This sketch, though summary enough, will suffice to indicate the multiplicity of causes affecting the conflict that we are now witnessing between the civil authority and the religious element. In order to exemplify the character of the conflict, we need only draw attention to certain incidents that have occurred. Thus, at the time of the amendment of the laws on army recruitment, the seminarists saw themselves placed under the common obligation of military service from which they had hitherto been exempt. By a change in the laws on education, ecclesiastics were placed on the same footing with laics by the annulling of the diplomas hitherto accorded them through the Church authorities, and by the exacting from them of the same diplomas as those compulsory on laics. After having thus taken away a privilege, unjustifiable enough, by a rigorous application of the principle of State neutrality in religious matters, the Government forbade religious teaching in the State schools, and prohibited members of religious orders from keeping elementary schools, which latter were all to be secularized within a given period. No exception was to be made (and this is worth noting) even in cases where a municipality might demand a continuation of the *status in quo*. Sometimes the attack on the Church was more direct still. For instance, the Government obliged all religious orders to provide themselves with an official authorization; and certain bodies whose influence was more particularly feared, the Jesuits in particular, were forced to break up their organization.

Side by side with these principal measures figures a long series of minor incidents and petty annoyances, wherein plainly appears with equal clearness the partiality of the Government and of the majority. Not only was the public-worship budget systematically reduced, but no occasion was lost of suspending, by way of discipline, the stipends of ecclesiastics whose anti-Republican proceedings had been denounced by some offended Deputy. More or less direct encouragement was given to the mania for secularization shown by the city of Paris, the municipal council of which, composed of ultra-radical members, thought fit to replace the sisters who served in the hospitals by lay nurses, perhaps less devoted, and at any rate costing the budget much dearer. The Church of St. Geneviève was taken away from the Catholic body, as had been done in the time of the first Revolution and during the reign of Louis Philippe, in order to convert it into a Pantheon consecrated to the worship of great men. The sort of need the Government seemed to have to show itself disagreeable to Catholicism gave rise at times to the most preposterous proposals. For instance, the National Assembly in 1873, at a time when the Republic was not yet Republican, had voted of public utility the works being carried on for the erection of the Church of the Sacred Heart, which is still building in Paris. In 1884 a Deputy demanded that this measure should be repealed, and M. Goblet, then Minister, mounted the tribune in order to declare that the National Assembly had evidently been in the wrong since the vote had reference to a church.

One thing comes to put an obstacle in the way of the Government's aims, and to prevent it from proceeding to too radical measures in reference to the Church and the ecclesiastics. It is the fact of the existence of the Concordat, which it cannot touch of its own authority. To pass by this barrier it

would be necessary for France to break completely with the Court of Rome, and to sever all the ties which attach the clergy to the Government—in a word, to effect a complete separation between the Church and the State. Will such an extreme measure as this be resorted to? It is probable. Many of the Republican party are demanding it—and it will perhaps be necessary in the near future if things continue to go on as they have done for the last few years.

It is true that the attitude of the clergy in reference to the Government is tending at the present time to transform itself. We have already pointed out the instructions of the Pope as to the indifference of the Church in so far as forms of government are concerned, and as to the necessity incumbent upon all French Catholics to accept loyally the established order of things. But in vain will French Catholicism, in obedience to its supreme head, ally itself with the Republic—the latter will not cease to feel a certain hostility against the Church; and unless the old conservative parties, converted to the republican form of government, become preponderant in Parliament, it is more than probable that the campaign against the Church will continue and will end sooner or later in disestablishment.

Such a measure as this, however, cannot be taken without preparation, for it will probably entail numerous difficulties both for the Church and for the State. We do not number among these difficulties the question one hears raised by Catholics in reference to Church property. The stipends now paid to ecclesiastics are, it is said, by the very terms of the Concordat, a compensation in lieu of the revenues of which the Church was despoiled at the time of the Revolution. From the moment the disestablishment of the Church causes the stipends to be suppressed, some other equivalent compensation will have to be found. In strict equity this would certainly be the case, but in political practice equity is very little considered: and examples of spoliation of this kind are numerous in history. It is certain that the Church in France, once deprived of its present resources, will find itself in a very awkward position. Will it succeed in obtaining the millions of which it now disposes annually? This is not at all certain, and even if it succeed, it will not do so without difficulty. The first consequence would naturally be the suppression of the millions which the Catholics send each year to Rome as Peter's pence; and this suppression would not fail to embarrass the Papacy considerably. Next, even should the Church in France be able to provide for its own wants, this would not happen without its first passing through a terrible crisis, which would produce its counter effect upon the social condition of the country, and so might even embarrass the Government. In consequence of the separation, the latter might possibly have other troubles to deal with, since, as soon as the members of the clergy cease to be State officers, it will no longer have any control over them, and there will be nothing to prevent them, if they think proper, from taking an active part in politics and using their great influence to create embarrassment for the Government. Other difficulties might be mentioned which it is possible to foresee, but what I have just said will no doubt suffice to show that the religious question, though at the present time in France of capital importance by reason of the hostilities often engaged in between the Church and the State, is not yet ripe for solution, inasmuch as the separation itself would not, so far as can be seen, bring peace. S.

Correspondence.

THE COLLEGES AND THE PRESIDENT-ELECT.

To the Editor of The Nation:

Sir: The students of this University have adopted the enclosed resolutions, which I hope you will bring to the attention of college men.

Very respectfully, George T. Winston.

University of North Carolina,
Chapel Hill, N. C., November 21, 1892.

"The students of the University of North Carolina, as a slight token of their appreciation of the character and services of a man who deliberately surrendered the Presidency in order to instruct the people in correct principles of government and especially of taxation—who in short preferred to teach the people rather than rule them—do hereby resolve to send ten delegates to the second inauguration of Grover Cleveland, and do earnestly request all the colleges and universities of the United States to unite in a grand student demonstration in honor of our great political teacher."

THE ELECTION.

To the Editor of The Nation:

Sir: The late election may be regarded from two points of view, which may be called the subjective and the objective, or, in more popular language, as to what it indicates and as to what it promises to accomplish. As an index of the character and intentions of the people it is beyond all praise. As a revolt from hypocrisy and falsehood, against the emptiness of a party machinery from which the main reason of existence has departed, and which is kept alive by the thirst for power, trading for the support of private interests—as a verdict in favor of honesty and manliness of purpose—it makes one proud to belong to the same country and people. But if we turn to the objective side, the result is by no means so satisfactory. The Democratic party is in an almost ludicrous position of not knowing what to do with its victory. What hope is there of any wise or well-considered or combined action from such a disorganized mob as the next House of Representatives will be? It would have been as reasonable to send our 300,000 volunteers to the front during the civil war without any officers, and expect them to organize the fighting when they got there. Whatever was the courage and intelligence and patriotism of those troops, we know that it was West Point which saved the country. If there is one thing more hopeless than the House itself, it is to expect that it will receive any effective guidance from the will of the people as expressed in the election.

Meantime the papers are discussing the formation of Mr. Cleveland's Cabinet. Of what consequence is it to anybody? The members will be nothing more than head clerks. There is a languid interest felt as to what State or what individual will get a Cabinet office, but nobody supposes for a moment that it will make any real difference in the policy or government of the country. The French Chambers are going to pieces, notwithstanding the presence of the Ministry, but that is because the Ministers are the creatures of the Chamber, set up and pulled down by the freaks of the constantly dissolving groups. The strength of our position is that the Cabinet, being the appointees of the President, himself the elect of the whole nation, would be wholly independent of Congress and would wield an authority which, so long as it was approved by the country, would be sufficient to bring Congress into working order.

Whether it will come in my time may be doubtful, but that the members of the Cabinet will sooner or later, from sheer necessity and on the demand of the country, be admitted to Congress, is, I consider, as certain as any piece of political evolution can be.

Gamaliel Bradford.

Boston, November 26, 1892.

WHO ELECT CONGRESSMEN?

To the Editor of The Nation:

Sir: I am aware that the columns of the *Nation* are not open to "funny things," but in view of the great Democratic "landslide" of the 8th inst., the following actual occurrence is worth recording. Yesterday, in the Third District Court, before Chief-Justice Zane, an alien made application for citizenship. He had answered all questions satisfactorily when his Honor, as a last and final test of the applicant's fitness for citizenship, asked him this question: "Who elect the Congressmen in the United States?" "The Democrats," was the prompt reply. The Court and the bar could not repress their laughter, while the applicant stood amazed, and failed to see why all were so merry. But he was admitted to citizenship.

Alfales Young.

Salt Lake City, November 18, 1892.

THE TARIFF AND THE WORKINGMAN'S MIND.

To the Editor of The Nation:

Sir: Some one has said, and it sounds like Walter Bagehot, that the greatest pain the human mind is capable of is the reception of a new idea. Ten years ago, while in the employ of what is now called the Illinois Steel Company, I lifted up a well-nigh solitary voice against the iniquities of the tariff. Everybody about me believed so religiously in the blessings of said tariff that I was saved, I was told afterwards, from being pitched into the lake only on the ground that I was a bookman, and further acquaintance with hot metal, ingots, and blooms would carry with it a better appreciation of the duty on rails. In 1882, to speak disrespectfully of a high tariff implied that one was in urgent need of a commission *de lunatico inquirendo*. But the thoughts of men have widened with the process of the suns, and the workingmen of the Illinois Steel Company this month voted against the very doctrine they upheld ten years ago so valiantly: the State, the county, the city, the ward, the very precincts in which they chiefly live went Democratic.

Everybody knows that the American workingman is, as a rule, ingenious, thrifty, honorable, good-natured, and kind-hearted, but the last election shows that it requires a long time to get one economic idea out of his head and another in. Makers of party platforms would do well to bear in mind this psychological fact: that the American workingman can be depended on to recognize the great truths of political economy, but an allowance of about ten years should be given him in most cases to make up his mind. E. L. M.

Windsor Park, Chicago, November 19, 1892.

THE OHIO BALLOT.

To the Editor of The Nation:

Sir: In your recent editorial on secret voting you speak of Ohio as having an absolutely

secret ballot. No doubt the framers of the law intended to make it as perfect as possible, but that they did not succeed is plain from what follows. At the top of the ticket in our ballots, under the emblem of each party, are circles in which the voter of a straight ticket may place his X. Now the Board of Elections of this county (the law requiring sample ballots to be furnished them by the Secretary of State) placed their facsimile signatures on the reverse side *over the circles referred to*. The consequence was that the election officer who tore off the stubs and put the tickets in the box could tell with certainty how the voter of a straight ticket marked his ballot. In conversation with the man who took the tickets in the precinct in which I voted, he admitted this, and told how, as he received the ticket from the elector, he could inspect one side and then the other as he folded it to put it in the box. The position of the facsimiles made it impossible to fold the tickets in any other manner. Had they been placed at the middle of the ticket, or near the lower margin instead, the difficulty would have been almost entirely obviated.

There is nothing in the law to prevent Boards of Election placing the signatures anywhere they choose on the back of the ticket. To be sure, the officers of the election are sworn not to reveal any information they may gather in the performance of their duties. But is a partisan's oath any more reliable than his word? For one man to be able to know how an election is going is one too many.

Yours truly, JOSEPH V. COLLINS.

MIAMI UNIVERSITY, OXFORD, O.,
November 19, 1892.

THE ETHICS OF PUBLISHING.

TO THE EDITOR OF THE NATION:

SIR: I see that the Messrs. Appleton advertise in the last *Nation* a new edition of 'An Englishman in Paris.' I am one of many who have bought that work during the past few months under the supposition that, as it was issued by a reputable house, it was a genuine book of recollections. But you have recently announced that it is by an obscure journalist named Vandam, who not only is too young to have known many of the earlier celebrities of whom he gossips so familiarly, but is not, presumably, on intimate terms with contemporary celebrities. I think, sir, that if this is true, the Appletons, far from spreading further copies of this fraud, ought to take back the copies which have already been bought by a confiding public. It is needless to say that cooked-up volumes of reminiscences, however cleverly done, have no value: who would buy, for instance, Pepys's Diary were it known to be the product of the inventive brain of a later journalist? Doubtless, the publishers who accepted the manuscript of 'An Englishman in Paris' believed it to be genuine, and their American representatives, the Appletons, merely trusted in them; but now that the fraud has been exposed, it does not become any reputable firm to continue to issue this work as if it were genuine. T.

BALLAD HISTORY.

TO THE EDITOR OF THE NATION:

SIR: Will you allow me to say that while I am glad to find Dame Barbara "warming the cockles" of your critic's heart, I object to the implication, in the *Nation* of November 24, as regards Whittier? Ballads are not written after an historical investigation. I do not suppose that a single one of the most famous of the Scotch ballads would be found historically accurate: I know that was the late Sir Daniel Wilson's opinion. An heroic flash stirs the heart of the poet. Is he expected to analyze it and discover whether the light was born of heaven or a penny match? It is his function to recognize and perpetuate the illumination, and Whittier did it.

All literature, of prose and verse, is open to such mischances. We have all suffered them, and must bear with them, as with other imperfect mortal conditions.

CAROLINE H. DALL.

WASHINGTON, D. C., November 26, 1892.

THE LA COSA MAP, AND OTHERS.

TO THE EDITOR OF THE NATION:

SIR: By way of comment on your remarks on a former letter of mine on the Paris Exhibition of Early American Maps, permit me to say that M. Marcel's reasons for doubting the authenticity of Juan de la Cosa's map—reasons bearing on the representation of the West Indies on that chart—could have been set forth only in considerable detail and with the aid of graphic representation. On the other hand, M. Marcel says that his familiarity with the said map was, until lately, limited to a reproduction of it in Jomard's Atlas, the sole facsimile of it known in France, and that it is only by means of the photographed reproduction of it now being made in Madrid that he will be able to decide whether La Cosa's map is an original or a copy made by a foreigner.

As to the question of misspelt Spanish words which figure on that map, I will quote what Mr. Harrisse says in his 'Discovery of America,' p. 415:

"When one sees so many names to which no meaning can be ascribed, although the letters in a number of instances are legible, and when this imperfect nomenclature is also seen in regions which we know to have been visited by the cartographer whose name figures on the map, it becomes a question whether the manuscript chart preserved in the National Museum at Madrid is really an autograph of Juan de La Cosa or a mere copy of the time made by some one else."

Mr. Harrisse thinks that the fact that La Cosa's being a Basque by birth has nothing to do with the misspelling, as the words exclusively Spanish are properly rendered. The words referred to by Mr. Harrisse are doubtless such as do not seem to belong to any known language; particularly in the island of Cuba, where they have the appearance of such meaningless strokes as would be penned by one trying to imitate writing which he did not understand. Juan de La Cosa was born at Santoña in Biscay, and, Biscay having been since 1379 an integral part of the kingdom of Castile, it is highly probable that the Spanish language was as familiar to him as the Biscayan.

It is a mistake to think that the early Spanish cartographers made but a few maps, or that they made them all themselves. Mentions in historical documents, as well as the ordinances in the collection of laws regarding map-making (although eight or ten years later), clearly indicate that the Spanish and Portuguese pilots made their chief living by making maps. They constructed an original one which they frequently intrusted to copyists who were good designers and miniaturists, but no scientific cartographers. These were chiefly Majorcans or Italians, as is shown by the early Portuguese charts. It is natural that copies so made should contain names absolutely misspelt, and the La Cosa map, although evidently authentic, may well not be autographic.

The Portuguese portolano of 1502 (or the King Chart, as it is called) was reproduced almost entirely, and particularly the portion of importance to Americans, by photolithography, in the Bulletin de Géographie Historique et Descriptive, more than five years ago (Paris, 1887). Besides, a reduced outline of the entire map appeared in the Paris *Illustration* of July 2, 1892.

Whether the "green globe" can or cannot dispute the claim of the so-called Da Vinci Gores "to be the earliest known in which the word America is written by human hand," Mr. Harrisse places the Da Vinci under the year 1519, and the green globe four years before, *sub anno* 1515.

The "globe doré" does not contain the "Sea of Verrazzano." "Terra Francesca nuper lustrata" (an inscription appearing on globes only after Verrazzano's expedition) aids us in surmising that Verrazzano's indications inspired it.

It seems that the globe of Franciscus Monachus is not the earliest instance in the revival of the notion that North America and Asia were one. Was it a revival in cartography or spherography? No map or globe or gores can be found in the first twenty-five years of the discovery of America on which the newly found regions are not entirely separated from Asia. Again, Mr. Harrisse has shown conclusively, from Schöner's own words, that this blending of America with Asia is a notion which originated altogether in globe-making with the Nuremberg mathematician so late as 1523, and that his globe of the latter date must have exhibited such a configuration.

The information that the charts of Gutierrez and Le Testu (Nos. 19 and 26 of Catalogue) have been reproduced causes surprise in France. Further information on this point would be appreciated. As to a reproduction of the portolano by Viegas (No. 1 of Catalogue), only the small reduced fragment inserted by Kohl in his 'Discovery of Maine' is known here.

The map loaned by the Navy Department, and entered as No. 131 of the Catalogue in the Exhibition of Early American Maps, is described by Harrisse in his 'Notes sur la Nouvelle France,' No. 219.

No. 161 has been wrongly stated to be first among the maps figuring at the Exhibition to make mention of the town of Chicago. A closer inspection has shown (No. 137), "Amérique Septentrionale," by J. B. L. Franquelin, dated 1686, on which figure both Checagou and Checagon River. This map is described under No. 231 in 'Notes sur la Nouvelle France.'

In answer to the remark that the Paris Committee would have done well had it solicited a copy of the Harvard map, 1684 (in which Chicago figures), it must be said that the Paris exposition was intended only to exhibit the cartographical treasures of the Paris collections, private and public, in so far as America is concerned. If it had proposed to set forth the cartographical history of the New World, doubtless the loan of it would have been requested, along with other pieces, among which may be cited the two Desceliers planispheres, known as the *Harleian* and the *Bubics*.

M. Marcel will shortly publish a series of facsimiles of documents which figured at the Paris Exhibition of Early American Maps.

Among these, not less than forty in number, will be facsimiles of the "green globe," of the King Chart, of the Viegas portolano, etc., etc.

LE COCQ DE LAUTREPPE.

PARIS, November 10, 1892.

[We are glad to have an outline of M. Marcel's argument about the non-autographic character of the La Cosa map, and shall await with interest the result of his study from the new reproduction which has just been published at Madrid. A copy of this last has this moment reached us, and it does not impress us as having been made with anything like photographic accuracy, as is claimed. A cursory comparison which we have made of it with earlier reproductions indicates numerous variations. It is nearly forty years since the present writer saw the original ox-hide when it was exposed for sale in Paris, and his recollection may be at fault, but he finds in this professed facsimile much brighter colors than he has ever since associated with the map. He looks in vain for that dash of green paint which Henry Stevens assigns to the western end of Cuba, as indicating an uncertain extent to that island. He finds that the inscription about the English discoveries is shorn of an essential part. That the map has lost something since Humboldt and Jomard used it, may be true; but it is also certain that, if their eyes divined obscure lines aright, the modern photography and chromo-printing of Madrid are not up to the standard which will satisfy scholars.

Until we see the reproduction of the "green globe" which M. Marcel promises us, it is hardly possible to say whether the respective dates which Harrisse assigns to that and to the so-called Da Vinci map will stand in everybody's opinion. We are inclined sooner to agree with Major than with Harrisse on the date of the latter map, believing it earlier than 1519.

Harrisse's putting of the lost Schöner globe of 1523 earlier than the Franciscus Monachus hemispheres, showing North America and Asia as one, is an argument rather than a demonstration. At all events, the globe of Franciscus Monachus has come down to us, while the globe of 1523 has not.

We had confounded dates in what we said of the Gutierrez and Le Testu charts, and trust M. Marcel will include them in his promised atlas.

We had thought there was a peculiar appropriateness in what we said of the Franquelin Map of 1684, inasmuch as Paris would then have regained in a copy what it some years ago lost in an original. We understood that the Exhibition did not attempt a complete collection of early maps, but the catalogue—which we have received since our previous notes were written—shows that some facsimiles of maps not preserved in Paris were admitted.—ED. NATION.]

FRAUDULENCE AND FALSE PROFESSION.

TO THE EDITOR OF THE NATION:

SIR: The circulation of the *Academy* not being so wide in the United States as in England, I solicit a little space for the purpose of repeating, in part, the substance of a noteworthy letter by the Rev. Anthony L. Mayhew, a philologist of high and deserved repute, which recently appeared in its columns.

Palmed off as by Smollett, a translation, or rather a "traduction," of Le Sage's *Gil Blas*, executed sixty years after the date of his own translation, and wholly independent of it, has, within a short time, been put forth, under his name, by three firms of London publishers, Nimmo & Bain (1881), George Bell & Sons (1885), and George Routledge & Sons. Nimmo & Bain's publication has prefixed to it "a biographical and critical notice of Le Sage, by George Saintsbury." Whatever Mr. Saintsbury knew about Le Sage, it is a pity that he neglected to inquire about Smollett.

With the aid of one of the British Museum librarians, Mr. Mayhew has discovered that the translation which has been so often imputed to Smollett was the work of Benjamin Heath Malkin, first brought out in 1809. It was, I find, published by Longman and other booksellers, and its price was six guineas.

That work contains the following anonymous "Advertisement," the writer of which was, assuredly, a passed-master in mendacity and impudence:

"On occasion of producing a splendid English edition of *Gil Blas*, the publishers would gladly have adopted the translation published under the name of Smollett. The defects of that translation are acknowledged; and Le Sage is now understood to be indebted to this popular writer only for his name. Under these circumstances, it has been the aim of the present translator to produce a more easy and spirited transcript of the original; with what ability and success, must be left to the reader to determine."

It is the translation referred to, as reproduced by George Routledge & Sons, that Mr. T. L. Kington Oliphant, in his pretentious and costly book entitled *The New English* (1886), has accepted as Smollett's, the diction of which he explicitly professes to criticise. As the consequence of what he has done, alleges Mr. Mayhew, he "has dated hundreds of 1809 words sixty years too early." "Remarkable" Mr. Oliphant may well style "the number of new English phrases" which, with culpable heedlessness, he fathers, directly, or by implication, on an eminent author, and not seldom to the detriment of his fair fame.

Mr. Mayhew writes, concluding his letter:

"One question I should like to ask; and I hope I shall get an answer. Who was the first person who foisted the work of Malkin on a confiding public as the work of the popular author of *Roderick Random?*"

It seems that the question can be easily answered, and, in fact, has already been answered by the unscrupulous tradesman who perpetrated the swindle to which Mr. Mayhew has drawn attention. The English *Gil Blas* now published by George Bell & Sons is, with no change except in the title-page, that which was published by their predecessor, H. G. Bohn, in 1859. And Bohn, though in the wrong place, has confessed, in a way, what it is that he then published. In his edition of Lowndes's *Bibliographer's Manual*, p. 1343 (1860), under the heading of "Le Sage," he represents it as being "Smollett's translation revised" by Malkin. But why, if an honest man, did not he call it so, or something else than simply Smollett's, in his reprint? As plainly appears, he thus stands convicted, by his own acknowledgment, of a scandalous imposition on public credulity. For the rest, on comparing, almost anywhere, Smollett's translation with Malkin's, one will see that the two are about as dissimilar as possible. Their difference, and also their comparative faithfulness, may be fairly inferred from the startling parallel quotations, accompanied by the original French, given by Mr. Mayhew.

Intermediate to the first issue of the translation by Malkin, which bears his name, and Bohn's reissue of that translation, offered as by Smollett, there is an edition, now lying before me, dated 1822, of the same translation, bearing neither Smollett's name nor that of Malkin. This suppression of name is a circumstance nowhere noted by Bohn. Was he deceived by it? Be this as it may, alike whether he reprinted that edition in ignorance that he was giving the world another translation than Smollett's, or whether he reprinted the original edition of Malkin's translation, withholding its "Advertisement," can now be only conjectured. In 1859 he may have been misled; but not in 1860.

Bohn's fraud, undetected up to the time of Mr. Mayhew's letter, was successful, not only commercially, but otherwise. The version, at best a wretched travesty, which he put off as Smollett's, accepted as being really so, furnishes the text of an article in the *Saturday Review* of November 26, 1859, opening with these words:

"Smollett's translation of *Gil Blas* is certainly an exception to the common rule, that translations of all kinds, and especially translations of novels, are altogether unreadable. It is very far indeed from being equivalent to the original; but it is a vigorous, lively version of it. No two styles, indeed, can be more unlike than those of Lesage and Smollett; but, though the translation differs widely from the original, it has the great merit of having a character of its own, instead of being a mere imitation."

With reference to Mr. Oliphant, I now give some quotations, yet not a fourth part of kindred ones that might be given, from the Routledge edition of Malkin's burlesque translation, confining myself to the three first Books of the twelve:

"While I was dressing, Corcuelo *put in his appearance.*" P. 6.

"I *joined issue with* [*i. e.*, joined] some desperate blades." P. 13.

"We were beginning to *wear our homeward way.*" P. 17.

"*Presuming on the lady for* [*i. e.*, presuming that the lady might be] an accomplice." P. 25.

"From my first *outset* from Oviedo." P. 26.

"Her *finale* [*i. e.*, ultimate conduct] gave me a much higher opinion of her." P. 33.

"He . . . had been careful to fetch them *by* over-night." P. 36.

"I closed *in* with the doctor's proposal." P. 46.

"In vain did he crack *off* [*i. e.*, up] his water." P. 47.

"This was followed by an *adjournment* to a tavern." P. 49.

"There might we have *foddered* for an age." P. 55.

"*I gave her carte blanche of* all my private thoughts." P. 69.

"I used to *sol-fa* with a shepherd of Olmédo." P. 70.

"These very *hymeneals* . . . have we been celebrating." P. 74.

"These plays *to tear a cat in* are the only things for popularity." P. 74.

"You are a very great *bore.*" P. 84.

"We may introduce a *buffo caricato* into our serious opera." P. 85.

"This bevy of *fashionables* set sail together for the tavern." P. 87.

"We *sat* before them a great choice of the best wines in Spain." P. 87.

"We all of us bore *a bob* [*i. e.*, a part in conversation]." P. 94.

"I . . . began to *appreciate* [*i. e.*, appraise] their merit more truly than they had estimated that of the authors." P. 110.

Not at all after the manner of Smollett is the false or questionable English observable in these extracts; and no more so is the shred of phrase from Shakspere, or the ambitious *buffo caricato*.

But, more particularly, Smollett was quite the reverse of a linguistic innovator, or of a patron of neoterisms; and, almost to a certainty, even if it had been otherwise, he could have known nothing, in 1749, of the expression *put in his appearance*, or of any of the vocables *outset, finale, adjournment, sol-fa, hymeneals, bore, fashionables*, and *appreciate*, as we have seen them used in 1809.

To go on with these strictures through several columns would be perfectly easy; but I shall conclude them with a single additional item. In his remarks on the translation of *Gil Blas* whose authorship he mistakes, Mr. Oliphant says: "The word *lord'ing* is revived, after a sleep of four hundred years." Apart from the insanely ludicrous claim to reach and closeness of research here implied, what are we to think of a person who makes such a statement in face of quotations for *lordling*, from Swift (1730) and Bp. Hall, in Johnson's *Dictionary* and in Richardson's respectively? And Edmund Gayton has *lordling* in his *Pleasant Notes upon Don Quixot* (1654), pp. 114, 171. With the multitude, the pretensions and the positiveness of Mr. Oliphant, exorbitant as they are, but at the same time, *φωνᾶντα συνετοῖσι*, would, as he shrewdly foresaw, insure the confidence in him to which, like every writer, he must have aspired. In the upshot, his salient features have earned him, besides the confidence of the uninquiring, a certain distinction. In one or two respects, he has achieved, among minutiose philologists, an eminence which, in spite of whatever competition, is likely to be recognized as all his own. For presumptuousness of profession and general untrustworthiness he may, without a tremor, challenge rivalry. F. H.

MARLESFORD, ENGLAND, October 10, 1892.

Notes.

GINN & Co., Boston, have devised a "Department of Special Publication," for the getting into print of "valuable works of a special character and a high grade." In brief, they propose to manufacture and lend their imprint to any work of this description on the simple insurance not of profit but against loss. This insurance will be ascertained by sending out prospectuses to the class interested in the proposed publication, partly at the author's expense. Professors, it is intimated, may thus secure desirable text-books by a guarantee to use them for a certain number of years. Societies and colleges also may use this department for the publication of monographs.

The first book undertaken by the Authors' Club of this city is now in the press. It consists of contributions, presumably by members, in prose and in verse, each of which will be signed by its author with pen and ink. The decorative headbands and tailpieces will be specially designed for their places. Only 251 copies will be printed, and bound in a "style completely new and characteristically American." Subscriptions, at one hundred dollars per copy, will be received by the Secretary, Mr. Rossiter Johnson, No. 1 Bond Street.

The Boston "Club of Odd Volumes" has in press "The Women of the Court of Louis XV.," from the French of Imbert St.-Amand, a quarto volume, limited to 150 copies. Besides a portrait of the King, it will contain a photogravure in color of Mme. de Pompadour, from a pastel by Maurice Quentin de la Tour. She is represented in the garb of a shepherdess, much decorated with powder, ribbons, and wild flowers.

The rubricated new Standard Book of Common Prayer of the Protestant Episcopal Church, which will be known in ecclesiastical history as the "Standard of 1892," is nearing completion at the De Vinne Press. The edition consists of 1,162 copies. Of this number 650 copies are printed in royal octavo size on good book paper, and bound in cloth, with polished red edges; one of these is to be presented within a few days to each delegate to the General Convention which recently assembled at Baltimore. The type will then be reimposed to a leaf 10x14 inches, and 500 copies printed on hand-made paper and twelve copies on vellum. Those on hand-made paper are to be bound in parchment and offered for sale at $20 each. One of the vellum copies will receive unique treatment, both in printing and binding, as it will be the property of the General Convention; it is designated "The Standard Book," and all other copies must be certified as accurate transcripts of it. The eleven remaining copies on vellum will be printed and handsomely bound at the personal expense of Mr. J. Pierpont Morgan, who will present them to those who have been most actively engaged in preparing this sumptuous edition.

'A Short History of the Prayer Book,' by the Rev. Dr. W. R. Huntington, rector of Grace Church, New York, is announced for publication by Thomas Whittaker. It will contain also an account of the rise, progress, and completion of liturgical revision.

Perhaps it is only the mania for collecting all sorts of things, perhaps it is the growing interest in all the arts of the book-lover, but there is no doubt that of late much more attention is being paid to those paper-labels which indicate the ownership of books, and which are called ex-libris in French and book-plates in English. In France, Poulet-Malassis's pioneer book on the subject has recently been followed by M. Henri Bouchot's little treatise. In England there is the portly volume by the Hon. Leicester Warren, and the Journal of the newly organized Ex-Libris Society. In America there was first a page or two in the "Home Library," then Mr. Laurence Hutton's articles (now included in his 'From the Books of'), and finally Mr. Lichtenstein's elaborate papers. Two volumes are now announced likely to interest all collectors. One, by Mr. Egerton Castle, is called 'English Book-Plates,' and is to contain some 120 illustrations; the other, 'French Book-Plates,' is by Mr. Walter Hamilton, and is to contain 100 illustrations. We could wish that Mr. Hutton or Mr. Lichtenstein had in preparation a third book, on 'American Book-Plates.'

Mr. Austin Dobson is engaged on an introduction to a reproduction of Holbein's 'Dance of Death,' printed from the facsimile woodcuts of Bonner and Byfield. It will be published in London by George Bell & Sons, and in New York by Macmillan & Co. The latter publishers have nearly ready 'A Review of the Systems of Ethics Founded on the Theories of Evolution,' by C. M. Williams; 'The Paintings of Florence,' a guide by Karl Károly (Frank T. Charles); and 'The Visible Universe,' by J. Ellard Gore.

The next volume in the Great Commander Series of the Messrs. Appleton will be a biography of Gen. Taylor, by Gen. O. O. Howard.

'First Days with the Contrabands,' by Elizabeth Hyde Botume, and 'The Life of Christian Daniel Rauch,' the Berlin sculptor, are in the press of Lee & Shepard, Boston.

Tait, Sons & Co., New York, have nearly ready 'The Diary of a Nobody,' by George Grossmith, with illustrations by Weedon Grossmith; 'A Battle and a Boy,' by Blanche Willis Howard; and 'The Secret of Narcisse,' by Edmund Gosse.

Brentano's announcements include 'Chicago,' thirty photogravures with descriptive text; 'The Buildings of the World's Columbian Exposition,' also in photogravure; 'The Great Composers,' 'The Great Singers,' 'The Great Virtuosi,' by the Comtesse de Brémont; and Motteux's translation of 'Don Quixote,' with Lalauze's etchings, limited to 300 copies.

David Douglas, Edinburgh, promises next spring the first of two volumes of Scott's 'Familiar Letters' (1797-1825), annotated by the literary hand of the publisher himself.

In the week's reprints, the two green-and-gold volumes, 'Persuasion' and 'Northanger Abbey,' in Mr. Brimley Johnson's edition of Jane Austen's novels (London: J. M. Dent & Co.; New York: Macmillan), fall behind none in intrinsic and extrinsic attractiveness. A. D. F. Randolph & Co. put forth, with their customary good taste, a second American edition of Dean Stanley's 'Historical Memorials of Canterbury.' It is bound in a white, vellum-like cloth with half-purple sides, and is freely supplied with illustrations both in and out of the letterpress. The latter set are all photographic, if we are not mistaken in supposing the etchings to be copies in this manner. Hence, and owing to the different tones of the photographs direct from the pile itself, there is a certain incongruity which we think might have been avoided by at least abandoning the etchings, seeing that they are but ordinary as art. Still, they add something to the graphic series, regarded as memoranda. The Messrs. Putnam continue their pocket series of "Literary Gems," bound in black leatherette, with half-a-dozen volumes from Milton ("L'Allegro," "Il Penseroso," and the sonnets and odes), Gray (the "Elegy"), Bryant ("Thanatopsis"), Irving ("Rip Van Winkle" and "Wolfert's Roost"), Sheridan ("The Rivals"), and Thackeray ("Charity and Humor" and "Nil Nisi Bonum"). There is a portrait frontispiece to the Thackeray; the rest have etched designs appropriate to the respective pieces, and of good quality. Estes & Lauriat make four little volumes of Thomson's 'Seasons,' with unpretentious and sometimes charming illustrations. The covers are not to our taste, and the binding is too inflexible. T. Y. Crowell & Co. reprint their edition of Tennyson's Poems of 1885, with additions and with some fresh illustrations, including a good portrait. The outside is too florid for the rather plain typography. The same publishers reissue Miss Bates's 'Cambridge Book of Poetry and Song,' which has been for ten years before the public and is a useful anthology if not critically among the best. The volume has been diminished in size to advantage, and has a better designed cover than formerly; but the exchange of Longfellow portraits has not been fortunate. On the whole, one may prefer this to its predecessor. We may notice here that a third edition of the Rev. Henry Van Dyke's 'The Poetry of Tennyson' has just been issued by the Scribners.

Eleanor Lewis's 'Famous Pets of Famous People' (D. Lothrop Co.) is a well-written, humorous narrative derived from a great va-

riety of sources and exceptionally well illustrated. From the design on the cover one might think it a child's book, and it would in fact be a very proper gift for children, though there is no condescension to that age in the author's cultivated style. Adults will first enjoy and then retail these anecdotes to the little ones.

The title of Rose Porter's 'A Gift of Love and Loving Greetings for 365 Days' (Fleming H. Revell Co.) explains itself. This calendar for every year is prettily bound in white, and stamped with pansies, and adds to the daily text on love from the Scriptures harmonious extracts containing the same magic word from a large number of secular writers.

There is very little novelty in the second series of F. Anstey's dramatic social satires, 'Voces Populi' (Longmans), some of which can be read with entire soberness of face. The talk of the people in the galleries, in 'buses, at garden parties, at the theatre, at the horse show, the talk of street orators and Socialists, bears a strong family resemblance to that of the mirth-provoking first series. The vein would seem to be nearly worked out. "In a Fog" and "Bricks without Straw" are exceptionally ingenious and delightful. Mr. Partridge's illustrations maintain their high level of character drawing.

The current bound volume of the *Magazine of Art* (Cassell) wears its customary look, at once British and popular. Its modes of illustration vary from chromolithography to etching, wood-engraving, and process. Due notice is taken of native deceased artists, exhibitions, private collections, with glances at art abroad. The department known as "Our Illustrated Note-book" is always interesting for its pictorial memoranda of passing men or events, new monuments, new acquisitions of the art galleries, etc. The chronicles of art have a liberal American section. The articles are kept very short, in the endeavor to please many tastes. The late Theodore Child has a brief paper on the Comédie-Française. Mr. Linley Sambourne writes two on Political Cartoons, speaking of himself and his own work with great modesty. He confesses to have formed his style as much upon the study of Albert Dürer as of any master.

Another volume, the fifth, of the *Bookworm* is before us (London: Elliot Stock; New York: A. C. Armstrong & Son). Its scrappy character is quite unchanged, and it appeals mostly to the desultory reader. Its special articles are, however, frequently meritorious, and sometimes authoritative, whereas much of the miscellaneous information is at second-hand. American topics are fairly abundant, and there is the usual supply of quaint reproductions of old prints, book-plates, etc.

The *Mother's Nursery Guide* (*Babyhood*) reaches its eighth volume without having exhausted its topics or its usefulness. The tenth volume will warrant a consolidated index for the series, from which alone can appear how much of scientific counsel and exchange of domestic experience is garnered by this magazine for the needs of the nursery and the family. It is issued by the Babyhood Publishing Co., in this city.

The Transactions of the Royal Historical Society of London for 1892 contain a long Introduction by Mr. I. S. Leadam to his forthcoming edition of the 'Returns to the Inquisition of 1517,' concerning Inclosures. Mr. Leadam maintains that the Inclosures of the Tudor period scarcely affected the copyholders, and, indeed, that copyholders were themselves among the inclosers. He allows, however, that some copyholders were evicted; and his own statistical synopsis shows that the inclosers of considerable areas were almost invariably manorial lords. Mr. Leadam argues further that not only the "copyholders" in the technical sense, but also all the villein tenants, enjoyed legal security of tenure. To support this position he draws a distinction between *villanus* and *nativus* which certainly does not appear on the face of the evidence and is opposed to the best authorities. The treatise is full of information, but is somewhat marred by its polemical form. It was hardly necessary to treat Prof. Ashley's tentative suggestions, contained in a brief paper on "Villein Tenure" a couple of years ago, with the rather ponderous vehemence which marks the present production.

The November Proceedings of the Royal Geographical Society opens with an account of the central province of Madagascar by the Rev. James Sibree. In describing the journey from the coast, he referred to the fact that there are still no roads practicable for wheeled vehicles, stating afterwards that this was not due to the conservatism of the natives, but had a political cause, the difficulty of the road making an invasion almost impossible. The Prime Minister is quoted as saying that "he had two generals in his army, Gen. Forest and Gen. Fever, and these he pitted against any foreign forces coming up to take his town." During the past thirty years the progress of the capital, Antanànarivo, has been striking. In 1863 it was a town built entirely of wood or rush and bamboo. Now it has become a city containing hundreds of good two and three-storied brick houses, with many public buildings of stone. This is mainly owing to the influence of the English missionaries and especially to the erection of the stone Martyr Memorial Churches. Mr. W. M. Conway contributes a graphic account of some of his last summer's exploits among the Himalayas. One of his camps, in which with two European companions he spent two nights, was about 20,000 feet in height. There is also an interesting description of recent explorations in British New Guinea and the progress made in civilizing the country. In some places "villages formerly built for safety upon piles over the water, are now being rebuilt on dry land, and the new houses are far more substantial." More land is being cultivated. Warlike habits are being given up, the people who formerly invariably carried arms now appearing without them; and a commercial spirit is fast developing.

In the *Scottish Geographical Magazine* for November is an encouraging account, by Mr. D. J. Rankin, of his recent explorations in the Zambesi basin. He found the country lying between this river and the Shiré rich in mineral and agricultural resources. Traces of gold were observed in numerous places, and one large stream drains an "extremely rich auriferous region, while coal, iron, and copper are found from its source to its confluence." Another section "offers valuable sites for extensive coffee plantations, besides which it is prolific in most tropical products, of which cotton, indigo, cocoa, rubber, rice, and sugar may be mentioned as the most important." In addition, this whole region possesses the great advantage of having an abundant water-supply and navigable communication with the seaboard from almost every part. Inhabitants are very scarce and large game very numerous.

A correspondent writes, apropos of Mr. W. C. Ford's recent letter on the Washington genealogy: "That Mr. Ford's supposition as to the relation of the names Howard and Hayward is correct—to wit, that they are 'aliases'—is apparent from the pedigree of Howard (Dukes of Norfolk) given on page 286 Burke's 'Dormant and Extinct Peerages,' ed. 1883."

—We have received from Mr. Victor Bernstrom, member of the Society of American Wood-Engravers, a proof print of a large and notable engraving on wood from his own design. The picture represents a scene, "Pirates' Haven," on Shark River, along the New Jersey coast. It is a really charming landscape, vigorous in composition as well as in the management of light and shade. It is carefully executed, and gives promise of further development on the part of the artist. There is a certain dryness in the handling of the tints, as well as in the light of the sky, but, taken as a whole, this print is fresh evidence that wood-engraving has not witnessed its culmination in the pages of the magazines, but has merely been encouraged in its onward march as an art by itself. Mr. Bernstrom's print is to be had of our leading dealers—Keppel, Knoedler, Reichard, Klackner, and Wunderlich.

—The publishers of the entertaining illustrated fortnightly magazine *Natura ed Arte* (Milan: Francesco Villardi) have issued as a supplement a thick Album, in honor of the current Columbus anniversary. Cecilio Villardi and Prof. Angelo De Gubernatis together procured a vast number of autographs from the leading men of letters the world over, and these, photolithographed and arranged in due order, make the 'Albo di Onoranze Internazionali a Cristoforo Colombo.' It is a very curious and entertaining collection, in which, amid the sentiments and mottoes, one comes upon architectural or landscape drawings, portraits, music, as by Verdi, Gounod, and the Brazilian Gomes, and even upon ancient Vedic music—a fruitful field of exploration for western musical Columbuses, we are assured. The more difficult tongues are provided with translations. Of common occurrence are the inscription, "A Castil'a y á León," and Seneca's prophecy, "Venient annis Sæcula seris." In one case at least (p. 72) notice is taken of Columbus's recent detractors, moved by an "antipelasgic spirit." Prof. Gustav Storm of Christiania will not let Leif Eriksson be forgotten. The Bopp-Stiftung holds up its founder as the Columbus of Indo-Germanic learning; Poland sees in Copernicus the Columbus of the firmament; a Hungarian professor ascribes to Columbus, Galileo, and Newton our new view of heaven and earth (*die Erneuerung unserer Weltanschauung*); a Hungarian Deputy holds that, next after Christ, Columbus has been the most useful to mankind. In this linguistic Babel a noticeable number of foreigners choose English mottoes—from Shakspere, Berkeley, Byron—or use English as their vehicle, whereas Huxley, on the other hand, copies an Italian passage from the Life of the navigator.

—The reaction of the New World upon the Old is remembered in many ways. Dr. F. Markovitch, of the Agram Academy, prettily recalls Columbus's having been taken back in chains from the theatre of his discovery, to which millions of his fellow-beings would one day flock, leaving their Old World chains behind them. So Vámbéry, writing in English, says: "Through the strides of the Great Republic, on the field of political and social sciences, the old saying, 'Ex oriente lux,' will soon be reversed in the sentence, 'Ex occidente lux.'" On the other hand, Julius Schwarz of Budapest says that Columbus was a "most successful pioneer of the political evolution of

modern political societies," because he opened to feudal Europe America, which produced Franklin, who crystallized on a great scale the principles of 1789; but then, "the brutal mercantilism in science and literature that we are accustomed to ascribe to American genius is deeply rooting in our own social habits as a fruit of the reaction of half-breed spirits against the remnants of mediæval prerogative." Prof. Barzelotti of Naples admonishes American protectionists who still flatter their countrymen with the musty theory of "America all by itself and for itself, divorced from the Old World," that they cannot suppress the spiritual affinity of American for Old World culture. Altogether delicate and fitting is Prof. D. Korsakoff's remarking upon the coincidence that in 1492, through Columbus, Italy revealed to Europe the New World of the West, and in 1493, through the Venetian Senator and traveller Ambrogio Contarini, the New World of Muscovy—the two giant empires of to-day. "The mutual sympathy of these two great States is evident, and has shown itself in a signal manner by the fraternal succor of the former to the starving population of the latter in 1892." Franklin, we will close by observing, is the notorious favorite among Americans in foreign eyes. On p. 48 we have a new version of "Eripuit cœlo fulmen"—

> "Che ai ciel rapita ha i fulmini
> E un ferreo scettro infranto."

On p. 86 Franklin is linked with Washington in the lines (to Liberty)—

> "Te di Boston il saggio e te l'eroe
> Di Virginia comprese;"

On p. 80 the conjunction is of Lincoln and Washington—

> "Da te solenni di virtute esempi,
> Lincoln ereditammo e Vascintono";

while our translator of the 'Divine Comedy' is remembered thus:

> "Del sommo
> Fiorentino schiudea gli inferi regni
> Longfellow a' suoi concittadini."

—The latest publication of the American Statistical Association contains some extracts from a paper by Mr. Giffen which recall the old jest that the only good book of the Spaniards is the one which exposes the folly of all the others. Mr. Giffen's remarks are a most impressive warning against the work of amateur statisticians, especially when they attempt international comparisons. He points out that it is very difficult to compare countries according to the degree of education prevailing among their inhabitants; that equal difficulties affect every comparison of the extent of crime; that the same is true of sexual morality, of insolvency, of the diffusion of property, of production, industry, trade, and wages. As to drunkenness Mr. Giffen declares: "I see no way myself of establishing statistically that one population is more or less drunken than another." In all these matters he asserts that the results of the comparisons ordinarily furnished to the public are "the merest chance" —an assertion which it is of great value to have made by the highest authority upon statistics.

—The same publication contains a statistical investigation of the net profits of certain manufacturing industries in the State of Massachusetts by Mr. W. F. Draper, which incidentally discredits the results attained by the Bureau of Statistics of Labor in that State. Mr. Draper takes from Martin's annual statements of the prices of stocks and dividends of corporations known to the Boston market a list of all Massachusetts corporations for which figures are given for ten years from 1882. The list contains 65 names, and of these 41 have maintained the same capital during the period covered. These have paid dividends averaging 6.58 per cent. per annum on the par value of their stock, but averaging only 4.88 per cent. on the average market value. Moreover, during these ten years, that market value has declined from $55,000,000 to $44,000,000, so that if the amount of this decline is taken from the dividends, the stockholders have really received but 2.68 per cent. per year as net income. Taking the other twenty-four companies whose capital was changed, or which suspended operations during the period, Mr. Draper finds that, after deducting capital paid in from dividends paid out, there remains an average annual dividend of less than one-half of one per cent.; while if market values are compared, it appears that these companies have lost not only the interest on their capital for ten years, but also quite a sum of money besides. Taking all the companies together, they have made an average net dividend of 4.86 per cent.; their dividend upon the average selling price would be 3.87 per cent., while their dividend upon the average value of the capital invested falls to 2.06 per cent. These figures are extremely startling, and should receive the most careful consideration from those interested in Massachusetts manufactures. They are indeed of interest to the whole country, as suggesting that a high tariff has failed to increase the prosperity of manufacturers, and that they could not be worse off with lower duties.

COTTON MATHER.

Cotton Mather, the Puritan Priest. By Barrett Wendell. [Makers of America.] Dodd, Mead & Co.

The Life and Times of Cotton Mather, D.D., F.R.S.; or, A Boston Minister of Two Centuries Ago. By Rev. Abijah P. Marvin. Boston: Congregational Sunday-School and Publishing Society.

THE recent appearance of two biographical studies of Cotton Mather is incidental to the two hundredth anniversary of the Salem witchcraft episode, with which delusion the name of Mather is yet, and seems doomed to remain, fast associated. Approaching their subject in a wholly dissimilar spirit, both Mr. Wendell, whose book was issued some months ago, and the Rev. Mr. Marvin, whose work is posthumous, have shown no small zeal in clearing away many of the aspersions which have gathered since the beginning of the present century about the reputation of the younger of the two great New England preachers. To the later biographer Cotton Mather stands at last disclosed as a faithful, patient, God-serving pastor, erring only in over-devotion to the cause of religion and of doing good, and by no means a self-seeking winner of personal glory. It is the tribute of a member of the sect still intellectually dominant in New England to one of its greatest memories. On the other hand, Prof. Wendell, with a somewhat lavish gesture, has thrown the mantle of charity over Mather, and yet has so disposed it as to reveal his nakedness and weakness. It is plain to see, throughout a highly ingenious and carefully elaborated method, a courteously conveyed but not expressed conviction that Mather was so far the victim of his hallucinations and personal vanities as to have passed the limit of mental responsibility. Much stress is laid in a novel manner on his relations to "occultism," as may be seen by reference to that word in the author's admirable index.

Whoever thinks there is no new thing under the sun, will do well to examine for himself what Prof. Wendell has to say on the supernatural as it was manifested in Salem in 1692. This author has, in a former book, given hint of a theory, wholly his own, which he now expands in a manner worthy of attention, though perhaps not of belief. The introduction of private conclusions on matters in general may or may not be acceptable in a book with so definite an object; at all events, it is safe to say that some readers will by no means relish Mr. Wendell's opinions on the "histrionic insincerity" of the pulpit, the theatrical accessories of which, it may be fairly submitted, are not necessarily more insincere than the judicial wig, the academic gown, or the "bedside manner" of the physician.

To valuable sources, many of them private and difficult of access, it is evident that Mr. Wendell has gone in a thorough and painstaking spirit. Like Mr. Marvin, he has chosen to make diaries and journals tell the story of Mather's life. The best evidence that their subject was a genuine and not an untrue man is found in the substantial sameness of the issue of their labors. These pieced-together autobiographical records, chosen by one editor as a confessed apologist, and by the other in a way to uncover, on the whole, faults even more than excellences, reveal the essential unity of Mather's strangely composite character: two Cotton Mathers, and not one, would otherwise have been the resultant of such diversely motived attempts.

It is pertinent to express surprise that the editors of the series to which Mr. Wendell's work is a contribution should not have chosen Increase Mather, rather than his eminent son, as a representative "Maker of America." The elder Mather's work for the new Charter, his presidency of Harvard College, and his wide concern in the affairs of his day, while happily remote for the most part from personal contentions, would seem to qualify him for consideration as one of those characters who mould and inform a coming civilization. Aside from the fact that Cotton Mather was a busy and faithful pastor, an active citizen of the town of Boston, and an unceasing toiler for the good of his race in practical as well as in spiritual matters, his fame commonly rests on his prodigious erudition and its prolific fruitage. Of the hundreds of printed volumes of the two Mathers, the man of letters of to-day finds nothing more significant to say, when he has excepted the 'Magnalia' and several contributions to witchcraft literature, than that they are the curious objects of search for the harmless book-collector. Prof. Wendell lost an admirable opportunity to speak of the place to which Cotton Mather is entitled in American literature, for it is as a writer of many books of many sorts that he stands in memory as one of the "makers" of this country. As it is, the author's statement that he found in the 'Magnalia' not a line that is not perfectly lucid nor a paragraph that he could honestly call tiresome, bears weight nd is of interest. A further critical estimate would have been most welcome.

Prof. Wendell candidly admits that he was not so fortunate as to examine the manuscript of the now published book by the late Mr. Marvin, in which, however, there seems to be nothing which would have changed materially his conclusions. To essay a man's Life in his own words, written in solitude or for no eye but his own, has its dangers, and in the case of Cotton Mather this is especially true, for his diaries were so often the effusive and un-

healthy outpourings of one who thought much about his "condition," though he certainly never wilfully neglected the spiritual concerns of others, that an uncomfortable conviction grows that his story as it has been told thus far is frequently not worth the telling. Mr. Marvin's excerpts, upon which he comments in a style better suited to the larger opportunities of the pulpit than to the closer exactions of biography, exhibit in a generous way the best qualities of Cotton Mather, and do not disclose more than is necessary of mere eccentricities or failures. His earnestness so far outweighs his sense of humor that he seldom has availed himself, with Mr. Wendell, of the melancholy pleasure of exposing his subject's weaknesses in order to extenuate them. With some skill in selection, aided by an honest desire to promote the cause of the religion of his fathers, Mr. Marvin gives passages which for the most part show Mather as a man of noble moods. Both editors properly quote the beautiful words of Mather on the death of his first wife, and both are alike generous in their estimate of the manhood and patience shown during his trials with the mental alienation of the third wife.

Brief observations upon most of the publications of Mather have been introduced by Mr. Marvin, and the depositories of many of the rarer imprints are frequently mentioned. Some important corrections are given of earlier bibliographical assertions in the curious tangle of the Mather literature. Mr. Marvin touches with precision on the Brattle Street Church affair, and would, we think, have avoided stating, with Mr. Wendell's certainty, that Benjamin Colman was responsible for the famous 'Gospel Order Revived,' a work which Mr. Hildeburn, usually good authority in these matters, now ascribes with a query to Solomon Southwick; though why not rather to Stoddard of Northampton, it is not easy to see. Mather's memorably progressive part in the early medical history of New England wins from Mr. Marvin something like adequate treatment. Far more edifying than his numerous fastings and strivings, his piqued disappointments at the lack of recognition from Harvard College, or the fateful honesty of his zeal against the possessed of Salem town, are the memories of Cotton Mather's unquenchable wish to do good to mankind, his bustling activity as pastor, preacher, and student, and his zeal in pushing the claims of inoculation. Both Prof. Wendell and Mr. Marvin have been too fearful of widening the scope of their efforts, faithful as each is in his own way, and have limited themselves too closely to the interior view of Mather's two-sided though by no means double character.

CHILDREN'S BOOKS—II.

WHAT dimmest glimpses of the possible joys of reading, any more than of the beauties of language, can visit the mind of a child doomed to get its first and perhaps, alas! its last, ideas of books from the drowsy preachment of a volume of 'Stories for Children: A Supplementary Reader for Schools or for Use at Home,' by Lucretia P. Hale (Leach, Shewell & Sanborn), it is hard to see. It was to brighten life by some such youthful glimpses and to offer some such joys that Matthew Arnold adapted the noblest of the Hebrew prophecies to the use of young learners, and that Lewis Carroll conceived an 'Alice in Wonderland' and irresistible nonsense in verse beside. But let what they and Hawthorne and Kingsley and others like them have contributed to childhood's proper world of letters be ever so studiously neglected, it is safe to say that no child, unless it be a hopeless prig, will ever of its own accord pore over sing-song moralities, however well meant, and that the teacher who attempts to use them in a class will find a speedy retribution in the shape of the wandering eyes and fidgeting limbs on the benches before him.

It is doubtful, too, if instruction, edification, or pure delight will ensue from an acquaintance with 'The Little Doctor,' by Darley Dale (E. & J. B. Young & Co.). The juvenile mind will be quick to spy the cloven foot of pedagogy under the disguise of the gypsy Zingar. In the make-up of the little doctor himself, with his unhealthily premature medical information and his equally unhealthy longing to dabble in magic—which supplies the moral and the second title of the book, "The Magic of Nature"—there is nothing that ought to rouse the juvenile admiration, while there is quite as little that should appeal to the juvenile taste in the sort of talk that is bandied between the disreputable gypsy mother and her still more disreputable son. The "angel-child" Stella is composed after the fashion of Christmas-tree decorations, in cardboard and tinsel-paper, with an indigestible sweetening of sentimentality. Altogether, in spite of some ingenuity in the conception and in the weaving in of Swedish scenery and habits, the recurring problem which this book, too, suggests to the adult mind is, whether, after all, anything save the "best that has been thought and said in the world" is good enough to put into childish hands.

Mrs. Molesworth's English story of 'The Girls and I' (Macmillan & Co.), even though it is told from the standpoint of a premature snob of eleven, who hates to drive on the back seat of a victoria because "it gives such a messy look to the turn-out," who has opinions upon first and second-class travelling, and who speculates whether the landlady has charged for the cake and jam, is not such bad reading in itself. The chief objection to it is that it leaves such a small residuum in the mind after it has been read. There have been children who have thumbed their 'Pilgrim's Progress' in pinafores, and devoured Shakspere or Sir Walter while still in the nursery; and such children, we believe, have generally in after life escaped the most dreary of all curses—that of having nothing to think about. But a boy or a girl might go through a whole library of stories such as this one, about the loss of the diamond ornament, and the family attack of whooping-cough, and their consequences, and still have a mind as unfurnished with lasting conceptions as that of a child altogether bookless, and an imagination not comparable in development with that of the child of one book, provided, only, the one has been drawn from a supreme few.

To unfold the whole network of improbabilities which makes up the plot of 'Kent Hampden,' by Rebecca Harding Davis (Scribners), would take too long, but one or two points may be shown. If it ever happened that an "impulsive Virginian" ran away from home and concealed himself for many years under a changed name, all for the sake of leaving the fortune really his own in the undisputed possession of a crippled cousin, the fact should be frankly admitted to be too strange for fiction. Unlikely, too, is the successful detective work of a boy of fifteen by which he clears his father's name from grave suspicion. The author makes the most of time and place by references to "hot-blooded Southerners" and "that early time," but seventy years ago is too recent, and Wheeling, West Virginia, is too near home, to yield the necessary glamour. Still, as young readers stick at no unlikelihood, and are ready to enjoy the final triumph of virtue, however brought about, this book may suit them well enough, being full of incident and written in a lively style.

Improbability is not to be charged as a defect against 'Elfie's Visit to Cloudland and the Moon,' by Frances Vescelius Austen (Estes & Lauriat). We do not exact reality for a scene in Cloudland, whither a child is transported on a wreath of smoke under the guidance of E-ma-ji-na-shun, who, by the way, turns out to be an uncommonly dull little elf. Dulness, indeed, is to the adult taste the distinguishing characteristic of the whole story, in which Santa Claus, Mother Goose, The Man in the Moon, etc., are treated as real people, perhaps to the delectation of youngsters.

Four very thin books of the "Christmas in Many Lands Series" (Estes & Lauriat) are 'Dulce's Promise,' 'Jean Noël,' 'Lischen and the Fairy,' and 'The Little Musician,' by Florence and Edith Scannell. The scenes are in England in the last century, in France, Germany, and Italy. Monochrome illustrations are freely scattered through the text, and the stories themselves, though slender enough, are quite as substantial as any one would expect after a glance at the millinery covers, one of which actually simulates white lace laid over purple watered silk.

The stories which make up Nora Perry's 'A Rosebud Garden of Girls' (Little, Brown & Co.) are rather moral than useful. Few children would need to be specially taught that every virtue is not confined to the rich, or even that some belong peculiarly to the poor, yet this is the only moral pointed with convincing clearness. The idea of character as the basis of a new and truer class distinction was, no doubt, in the author's mind, but there is often confusion between character as a whole and single traits; rudeness is overlooked on account of independence or generosity until there is some risk that a child would not feel the bad traits to be condemned. The confusion is increased, too, by indications that some of those very refinements which the author is trying to show to be unessential, hold an unduly important place in her own esteem. A plain Western girl is relieved from the unpopularity which continues in spite of her irreproachable behavior, by the discovery that her father is a man of wealth and consequence, and that her dresses came from Paris; and this case does not stand alone, though it probably marks the extreme. In at least one of the stories, "The Cottage Neighbors," the moral is plainly drawn, though the artistic effect is somewhat marred by an occasional grammatical slip (not to say tumble) on the part of a lady supposed to be the very pattern of elegance.

Young and old should be glad to get in one volume the late Mrs. Ewing's 'Jackanapes,' 'Daddy Darwin's Dovecot,' and 'Lob-Lie by the Fire' (E. & J. B. Young & Co.). Caldecott's illustrations bind these classic stories together.

'More Good Times at Hackmatack,' by Mary P. W. Smith (Boston: Roberts Bros.), is rather a series of sketches than a continued story of life in an inland Massachusetts village sixty years ago. The principal characters are the children of the minister, and their occupations and amusements are the theme of the book. They make sugar, go on a picnic, help raise the frame of the church, see a circus, enter heartily into the Tippecanoe political cam-

paign—idolizing Webster, of course, whom they hear speak, as well as Everett—attend the academy, and finally one goes to Harvard. There are few adventures, and those not of the thrilling kind, though the children are constantly falling into scrapes; but the interest of the book is wholly in its faithful pictures of a past generation. In these the author has shown much skill and no little humor, especially in the description of the summer Sunday and of some of the more peculiar village characters.

'Monica,' by Mrs. Evelyn Raymond (T. Y. Crowell & Co.), tells of an attractive Spanish girl, whose adventures while searching for a runaway brother furnish the main incidents of a very interesting story. Her unselfish devotion to those belonging to her is not without its influence upon others, especially upon young Christine, the adopted daughter of rich Americans, and only less charming than the heroine herself. Of the other characters, Benito, the little hunchback, is the most taking. The scene of the story is laid in Southern California, and there is a sufficient number of exciting incidents—as, for instance, a cyclone and a mortal combat with a grizzly—to commend it to its chosen audience.

Prof. H. H. Boyesen's 'Boyhood in Norway' (Scribners) is a collection of short stories illustrative of Norwegian sports and customs. Some are tales of adventure, as of hunting the elk and the bear, and rafting and logging in times of flood. Others are founded upon certain superstitions of the peasantry, chiefly in connection with children; but in one, "The Nixy's Strain," a belief in fairies is made in a charming way to call forth and develop all that is best in a boy's nature. Nearly all, in fact, teach lessons of manliness, self-control, and unselfishness, while one gives a noble example of self-sacrifice. Six of the nine stories, it should be said, as the title-page does not indicate the fact, have already been published in the *Youth's Companion* and in *Harper's Young People*.

The title of 'Zigzag Journeys on the Mississippi,' by H. Butterworth (Estes & Lauriat), naturally implies an account of the river, its scenery, the cities on its banks, its commerce, agriculture, and history. There is nothing of the kind. Of 319 pages, a little less than two are devoted to a general description of the river, seven are given to St. Louis, eight to New Orleans, while six lines each suffice for Memphis and Vicksburg. The Chicago Exposition has a few pages, and brief mention is made of the "islands of the Discovery." The rest of the volume consists of miscellaneous essays, poems, and stories, some of which relate to the early history of the river and America. There are in the text which strings them together passages like the following: "The legend of Ponce de Leon [the date of his birth is given a century too late] represents the struggle of the soul for larger knowledge and higher attainments, of the dreams of the *ideal* finding the *real*. *That* is America. It is the most beautiful allegory of America's life and mission. Already the legend is beginning to take form. It has been put into solid art in the palace hotel at St. Augustine." "America has only one city that is a poem." "At the entrance of the park is the grand bronze statue of Lincoln which stands in a serious but hospitable attitude on a semicircular platform of state."

Mr. Warren Lee Goss, whose 'Recollections of a Private' has a recognized place in the literature of the civil war, offers to boys an attractive book in his 'Tom Clifton' (T. Y. Crowell & Co.). His hero migrates in youth from New England to Minnesota, and goes through the adventures, perennially fascinating to the young, of establishing a new home, hunting, fishing, farming, and exposure to "blizzards." The civil war breaks out, and the youth, with a group of companions, enlists. Mr. Goss did not serve in the West, but his experiences in the ranks need but little change to insure verisimilitude when his boys fight at Shiloh, Corinth, Vicksburg, and Missionary Ridge. The horrors of capture follow, and thrilling efforts at escape, with final release in time to share the hurrahs at the return of peace. There is, perhaps, too much history for successful fiction; but boys are good at skipping, and for the more faithful readers the history is fairly close to the accepted version of the campaigns the author describes.

'The Story of John G. Paton' (A. C. Armstrong & Son) is the record of a well-spent life. It tells in a simple way of the struggles of a poor Scotch lad to get an education, of his self-denying work among the poor of Glasgow, and of nearly thirty years' toil among the cannibals of the New Hebrides. Few books of adventure have such thrilling incidents as are narrated by this missionary, whose perils from storm, sickness, and the hostility of the natives were equalled only by the courage and patience with which he endured them. Nor are there any more attractive pictures of savage life than those which Mr. Paton draws of these poor islanders after they had become Christians. The "story" should find a place, at least, in every Sunday-school library.

A Hanoverian-English Officer a Hundred Years Ago: Memoirs of Baron Ompteda, Colonel in the King's German Legion, etc. Translated by John Hill, M.A., with portrait. London: Grevel & Co.; New York: B. Westermann & Co. 8vo, pp. 320.

INTERESTING side-lights are thrown by these memoirs upon the great conflict between England and the first Napoleon, from unexpected sources. As George the Third was King of Hanover as well as of Great Britain, the little Continental kingdom, though independent by its Constitution, was not allowed to be neutral in the wars following the French Revolution. It was a convenient point of attack where England could be reached without crossing the Channel. It was therefore occupied by French troops when war was waged between the principal countries. From 1803 to Napoleon's downfall it was continuously held by England's great enemy, and many of its most patriotic citizens were in exile. It was never the field of decisive battles, but it was harried and stripped by marching columns and remorseless garrisons, hopelessly enduring the most galling burdens and insults, without any of the glory of real war.

Christian Ompteda was a young lieutenant in the Hanoverian army when Louis XVI. was guillotined and war broke out. He served in the Netherlands campaigns of 1793-5, being severely wounded at Mont Cassel, and in his slow recovery suffered such mental depression as for a time unbalanced his mind. His sympathy with his countrymen in their misfortunes gave a sombre tone to his life and a tendency to melancholia which once more in his career caused a temporary insanity. These periods of alienation were brief, but they add a curious interest to his story by the resemblance, on a smaller scale, to the mental disorder of King George his sovereign, which so gravely affected the Government of Great Britain.

When in 1803 Hanover was forced to disband its army, Capt. Ompteda, with many more of the Hanoverian officers, made their way to England by devious routes and through many adventures and hardships. The German Legion was organized as part of the British Army, several thousand Hanoverian recruits, largely from the disbanded army, finding their way to the standards which their officers set up at Portsmouth. Ompteda was made major in one of the battalions, and he was thenceforward an exile, but a devoted soldier of his Hanoverian king. He served in English camps, was for a year in the garrison of Gibraltar, took part in the expedition against Copenhagen in 1807, was wrecked on the coast of Holland and made a prisoner of war. After his exchange he served under Wellington in the latter part of the Peninsular campaign, and, upon Napoleon's return from Elba, was transferred with the English Army to Belgium, and took active part in the campaign of Waterloo. He was now colonel of his regiment and commandant of a brigade. At Waterloo his troops defended the famous farm of La Haye Sainte, and he was killed in one of the last charges of the French cuirassiers. The monument on the field, opposite the place of the old farm-gate, bears his name with that of his comrades who fell with him.

Though his military career was an honorable and an instructive one, the chief interest in his story, compiled as it mainly is from his letters, is found in the mental and social history, which may be taken as a type of that of his oppressed and patriotic countrymen. We are made to learn what life was in Hanover in the doleful era of the subjugation. From this point of view we have a new and valuable chapter in the inner history of the time. Christian's brother, Louis, was in the diplomatic service, being ambassador of Hanover at the Court of Berlin, and an unofficial representative also of the English Government. Scharnhorst and Gneisenau were their intimate friends, and all were heart and soul in the reaction of 1813, when Germans were proud to "give gold for iron," and to have a hand in the downfall of the Napoleonic despotism.

The Bible and English Prose Style. Selections and Comments. Edited, with an Introduction, by Albert S. Cook, Professor of the English Language and Literature in Yale University. Boston: D. C. Heath & Co.

THIS little book of Prof. Cook's, in essence a plea for the study of the Bible for literary ends, will be a melancholy confirmation, to some, of the recent saying of an English writer: "Now that the Bible has ceased to be a fetish, it has ceased to be read." What possible need could there be of an exhortation to acquire familiarity with the Bible for the sake of understanding the allusions to it with which all English literature is filled, and for the sake of benefiting by its diction and style, if it were still the practice of mothers, as it was Ruskin's, to "force" their children, "by steady daily toil, to learn long chapters of the Bible by heart"?

At best Prof. Cook's volume must appeal to a narrow circle; it will have no chance of being used as a text-book in Sunday-schools, where he would be thought to be laying stress upon the beggarly elements; as little will it commend itself in those pietistic families where talismanic ideas of the Bible still linger; the most it can do is, perhaps, to remind a

student here and there of those resources of literary gratification and moral uplifting which are to be found in the nobler portions of the Scriptures, and which can be enjoyed, as George Eliot and Matthew Arnold proved, even after the old glamour of theological interpretation has been dissipated.

Prof. Cook's introduction is in the main excellently conceived. A lack of discrimination might be charged against it, in its failure to distinguish the unequal values of the many different styles comprised under the name "the Bible." "Noble naturalness" may be safely claimed for the racy narratives of the Jehovist, but would it be just to assert it of the Elohist, with his schoolmaster's stiffness and jealous reiteration? So of some of Prof. Cook's other distinctions. It would be difficult to make good his sweeping assertion that there is no "artificiality" in the Bible; one remembers the acrostic Psalms, Ezekiel's unrealities, and the elaborate machinery of the Song of Songs. We think, too, that in commending the style of the Bible so unreservedly as Prof. Cook does, he should have been at more pains to point out the special vice, for us moderns, of one of its qualities—its prevailing oversight of the reasoning faculties. He states, it is true, that "there is no attempt to convert men from their errors by ratiocinative or philosophical processes"; but this scarcely marks, it seems to us, the whole world of difference between the style of St. John and that of Plato, for example. The Greek made all his appeal to the reason of men; did it as a cover for arbitrary dogmatizing, often; did it with surprising use of merely verbal arguments many times; but still did it, and so followed a method which is valid and indispensable today. The Hebrew spoke throughout in the name of Divine Infallibility, and thus made the tremendous impression he did as long as his dicta had to undergo no scrutiny. But one proved error was enough to throw doubt on his whole method, whereas, in Plato's give-and-take of argument, a mistake discovered serves but to confirm his method. Which of the two is best adapted to the needs of the modern world and the uses of modern writers, it is not necessary to say.

Goethe's Faust. Edited by Calvin Thomas, Professor of Germanic Languages and Literatures in the University of Michigan. Vol. I.: The First Part. Boston: D. C. Heath & Co. 1892.

It is not too much to say that of all "Faust" editions which thus far have appeared in this country or in England, the one of which Prof. Thomas has just given us the first instalment is by all odds the most scholarly and comprehensive. Indeed, it is the only one which can be proclaimed worthy of the poet whose name it bears, the only one which can be mentioned, if not side by side with the works of such men as Loeper or Schröer or Düntzér, at least in the very next place after them.

Prof. Thomas is not a novice in this field of work. For years he has given his best thought to the study of Goethe. The admirable Goethe collection which the University of Michigan owes to his indefatigable zeal and organizing power stands among the very first of its kind in America. His edition of "Torquato Tasso," which appeared a few years ago, is a model of critical tact and discretion. But it is as the editor of "Faust" that he will be most widely and favorably known. What gives to this edition its distinguishing feature is the spirit of directness and common sense which pervades it from beginning to end. Prof. Thomas approaches his task without any preconceived theories; he does not tamper with facts in order to import a philosophy of his own into Goethe's poem; he does not try to dazzle through brilliant æsthetic *aperçus;* he does not waste time in long-winded antiquarian or linguistic digressions. He gives us a careful historical account of the genesis of the legend and of Goethe's drama, and a thorough philological interpretation of the text. And it is mainly by reason of this wise self-restriction that his edition of "Faust" will mark an important step in the history of genuine Goethe study in America. Dilettantism will henceforth be out of the race.

According to his own statement (Pref., p. 5), Prof. Thomas has "as a rule avoided controversy and the rehearsal and discussion of conflicting views." For a book which is in the main intended to present a correct view of the accepted results of modern Goethe scholarship, this was unquestionably a sound decision. We cannot, however, suppress a doubt whether in some cases it would not have been better to adhere somewhat less strictly to this rule. In speaking of the popular Faust-drama of the seventeenth century, the editor remarks (Introd., p. 18) that this production "now appears to have been derived from Marlowe's 'Faustus' as brought to Germany by English players." It cannot be unknown to Prof. Thomas that this theory of Creizenach's has of late been most effectually attacked by a number of scholars, who seem to make it probable that there existed a native German Faust-drama as early as the sixteenth century. Even if there was no room for discussing Herman Grimm's ingenious hypothesis that the very Faust-book of 1587 was based in part upon a popular dramatic tradition, it seems as though it would have been within the scope of such an edition as this to mention at least the fact that, as Bielschowsky's incisive investigations have clearly demonstrated, there are a number of most important traits in the puppet-plays of Faust not to be found in Marlowe, which it is almost impossible to explain except by assuming that they were remnants of a sixteenth-century German Faust-play.

Lessing's "Faust" does not seem to receive its due share of attention at Prof. Thomas's hands. All that is given (Introd., p. 20) is a scanty reference to the famous seventeenth *Literaturbrief*. There is no analysis of the fragment of the drama itself, no allusion to the reports of Engel and Eschenburg about it, not even a mention of the important fact, so clearly brought out by Kuno Fischer, that Lessing was the first to conceive of a final salvation of Faust.

In speaking of the scene *Wald und Höhle* (Introd., pp. 53, 62; notes, p. 315), Prof. Thomas does not even hint at the possibility that the "erhabne Geist" whom Faust addresses on this occasion might be other than the Earth-Spirit of the opening scene. It is hard to believe that Prof. Thomas himself considers this as a certainty beyond question, in view of the powerful arguments by which W. von Biedermann has tried to refute this very interpretation. How, we may ask, would he reconcile the lines of the *Wald und Höhle* monologue:

"Dann führst du mich zur sichern Höhle, zeigst
Mich dann mir selbst, und meiner eignen Brust
Geheime tiefe Wunder öffnen sich,"

with the words of the *Monodrama:*

"Du Erdengeist, kennst du die Macht,
Was eine Menschenbrust vermag?"

Is it possible to assume that both these utterances were addressed to the same being?

We have mentioned these cases, to which a number of others might be added, in order to show that Prof. Thomas has not always avoided a danger to which his desire for succinctness and his aversion to controversy made him peculiarly liable: the danger, namely, of dismissing without notice opinions and conjectures which it would have been well worth his while to admit at least to a hearing. But it would be unjust not to add that in the vast majority of cases Prof. Thomas's own judgment is so carefully considered, so well balanced, so eminently the result of a conscientious examination and comparison of all the available material, that it can truly stand for the best opinion of modern "Faust" criticism. One example at least among many may illustrate and fortify this praise: the way in which Prof. Thomas discusses *Mephistopheles*'s character. Not even *Mephistopheles* has escaped that mania prevalent among modern commentators of reducing all poetical creations to mere copies of actual conditions or individuals. Some see in him Goethe's Leipzig friend Behrisch, others consider him modelled after J. H. Merck, still others think Herder his living prototype. Of course, there may be a grain of truth in every one of these identifications, and we think Prof. Thomas did entirely right to discuss every one of them at some length. But still more do we agree with him when, after having duly considered the claims of all these men to have shaped the conception of *Mephistopheles,* he winds up with the following remark (Introd., p. 78):

"The truth is that Goethe's famous creation owes very little, and nothing that is clearly definable, to any actual personage. *Mephistopheles* is simply the natural, and, in view of Goethe's poetical methods, necessary, pendant to *Faust.* The pair are in their way but another instance of that dualism of poetic conception which meets us elsewhere as *Götz* and *Weislingen, Clavigo* and *Carlos, Orestes* and *Pylades, Tasso* and *Antonio.* . . . Our poet needed no models, and no suggestion beyond what was furnished by his widening acquaintance with life and his observation of the inner contrasts of his own being."

We must forego entering upon further particulars, such as the discussion of the "Urfaust," the analysis of *Wagner's* character, the consideration and partial refutation of Scherer's criticism of *Faust's* first monologue, and other passages of Prof. Thomas's work which seem to us especially worthy of commendation. But enough has been said to make it clear that here we have a work which, when completed, will be no small credit to American scholarship, and which even in its present form will do much to stimulate serious Goethe study in our colleges and universities.

Admiral Farragut. By Capt. A. T. Mahan, U. S. N. D. Appleton & Co.

This little volume is the first of a series which is to be devoted to the lives of the great commanders of American history. It is fortunate that so able and competent a pen has been secured to treat of the career of the greatest naval commander of recent times, not only presenting one of the best short naval biographies that we know of, but giving also a critical naval history of great value of the operations in which Farragut took part. The work before us should serve to elevate and sustain the professional reputation of Farragut, and in addition make better known the professional and literary ability of his biographer.

Farragut was born near Knoxville, Tenn.,

in 1801, his father being of unmixed Spanish origin, a native of the Balearic Isles, while his mother, of Scotch descent, was a native of North Carolina. Shortly after his birth, his father, who had served upon the side of the Americans during the War of the Revolution, removed to Louisiana and was appointed a sailing-master in the navy, his duties being confined to service in the waters of the Gulf. Through the kindness shown by the father of Farragut to the father of Capt. David Porter during his last illness, the relations between the families became intimate, and the future Admiral of the American Navy was adopted by the father of the late Admiral Porter, who was the second person to hold that grade in our naval service. Accompanying his protector to Washington, Farragut, in 1810, when less than ten years of age, received through the influence of Porter a warrant as midshipman in the navy. In 1811 he joined the frigate *Essex* with Capt. Porter, to whom the command of this vessel had been assigned. The building of the *Essex* by the citizens of Salem, in accordance with the law passed in 1798, is described here in an interesting manner; everything pertaining to the construction and equipment of the ship being portioned out among the people of this Massachusetts town, and supplied from its resources and those of the surrounding country. Each of the three ropewalks undertook the rigging of a mast, and the workmen carried the rope cables when completed upon their shoulders, in procession, to the ship, headed by a drum and fife.

The war of 1812 breaking out, the *Essex* was fitted out for her last and famous cruise in the Pacific. Missing the *Constitution* and *Hornet*, Porter finally proceeded to the Pacific, reaching Valparaiso in 1813, after a severe passage around Cape Horn. After a cruise of nearly a year, commerce-destroying, the *Essex* was met by English men-of-war, the *Phœbe* and *Cherub*, and shortly afterwards followed the famous action which, though resulting in the capture of the *Essex*, redounded more to the honor and fame of the captured than of the captors. Farragut lacked still three months of being thirteen years old in this fight. He saw service after his exchange before the termination of the war of 1812, and continued afloat without much interval or incident, excepting his service in the Mosquito fleet in the West Indies against pirates. In 1823 he returned to Norfolk and married, and from that time until the outbreak of the civil war his life was the ordinary one of a naval officer in time of peace, an alternation of sea cruising and duty on shore. The author, however, bears witness, from an examination of the private journal of Farragut, to his activity of mind, habits of observation, and above all to a constant readiness and diligence in embracing every passing opportunity for improvement, all of which told for so much in his after career. When at New Haven he availed himself of the lectures given at Yale College, and while on duty in Washington he attended regularly those of the Smithsonian Institution.

With Farragut, as with members of our military and naval services generally, the time of preparation was long, that of action but short. He was nearly sixty years of age in 1861, having been in the navy over fifty years, while his famous war career was compressed into a period of less than three years. We were fortunate, immediately after the outbreak of the war, in having had called to the Navy Department a man competent to act as its professional head, though not at the time in the naval service. Mr. Gustavus V. Fox, the Assistant Secretary of the Navy, added to a naval experience of eighteen years an extensive acquaintance with naval officers and excellent business and military capacity. To him was due the general scheme of the expedition against New Orleans. Farragut, whose loyalty had stood the crucial test of the early days of the war, was selected for its command, and enthusiastically approved of the proposed operations. The author discusses fully the professional differences in the views of Farragut and Porter as to the passage of the forts, Porter favoring a reduction before passing, while Farragut, with Fox, believed that the passage of the forts should be made and the troops brought from the Gulf above the forts, under the protection of the ships, through the bayous. The passage of the forts is critically and fully described. The strategic foresight of Farragut enabled him to successfully carry his fleet by the forts, cut off their communications with New Orleans, and thus cause their fall. That the capture of the city, as well as the occupation of the Lower Mississippi, was the work of the United States Navy, and of the navy alone, has never been successfully impugned; and the author well says that of this triumphant work Farragut, by his magnificent successes, became the representative figure.

Space does not allow us to follow Farragut in his course up the Mississippi, and the succeeding combined operations which led to the Vicksburg campaign of Grant and ended in the final command of the great water route, which caused in turn the trans-Mississippi States of the Confederacy to shrink into insignificance as a military factor of the Rebellion. The criticisms of the author concerning these operations are peculiarly sound and able.

Mobile came next. It was, at the end of the period referred to, the best port upon the Gulf left to the Confederates; its attack had long been urged by Farragut as well as desired by Grant. When the Department directed the attack, a further delay occurred by reason of the completion of the iron-clad *Tennessee* and the consequent necessity for iron-clads upon the Union side. When the iron-clads arrived, Farragut found at Mobile new conditions, serviceable iron-clads for attack and defence, torpedoes and permanent channel obstructions. The fight at Mobile Bay, though less important in its objective and results than that below New Orleans, surpassed the latter in its varied nature, heroic personal leadership, and dramatic accompaniment. The confusion at the head of the column, from the mistaken course of the *Tecumseh* and the stopping of the *Brooklyn*, and the final sinking of the *Tecumseh*, all under the heavy fire of Fort Morgan, gave Farragut the opportunity to display his heroic qualities and genius for war. The ramming and iron-clad contest with the *Tennessee*, the pursuit by Jouett, and the final surrender of Buchanan, fitly closed this memorable page in American history.

After Mobile, Farragut's health and advancing years prevented him from taking any further active part in the war, and after the war in professional matters of importance; but his closing years were as unsullied as his whole life had been pure and elevated. Those who had the good fortune to know him during his lifetime felt drawn to him not only by his unobtrusive and simple character, but by his great kindliness of manner. His character is one that his countrymen can always dwell upon with a satisfaction and pride that needs no qualification. No great commander of the war for the Union, of either service, North or South, was more symmetrical and noble in his mould or more heroic in character than the first Admiral of the American Navy.

The Old English Manor. By Charles M'Lean Andrews, Ph.D. Johns Hopkins Studies in Historical and Political Science. Extra Volume XII. Baltimore. 1892.

MR. ANDREWS'S substantial treatise on Anglo-Saxon manorial life is welcome, both as a scholarly piece of work and as testifying to a growing perception among American students of the vital importance of the question of the origin of the manor for any real understanding of the social evolution of the past. It is scholarly in the sense of being well informed and careful; and although the style is frequently slipshod, that is a minor defect, especially as the book appeals only to specialists.

The greater part of the volume is occupied by a minute description of manorial life in the century before the Norman Conquest. In this Mr. Andrews follows very closely the lines laid down by Mr. Seebohm, as indeed every unprejudiced writer since 1883 has been compelled to do; but he has brought together a wealth of additional detail which will be of no little service to subsequent investigators. He frankly concedes much that the writers with whom he has most sympathy have hitherto refused to recognize; that, for instance, "there is no reason to believe that the Norman Conquest created any changes in the life of the village group"; that the great body of the people were only "nominally free," and indeed can fairly be described as being "in a semi-servile condition"; and that there is "no clear evidence" for the existence of "freeholders" in pre-Norman times. He makes a still more important concession, of the full significance of which he is hardly aware, viz., that in the laws of Ine of Wessex (drawn up between A. D. 688 and A. D. 705) we already "find the manorial growth well developed, *either from serfdom upwards* or from freedom downwards," and indeed that they show "nearly every feature of the manor life of the *Rectitudines*"—a document three centuries later. This would seem to knock the bottom out of the argument to which Mr. Andrews more than once resorts as against Mr. Seebohm, that between the *villa* and the *manor* there is "a period of 600 years" without evidence. Mr. Andrews perhaps feels this; for he hastens to minimize his concession by the remark that "there is no clear indication of the labor upon which the whole question turns." There is much virtue in a *clear;* since the phrases of the laws of Ine certainly do indicate some sort of labor dues. And if we compare the conditions there revealed with the laws of the Alamanni and the laws of the Bavarians half a century earlier, it is easy to see in what direction the probability lies. Mr. Andrews warns us not to "draw inferences from Frankish practices," and he would probably add "or any other Continental parallels"; "for," he goes on, "it is plain that Roman influence on the Continent had consequences which cannot be applied to England." But this is precisely what has to be proved.

Thus, in the part of the work where Mr. Andrews is giving the results of his own study of the original sources, his conclusions are in general harmony with those of Mr. Seebohm and others who throw back the serfdom of the body of the population into a very distant period. But our author still clings to the free vil-

lage-community theory, and in his long Introduction he propounds a view of his own. It is, in brief, that the manor is descended from the settlements of clans under hereditary chiefs. For this he adduces scarcely anything which looks like evidence, but still it is an opinion worth bearing in mind; and there are other considerations to which Mr. Andrews does not refer—such as the opinions of Skene and Sullivan as to the late and artificial origin of the clan—which tend in the same direction. Only, why not drop the term "village community"? It has too long been the practice to use it without discrimination for everything which differed from modern holding in severalty: like the writer quoted with approval by Mr. Andrews who says that "the Irish *tribe* was simply one example of those village communities which existed among all the early Aryan nations." The mediæval manor we know, and the tribe we are beginning to know; but the free *Markgenossenschaft* has never been more than a pleasing vision. And if Mr. Andrews and those like him who are almost persuaded to give up Maurer will let their minds play freely round these facts—that English manorial life was substantially identical with the manorial life of the Continent, and that the manorial life of the Continent came down without break in continuity from the conditions of the later Roman Empire—they may at last recognize the likelihood that even in Britain the manor derived very much from Roman agrarian methods.

A Tour around New York. By John Flavel Mines. Harper & Bros. 1893.

It would be a pity if these pleasant sketches, which have delighted so many readers, should go the way of what they commemorate and be forgotten. They deserve to be preserved in this permanent form, enriched and enlivened as it is by more than 100 engravings from well-chosen subjects of buildings, views, and curious relics described in the text. Taking Trinity Church as a starting-point, Felix Oldboy saunters leisurely through the streets, parks, burial grounds, and public buildings of the lower city, following the story of each one back from its condition now, through its changes to its beginning. The knowledge of persons and localities displayed in his early papers, and the genuine feeling pervading them, brought letters and requests from many correspondents. Guided by these, his walks extended over all the island, and his inquiries revealed new histories or discovered sites, while his range of reminiscences by degrees embraced almost all classes and institutions of New York as it was forty or fifty years ago, and his researches linked all these with the remoter past of Revolutionary days. Perhaps the latter part of the volume, devoted to the shores of the East River, is the best instance of his skilful use of points historical and traditional. At the same time the sketches of the scenery and the society of that region abound in picturesque effects and interesting personalities.

One does not look for a keynote in writings which their author speaks of as simply the records of a random tour through familiar places, recalling the persons of other days. Yet such a note is betrayed. The sketches are held together by the slightest thread of recurrence to one quiet home and its gracious inmates. As the notes of saunterings widen in range they deepen in feeling and gain a simple tenderness; and the close of the first series expresses the undertone of the whole, in the answer, more amused than contemptuous, to some one's suggestion that Felix Oldboy knows nothing of "the élite of the city in former years." It is of the finest style—the quiet way in which the modern social standards of the soi-disant élite are ignored, and the true worth and dignity of the elder ways implied, in contrast with the extravagances of fashionable leaders and their fashionable rabble at this day. It does not lie at all in the author's way to explain such contrasts, but their causes are suggested in every family name that he cites, in every civic function he describes, in every sidelight he throws on the spirit and drift of the old public and private city life, out of which that of to-day has sprung—widened, stimulated, enriched, but surely, as to many of the best things, degenerate.

As a startling outcome of forces that had long been working for social changes, the author mentions the civil war. No doubt society, not merely in its surface show, but in all its relations to business, politics, morals, was profoundly modified by that tragic period, with its "sudden making of splendid" fortunes. Still, other influences of change, more subtle if less violent, are suggested by Oldboy's light touches upon the men and their deeds of fifty years ago. The mention of some great merchant's name revives the strong personality, the wide knowledge, the bold forecast that won commercial leadership before the telegraph had equalized opportunities and almost levelled capacities. If some eminent banker is named, it serves to remind us of the times when financiers had not yet found Fortunatus's purse in the needs of great corporations. If Oldboy had been asked the question, we believe he would have answered that of all the powers speeding the shifting of the old and the coming of the new order, that one which works most deeply at the foundation of society is the rise and growth of corporations, stifling individuality, concentrating power, deadening responsibility. But this is digressing into regions which Oldboy's cheerful lightness would have avoided.

As his clerical lineage and connections lead us to expect, the writer's notes reveal many curious facts about the churches of a half century ago. The tenacity of doctrine, even the persistence in locality, of some of these modest and little known religious communities, is striking. The salt of the earth is still strewn in many out-of-the-way places. Of the legal profession he has less that is new, because old, to tell us. Indeed, the men of the robe have never been backward in speaking for themselves, their share in public affairs always keeping them conspicuous. The names he dwells upon are those of lawyers whose civic service and social charm made them the peers and friends of the great merchants who win Oldboy's warmest praise. The medical brotherhood cannot be said to fare worst at his hands, for in fact it does not fare at all. Yet old Manhattan, healthful and beautiful as he paints it, knew both the blessing of doctors and the curse of quacks. We have personally known one desperate Sangrado and an Ollapod or two. In the plagues of yellow fever and cholera that have invaded the island there have been heroes of the hospital whose names deserved to be kept green; and New York society has at all times recognized, as it does today, certain physicians as among its most brilliant and valued members. However, men of the first rank in that profession have never been quite as ready as those in the others to let their left hand know what their right hand was doing.

It may be that the new times are the better times. At any rate those who enjoy them will think so. It may gratify their curiosity, as it will touch with a tender regret those who lead them by a score or two of years, to read these lively memorials of a time when brick, mahogany, and madeira were going out with the old ex-slave servant, while brownstone, veneer, and thin potations began to come in with Biddy and valets. There are some men with minds so constituted as to think that things in our city ought to be honest as well as splendid—that on the whole the public good is not so well served by "combines" of Hans and Mike as by dull old Dutch probity. Such persons would actually prefer what used to be advertised as "an agreeable rum," brought in by traders fifty years ago, to fiery whiskey attending the advent of Hibernian statesmen.

We may hope for help to better municipal rule from one class for whom this book should be full of interest. They are the scions of those families whose names are recorded in it only to be honored, and whose line of public service runs back to the days of colonial Government. And among the correspondents whose attention was drawn to these papers there must be many whose stores of information and anecdote upon kindred subjects would be welcomed by the public. Such contributions might aid to complete this valuable record of what may be called the biography of New York city, as distinct from its history.

BOOKS OF THE WEEK.

Allen, Grant. The Attis of Catullus. London: David Nutt.
Anstey, F. Voces Populi. Second series. Longmans, Green & Co. $1.75.

IMPORTANT NEW WORK BY GEORGE BARNETT SMITH.

History of the English Parliament,

Together with an account of the Parliaments of Scotland and Ireland. By GEORGE BARNETT SMITH, author of "The Prime Ministers of Queen Victoria," "The Life of the Right Hon. W. E. Gladstone, M. P.," etc., etc. ILLUSTRATED WITH FAC-SIMILES OF NUMEROUS VALUABLE HISTORICAL DOCUMENTS connected with constitutional history. In two volumes, 8vo, cloth, boxed, $6.00.

"There are no fewer than seventeen appendices, in the shape of 'Constitutional Addenda,' dealing with a great number of matters affecting Parliament and the Constitution. The work differs entirely from the many existing constitutional histories treating of the government of England at various periods. It is the first complete, consecutive record of the English Parliament as a legislative institution from the earliest times to the present day. In addition to the Parliamentary journals and official documents, all the constitutional writers of authority upon each epoch have been consulted in its preparation—a fact which will sufficiently testify to the magnitude of the undertaking."—*London Academy.*

WARD, LOCK, BOWDEN & CO.,
LONDON. NEW YORK. MELBOURNE.
15 EAST 12TH STREET.

The Poems of George Pellew,

Edited, with an Introduction, by

W. D. HOWELLS.

12mo, white cloth, postpaid, $1.25.

The Nation.

NEW YORK, THURSDAY, DECEMBER 8, 1892.

The Week.

It must be said that Mr. Harrison, in his message to the expiring Congress, takes his humiliation as gracefully as could be expected. He admits that "the result of the recent election must be accepted as having introduced a new policy." He refrains from charging the people with being fools for decreeing a change, although he does accuse "the wage-earner" of having his perception of the beauties of McKinleyism "obscured by the passion evoked" by controversies between employers and employees. He graciously concedes that "those who have advocated a protective tariff can well afford to have their disastrous forecasts of a change of policy disappointed." At the same time he declares his conviction that these disastrous forecasts will not be disappointed—that the friends of the protective system will await the results of the new experiment "with undiminished confidence in the principles they have advocated." As to action, he says:

> "I recommend that the whole subject of tariff-revision be left to the incoming Congress. It is matter of regret that this work must be delayed for at least three months; for the threat of great tariff changes introduces so much uncertainty that an amount, not easily estimated, of business inaction and of diminished production will necessarily result. It is possible, also, that this uncertainty may result in decreased revenues from customs duties, for our merchants will make cautious orders for foreign goods in view of the prospect of tariff reductions and the uncertainty as to when they will take effect."

Postmaster General Wanamaker's annual report is aglow with the best rhetoric of his bargain-counter advertisements. Everything proves "wonderful growth" and "steady improvement of the service." One characteristic touch is, "The deficit receded nearly a million." This is much neater than to admit that his prediction of a year ago, that the deficit would be entirely wiped out, has been falsified. Secretary Foster believed him at the time, and made post-office receipts and expenditures equal in his estimates for 1892. In his estimates for 1893, submitted last year, he actually counted upon a surplus in the Post-office Department. But he has since learned not to take Wanamaker literally, and now figures on a deficit in his Department of $2,453,966 for 1893, and one nearly as large for 1894. If the Postmaster-General is no longer credited by the Secretary of the Treasury, we do not think that other people will give great heed to him.

The Superintendent of the Census, Mr. Porter, renews in his annual report his former suggestion that the Census Bureau be made permanent, and in support of it remarks that he has consulted statisticians, experts, and others interested in the improvement of census statistics, who favor the proposition. A collection of opinions from genuine authorities upon census statistics as to the value of Mr. Porter's services would, we are positive, be unanimous in favor of ridding the Government of him as soon as possible. He gives much space in his report to the consideration of complaints made against the accuracy of his census, observing complacently that the work of his enumerators "has been vindicated by time." As a matter of fact time has steadily added cumulative evidence in support of the belief that his census is undoubtedly the most inaccurate and untrustworthy ever compiled in this country. Mr. Porter is obliged in his present report to explain how it was that his census of the manufacturing industry of Philadelphia was so grotesquely inaccurate that the entire press of the city was obliged to denounce it. He says that the special agent in charge of it "was imbued with the idea that the manufactures of Philadelphia must be made to exceed in value those of New York city, and to sustain this idea some of his subordinates manufactured returns which they failed to find legitimately." He adds that a revised valuation of the city shows a net decrease from the first of nearly $157,000,000. Everybody who has followed Mr. Porter's course in the Bureau will recognize as his the idea with which he says the Philadelphia special agent was "imbued," for it is the idea upon which the entire census has been compiled—namely, to make it a monument of the blessings of a high-protective tariff.

Mr. Porter shows that the total expense of compiling his worthless census (for worthless it is and always will be as a source of exact and unquestioned information) is already more than $8,000,000, and that he will need $240,000 more in order to continue his work through the present fiscal year. He is unable to say when the work will be finished. Whatever action Congress may take in the matter, one of the first steps of the Cleveland Administration ought to be to rid the service of this preposterous statistician. Of the very many bad appointments which President Harrison has made, Porter's is easily the worst. He had no qualifications for the place, for he had never been anything except a notoriously partisan juggler with tariff and wage figures. His only idea of the census has been so to stuff it with bogus and defective figures as to make it a Republican campaign document. To put such a man in charge of a work which, in order to have any real value, must be not merely above attack but above suspicion, was a misuse of the appointing power for which it would be difficult to find a parallel.

The Treasury Department has been gradually crawling out of its untenable position on the subject of quarantine and immigration, and the vacant place is now occupied by Senator "Bill" Chandler of New Hampshire, who offers a bill proposing that all immigration shall be prohibited for one year as a measure of protection against the cholera. There is a proviso attached to his scheme, that persons who come merely as visitors shall be allowed to enter the country and stay as long as they choose, such persons being always free from the cholera germ, as is well known. The year 1893 being fixed for the World's Fair at Chicago, and great preparations having been made for a rush of visitors from abroad, it is to be hoped that Mr. Chandler will give the people of the Old World very exact information of the steps to be taken to distinguish between those who come hither to remain and those who come with the intention of returning.

Congressman Dockery's resolution calling upon the Committee on Appropriations to ascertain and report to the House the exact situation of the Treasury, was introduced none too soon and should be passed at once. It might be taken as something of a reflection on Secretary Foster, but then it is impossible to discuss national finance at all without reflecting on him, and Mr. Dockery will find the country ready to overlook any seeming discourtesy of that sort. And even Mr. Foster, we should think, would be relieved to be freed from the necessity of longer doctoring his reports and holding up appropriations, and would be willing to go before the Committee and make a clean breast of it. Certainly he can expect nobody to give serious attention to his estimates submitted to Congress on Monday, in view of the demonstration made by time and the event of the worthlessness of his former efforts in that line.

An interesting statement as to the bearing of the Democratic victory upon the future of cotton-manufacturing industries in New England has been issued by Durfee & Chace, bankers of Fall River, Mass., in answer to questions from some of their clients. They begin by saying that they "were supporters of Mr. Harrison and hoped for his reëlection to the Presidency"; but, having been defeated, they accept the decision of the majority, and propose to look at the situation as it is, from the standpoint of Fall River. In case of Harrison's reëlection at least six and possibly eight new mills for the manufacture of cotton goods would have been built immediately in Fall River, and there would

have been the same tendency elsewhere, while, as it is, these mills will not be built, at least for the present. But this will be a gain rather than a loss, for if the new mills had been built, "the result would have been, in twelve months from now, over-production and its resultant evils." On this point they say further: "The mills which would have been built will not be, probably because of an indefinite idea that the results of the election are inimical to manufacturing enterprises. So far, then, we shall be better off, for over-production will not follow so speedily." As regards future tariff legislation, Durfee & Chace ridicule the idea that any changes will be made which will ruin manufacturing industries, saying among other things:

"Mr. Cleveland is elected President of the United States, not of a section, and we have faith that he appreciates that fact, and that he will live up to it in the fullest sense. The Democratic party, which elected him, in this case, was and is a party of the country, and not of a section. Many of its members are manufacturers, engaged in various industries, among them the manufacture of cotton cloth, and their interest is the interest of the community and of the country. They accept the responsibility, and, without fear as to the future, we leave it to them, confident that they will work no harm to the cotton-manufacturing industries of New England."

The conclusion of these Republican bankers is that "such industries are to experience a further season of prosperity, not to be menaced by hostile tariff legislation," and they strongly advise holders of stocks in cotton-manufacturing corporations not to part with them at present, as, in their opinion, "they promise as good returns as any investment at the present writing."

Several Massachusetts newspapers have been sending scouting parties of reporters throughout New England to discover some of the manufacturers who, Senator Hoar says, are "in a state of great anxiety" about the future because of Mr. Cleveland's election. At last accounts no trace of even one manufacturer in dread of "ruin" had been found. A Bridgeport, Conn., carpet-manufacturer explained the failure of the hunt satisfactorily by saying that he believed "no one is anxious except those Republicans who fear that their predictions will not come true." So far as the carpet industry is concerned, this manufacturer said that the price of carpets had advanced 5 per cent. since election, that there was not a single instance in which capital had been withdrawn or production decreased since election, and that the manufacturers are "all waiting for free wool, knowing that it will enable us to enlarge our production and pay better prices for labor." This is substantially the verdict from all other quarters in New England. From the remote West a different and a sadder tale comes. In Helena, Mont., Russell Harrison's newspaper, which was seized by the sheriff at midnight on Election Day, was sold at Sheriff's sale on Thursday for $21,000. Its debts are said to aggregate $100,000, in Montana and the East. This is a genuine case of "ruin," due to the defeat of President Harrison and the withdrawal of protection. The venerable Senator Hoar ought to write the Home Market Club a special letter on this case.

Mr. J. Q. Smith, the veteran tariff-reformer of Ohio, gives the *coup de grâce* to the gigantic humbug known as the Wool-Growers' Association of that State. This concern, which has largely dominated the tariff policy of the country in recent years, and has actually dominated the Treasury Department in the matter of rulings on disputed questions, consists of three men named Lawrence, Delano, and Harpster. If they have any following at all, it has failed to show itself in any recent election. Nevertheless, they have held the bulk of the wool-manufacturers in abject terror by threatening to do a lot of things that they had no power to do. Six or eight years ago Mr. Smith, who was formerly Commissioner of Indian Affairs at Washington, and is himself an Ohio wool-grower, exposed this triumvirate very thoroughly in a pamphlet which had a wide circulation. He said and proved that it was a sham and a fraud so far as it assumed to have any considerable influence or following among the farmers of Ohio. Pretty soon an election came on in which a square test was made of the power and importance of the Ohio Wool-Growers' Association. This was in the election of 1889, when Foraker and Campbell were the rival candidates for Governor. The Democrats in this campaign were obliged to take ground against the wool tariff. Accordingly, Gov. Campbell went into the chief wool-growing counties of the State and made speeches declaring outright that wool of all kinds ought to be imported free of duty. "Now we've got you," said Delano, Lawrence, and Harpster; "now we'll show you where you stand." Instead of that they showed where *they* stood. Not only was Gov. Campbell elected, but he made his most conspicuous gains in the wool-growing counties. In the following year, 1890, the Democratic tidal wave carried the Ohio Congressional elections, the wool tariff being still an important issue. In 1891 the silver question came in as a disturbing element, and the Democrats lost the State. In the present year the tariff question was again uppermost, and, surprising as it may seem, and must seem to the triumvirate, the fourteen chief wool-growing counties of Ohio show a net Democratic gain of 653 even as compared with 1890. Mr. Smith thinks that it is time the Ohio Wool-Growers' Association should quit business. We think that they should at least take down the sign.

The prospect of the establishment of two or three new lines of steamers between this country and Europe, backed by American capital, suggests more than a mere growth of business and enterprise. It shows that a mortal blow has been struck at the old protectionist folly of supposing that any country is sufficient for itself, and that commercial intercourse with foreign nations is only a concealed form of treason. The best of it is, that the Republicans themselves were driven to acknowledge that their policy in regard to foreign trade and shipping had been sheer nonsense, and to lead the way to better things by practically repealing the law forbidding American registry to foreign-built ships. The exception made in favor of the Inman Line cannot in fairness be withheld from any other company applying for equal privileges. In fact, the promoters of the new lines from Newport News and Charleston expect, as they have every right to, that their steamers, wherever built, will be given American registry. When the future historian of the movement for free trade in the United States comes to look for the earliest legislative enactments breaking off the old shackles, he will lay great stress on the abandonment by Republicans of their doctrine of protection to American shipping. And he will have to record the grievous fact that Congressmen Boutelle and Dingley sat by in silence while the entering wedge was driven.

An analysis of the official vote of New Jersey shows the great strength of Mr. Cleveland across the North River. The total vote this year was 337,547, as compared with 303,801 in the Presidential contest of 1888, 260,893 in 1884, and 245,928 in 1880. Of the gain this year over 1888, Cleveland had 19,534 and Harrison 11,708, New Jersey doing better for the Republican candidate in one respect than New York, as she did not reduce his vote. The vote of the two parties in the last four Presidential contests is shown in the following table:

	Democratic.	Republican.
1880	122,565	120,555
1884	127,798	123,440
1888	151,508	144,360
1892	171,042	156,068

Werts, the Democratic candidate for Governor, received a smaller plurality than Cleveland in each of the eleven counties which he carried, and he lost Essex County by 1,186 plurality, while Cleveland carried it by 1,131. Kean ran behind Harrison in three of the ten counties carried by him. Werts received 3,785 votes less than Cleveland, and Kean 3,564 more than Harrison.

Gen. Dyrenforth has ended his rain-making experiments with a terrific bombardment of the heavens above Texas, which failed to produce even a drop of rain. It is said of the final "test" that it lasted from sunset to sunrise, that up till midnight the explosions were all upon the ground, that between midnight and day-

light they were entirely from balloons, and that the noise was heard for a distance of thirty miles. The sky remained perfectly clear till the balloon explosions began, when the "phenomenon" of clouds gathering immediately overhead was witnessed by a large crowd of spectators. Great hopes of a shower were raised, but the wind "soon seemed to change" and "seemed to counteract the influence of the explosions, for the clouds were driven back and dissipated." Gen. Dyrenforth was very much discouraged by this brutal conduct of the wind, but he sent up balloon after balloon with heavy explosives aboard, and soon a fresh batch of clouds appeared. "They seemed to come up from the southern horizon, and were laden with moisture to such an extent that a heavy mist set in which could be felt perceptibly." This mist continued for about twenty minutes, but that was all. "The efforts," says the chronicler of the experiments, "at precipitating rain from the clouds proved futile." There was a light sprinkle of rain at a neighboring point, but "the fall was too light to be measured by the rain-gauge." Although the "experiments were a dismal failure," assurance is given that Gen. Dyrenforth and his backers declare that the tests have "proved the theory of producing rain by concussion." They do not expect to obtain further results this year, but next year the General is going to abandon Texas and try the heavens above South Dakota. We trust that he will not be able to continue his silly work at the expense of the United States Government. The appropriation which Congress, at the suggestion of "Uncle Jerry" Rusk, made for the tests has been exhausted, and there is slight probability that a subsequent Congress will be capable of the folly of making another. Gen. Dyrenforth and "Uncle Jerry" should be permitted to lapse into obscurity together.

A correspondent writes to us to propound the theory that Edward Murphy, jr., is put forward as a candidate for the Senatorship simply to receive "the hot shot from the Cleveland forces," and on this assumption he bases the prediction that, when the time comes, he will disappear and William F. Sheehan appear in his place. We never like to close the mouth of a prophet, and accordingly place this prediction before the public for what it is worth. Our own opinion is that Murphy, according to all present appearances, is sure of the place, and one reason for thinking so is that the "hot shot" has not been forthcoming. If "the Cleveland forces" are cannonading him, they make no noise and evolve no smoke. The reason probably is that the Legislature is so completely Tammanyite and Hillite that it need not mind either Cleveland thunder or public opinion about the qualifications of a Senator.

Those who blame theologians for disputing about unreal abstractions will certainly find some ground for their complaint in the charges against Prof. Briggs, as now finally amended and undergoing argument. The first one of these turns on the question whether the reason is "a fountain of divine authority," and the second on the question whether the Church is a similar fountain. But what a fountain of divine authority may be is nowhere defined, and there might easily be twenty opinions about it in the Presbytery, so that days could be spent in debate before being able to fix the meaning of the terms of the charges. The third accusation against Prof. Briggs relates to the possibility of errors in "the original text" of Scripture. But this is an abstraction of the purest sort, the said original text being something which no man ever saw or will see, and of which it is not possible to make any affirmation whatever. Yet there is no doubt that the main controversy will be carried on precisely in this fog. As to the two points where a clear question of historic fact is presented—namely, the charge that Prof. Briggs denies that Moses wrote all of the Pentateuch, and Isaiah all of the book that passes by his name—we must suppose that the prosecution brought them in as mere makeweights, it being scarcely possible that they would seriously attack opinions supported by a growing weight of critical authority.

To treat the late Jay Gould, as some of our contemporaries have done, as a man who achieved his notoriety and acquired the enormous power which he wielded in the financial world under ordinary conditions, is to do our civilization great injustice. He was in reality as much the product of anarchy as Napoleon—to whom he is often compared—or Rosas, or the Greek Hadgi-Stavros. He saw his opportunities and made his beginnings in a state of things in which all the institutions of a civilized society—the Legislature, the Judiciary, the Exchanges, the means of carrying on commerce and even currency—were made to take part in the semi-military contest of two speculators for the possession of a railroad, and in which a Boss, and not a Buccaneer, was preparing to take possession of a great city and loot the treasury, not on the Spanish Main, but in a Christian Protestant Anglo-Saxon State. One of Gould's own earliest exploits was storming with an armed force a tannery which was defended by his business rivals with another armed force, in regular twelfth-century fashion. In short, the community was, between 1865 and 1873, in that revolutionary condition in which Tweeds, Fisks, and Goulds surely appear, apparently in obedience to a law of social development. As you sow so shall you reap, say the Scriptures. Thorn-trees produce thorns and fig-trees figs, and to stand round Gould's grave now and treat his career as something wonderful is to misunderstand the moral government of the world. Every great modern city—as we have often said in speaking of Tammany—swarms with men capable of making very good Goulds, Fisks, Tweeds, Kellys, and Crokers, under favoring social conditions. Create the needed environment, and you can have them anywhere by the dozen—keen, alert, courageous, resourceful, unscrupulous, ready to use, for either rule or ruin, every weapon which the law and the meanness or greed of their fellow-men put into their hands. It is a sorrowful thing to have to give up whole pages of a newspaper to a chronicle of the exploits of such men. They ought properly to be recorded only in popular mediæval ballads. They are sad anachronisms in the days of "public opinion" and a free press. But the sorrow they cause has its crown when they pass their later years in tranquil prosperity, and go down to the grave with more or less of the admiration of the generation which comes after them, and which has only a vague, if any, memory of the way in which they began their struggle, and sees how far success has gone to palliate or condone their enormous offences against civil society. Their type is to-day the worst enemy with which democracy has to contend—the enemy which, if the great experiment fails, will be the cause of the failure.

The jaunty tone of the daily despatches from Brussels, describing the progress of the Silver Conference, indicates that some very sanguine person has a hand in their composition, possibly Senator Jones. No matter what happens in the Conference, we are always assured that the "American delegates regard the situation cheerfully." When the Rothschild proposition was made, the American delegates were "cheered" by it, looking upon it as a "recognition" by the monometallists of the merits of their claims. When the Rothschild proposition was rejected, the American delegates were again "cheered," declaring that the "way was now cleared for a full discussion of their bimetallic plans in accordance with their original programme." When the British delegates opposed long debates in the interest of speedy adjournment, and the British, German, and Austrian delegates threatened to withdraw at the latest by the middle of December, the American delegates made themselves more "cheerful" than ever by resolving "not to yield to the application for hasty adjournment." In explanation of all this cheerfulness, it is added that the "delegates are having a pleasant time socially," and that "dinners and other entertainments are of nightly occurrence." It is possible that the despatches containing all this "cheer" are written at the close of the "dinners and other entertainments." We shall look for a grand outburst of "cheerfulness" when the Conference collapses.

THE BRUSSELS CONFERENCE.

A SUNDAY newspaper publishes an interview with our Mr. Jones, Senator from Nevada and a delegate to the Brussels Monetary Conference. Mr. Jones, if he is correctly reported, is embarrassed in his great work by the comments of the American press on the proceedings of the Conference. The American delegates, he says, went to it in good faith to promote international bimetallism. They found that Europe was not in favor of that, so the Americans were disposed to take the next best thing—that is, to make a compromise of some sort. What that compromise may be—what may be the best terms that Europe will agree to short of free coinage—is still undetermined; and while the debate is still on, the American newspapers keep up a running fire of comment implying that the whole Conference is a humbug. "When we are doing our best *for our country*," says the Nevada Senator, "the American press steps in and derides our efforts." Then Mr. Jones becomes down hearted and asks: "What can you expect other delegates, acquainted with the comments of the American press, will think? The result is inevitable."

For one member of the American press, we are constrained to reply that the result was inevitable from the beginning. That Europe would not have international bimetallism was known beforehand. She had been interrogated on that point twice already, and had answered in the negative. There was not the least reason to suppose that any nation, great or small, had changed its mind. On the contrary, three of them (Italy, Rumania, and Austria-Hungary) had abandoned the bimetallic or the single silver standard since the last Conference was held in 1881. We have our opinion of the reasons for calling the present Conference. We need not say what those reasons were, but the expectation of international bimetallism was not one of them. What then? Mr. Jones says, "The next best thing."

What is the next best thing to international bimetallism? From the Nevada point of view, it is the purchase of large quantities of silver by somebody, the larger the better. Mr. Jones and his fellow-Senators from the mining camps managed two years ago to get the Government purchases doubled, but the result did not answer their expectations. The price of silver went down more rapidly than it had ever gone before. So hopeless seemed the task of bidding up the price artificially that one of the great political parties protested against it and demanded the repeal of the Sherman Act, and Mr. Sherman himself had advised its repeal. Here was a threatened crisis in the silver market. "The next best thing" was to get Europe to help us to bolster up silver, and especially to commit us to our present policy for a definite period of time. This was the mining point of view exactly, but it met the expectations of no other class. It did not satisfy the free-coinage men who are not silver-producers. Still less did it satisfy those who believe that the gold standard is the best one and the only possible one for us. The latter class would be willing to accept international bimetallism as an experiment, if it were attainable, but they do not think that the necessary number of nations will ever agree to it. Silver-buying on Government account they look upon as sheer waste and as a terrible thing, fraught with present suffering and future disaster. That policy has been in force now nearly fifteen years, and no words can express the shuddering and loathing with which it is contemplated from day to day by the great bulk of our financiers and instructed men of business. They know that the time must come when silver buying will be stopped, and that the silver crisis will grow in the meantime by what it feeds on.

The American press, therefore, faithfully represents the American people—all the people except the silver-mining class (and a part of these, too)—when it says that the next best thing to international bimetallism is to adjourn and come home. There is no other next best thing. Mr Dana Horton, a real bimetallist, is on hand to tell them that. If he does not agree that the next best thing is to take an early passage for home, he will belie everything he has ever said before. We have another friend, a real friend, there, in the person of Mr. Bertram Currie, who told the truth when he said that the United States had undertaken the endless task of Sisyphus and ought to drop it in their own interest and in the interest of the civilized world.

As we bring this article to a close, the following account of recent silver discoveries in Colorado fixes our attention. It is from the *Sun* of December 5:

"DENVER, December 4.— The new discoveries at Creede have had a stimulating effect at that prosperous camp. Persistent prospecting is daily establishing the extent of Creede's mineral belt. The Amethyst is being worked with unprecedented activity, while from the Little Maid and Cleopatra adjoining come most encouraging reports. In the Atlanta a vein has been encountered at a depth of thirty-five feet, which has shown fifty ounces of silver, while further in was encountered a cross feeder of spar and amethyst quartz. The Last Chance and Holy Moses continue to ship many tons of ore, the returns for which are exceedingly gratifying."

Creede is the place where silver can be produced in large quantities at twenty-six cents per ounce. We venture to say that the Last Chance and Holy Moses will do their whole duty and meet any requirements of the Brussels Conference.

FRENCH VIEW OF THE CONFERENCE.

M. CUCHEVAL-CLARIGNY, a leading French writer on financial topics, is publishing a series of articles in the *Revue des Deux Mondes* on the Latin Union and the silver question. The second of the series, which appeared in the last number, deals more especially with the Monetary Conference now sitting, but was, of course, simply a prospective view of it, having been written before the meeting. His forecast is interesting.

After giving the history of the previous conferences convened at the request of the American Government, he asks, What reason is there for supposing that the present one will have any more success than its predecessors? The answer to this question, he says, is to be found in the subsequent acts and declarations of the various Powers which took part in them. He shows that Germany, Italy, Austria, Russia, and England have all, since 1881, through their Ministers of Finance, distinctly intimated that there was for them and their respective countries no silver question at all, and that they attend the conferences asked for by the United States simply as a piece of courtesy due to a great nation. He further quotes the protests against an accumulation of silver made in their messages by Presidents Hayes, Arthur, Cleveland, and Harrison, and continues thus:

"How could it be otherwise? Is it not a chimerical enterprise to try to compel people to use a kind of money they do not like when they have a better kind within their reach? Why have Americans remained deaf to the advice of their Presidents urging them to withdraw their paper money from circulation? Would not the substitution of silver dollars for greenbacks have offered them a sufficient outlet for the produce of their mines? Why are they straining their Constitution by keeping $300,000,000 of paper money afloat? Simply because the greenbacks—which have been at par in gold since 1879, have the guarantee of the Federal Government, and are legal tender in the payment of debts—have all the advantages of convenience and security which are offered to us by the notes of the Bank of France. As to the silver certificates, they constitute a second kind of notes, with a metallic guarantee lying in the Treasury vaults; and they have entered into circulation to the extent of $240,000,000. Add these to the gold certificates, which offer the same facilities, and to the bank bills, and you perceive that the United States have four kinds of currency, representing five thousand million francs, while their circulation of silver, of their own free will and in obedience to their manifest preferences, is not more than three hundred million francs, or five francs per head of population. In the presence of these facts and figures, is it possible to take the American proposals seriously? Are they anything but, as Mr. Luzzatti [the Italian Minister of Finance] intimated, an attempt to unload on Europe a mass of silver dollars, created by useless and reckless coinage?"

The fall of prices which some ascribe to the scarcity of gold, he ascribes to overproduction, more particularly in the iron, cotton and woollen, and silk industries. He then proceeds to ridicule the notion that the world needs more coined money as an instrument of exchange, in view of the enormous masses of coin and bullion now lying idle in the banks, and more particularly in view of the tremendous advances made in all the civilized countries in the use of checks, banknotes, bills of exchange, and other instruments of credit, in the work of trade and commerce. In truth, the most striking phenomenon of the industrial world to-day is the growing disuse of the precious metals as money except for small change. The growing tendency of all civilized nations now is to do business,

both domestic and foreign, by setting off debts against debts, which may fairly be called a new modern art, and makes the yells of the bimetallists for more coin increasingly absurd.

The report of the Bank of France for 1886 showed that the proportion of bank-notes used in the transactions of that year was 52 per cent., of other instruments of credit 43½ per cent., and that of coin only 4½ per cent. Mr. Birch, a London financier, was so much impressed by these figures that he asked the directors of the Bank of England to give him similar ones, showing the part played by the three different instruments of exchange in their operations in one week taken at random. They gave him the results of a daily average of £4,445,000, which were: drafts and checks 87½ per cent., banknotes 12½ per cent., and coin ¼ of one per cent.! There was one day in which, in a sum total of payments amounting to £4,775,593, the part played by coin was only £4,632. The private banks in England have the same story to tell. In 1887 the part of coin in these transactions was 4½ per thousand. In 1880 Mr. Pownall estimated that the coin used by ten London banks was only 9½ per thousand. In 1881 the number of checks drawn on the country banks of which Glyn & Co. were the London correspondents was in three days 19,950, of which 2¼ per cent. were under a pound sterling. In 1887, in the corresponding three days, the total number of checks was 35,090, of which 4 per cent. were under a pound.

The same process is going on rapidly in every country. Even the bill of exchange is being to a considerable degree supplanted by telegraphic orders—that is, money which used to be sent across the ocean in boxes or banknotes or drafts, is now sent by telegraphic set-offs. A merchant in Hong Kong doing business with New York settles the transaction through the telegraph just as promptly as if he were himself face to face with his customer in Lombard Street.

M. Cucheval-Clarigny is sarcastic about the notion that the supply of gold needed by the great nations is falling short. He quotes Mr. Leech as showing that the production of gold was 140,555 kilogrammes in 1886 and 188,531 in 1891. M. Ottomar Haupt, a great authority on metals, says the gold coinage of the world, which was 494,000,000 francs in 1886, was 650,000,000 in 1887, 702,000,000 in 1888, and 879,000,000 in 1889. The amounts in all the banks and in private hands are also enormous. With these figures in the pocketbooks of the European delegates, the task of the Americans was of course hopeless from the beginning.

SUNDAY AT CHICAGO NEXT YEAR.

The reassembling of Congress brings into prominence the question how Sunday shall be treated at the Chicago Exposition next year. Senators and Representatives will be compelled to define their position, as the issue is bound to come to a vote. The President of the Board of Directors has written a letter on the subject, copies of which have been sent to every member, stating the attitude of the management and presenting their arguments for Sunday opening. They maintain that the closing of the Fair on Sunday would deprive a host of people of an opportunity to enjoy the spectacle which ought to be granted to all who wish to improve it, and declare their own belief that a majority of the American people are in favor of granting this opportunity. They propose to "stop all machinery, merchandising, and unnecessary labor," to require the services of as few attendants as possible, and to enforce a rule that no employee shall work more than six days a week, besides furnishing facilities for the conduct of religious services.

We contend that the Directors are entirely right in believing that a majority of the American people will favor such a system of Sunday opening. The demonstration against it which furnished Congressmen an excuse for their votes at the last session, was largely a fictitious show of strength. It was chiefly a matter of paper. Printed petitions were distributed all over the country by organized effort, and the national weakness for signing any sort of a petition sufficed to secure a great number of names. A smaller expenditure of energy would easily have secured a larger and more intelligent showing on the other side.

The arguments in favor of closing will not stand examination. The one which is most relied upon is altogether out of date—that freedom to view the treasures of the Chicago Exposition will be "the entering wedge" for the introduction of "the Continental Sunday." The truth is, that this wedge was inserted many years ago by two of our most conservative cities—Boston and Philadelphia—and driven in a little deeper more tardily by New York, when public libraries, museums, and art collections were thrown open for the enjoyment of the people on Sunday. This experiment has now had a thorough trial in each of these three cities, and not one of the predicted evils has been realized. In no case has it resulted in any movement towards turning Sunday into a day of work or of riotous pleasure. The argument for keeping the Chicago Exposition closed on Sunday is simply an argument for again shutting the doors of every museum, library, and art collection that is now open on that day—and such an argument would be overwhelmed with ridicule in Philadelphia, Boston, or New York.

Indeed, the whole argument for opening the Chicago Fair on Sunday is simply the same argument that has been endorsed by public sentiment wherever it has been put in practice on a smaller scale. The opening of the Metropolitan Museum in Central Park disturbs no New Yorker who prefers to spend the whole of Sunday in religious worship or meditation, or who considers it a sin to gaze upon a work of art on Sunday. All that such a person has to do to avoid contamination is to stay away. In like manner, the visitor to Chicago who wants to spend the day in church going or in religious reading in his room will not be annoyed by those whose tastes lead them to prefer other employment of their time.

In fact, it would be hard to imagine a method whereby those who differ in their views as to the best way of spending Sunday can be more easily accommodated than by opening the grounds for those who choose to enter. Nobody proposes to require any person to visit the Exposition on that day, so that no one who has conscientious scruples against so doing will need to violate them—nor, indeed, to see them violated by others. On the other hand, nobody who considers a visit to the grounds the most profitable way of spending the day will be prevented from following his predilections. The Sabbatarian will not be driven into the Exposition against his will, and the liberal will not be barred out of it against his will. Each class will spend the day as it thinks wisest, and neither will disturb the other.

The national sentiment in favor of fair play is altogether on the side of those who advocate Sunday opening, and it will respond emphatically when an appeal is made to it. The plea of the Sabbatarian that nobody shall be allowed to visit the Fair on that day because he, the Sabbatarian, does not think he ought to go, is a plea for ecclesiastical despotism which is altogether out of date in this country and this age.

We repeat that the directors are right in holding that a majority of the people are opposed to Sunday closing. As the will of the majority ought to prevail, Congress should at its approaching session revoke the ill judged prohibition of such opening which it was persuaded to approve at the last session. No foolish pride of consistency should prevent Senators and Representatives from undoing a hasty blunder which it would be almost a crime to sustain.

THE LATEST "HILL-MURPHY CONSPIRACY."

Nothing has been more remarkable in the career of David Bennett Hill than his consistent inability to comprehend the size of the United States. Because he was able to build up a political machine which he could control absolutely in the State of New York, he was deluded into the belief that, by applying the same methods to the whole country, he could force his party to throw over its strongest candidate for the Presidency and nominate him in his place. The National Democratic Convention repudiated this idea with such contemptuous emphasis that one would have supposed that even Mr. Hill would have learn-

ed a lesson from it, but he did not. He began at once to set on foot a plan to defeat the election of the Convention's nominee unless the latter should first consent to sell himself to the Hill Machine as the price of the electoral vote of New York. This plan failed also, because of the indignant refusal of the nominee and because of the people's determination to elect him.

No experienced student of election returns can examine the figures from this State and not become convinced that the Hill-Murphy Machine did the most it could without detection to prevent Mr. Cleveland's election. In all parts of the State above the city limits the trace of the Hill knife is discernible. Mr. Cleveland's total vote, which is known to have been increased by the accession of thousands of men hitherto Republican, falls off in every strong Hill locality, and falls far below what it ought to have been and would have been had the full Democratic strength been polled for it. Many of the Hill Democrats refrained from voting, and many others of them voted for Harrison in 1892 as they did in 1888. Indeed, there is good reason for believing that had there not been a straight issue on the Presidency, with no Governorship at stake at the same time, the State might have been sold to the Republicans by Hill this year as it was in 1888, when, according to the *Tribune*, "Hill succeeded only because he was able to sell a Presidency for a Governorship." The Hill Murphy Machine did little or nothing to help Cleveland in the State, but devoted all its energies to the election of a Legislature which should send Mr. Murphy to the United States Senate.

Having failed first to prevent Mr. Cleveland's nomination, and second to defeat his election, Mr. Hill proposes to take Mr. Murphy with him into the United States Senate, and there prevent Mr. Cleveland from exercising his powers as President. In other words, having been repudiated by his party in national convention and at the polls, Mr. Hill presumes to dictate in the Senate the policy of his party, and of the President whom the party has nominated and an overwhelming majority of the people have elected! He and Murphy propose to sit in the Senate and to oppose all of President Cleveland's appointees whom they do not like, and to appeal to the Democratic majority to sustain them in that course on the ground of "Senatorial courtesy." They pretend to believe that in this way they can tie the President's hands completely, block the course of his policy, and force him to surrender to their wishes! Mr. Hill has made many miscalculations, but none comparable to this. It is very clear that he will never comprehend the size of the United States.

That this latest conspiracy will fail as disastrously as the preceding one did is inevitable. Mr. Cleveland was nominated and elected because of his strength with the people—a strength which had been manifested in many ways, but which had not formally been put in evidence. The elections have thus put it in evidence in a manner which no man can question. He is the President-elect of the whole people, and would have been chosen even had the Hill-Murphy Machine been able to deprive him of the vote of New York. He will sit in the White House with a power behind him incomparably greater than that which made Mr. Hill's former conspiracies so futile. As the Democratic majority in the Senate after March 4 will not be composed entirely of imbeciles, it is scarcely necessary to speculate as to the probability of their choice between a discredited and rejected politician like Hill and a President like Cleveland, who not only has the people behind him, but all the offices at his disposal. The people would very soon make it known to their Senators on which side they stood in such a contest.

So far as this great State is concerned, the spectacle which it will present to the country will be pitiable enough. It has furnished the country with the most popular Presidential candidate that it has had for years, and the country has elected him with delight and by a most significant majority. Yet, having done this, the State is to be represented in the Senate by two political jobbers who are going there for the express purpose of trying to "get up a row" with the President over the distribution of the offices. Neither one of them has any other conception of his office than as a basis for the distribution of spoils. Not an honest or public-spirited idea has entered the mind of either one of them throughout his political career. Both are as incapable of representing the great commercial and industrial interests of the first State in the Union as they are of comprehending the forces which have baffled all their previous conspiracies against Mr. Cleveland and are foreordained to baffle this their final and weakest one. It is an unspeakable misfortune that the terms of both in the Senate will continue long after the Machine which has put them there to belie the intelligence and morality of the State, shall have been destroyed, as it is certain to be in this final struggle with Mr. Cleveland.

THE FRENCH TROUBLE.

It must be borne in mind that it is not the Panama Canal scandal alone which has overthrown the Loubet Ministry and has plunged French politics into such disorder. The Panama scandal has simply brought to the boiling point the public indignation over a long series of weaknesses and failures on the part of the Ministry in dealing with the Socialists and Anarchists. The Panama charges are being pushed because the Ministry was already discredited by the multiplied signs of its incapacity to meet the growing audacity of the Socialist organizations and the trades unions, and the growing tendency to legislate in their favor and against the employer class.

Some of the illustrations of this which M. Leroy-Beaulieu furnishes in the last number of the *Économiste Français* may well be called alarming. The trades-unions in France are recognized as corporate bodies by law, and have been committing acts of the grossest oppression in excess of their legal powers or rights. The Court of Cassation had recently to reverse a decision of the court below denying relief to a non-union workman to whom the employers of the whole region had been formally forbidden by the local union to give work. In the Department of the Nièvre, the unions have actually imposed a tax on non-unionists, and have compelled the employers to stop the amount out of their wages. A Labor Exchange (*Bourse de Travail*) has been built and furnished luxuriously by the municipality in Paris—a "veritable palace," M. Leroy-Beaulieu calls it—and it receives an annual subvention from the city treasury. Its ostensible aim was to supply a meeting-place for laborers in search of employment or of information about work and wages. It has in practice become a centre or headquarters of revolutionary politics, in which the Anarchists hold meetings and denounce Society and Government and applaud law-breakers. The proceedings in it have for several years been a great public scandal, but no Ministry has had the courage to shut it up or reform it.

The Carmaux strike was the legitimate outcome of this governmental feebleness. There the strikers took possession not only of the mine, but of the town. They elected one of the strikers Mayor, and he set the authority of the Prefect at defiance, refused to allow his proclamations to be posted, mocked at the police, and appeared at the head of processions carrying the red flag of the Commune and threatening the "bourgeois" with death and spoliation. All the while, too, several members of the Chamber were on the ground, encouraging the strikers and denouncing the gendarmes and the troops. On the top of these things have come the explosions of dynamite in Paris and the terror inspired by dynamitard threats not only among the officers of the law, but among persons who live in the same house with them. The tenants in one apartment-building have left it because the Procureur-Général who prosecuted Ravachol lived there, and a dynamitard deputation has actually had the courage to go to a newspaper office and warn the editor that they would put him on their black-list if he did not stop denouncing them.

M. Leroy-Beaulieu sums up his description of the situation as follows:

"The evil in France is a general evil, which has greatly grown within a few years, and particularly within a few months. It is both political and social. From the political standpoint it consists in the fact that the Government is composed of men who cling to the vain title of 'Minister' while failing to discharge its duties, who capitulate every day both wholesale and retail, retain no effective authority and

contribute more and more to the weakening of justice, police, and administration. From the social standpoint the evil consists in the overflow of an excessive and frivolous sentimentalism, very like that which was the fashion towards the end of the eighteenth century, and disregards the natural laws on which both the production and distribution of products rest, and in constant and increasing concessions to Socialism, both in word and deed, and in the adoption of the Socialistic formula by a crowd of featherheads and popularity-seekers."

The result has been the diffusion of the old alarm about property and order which put France under the foot of both the first and the second Napoleon, and a renewal of the doubts about the power of a republic to deal with the forces of anarchy which made Boulangism possible. Why it is that the Republic is exposed, every now and then, to these doubts it is hard for foreigners to understand. There is no country in Europe in which property is more widely diffused than in France, or in which the great body of the people, especially the farmers, are readier to sacrifice political liberty for the sake of security. The Socialist element is but a very small part of the French population, and is confined to the large towns. Why, under these circumstances, the Ministers are afraid to be vigorous and peremptory does not appear on the surface of French politics, and can be explained only by the readiness of the Conservatives to join with the extreme Radicals in the Chamber whenever there is a chance to bring Republican institutions into discredit.

THE ITALIAN ELECTIONS.

ITALY, November 15, 1892.

IN Italy, as in England and in America, the electoral struggles are over. In Italy, as in America and in England, the champions of liberty, economical and political, have won the day. With the affirmation of a strong liberal majority there seems a chance of a strong, durable Government. The present Ministry has had the open support of the men who have never deviated from their liberal principles, to whom are due the great liberal measures of the last eighteen years. Around these have rallied some of the ablest and purest names in the country. Though Crispi himself has not in so many words pronounced in favor of the Government, he has offered no opposition, and his paper, the *Riforma*, warmly praised the ministerial report which accompanied the decree for dissolution. Nor could Crispi do otherwise. He objects to the pressure of the ministerial agents during the elections, which has excluded some of his warmest friends and supporters, but, alas! Crispi himself adopted the same system to his cost, even as all his predecessors and successors, from Cavour to Giolitti. In the main, Giolitti's programme is a modified edition of Crispi's own, and it is clear that many of the salutary reforms proposed and carried by Crispi, but left in abeyance or neglected or modified by Rudini, will now be taken up again and continued and carried out to their full extent. I allude especially to the reform of the charitable institutions, to the reform of the communal laws, the pensions for old age, the organization of co-operative societies of bona-fide workingmen, internal colonization rather than African extension—everything, in short, that shall end to increase production and adjust distribution, by which alone can the Italians hope to make ends meet and apply the wealth of the country, never yet much to boast of, to its own increase through agriculture and industry in the country itself. The deficit is placed at 28,000,000, and no promises are made that this can be suddenly filled up, but the expenses are being kept under, and the income rather than the land-tax is looked to for an increase of receipts. There is to be no fresh taxation, nor any increase in old taxes, until all other methods have been exhausted. There is a proposal for a Government monopoly of lucifer matches and petroleum which would at most disgust some noted speculators, but would not increase the price of the articles to the public.

Of course any rupture or change in the terms of the Triple Alliance is not contemplated. The expenses of the war budget are thus stated in round numbers, for late years: 1887-8, 318,000,000 lire; 1888-9, 405,000,000; 1889-90, 307,000,000; 1890-91, 290,000,000; 1891-92, 260,000,000. Next year we are to spend only 241,000,000. The expenses of the navy, which in 1887 stood at 114,000,000, are this year to be 105,000,000. But what is more satisfactory is, to know that the hopes of the future are to be placed less in an enormous standing army than in the general military education of the people in the schools and a thorough system of national rifle associations; that the term of service is to be reduced, so it is hoped, from three to two years; and, that while the *cadres* are to remain intact, fewer soldiers will be kept under the colors. With the aforesaid military instruction at home there will still be an efficient army to be called on in case the hopes of peace should be blasted and the nation summoned to defend its frontiers. This, you see, is a very different attitude towards the *triplice* from that assumed four years since, but then the state of Europe is also changed. The attitude of France towards Italy is modified; the grand meeting of the fleets at Genoa was cordial and hearty, and there is some chance of the resumption of commercial relations between the two countries, as France still needs Italian wines and Italian raw silk, and, with the new commercial treaties with Germany, Switzerland, and Austria-Hungary, it may be that the French will see their way clear to deal directly with Italy rather than receive her wines, etc., through a roundabout route. At any rate there is a truce to the press warfare between the two countries, and the present Ministry and Zanardelli especially will do all that lies in human power to avoid giving offence to their supersensitive neighbors. What the country wants is breathing space, and the electors have very decidedly taken as their war-cry, "Confound the factions!"

If the present Ministry should succeed in carrying through certain reforms in the system of procedure, insisted on by Zanardelli when he propounded his penal code, a long step will be taken towards the repression and the prevention of crime. Police reform and the swift administration of justice, the reform of ordinary prisons rather than the erection of "model penal establishments," would go far to save young offenders from growing old in crime by contact with vice and infamy. There are sentences in both the ministerial programme and in Zanardelli's wonderful speech which imply that they really mean to take in hand the question of land tenure and land reform. While thousands of hard-working peasants are starving or dying of pellagra (the disease produced by exclusive feeding on maize) or from malaria, thousands of acres of land are lying uncultivated and become pestilential sources of fever, ague, and death. Under the head of "Social Legislation," Zanardelli says, "The culture of the soil ought not to meet with obstacles in that inflexible proprietorship which the old *jus abutendi* maintains, to the detriment of all social progress, which renders internal colonization impossible, whereas this system would not only attach the peasant by his material interests to the general interests of the country, but would immensely increase the wealth of the nation." How often has this truth to be repeated before an attempt is made to put it in practice? Were a party, supported by the Government, to attempt such a colonization in good earnest, I do not doubt that funds would be forthcoming from wealthy persons in Italy, for it is a fact that the sums subscribed and bequeathed for charitable purposes increase yearly. Only yesterday a wealthy Israelite of Milan left 15,000,000 of lire for the foundation of a labor school in the city for the unoccupied poor, without any distinction of religious denomination. With regard to ecclesiastical policy the old Left is true to its flag—liberty of conscience for all, the church property remaining to be used for the maintenance of parish priests, but the Vatican to be kept from the power to harm. The proposal is made to restore to the crown the right of revoking the *exequatur* and *placet* whenever the prelates, abusing their office, preach sedition and excite the ignorant masses against the civil power. If this measure were carried out, half the bishops and archbishops would have to mind their manners or lose their temporalities. This, one of the fundamental principles of the old historical Left, reappearing on the scene, is another sign that the "transformism" of late years is disappearing.

The extreme moderates and the ultra-radicals who have decried the Triple Alliance and pursued a policy of obstruction are nowhere. One of these, a popular poet and a man of considerable ability, having no chance in Milan, which returned him with overwhelming numbers before, has been defeated in the little college of Belgiojoso. Likewise, Imbriani, whose constant interruptions and impertinences turned the House into a beargarden, has been defeated in three colleges. Unfortunately, they have carried down in their fall some of the real champions of liberty and of popular progress—the great sculptor and true democrat, Ettore Ferrari, the workingmen's candidates, Maffi and Armirotti; and this is a dire misfortune. Costa, the representative of the Socialists, is also defeated, but other Socialists have succeeded. Some capital additions have been made to the radical party, and there is a faint hope that once again the extreme Left, instead of being an undisciplined, useless—nay, baneful—element, will return to its own mission as exercised of old under the leadership of Bertani, Avezzani, and other makers of Italy, and will retake its position of advanced sentinels of liberty, sustaining the Government when its measures are those of right and progress, and stimulating it to activity and courage when it shows hesitation or fear. The moderates have made a desperate fight, and, with the assistance of the Catholics, who, though they do not yet dare to present themselves as candidates, nevertheless vote plentifully, have secured a certain number of seats; but some of their magnates have fallen ignominiously. Bonghi, who stood in three colleges, has not succeeded in any; and to-day his fate will be

decided in the one college of Agnani, where he is in ballot with his competitor.

One defeat has caused genuine grief to all patriots, without distinction of party, and that is of Alberto Cavallotti, almost the last survivor of the prisoners of the Spielberg—a man who has fought for religious and political liberty in the foremost ranks; one of Crispi's supporters, though a moderate in past times, and until now always elected almost without opposition in the same college of Venetia. His reëlection was combated in a circular letter of the archbishop of the diocese, who recorded against him an able speech showing the encroachments of the Vatican on the liberties of the State. The clericals fighting with the moderates, Cavallotti succumbed. He will be appointed Senator as a tribute to his unblemished patriotism. This is one of the results of the return to the uninominal college, as is called the old system abolished in 1886 and replaced by the *scrutin de liste*, or vote by all the electors of a single province for all the Deputies to which the college is entitled. This change was clamored for by those who believed that political corruption had increased under the new system, but their provisions were unsound. It is much easier for the prefects to prevail on the syndics and on the most influential persons in one college to vote for this one candidate and against that, than to succeed in the same trick when four, five, or even seven candidates are to be elected by the entire electoral body. Again, the champions of the "one college one candidate platform" used another argument. Said they: The *scrutin de liste* has lessened the number of voters; the people don't care for a list of names many of which they have never heard of, hence they don't take the trouble of going to the voting-hall—and with seeming reason they quoted the affluence of electors in 1876, which amounted to almost seventy-five per cent. of the whole. But in that year, as until 1882, the suffrage was restricted to 600,000 voters; now the electors amount to over three millions. Then, too, 1876 was the year of the fall of the Moderate party and the advent to power of the great Liberal party, for the first time since the constitution of the kingdom of Italy. Also, it is generally admitted by his friends and foes that Nicotera, Minister of the Interior during the first elections, did not use the coercion of his predecessors and successors, but really left the country free to choose its own representatives. All this would account for the increase of the voters; but, since the extension of the suffrage, the attendance at the urns has considerably fallen off. In 1885 it was fifty-eight per cent., in 1890 it was fifty-three per cent. In that year, you will remember, Crispi obtained an enormous majority, which, without rhyme or reason, broke up two months after. Last Sunday the attendance at the voting-halls did not throughout the country attain to fifty per cent. Hence nothing has been gained by the return to the uninominal college, as far as national dignity and electoral purity are concerned. A minor attempt to lessen bribery and corruption has brought ridicule on the clumsy methods adopted. It was affirmed that many electors, instead of voting themselves, sent proxies; so by the new law no one was to be allowed to vote who could not prove his identity to the sitting committee. Hence the most absurd scenes ensued. The present Government, recognizing the evil effects of the measure, has agreed to abolish it; but meanwhile it has served its end as an electoral manœuvre.

As yet the attitude of the Southern Deputies is said to be decidedly favorable to the Government. It is not yet clear what attitude Nicotera will assume in the House. He has, during the elections, supported many of the candidates devoted to Crispi. The programme of the present Government is almost a facsimile of that presented by the first Ministry of the Left, of which Nicotera formed a prominent part as Minister for Home Affairs. That he should have accepted office with the moderate, Rudini, was considered an error by his friends; but no one accuses him of having abjured his Liberal principles. To-morrow the Chambers open, and when the elections are sanctioned or cancelled, we shall see how the tide sets in. J. W. M.

P. S. The ballotings are over, and the results add to the Ministerial majority. But numbers of those who won their seats as Ministerials are already clamoring for benches in the Centre, in that neither "t'other nor which" portion of the House against which Zanardelli launched the Biblical anathema, "And because thou art neither cold nor hot," etc. Nicotera has published an indignant letter against "the more than usually indecent interference in the elections." Bonghi has not succeeded. Sicily, out of fifty-two Deputies, sends but five moderates, with four radical Socialists; the rest all for the Ministry. Now as Sicily is nine-tenths *Crispino*, it is certain that Crispi's influence has not gone against the Government.

CONTINENTAL TRAVELLING—AND IRELAND.

ROME, November 20, 1892.

ONLY when you have travelled for some months do you begin to realize the extent of the floating population of tourists spreading everywhere over the Continent. As summer and autumn visitors, German-speaking people now apparently outnumber any other. As more or less permanent residents, moving northwards at the approach of summer and southwards at the approach of winter, Britons and Americans are certainly more numerous. The observer must often reflect where this great flood of travel is to end, what are its effects likely to be on the countries visited, on those who travel and on those who remain at home. The influence on the native population, where a large number of tourists temporarily reside, cannot be essentially good. Judging by my own observations, however, I believe the average results, so far as yet apparent, among the Swiss and Italians are less demoralizing than those among the inhabitants of tourist resorts in Great Britain and Ireland. These "foreigners" are less grasping than our insular population; persons with an imperfect knowledge of the language are less imposed upon, less at a disadvantage, than they would be with us. The ease with which so many can now absent themselves from home life must have a considerable influence, acknowledged or not, on those at home who cannot travel. Formerly, whatever were their different means and conditions, the lives of all flowed on from cradle to grave very much together. What affected one more usually affected all. Now that so large a proportion of the middle class can avoid the evils of crowded town life, that so many of them can indulge in a summer trip, that so many can flee pestilence or can at will change their skies, it is inevitable that the stay-at-home masses, chained to one spot, should more and more demand the right to decide the laws and conditions under which they are obliged to live.

The ennobling and educating effects of travel on most travellers for pleasure nowadays are on the whole doubtful. To have travelled by no means implies at present increased cultivation of mind, as it did when privations had to be endured to attain its benefits, and when books were less accessible than they now are. Many a "school-marm" who never leaves her own district, many a mechanic who can rest only factory holidays from his labor, is better informed, has more real knowledge of the inner life and history of the nations, than numbers of individuals who float round in ocean palaces and sleeping-cars, and return to fill their rooms and astonish their friends with knicknacks, photographs, and antiques (pseudo or real) from foreign lands. The average tone of thought and conversation at Continental hotels and boarding-houses, the average attitude of mind towards home politics and towards the inhabitants of the country visited, the average spirit displayed in the Continental papers meant for circulation among British and American residents, are the truest gauge of what that tone of thought, that attitude of mind, that spirit generally is; and, so estimated, they seem neither broad nor elevated. I know no Continental nation more deserving of our sympathy than the Italians, or making more heroic efforts to reverse an unfortunate past, no nation that has more belied the sinister anticipations of even the shrewdest minds of thirty years ago, none confronted by more difficult problems or more likely to be embarrassed by outside influences affecting her development. To no nation do I hear harder measure meted out by temporary sojourners within her borders.

Unless when circumstances or health or study demand living abroad, there is a certain want of dignity in such a life as it often is—a butterfly existence, running around seeking something new, or craving to see all that others have seen. I more and more understand the feelings of one of your great men, lately passed away, who, having visited the Continent in his youth, never cared to visit it again; of Edmund Quincy and Whittier, who preferred picturing foreign countries in their minds to seeing them with their eyes. There is one class of persons to whom travel would be most beneficial, and yet who proportionally do not enjoy it as much as others. I refer to party politicians. What more instructive than to come away for a while, and find how little the affairs that agitate us are known or heeded beyond our shores! What more likely than occasional travel to enlighten a spirit of petty provincialism, such as that of a certain politician, of no mean eminence, who, sitting by me at some celebration in Connaught years ago, exclaimed, "Is it not interesting to think that the eyes of all Europe are now fastened upon us?" What more calculated to bring before us the eternal issues involved, to minimize the passing complications, the personal pettinesses that inevitably gather round every struggle? And what more likely to impress on the ordinary political functionary of any common sense the fact that he can be very well dispensed with, that it is by no means incumbent on him to barter truth and principle—to sell his soul, as it were—in order, for the ostensible benefit of his city or country, to maintain himself in a prominent or representative position?

The thought of politics leads back to my own country, concerning which, although abroad for some time, I have kept myself fully informed. Mr. Gladstone's Government is, in the face of greatest difficulties, through

many temptations to turn aside from the right path, redeeming all its promises regarding Ireland, doing all that a Government can, in the interval between its advent to power and its meeting Parliament with a programme of well-considered measures. Mr. Morley's administration of Irish affairs, the abrogation of all the Coercion Act forces, the dismissal of Col. Turner, the appointment of Mr. Murrough O'Brien to the Land Commission, the instituting an inquiry regarding the position of the evicted tenants and the means by which they can be reinstated, are incontestable proofs that a new era has dawned. It lies with the Irish people whether they are to reap the full benefits of the change, or whether, when another election comes, they are again to be relegated to unsettlement and the old weary round of demoralizing patronage and exasperating coercion. It rests with the Irish people. And yet we must acknowledge the extent to which, as compared with seven years ago, the importance of Irish politics has been overshadowed by social, especially labor problems, affecting equally the entire United Kingdom. Ireland's best friends in England are in the North. Too many of them have been carried away by the bimetallic craze; and Mr. Balfour, since his defeat, has ranged himself on the side of bimetallism. Industrial complications, rearrangements of parties, and general disturbances, some involving serious consequences, are likely to result in the United Kingdom from these labor questions, from the readiness with which so many politicians accept theories, not only as to the possibility of wages being maintained at an unnatural level, but regarding the right of unions to exclude outsiders from employment. Such horrors as occasionally occur with you at Homestead and elsewhere are to be deprecated; but the repressive power of our executive is by no means an unmixed blessing. Our people are not, like yours, from time to time afforded palpable demonstration of the working out of unsound principles. Possibly we in the long run may be led farther astray than you. But whatever general complications, such as I have indicated, may arise, the fate of the Liberal party, and with it the hopes of an Irish settlement, rest with the Irish people themselves. The majority continue true to the Liberal Alliance, to those principles enunciated and acted upon by Mr. Parnell till the hour of his fall. The worst fault of too many prominent in the majority is a tendency to impute vile motives to the Redmondite party. Much of this is hyperbolical and for effect; they cannot surely believe that Mr. Redmond and Mr. Mahony and Mr. Harrington, with whom for years they worked side by side in the closest intimacy, are the monsters depicted. But such language, fully exploited by enemies, operates most disastrously for us in Great Britain, where it tends to degrade the whole Irish people and undermine confidence in them. It were better had the Paris funds at first been sunk in the ocean than that the sordid bickerings and complications concerning them had been permitted.

It is a pity the majority have not frankly acknowledged that the Redmondite schism originated partly from an honest uprising against real or supposed clerical dictation. The apparently all but universal accord of Roman Catholics with clericalism in Ireland, so fostered by her history, which prevailed until a few years ago, will never again prevail. In Redmondism we have the commencement of that divergence of feeling which has sooner or later occurred in all Catholic countries. It would be more straightforward and politic for the Irish majority, while, as they well might, standing by the clergy in their general action, to acknowledge the heinousness of such language as that for which a Catholic priest was lately subjected to a month's imprisonment, rather than, through their chief organ, turn the incident into a fresh argument against the minority because the prosecution was instituted by one of them. That any party of patriotic Irishmen, any body of men professing to desire a settlement, pretending to hold to the principle that the majority in Ireland should rule—that any such body of men should adopt the present attitude of the Unionists towards Mr. Morley's Government, seems almost incredible. It must arise partly from individual spleen at being placed in a small minority, from a determination that there shall never be any settlement with Great Britain, or from an underhand, perhaps unconscious, desire to curry favor with the Conservatives. The minority appear bent on embarrassing, and if possible bringing about the ruin of, the Government by making demands upon it impossible to concede, regarding subsidiary matters upon which they must know the English are not so clear as they are concerning the main question of home rule. Mr. Redmond, at Waterford a few days ago, is reported to have spoken of Mr. Morley's policy in Ireland as one "of cowardice, of delay, and of evasion," and to have declared that "he failed altogether to see the great change in the position of any of the great political questions that they had near at heart." Home rule is necessary mainly because of British ignorance regarding Ireland and Irish affairs. The Conservative party and their organs are with almost fiendish ingenuity utilizing this ignorance to prevent the concession of home rule. They carefully suppress the fact that a British party is now, for the first time in history, heartily supported by the most tried and trusted leaders of Irish public opinion, and by the vast majority of the nation, as represented by 71 of its 103 elected members of Parliament. Mr. Redmond, Mr. Mahony, and Mr. Harrington, the leaders of a party of nine, are put forward and fully reported as representing Ireland, alternately patronized as patriots and gentlemen and held up through their utterances as proof of the impossibility of ever reconciling the sister island. The Conservative policy regarding Ireland is illogical and aimless. Surely what is wanted is to pin the Irish people to some reasonable settlement, to take them at their word, pledged before the world, and, backed by the public opinion of the world, to hold them to their engagement. No country ever made a treaty with another in which the majority was so fully represented as in this case it would be.

The action of the Irish Ascendancy party, of men who, under the continuance of a Balfour régime, would occupy seats on the Irish bench, towards Judge Mathew shows that they require not just judgment but special judgment in Ireland. The attitude of the *Times* and the British Conservative press towards him proves that they are not prepared to extend to the Irish people the safeguards extended to Englishmen through the respect usually shown the English bench. Judge Mathew is a judge of irreproachable character. His legal knowledge, the fairness of his decisions, have never heretofore been questioned. If when called upon, unfortunately for himself, to sit in Ireland, his judgment failed to satisfy Englishmen, surely the conviction ought to strike the thoughtful and fair-minded among them that the system judged, rather than the Judge, is at fault. That the landlords have withdrawn from his commission cannot ultimately improve their position.

Regarding Irish affairs as a whole, it is perhaps dangerous to predict before Parliament meets. If, after the general election, there was some danger of our being unduly elated, there is perhaps at present some excuse for our being unduly depressed. The situation is certainly one of great gravity. D. B.

HENRI DE VIRIEU.—II.

PARIS, November 25, 1892.

WE left Virieu after the departure of the Duchess de Rohan, his second mother, with the emigration. He remained in Paris, occupied with the framing of the Constitution. He did not oppose the enumeration of the rights of man, but insisted upon the admission of the name of God into the preamble of the Constitution. Mme. de Rohan remained a long time in Burgundy with her friends the Jaucourts, waiting, perhaps, for a change in Virieu's mind, and hesitating to leave for ever those whom she loved best in the world; she finally went away in December, 1789, and started for Nice, where she wished to stay till the tempest was over. Virieu was now beginning to ascend Calvary; his loyalism to the crown received a new blow every day. He asked in vain for the royal "veto"—the King was now called the Executive; the master of twenty-four millions of subjects had become the subject of twenty-four millions of masters.

Just at that moment Mme. de Tourzel, the great aunt of Mme. de Virieu, was appointed governess of the children of France. She accepted a function which had become a danger. Virieu had become in all the revolutionary papers the "infamous Virieu." When the Parisian fishwomen made their expedition to Versailles and invaded the hall of the Chamber, Mme. de Virieu was with her aunt, Mme. de Tourzel, in the palace. In the night the palace was invaded by an armed multitude. The Dauphin was carried rapidly to the King's room. "The Queen joined them; her hair was down; she had on only a little coat *rayée jaune*. What a picture! Marie Antoinette, Mme. Elisabeth, the children, all pressed against each other before a window, through which looked the King. In the passages, on the staircases—everywhere the crowd, everywhere screams, dead bodies; under the window, a furious and drunken crowd demanded the Queen on the balcony." The King in Paris was the wish, the order of the mob. Louis XVI. obeyed, and abandoned Versailles. The Assembly decided to follow him. The journey lasted seven hours. Mme. de Virieu was taken in one of the carriages, expecting all the time to see the head of her husband at the end of one of the pikes which were brandished round her.

Virieu's political theories were entirely wrecked in these two historic days, the 5th and 6th of October. He belonged to the group which called itself Constitutional, and what was the Constitution worth? Mounier and Lally were already asking for passports. In a letter to Mounier, who left Paris, Virieu says: "The atmosphere in which I live seems poisonous. The crimes and the criminals who rise on every side revolt my heart and soil my eyes. . . . Civil war would be better than all this mud in which we are drowning." On the 29th of April, 1790, the Centre of the Assembly, by a supreme effort, managed to name Virieu President. He was not able to remain long in

the chair and resigned. His alarm was now so great that he sent his wife and his three young children to Pupetières; he thought himself obliged to remain in Paris. "When I consider," he wrote to Mounier, "the situation of this unfortunate royal family, always under the dagger, I dare not go away. Notwithstanding the decree which has abolished all titles of nobility, I still feel enough of a gentleman not to abandon the King."

Louis XVI. was already thinking of secretly leaving France; Virieu helped Mesdames the daughters of Louis XV. to make their escape; he saved the princesses who had protected his infancy. He heard immediately afterwards that Mme. de Rohan was dying at Nice; she had for some time left his letters, which now had become very humble, unanswered. In June, 1791, he resigned the colonelcy of his regiment, as he was unwilling to take the new civic oath which had been ordered by the Assembly. Then came the flight to Varennes. Virieu was indignant at the King's confiding his defence to Barnave. It is always so. The Queen had trusted Mirabeau; the King trusted Barnave, who had incessantly conspired against him. "I have to work," wrote Virieu, "for people who are working for their own suicide." Mme. de Rohan was inflexible; she had no pity for the remorse and sufferings of Virieu. She was slowly dying; she did not allow any conversation about her on the affairs of France. When her will was opened, the first page contained these words: "I order that, immediately after my death, the little golden crucifix which I have always worn be taken from my neck and given as soon as possible to Mme. de Virieu." The name of Virieu himself was not pronounced. Virieu wrote to Mme. de Wall, who had remained to the end with Mme. de Rohan: "Ah, if she had seen me amidst the assassins who threaten me every hour, the person whose death you accuse me of having caused, she would have understood that cowardice would have rendered me unworthy of her. I have never been more faithful to the principles which she gave me than when I disobeyed her." The Duc de Rohan died a few weeks after his wife. "With him," says M. Costa de Beauregard, "disappeared one of the last, perhaps the last, of those *grands seigneurs*, as unintelligent of the fearful time which was beginning as they are unintelligible to our new time. The old gentleman died like a perfume which has ceased to be the fashion."

The powers of the Constituent Assembly had come to an end. Virieu had left it without regret and with many misgivings; he had remained in Paris with the faint hope of being of some use to the royal family. Mme. Elisabeth gave him a mission to Coblentz, which he accepted without a murmur, but with great reluctance, as he had always disapproved of the emigration. He made the journey with a mysterious agent, who had taken the false name of Montalbano. This Montalbano was a secret agent of the Austrians, one of those adventurers who find their opportunity in troublous times. Virieu had so little confidence in him that he always kept pistols in his pocket, and thought it necessary, when they slept in the same room on their way to Coblentz, always to keep his sword near him. They crossed the frontier together. Virieu obtained an audience of Monsieur the Comte de Provence and of the Comte d'Artois. Montalbano had also an audience of the Comte d'Artois, and delivered to him a message from the Archduke Francis, the heir of the Austrian crown, who professed to be as devoted to the cause of Marie Antoinette as the Emperor Leopold was himself indifferent.

Virieu lingered a long time in Coblentz; the princes had bid him remain. He was much troubled by the sort of responsibility which he had for Montalbano's mission, and heard not without a patriotic pang that the Austrian agent had in his plan demanded the occupation of Neuf-Brisach, which was then a French fortress, by an Austrian garrison. Virieu saw clearly that the foreign Powers were preparing either to abandon Louis XVI. to the Jacobins or to dismember France. The Emperor of Austria died on the 1st of March, 1792, quite unexpectedly, as he was only forty-five years old. The *émigrés* conceived much hope from the accession of Francis, but they were soon disappointed: the Emperor did not keep the promises of the Archduke. The negotiation which Virieu had begun was abandoned. He remained idle in Coblentz without money. After a while he left for Turin, stopping on the way in Geneva, at his aunt's, the Marquise de Blonay. He had a semi-official mission to the King of Sardinia from (so to call him) the minister of foreign affairs of Monsieur. He found the King very angry with the princes and the *émigrés*. "My people will get spoiled by all these gentlemen," repeated constantly Victor Amadeus. Virieu's mission came to an end when Louis XVI. declared war on Austria in April, 1792. He returned to Paris and found the monarchy in the last spasms of its agony; he was among the few faithful servants who remained around the King on the 10th of August. It is well known how, when the mob attacked the Tuileries, the King took refuge with the Assembly, and how the Swiss Guard was massacred in the palace and in the garden of the Tuileries. Virieu escaped through the garden almost miraculously. He concealed himself in a boat on the Seine, and afterwards in the woods of Meudon.

The memoirs of his daughter, Mlle. de Virieu, are here interrupted; they bring us, without any transition, to Lyons, where "the same will which had sent him [her father] to Coblentz, sent him to find his death." Lyons was in the hands of Chalier, a Piedmontese who had been brought up as a priest; he had become a commercial traveller, then administrator of the police in Lyons; suspended from his functions in April, 1791, for ordering women to be whipped at the doors of the churches, he had been reinstated by the Legislative Assembly on the 15th of August, 1792. Chalier was a sanguinary fanatic, and he would not have spared Virieu, who was obliged to change his name and to conceal himself. The King of Sardinia had been obliged to begin hostilities, as the French had entered Savoy. Mme. de Virieu to k refuge at Lausanne, with her children, but, after a while, she rejoined her husband at Lyons. The tyranny of Chalier became so intolerable that the inhabitants of Lyons rose against their ferocious proconsul. Virieu took part in the insurrection; he was, in fact, its principal leader with a workingman named Madinier.

Unfortunately for Virieu, the triumph at Lyons coincided with the downfall of the Girondists in Paris. Such of them as had fled from the capital tried to raise the provinces. Chalier had been guillotined and the Mountain swore to avenge him. Lyons had to prepare for a siege. Virieu organized and drilled the volunteers; eight thousand men were rapidly equipped and armed. An old gentleman, Comte de Précy, took the command. Précy had been a colonel; he had fought among the Swiss on the night of the 10th of August, and had retired near Lyons. Virieu was in favor of offensive action, and wished to take his volunteers out of the city. Précy preferred to take the risk of a siege. The city was besieged in due form by Gen. Kellermann. Virieu had command of the strong positions of the Croix-Rousse between the Saône and the Rhone. Lyons suffered a bombardment, and was invested. Famine turned the population against the defenders. Virieu made a sortie with his men, and was killed. "The day after the battle, the body of an officer had been found along the road. . . . His cross of Saint Louis had half entered his breast with a ball. His face seemed still alive." Public rumor said that it was Henri de Virieu; in the official report of the Commission of the Convention to Robespierre, it was said that among the prisoners was the ci-devant Marquis de Virieu. There were too many prisoners for the guillotine; they were killed together with grapeshot. Fouché, with Collot d'Herbois, had been intrusted with the punishment of Lyons. Fouché became a minister of Louis XVIII. Virieu died by his orders if he did not die in battle. His unfortunate wife could never learn exactly how he succumbed.

Correspondence.

THE NATIONAL FINANCES.

To the Editor of The Nation:

Sir: Your article of December 1 upon "Politics and Currency" gives fresh reason for surprise and regret at your practice of stating clearly a set of premises and then shrinking from the perfectly obvious conclusion. Except for the fact that we are a very rich nation and can afford to do almost anything, our national finances present about as pitiable a spectacle as can well be imagined.

In the first place, we have half-a-dozen kinds of currency—gold and silver coins and greenbacks full legal tender, gold and silver certificates partial legal tender, and national banknotes rather less a legal tender. Then we have some thousands of tons of silver bullion, increasing at the rate of 125 tons a month, which has depreciated and is depreciating heavily upon our hands, which is of no use except as a basis for circulation, and is increasing at a rate which, if continued, will at no distant day bring us to a suspension of gold payments, in a way which is making us the laughing-stock of the civilized world. And yet there is a cry that we have not currency enough, and that the restriction must be taken off from State banknotes to supply the deficiency!

Turning from currency to debt, we find since the war a mad rush to pay off bonds, and this tendency stimulated by an enormous surplus revenue produced by a high tariff; so that, instead of leaving the money in the pockets of the people, it was taken to pay off bonds drawing from two to three per cent. interest. From this has resulted a panic lest the national-bank circulation should be extinguished for want of the pledged security, and a disposition has appeared to guard against this danger by opening the gates in advance to a flood of State banknotes. The danger appears, however, to have been otherwise obviated by the operations of a lobby of pension agents who, by bringing about an expenditure almost equal to that upon any of the great armies of Europe, have made it extremely probable that in the near future the United States Trea-

sury will be selling bonds instead of buying them.

The state of the tariff reminds one of the man who was holding a mad dog by the collar and could not let him go, while, to crown all, the high officials of the Treasury seem unable to agree within five or ten millions of dollars as to what the condition of the Treasury really is.

And all this delicate and complex machinery, upon which so much of the welfare of the people depends, is to be placed next year, to say nothing of the present Congress, in the hands of two bodies, taken together, of 400 men, all precisely equal, without discipline or leaders, except so far as they are evolved by party wire-pulling, and among whom there is nothing to distinguish the most accomplished expert from the most inexperienced and self-confident tyro.

The all-important question in the matter of the finances is not as to any particular policy or measures, but upon what system they shall be carried on; how some order is to be brought out of this indistinguishable chaos. The essential conditions are (1) that it shall be a comprehensive system, in which debt, currency, revenue, taxation, and expenditure shall be dealt with in some relation and proportion to each other; (2) that it shall be a continuous system in which the experiments and policy of yesterday shall have some relation to those of to-day, and these to those of to-morrow; (3, and most important of all) that it shall be conducted from the standpoint of the national interest, and not from that of local and private interests. It should never be forgotten that the nation as a whole is not represented in Congress; that every man in either house represents only a district or a State. Is it any wonder that private and local interests have the upper hand, and the national interest receives very little attention?

The only way in which these conditions can be attained is by putting the whole subject in the hands of the Secretary of the Treasury, to be brought forward in open Congress. Imagine the interest that would be felt through the country if it were known that when Congress first meets under Mr. Cleveland, that would take place. It matters not that the particular individual would probably prove to be quite incompetent. While no vote of Congress could displace the Cabinet, it is yet true that the President could change at pleasure any or all of the members who, in his judgment, appeared to be incompetent. The mounting ambition of many candidates would probably be hurled from the saddle before the right man appeared. The first five or even ten years would be well and cheaply spent in evolving a man who was equal to the work. But when he did come, we should start on a new career. In the civil war we taught the nations of Europe an unexpected lesson as to the strength of democracy. It is not impossible that time may have it in store for us to teach them another and even stronger one in the conduct of civil government and the management of finance.

GAMALIEL BRADFORD.

BOSTON, December 3, 1892.

WILLIAM CLARK (NOT CLARKE).

TO THE EDITOR OF THE NATION:

SIR: The spelling of the name of the famous explorer who was with Lewis in 1804-'06, has been in question ever since. In my bibliography of the Lewis and Clark literature, published in 1876, I said the balance of evidence favored Clarke. Had I said the balance of ostensible (published) evidence, the statement would have been more precise. Now I find the balance the other way. The name is unquestionably Clark. I have before me a verbatim copy of family Bible records of genealogies of the Clark family back to 1724—there is not a Clarke in the whole list. I have examined many signatures of autograph letters; they are invariably "Wm. Clark." The *k* is large, like a capital letter, with a flourishing long, lower loop, but nothing that can be turned into an *e*. Many letters I have seen address the explorer as Clark. Copies I have seen of various commissions are issued to him as a Clark. Old St. Louis newspaper notices are all Clark. Mr. F. L. Billou, the veteran annalist of St. Louis, writes me: "Spell it without an *e*." The only surviving son of the explorer signs a letter to me "Jefferson K. Clark." In fine, Ensign Clark, Lieut. Clark, Capt. Clark, Gen. Clark, Indian Agent Clark, and Gov. Clark—the man who was a Clark in every personal, legal, commercial, and official relation in life—passed into history, by some mystery that may never be cleared up, as a Clarke.

The first systematic use of the *e* I know of occurs in Gass, 1807-1813, in the four or five editions of the Sergeant's 'Journal.' Then the princeps edition of the 'Travels,' Philadelphia, 1814, has "Clarke" throughout the text, though "Clark" on the title-page. This is curious, for Nicholas Biddle, the real editor of the book which was put to press by Paul Allen, was an intimate of Clark's, and wrote "Clark" in private letters to him. The appearance of Clarke throughout the authentic narrative of course turned the scale the wrong way. Future editors and commentators should revert to the proper spelling.

Truly yours, ELLIOTT COUES.

No. 1726 N STREET, WASHINGTON, D. C., December 4, 1892.

STAINED-GLASS WINDOWS.

TO THE EDITOR OF THE NATION:

SIR: A wise and appreciative critic who wrote in your columns last week regarding the work of Mr. Burne-Jones spoke with great interest of this artist's cartoons for stained glass, in which may be found a rare degree of excellence; and this excellence leads him to compare the glass windows of Mr. Burne-Jones with those of Mr. La Farge, so widely famed for beauty of color, and to hope for a future perfection in the art of stained-glass design which may combine the qualities of both. It would indeed be a fine consummation which should bring together such varied riches in a little room; but it is asking for what cannot be obtained, owing to the nature of the elements involved in the production of glass design. Let me, in a few words, explain this.

The stained-glass windows now made in Europe, among which those of Mr. Burne-Jones hold high rank, are wrought out of large glass plates, each plate being of uniform thickness and uniform tint. On these plates, or panes, of color, all minutiæ of design are *painted;* all shadows, modelling, and delicate lines are done with the brush—the lead-lines being reserved for the outlines and large masses generally. A fine example of this method of treatment may be seen in the window entitled "The Building of the Temple" in Trinity Church, Boston, where the intricate, subtle, and beautifully modulated drawing of Mr. Burne-Jones's cartoon is exactly copied in paint upon glass composed of flat, even tones of color.

It will be seen that by this process one gets the advantage of elaborate drawing, but at the cost of a certain loss in purity of color, for the color of the glass must be somewhat injured by the use of pigment. On the other hand, in the justly so-called American process, the glass which is used is all *opalescent*—that is, of varied and iridescent quality of color. It is made in plates, also, but each plate varies in thickness and in tint, so that by careful selection light and dark tones can be obtained from the glass itself, without the use of paint at all (save in the head and hands). All lines used in this method are *lead-lines*, which cannot be indefinitely multiplied, as when done with a brush; and the special aim is to produce beauty by a highly varied use of color, by purity of tone, and by texture—this last a new and exquisite element obtained in opalescent glass.

It will be found that windows made by the American method are capable of expressing, under the hand of a great artist, new and ineffable manifestations of color; and in a domain of art where light plays so large a part in the essential beauty, it seems to many that subtlety of color rather than subtlety of drawing is the more legitimate goal in the production of stained-glass work. But, however this may be, two noble schools stand side by side to-day, each expressing in its own way some of the dreams and desires of the heart of man.

S. W. W.

NO. 77 MT. VERNON STREET, BOSTON.

THE DANTE SONNET.

TO THE EDITOR OF THE NATION:

SIR: Would it perhaps be interesting to your readers to compare the, I fear, little-known version by the late Dr. T. W. Parsons of Dante's sonnet, "Tanto gentile e tanto oneste pare," with those by Rossetti and Mr. Norton given in the last number of the *Nation* (No. 1430)?

"So gentle seems my lady and so pure
When she greets any one, that scarce the eye
Such modesty and brightness can endure,
And the tongue, trembling, falters in reply.

"She never heeds when people praise her worth—
Some in their speech, and many with a pen—
But meekly moves, as if sent down to earth
To show another miracle to men!

"And such a pleasure from her presence grows
On him who gazeth while she passeth by—
A sense of sweetness that no mortal knows
Who hath not felt it—that the soul's repose
Is woke to worship, and a spirit flows
Forth from her face that seems to whisper,
'Sigh'!"

This may not be as faithful to the original as Mr. Norton's version, but it is evidently the work of a genuine poet.

WILLIAM M. SALTER.

PHILADELPHIA, November 30, 1892.

Notes.

HENRY HOLT & Co. will first give to the public at large 'Poems Antique and Modern,' 'A Book of Day Dreams, or a Century of Sonnets,' by Charles Leonard Moore, and 'The Banquet of Palacios,' a South American comedy in prose by the same author.

G. P. Putnam's Sons have in press 'Studies of Travel in Greece and Italy,' by the late Edward A. Freeman; 'Carlsbad, a Medico-Practical Guide,' by Dr. Emil Kleen; 'Short Stalks,' hunting trips North, South, East, and West, by Edward N. Buxton, with sixty illustrations; 'Studies by a Recluse in Cloister, Town, and Village,' by Augustus Jessopp, D.D.; 'Voodoo Tales,' collected from original

sources," by Mary A. Owen; 'Red Leaves and Roses,' poems by Madison J. Cawein; 'A Country Muse,' verses by Norman R. Gale; and 'The Pocket Encyclopædia.'

Henry George's new work, 'A Perplexed Philosopher,' being an examination of Herbert Spencer's position on the land question, will be published by C. L. Webster & Co., who will also take over Mr. George's other writings for reissue in a uniform edition.

T. Fisher Unwin's announcements include Quevedo's 'Pablo de Segovia,' with more than a hundred drawings by Daniel Vierge; 'Sixty Years of an Agitator's Life,' by George Jacob Holyoake; a new edition of 'Three Generations of Englishwomen,' by Janet Ross; 'The Life of William Cowper,' by Thomas Wright; 'The Fishguard Invasion by the French in 1797'; and 'The Nationalisation of Health,' by Havelock Ellis.

Shakspere in blocks of seven is the scheme of the dainty "Ariel Shakspere" of the Messrs. Putnam. Seven of the Comedies are the first instalment, and as many of the Histories and gain of the Tragedies will follow. Each play makes a volume, and is contained in a box of its own, suitable for a pocket case. The print is open and handsome, and the illustrations are unobtrusive outlines reduced from designs by Frank Howard, issued sixty years ago, and of course uniform in style and consistent one with another. The binding is leather, prettily stamped. Altogether, this is a very acceptable form for the perennial dramas. The same publishers have added two volumes to their Knickerbocker Nuggets series, one being 'Deutsche Volkslieder,' a selection from German folk-songs, edited by Prof. Horatio S. White of Corneli. This is a fresh assortment, printed in German text with ornaments by German designers, with an introductory essay on folk-songs, a bibliography, notes, and an index of first lines. It is sure to be appreciated. The other "Nugget" is 'The Wit and Wisdom of Charles Lamb,' selected and arranged from his works by Ernest D. North, with supplementary anecdotes by his contemporaries. The frontispiece portrait of Lamb at twenty-three adds much to the value of this volume. The same drawing, by Hancock, slightly reduced, has been etched as a vignette for the title-page of 'The Essays of Elia,' a handsome duodecimo issued by Little, Brown & Co., Boston, to which Prof. George E. Woodberry supplies a brief introduction. A companion volume is 'Last Essays of Elia.' The typography and the dark-blue binding of both have a simple elegance. Mr. Hugh Thomson, pursuing his pen-and-ink illustrations of old English classics, gives us 'Days with Sir Roger de Coverley' (Macmillan). This artist had more scope in the 'Vicar of Wakefield' and in 'Cranford,' but his present designs have the cleverness, imagination, and decorative quality of their predecessors. Mrs. Gaskell's 'Cousin Phillis' joins the "Tales from Foreign Lands" of A. C. McClurg & Co., Chicago; and 'Paradise Lost,' compressed into small but clear type, takes its place among the "Laurel-Crowned Verse" of the same publishers, who have given to both series a stamp of good taste without and within. This stamp is conspicuously wanting in 'Heinrich Heine: His Wit, Wisdom, Poetry,' edited by Newell Dunbar, who has incorporated Matthew Arnold's essay on Heine (Boston: J. G. Cupples Co.). Roberts Bros. make an interesting experiment in employing a Frenchman, Émile Bayard, to furnish the illustrations to a new edition of the 'Poems of Helen Jackson.' They are of uneven quality, but have as a whole more distinction than a native artist would have been apt to exhibit, while their "local color" is nil. They are numerous, and besides them are three good portraits: of the poetess herself, of Emerson, and of Charlotte Cushman. 'Christmas Books' is the title given to Dickens's five Christmas stories collected by his son in Macmillan's series of reprints from first editions. The "Christmas Carol" was the first of the line, and its popularity ranks with that of 'Pickwick' and 'David Copperfield.' It was also, says the younger Dickens in his introduction, the first of the novelist's works to be read in public by himself (in 1853), while "The Chimes" was the first to be read aloud to his friends in advance of publication. The other tales are "The Cricket on the Hearth," "The Battle of Life," and "The Haunted Man." 'Guy Mannering' is the second volume in the Dryburgh Edition of the Waverley Novels (Macmillan). To what we have already said of this admirable undertaking, we can only add a word of praise for Mr. Gordon Browne, who this time furnishes the illustrations.

Nobody will begrudge the fine attire bestowed upon that powerful tale, 'The Little Minister,' in the "Kirremuir Edition" (New York: Lovell, Coryell & Co.). These two noble octavos are printed on untrimmed Holland paper, with broad margins surrounding a 16mo page of type. The title-page and initial letters are rubricated, and there are ten etched illustrations, including a portrait of Mr. Barrie, by G. W. H. Ritchie. These etchings are duplicated throughout, one set being on vellum, unlettered; the other, on plate paper, lettered. The covers have vellum backs and pale-green paper sides, and give the work a very distinguished appearance. Mr. Ritchie's designs are a real embellishment, and are at their best very good indeed. The typography also is excellent. In short, the conception and execution of this sumptuous edition, which is limited to less than 300 copies, entitle it to rank among the best of the holiday publications of the year which have thus far come for judgment before us.

Except that the silhouette of *Lady Teazle's* profile is a little too startling, the cover of the new edition of the "School for Scandal" which Dodd, Mead & Co. have just published is excellent. The printing also, the work of the University Press, is good, although two typographical ornaments on the title-page are out of place. The illustrations by Mr. Frank M. Gregory are less praiseworthy; they are stiff and do not really illustrate the play; they are deficient in decorative quality also. The five so-called "aquarelles" have none of the charm of watercolors clearly and cleanly facsimiled; they are very chromo-like, oily, and heavy. It is perhaps too much to ask that the illustrations of a play shall suggest that it is destined for the stage; but this is what some of the French illustrators of Molière's comedies have succeeded in doing to perfection. They have set before us the persons of the drama in their proper surroundings, and have thus managed to hint at the stage whereon alone these characters are seen to best advantage. Mr. Gregory has not attempted to do this, any more than Mr. Abbey has in his illustrations of Shakspere's comedies.

To Mr. W. J. Loftie's "Art at Home" series Mr. Andrew Lang eleven years ago contributed 'The Library,' which had to do with the arts dear to the book-lover. Now this little book appears in a second edition (New York: Macmillan), with a preface "brought down to date," and with an appendix to the final chapters, by Mr. Austin Dobson, on modern English illustrated books. The body of the book seems to be intact. Mr. Lang's new preface contains references drawn from recent sales; it protests against the modern craze for large-paper copies of new books and for the first editions of books by living authors. Mr. Dobson's postscript deals with the great advance in book-illustration since 1881. It is with some surprise that we find a critic of a taste as refined as Mr. Dobson's bestowing even a word of praise in passing on work as doubtful as Mr. Caton Woodville's illustrations for Mr. Haggard's tales of battle, murder, and sudden death, or as Mr. Herkomer's illustrations for Mr. Hardy's 'Tess.' Mr. Dobson's praise of Mr. Abbey's best work is discreet and cordial, and so is his recognition of the promise of Mr. Hugh Thomson and of Mr. J. Bernard Partridge. Of American illustrators other than Mr. Abbey, Mr. Dobson says nothing; it would have been pleasant to have his opinion of Mr. Frost's "Rudder Grange," and of Mr. Howard Pyle's "One Hoss Shay."

The Chiswick Press in London turns out now and then really well-made books, equal to the standard set by the best printers of France and America. The manager of the Chiswick Press is Mr. Charles T. Jacobi, who put forth last year a little essay, 'On the Making and Issuing of Books,' which he has now revised and amplified, and republished as 'Some Notes on Books and Printing: A Guide for Authors and Others.' It contains suggestions on the preparation of MS. for the press, describing the styles of type, the kinds of paper, the sizes of the various pages, the process of stereotyping, etc. In intention and in plan it is excellent; but the author's style as a writer is slovenly and his proof-reading as a printer is careless. Very useful are Mr. Jacobi's specimen pages of the principal styles of type, set solid, leaded, and with thin leads. Useful also are the dozen samples of paper, machine-made and hand-made.

There is evidently a steady demand for Mr. Frederick Douglass's autobiography, for the 'Life and Times' just put forth by De Wolfe, Fiske & Co., Boston, is, if we mistake not, a fourth edition. In the previous issue Mr. Douglass had shown his respect for Mr. Cleveland, whose official attitude towards himself had been uninfluenced by the fact of his color, and he bears his testimony anew in this volume, having elsewhere expressed his satisfaction with the late election, as containing no menace to the welfare of the Southern blacks.

Three books on cookery call for notice at this season of home feasts. The "Majority Edition" of Marion Harland's 'Common Sense in the Household' (Scribners) marks the twenty-first year of a book which has proved useful and acceptable to many, notwithstanding the overbearing tone of its advice on domestic management. 'Ninety-nine Practical Methods of Utilizing Boiled Beef' (New York: John Ireland), a translation from the French, is a much-inflated book, suggesting that the author agonized to complete the odd number by making the least change in seasoning an excuse for turning over the leaf and writing a new title. We must sometimes economize in the quality of our cooks as well as in food, and most of them would make a sad mess in attempting to follow these rules, which will have their chief use for American readers in showing how far we still are from the admirable economies of the French cuisine. 'Letters to a Young Housekeeper,' by Mrs. Bayard Taylor (Scribners), combines with excellent general directions for marketing and cooking a large number of practical recipes, many of which are for odd dishes tasted and liked by the author in various foreign lands. The whole book is written with a commendable regard for its literary

dress uncommon in a cook-book. A young housekeeper can use it with a sense of being in good company, and can hardly fail to profit by sound advice so modestly given.

'The American Annual of Photography' for the coming year (Scovill & Adams Co.) contains the usual variety of contributed articles on topics interesting to the craft, and plates illustrative of a variety of processes. Among these are several portraits of Daguerre, but not many remarkable compositions or *genre* studies. We should have been glad of some illustrations of long-distance photography, on which there is a brief paper. Mr. Stillman, in describing the Roman Amateurs' Club, gives some useful hints to amateurs as to objects, places, and times for getting the best views in the Eternal City.

A "Children's Calendar" for 1893 (Boston: Greenough, Adams & Cushing) is the first to reach us of the pad variety. The same firm send us also "Thoughts from Modern Authors," hinged leaflets, with a sentiment for every day in the year, compiled by Alice F. Stevens. Rose Porter makes a tiny book of 'Men's Thoughts for Men,' the novelty consisting in drawing all the thoughts for a whole month from one author. Marcus Aurelius is followed by Mr. Froude, who supplies some excellent aphorisms on the subject of truth, by Thomas Hughes, etc.

The translation of Galdós's 'Marianela,' by Helen W. Lester (Chicago: McClurg), is considerably condensed from the original, perhaps to fit the metes and bounds of the series in which it is published, but is otherwise remarkably faithful and adequate. The story itself has an idyllic strain not characteristic of its author, and in its pastoral unreality is certainly not typical as "A Story of Spanish Love"; but it is not without a fanciful charm which is well preserved in the English version.

Dr. Daremberg of Paris, whose work on cholera we recently reviewed, has published 'Traitement de la Phthisie Pulmonaire' (Paris: J. Rueff & Cie.) that is too distinctly a professional work for particular notice here. He necessarily upholds the modern doctrine of the contagiousness of consumption, whose mode is shown by the tubercle bacillus. He believes the disease to be rarely hereditary, and he has firm faith that it is curable with sufficient frequency to justify its removal from the hopeless catalogue. The treatise is in two small volumes, beautifully printed on good paper, with flexible bindings. The style is luminous and the substance excellent.

A year ago we called attention to Restori's 'History of Provençal Literature,' in Hoepli's well-known series of manuals, as giving in compact form much which the general student of literature could not easily find accessible elsewhere. A somewhat similar service is performed by the 'Crestomazia Provenzale' of Prof. V. Crescini of Padua. The first part, now published (Padua: Fratelli Drucker), contains some 7,000 lines of Provençal text from about fifty authors, or one-quarter as much as Bartsch's 'Chrestomathie Provençale,' from two-fifths as wide a range of authors. The second and smaller part, which is to appear shortly, will consist of a grammar and a glossary. Both together cost only three and a half lire—a price which, taking into consideration the number and variety of the selections, should recommend the work to many who do not care to buy the more expensive Bartsch, or who welcome fresher subject-matter for their class-room work.

Two documents, recently discovered in the Florentine archives and published by Del Lungo in the July Bulletin of the Italian Dante Society, supplement our slender knowledge of Dante's part in Florentine politics. They are dated July 6 and December 14, 1295, and concern respectively a noteworthy episode in the modification of Giano della Bella's severely stringent democratic reforms, and a clumsily arranged bi-monthly election of priors. Both documents antedate all others extant concerning Dante's political life. Moreover, they confirm 1295 as the date at which Dante began to take an active part in political affairs, and afford a basis for several interesting inferences as to the experiences which changed the timid sonneteer of the 'New Life' into the vigorous and versatile scholar and statesman of a few years later.

We shall soon set eyes on the first number of *Toscanelli*, a publication launched last month at Florence by Loescher & Seeber, whose American agents are B. Westermann & Co., New York. Its sub-title is: "Notes and Documents touching the relations between Italy and America." The term "relations" (*rapports*) is to be interpreted in a broad sense, (1) on the ancient side, by paying special attention to documents existing in the Italian archives and libraries that relate to the period of discovery; (2) on the modern, by keeping a current record of the relations of the two countries at the present day in respect of literature and artistic enterprise ("les œuvres d'art en voie d'exécution"). Articles will be welcomed that contain documentary evidence or impartial criticism. To avoid padding, the size of the several issues will vary, and the publication will be irregular. Book-reviewing will be a feature.

—An unscholarly article in *Foet-Lore* for October maintains that Dante's claim to the place as a poet which he now holds in popular esteem will not bear investigation. It is interesting to notice that the author bases most of his deductions upon passages from the "Inferno," and to recall that the "Inferno" is indeed what Dante means to the ordinary reader. Whoever takes real delight in Dante's poetry, however, is very likely to consider the "Inferno" as merely a gateway, beautiful and impressive in itself, to the greater beauties of the "Purgatory" and the "Paradise." That the last two canticles of the great poem are especially dear to the student of philosophical and religious thought, one is reminded by a glance at the citations appended to the text in the late Canon Liddon's interesting essays on Dante and Aquinas, and Dante and the Franciscans, which, though read some years ago before the Oxford Dante Society, are now for the first time published in his 'Essays and Addresses' (Longmans, Green & Co.). Here the mere fact that there are twice as many references to the "Purgatory" as to the "Inferno," and three times as many to the "Paradise" as to the "Purgatory," will indicate the relative proportion in which the three canticles associate themselves with the Franciscans and with the great Dominican thinker. Both of Canon Liddon's essays are undogmatic in form and substance, and will greatly interest and aid those who find not enough help in the ordinary commentary on Dante, and too much in the larger books of reference. The author concludes that Dante "holds St. Thomas, beyond any other religious teacher, as his master," and that Dante "certainly detected in the mind of the greatest teacher of the thirteenth century those elements which command the attentive respect of men when the changes of thought and feeling which come with time have had their full range of influence." But though Dante's deepest sympathies were with St. Dominic, he did ample justice to St. Francis and his followers, both by direct encomium and by his evident admiration of and affection for *il poverel di Dio*. Perhaps more remarkable, however, than Dante's references to the great Franciscans is, according to Canon Liddon, his omitting all mention of the three great English Franciscans who were his own predecessors or contemporaries—Alexander of Hales, "Doctor Irrefragabilis," the master of St. Bonaventure; Roger Bacon, "Doctor Mirabilis;" and Duns Scotus, "Doctor Subtilis." Silence as to the last, however, we cannot think strange, for Scotus had done comparatively little worth mention before 1300, the date which Dante, with such scrupulous accuracy, sets as a limit to his vision of all that seemed to him memorable in the past.

—A recent writer in the London *Notes and Queries* (8th s., ii., p. 358) insists on the name United Statesians as best befitting dwellers in the United States. He avers that he did not coin the word, but that "he has read it in authors of respectability." The name Yankee, he holds, is too narrow, and American too wide—"an extension of the Monroe doctrine to which he is not inclined to yield." The current limitation of the noun American seems, however, to have grown up very naturally. It was perhaps restricted to inhabitants of British American colonies by English writers earlier than by those inhabitants themselves. We find it so used by such writers before the Declaration of Independence. Thus, in 1765 a writer in the British Philosophical Transactions said: "Paying quit-rents to monopolizers of large tracts of land is not well relished by *Americans*." An epigram dating from 1774, addressed to the Ministry, begins:

> "You've sent a rod to Massachusett,
> Thinking the Americans will buss it."

So, in 1775, Dr. Johnson, in 'Taxation No Tyranny,' wrote: "That the Americans are able to bear taxation is indubitable." He also employed the phrase "American Congress" in no doubtful sense. Only on farthest shores washed by the farthest sea has the present writer discovered the adjective American to be still ambiguous. Asking in Colombo for the American Consul, he was directed first to an official from Brazil and then to one from Mexico. The narrowing in the application of the name American to existing usage, which did not begin with Johnson, is in keeping with the analogy of several collateral words, and those mostly made up by the English themselves. Thus, *Americanized* means assimilated to characteristics of the United States. All the citations illustrative of this word in the Philological Society's Dictionary are adduced from English writers. So *Americanism*, *Americanize*, and *Americanization*—the last an issue from the London mint—describe characteristics of the United States, and not of any other sections of the Western continent. *A potiore nomen fit.* The people of the United States, as outnumbering the dwellers in any other American country, would more reasonably bear the name of Americans. But while still few in number, they were already so called, because they had not, like Canadians, Mexicans, etc., a distinctive name based on their geographical position. The truth may be that the inhabitants of the United States were styled Americans with prophetic foresight. When it was first bestowed, their number was not one-tenth as multitudinous as it has now become, nor was their territory one tenth as vast. Should their expansion in the future be commensurate with that in the past, the American hemisphere will soon be too narrow to

bound in the local habitation of United Statesians. But when the name of United Kingdomers shall be accepted by the people of the three Britanno-Celtic islands, and when British federationists have devised a descriptive title for their rope of sand, Americans may be ready to exchange their name for that of—Greater Britons.

—Few historic monographs are so instructive, and fewer are so readable, as Mr. George A. Gordon's account of land-grants in the wilderness north of Merrimack River in 1659 and onward. Lowell, second of Massachusetts cities in 1880, was a centre of these grants, and this paper was recently read there before the Old Residents' Historical Association, all of whom doubtless wished they were descendants of the original grantees. The grants were sometimes made to requite heroism in public service, or in return for money advanced in planting the colony, or in place of salaries, or, once, as an Indian reservation. It is remarkable how many names occur that are still notable, as Winthrop, Saltonstall, Higginson, Gardner, Tyng, Russell, etc. The boundaries were so indefinite as to need perambulations at least annually, thus: "Laid out to Mr. Edward Tyng 250 acres in the wilderness on the northern side of Merrimack River, being bounded and butted by a farm laid out to Mr. Russell on the south end; the wilderness elsewhere surrounding according to marked trees. Jona Danforth, Surveyor." The significance of Indian names is given according to latest authorities. Racy anecdotes abound, so that no dish at the dinner can have been more of a dainty than the discourse. One of the grantees was in 1669 a commissioner at Salem to see that no coin was exported, with authority to examine outgoing sailors and passengers, and, if found, to bring the coin to the court for confiscation. His career ought to be studied by our statesmen who are now laboring so hard to keep gold from running out of the country.

—We have received from B. Westermann & Co. a pamphlet containing a lecture by J. Wells of Wadham College, Oxford, on "The Teaching of History in Schools." The subject is an important one both because history is constantly gaining ground in the schools, and because in the past it has often been taught in such a wooden manner as permanently to prejudice the young student against it. In Mr. Wells's view, the prime utility of history is its power to bring new interests into life which will always be an addition to one's intellectual resources. As travel enlarges our experience in space, so history enlarges our experience in time. An indirect lesson of great value to be learned from the study of history is that one can believe strongly in a cause and yet be fair to opponents and see that they too are sincere. Mr. Wells strongly condemns in teaching any "attack on present political parties or classes through their predecessors, real or supposed." "So to teach or so to write is the mark at once of a bad historian and a bad citizen." He is also severe upon allowing children to read so-called comic histories, and warns teachers against over-familiarity of treatment, against encouraging false sentimentality, such, for example, as that in Mrs. Sigourney's 'William the Conqueror at Windsor,' and a too early introduction to historic doubt. He emphasizes the use, as aids, of architecture, pictures and photographs, museums, historical poetry, and national songs. In garrison towns the history of the regiment cannot fail to kindle interest. Historical novels should be made use of with caution; perhaps not more than fifty are of value for this purpose. Mr. Wells would confine the teaching in schools to the history of England, and on this point he seems too dogmatic. The lesson of judicial impartiality is often far more easily inculcated in studying the history of Greece and Rome, while the strong personal element in Greek and Roman history and the narrative power of the ancient historians combine to stir the interest of young students. By a strange oversight, Mr. Wells speaks of Scott being misled by Thierry in writing 'Ivanhoe.' Thierry did not publish his 'Histoire de la Conquête de l'Angleterre' till 1825, while 'Ivanhoe' appeared in 1820.

SYMONDS'S MICHELANGELO.

The Life of Michelangelo Buonarroti: Based on Studies in the Archives of the Buonarroti Family at Florence. By John Addington Symonds. With etched portrait and fifty reproductions of the works of the Master. Charles Scribner's Sons. 1892. 2 vols. 8vo, pp. xxxii, 469, and viii, 441.

THE ideal biographer of Michelangelo is perhaps an impossible person to find. He should not only be one deeply versed in the history of the period and in general literature, a careful and impartial investigator, a man of imagination and penetration, and a powerful and interesting writer, but he should also be a specialist in three great arts, having a wide and profound critical knowledge of, and a practical acquaintance with, painting, sculpture, and architecture. Mr. Symonds probably fills many of these requirements better than any other English writer. His knowledge of Renaissance history and literature is vast, and his competence as critic and investigator is undoubted. He has, besides, had access, rarely granted, to the Buonarroti archives, and has thus been able to throw much new light on many points. He has avoided Grimm's fault of wide excursions into general history, and has kept his hero constantly in sight. He has, where possible, used the language of Michelangelo himself and of his contemporaries, thus securing greater vividness of delineation even at some expense of continuity of style. His 'Life' is an admirable and solid work, and one must be a very profound student of the subject or a very reckless writer to question his conclusions on all matters of fact. Michelangelo was, however, first of all an artist; and in the interpretation of a work of art, and of the artist through his art, a little practical and technical knowledge often goes farther than much general information. It is here that Mr. Symonds is weakest, and here that we feel we may venture to disagree with him or supplement him. We shall rather supplement than disagree, for we believe that his conclusions are in the main the right ones, and that a clearer technical knowledge would have insured his arrival at them with less difficulty and confusion.

The three great questions as to Michelangelo are (1) his relation to men and women, and, bearing upon that, his treatment of the sexes in his art; (2) the reason for the paradox that, though essentially a sculptor, his greatest work is in painting; (3) the reasons, whether temperamental or external, why so much of his work remains unfinished. Connected with these are many minor questions, such as that of his failure to found a school, his successive changes of manner, etc., etc.

The first of these questions, which Mr. Symonds discusses with great frankness in his twelfth chapter, can hardly be considered here except in the second branch of it, that of Michelangelo's treatment of sex, and particularly of the female figure, in his art. We know of no point in which the master has been so misunderstood as this, and none which it is so important to clear up. Critics of Michelangelo have constantly dwelt on his insensibility to female grace and beauty. Mr. Symonds is somewhat confused, not to say contradictory, on this point, and oscillates strangely from the extremest view to one very nearly right. He says: "I find it difficult to resist the conclusion that Michelangelo felt himself compelled to treat women as if they were another and less graceful sort of males. The sentiment of woman, what really distinguishes the sex, whether voluptuously or passionately or poetically apprehended, emerges in no eminent instance in his work." And again: "He remained insensible to the grace of purely feminine lines; and the only reason why his transcripts from the female form are not gross like those of the Flemish painters, repulsive like Rembrandt's, fleshly like Rubens's, disagreeable like the drawings made by criminals in prisons, is that they have little womanly about them." Nothing could well be more strongly stated than this, yet, a little later, we find Mr. Symonds admiring, in a long series of works, that profound sentiment of maternity which the world has been accustomed to consider as "what really distinguishes the sex" more than any other, and admitting that "the Eve of 'The Temptation' has even something of positively feminine charm." This admitted charm, however, he immediately explains away, by an explanation that is none, as "dramatic characterization" necessary "in this part of his work."

As important conclusions about this artist's psychology are drawn from the lack of "girlish charm" and "grace" in his female figures, it is well to consider if there is not a very simple reason for it. Michelangelo had a message and a style. His style was gradually evolved as the only language that could carry his thought. It is marked by the absence of landscape, of ornament, of everything but the human figure, and the figure is systematically enlarged and idealized in a special way until his personages are colossal, rugged, titanic—primeval powers rather than human beings. What should "girlish grace" and slim elegance do here? They would be as much out of place on the ceiling of the Sistine as would a background of Perugino's or Fra Angelico's wings or patterned draperies. Yet we are assured by Condivi that Michelangelo was passionately fond of beautiful landscape and all beautiful things. An artist's choice of material for his art has often little to do with his likings in other respects, and the woman he chooses to paint may be very different from the woman he chooses to marry. Michelangelo idealized his female figures in exactly the same way as the male, and for the same reason—to fit them to carry the weight of thought he placed upon them. They are true mates for his men—colossal and grandiose like them—but they are nevertheless intensely feminine. Every curve of the figure of "Dawn" is a masterful and wonderful idealization on Michelangelesque lines of distinctively female forms, no smallest fragment of which could ever be mistaken for part of a male figure; and it is so full of grace that, minus the style, it becomes the type of all the long-legged, sinuous women of seventeenth and eighteenth-century art; while the "Libyan Sibyl" is one of the most graciously, nobly, and winningly feminine presences in all art. The

"enormous haunches" of the Eve are, like the superb thorax of the Adam, a stylistic exaggeration, and mark the sex more and not less strongly than nature. We are not of the same race as these giants; if we were, it is such giantesses that we should love —giantesses that are not less but more feminine for being framed on the generous scale of those huge things that lived before the flood.

The recognition of a personal artistic style, gradually developed for the expression of profound and romantic thought, will aid us in arriving at some conclusion about other points in Michelangelo's work. If he was the most sculpturesque of painters, so that one recognizes in each of his pictorial compositions the sculptor's manner of seeing and feeling, he was also the most romantic and, in a sense, pictorial of sculptors. If his frescoes are composed on only one plane and without accessories, his sculpture depends, more than that of any other great sculptor, upon light and shade, and, in many of the most remarkable of his works, largely upon lack of completion, for its effect. Take the Lorenzo de' Medici from his niche and place him in a plain side-light, and, together with the brooding shadow of his helmet upon his face, half his mysterious dignity has vanished and he seems almost commonplace and vulgar. Disengage the face of the "Day" from its stony mask and complete it, as it is completed in the common small models of the figure, and its strange horror has evaporated. What is left is the Michelangelo that his science and training had made him, the academic master of anatomy who epitomized the learning of the Renaissance, the decorator who already foreshadows the epoch of Rococo; but the personal element, the strange poetic nature which has had no fellow unless in Rembrandt, is gone. Mr. Symonds says: "His 'Bacchus' alone is sufficient to explode a theory favored by some critics, that, left to work unhindered, he would still have preferred a certain vagueness, a certain want of polish in his marbles." We venture to say that it is nothing of the sort. The "Bacchus" is an immature work, showing none of Michelangelo's great qualities, and no immature work can explode a theory drawn from the mature work of the same artist. Michelangelo was constantly at the beck and call of a succession of pontiffs, and was constantly being made to desert one piece of work for another; and this fact undoubtedly had something to do with the incompletion of his work. He may also, occasionally, have deserted a statue because of veinings in the marble. Neither of these causes, however, seems sufficient to account for the remarkable fact that there is hardly a work of sculpture by him in existence, after the time of the "David," which is finished throughout by his own hand. Some of his statues were finished by inferior men after he had done with them, but most remain, as he left them, more or less unfinished.

There must surely have been some cause, deep down in the temperament of the artist, for this; and this fact Mr. Symonds partly recognizes later in these volumes, but he does not, we think, draw as much for the study of the master's mind from it as is there to be found. It may throw some light on the question to notice that in many figures, otherwise finished to polish, the head and hands are only blocked out, and that in most of the artist's sketches and studies the head is omitted entirely or indicated by a mere scrawl. As an anatomist Michelangelo undoubtedly felt that, structurally, the head is of the least importance of anything in the figure, having the smallest influence in determining the action and movement which he was studying. It was of least importance to him artistically also, for his whole scheme of art was based on the expression of the nude figure. His finished heads are usually rather commonplace abstractions, and might be destroyed without much affecting the expression of the figure; and he may well have felt that when the figure was once done, it mattered little whether the head was completed or not, its pose being settled, and might even leave it, complacently enough, to any journeyman's hand to finish.

More than this, however, it is absurd to suppose that Michelangelo was himself insensible to the strange charm which is so visible to all of us in his unfinished work. He began to work, and to a certain extent always worked, on a system of carefully polished and rounded modelling; but he was constantly striving to infuse into sculpture meanings and thoughts which it was not meant to express and could not hold. His whole life shows him to us as an artist of the modern, *musicianly* type—fitful, moody, impatient, unable to found a school or to work with assistants—at the antipodes of the serene craftsmen who knew how to do a good thing and could teach what they knew. His deep poetic spirit tried to express itself through the medium of the most simple, classic, and formal of the arts. What more natural than that he should have found the sentiment evaporating as the work advanced, and should have, half-despairingly, left in the unfinish of the sketch a suggestion of things which the cold completeness of the finished marble could never convey? It is this struggle of a romantic temperament to express itself through a classic medium that caused the lack of finish in so much of Michelangelo's work, and which accounts also for the paradox that, sculptor as he was and remained, even in painting, it was in that more romantic art, where finish does not exclude mystery, that he found his highest and most complete expression.

There is another matter in which, it seems to us, a fuller knowledge of technical conditions might have modified Mr. Symonds's judgment. He discusses the apparent suddenness of transition from Michelangelo's realistic manner to the "schematic" treatment of the figure in the Sistine Chapel, and imagines that the intermediate stage might be found in the cartoon of "The Battle of Pisa," if it were in existence. Possibly it might, but little is needed to explain the change beyond the conditions of the work itself. The "David" may have been, and probably was, modelled directly from nature, but the host of figures on the vaults of the Sistine could be done at all only in virtue of a system and a convention. Nothing could, in the nature of things, be made from nature save more or less slight sketches and indications. Every painter who has ever undertaken much more humble work of anything like the same sort will understand how Michelangelo was *forced* to rely upon the knowledge gained from his long and intense study, and to invent a Michelangelesque type which thenceforth dominated his work, getting ever farther from the nature from which it started till it ended in the pure conventionality of the "Last Judgment," and manner became mannerism.

Michelangelo is so great that it is hardly necessary to depreciate Raphael in the comparison, as Mr. Symonds seems inclined to do. He calls Leonardo, Michelangelo, Raphael, and Andrea del Sarto "the four greatest draughtsmen of this epoch," and then proceeds to bracket Raphael and Andrea together as much inferior to the other two. This seems to us a grave fault in criticism. Raphael was, on his own lines, the equal, if not the superior, of any draughtsman that ever lived; while Andrea is every way his inferior and that of the other two. Neither is Michelangelo "always technically faultless." The left forearm of the finest of his figures, the Adam, is by no means impeccable, and he is not infrequently guilty of really bad drawing.

There are also one or two matters of fact that we shall touch upon by way of suggestions for a future edition. They are of no great importance in themselves, but accuracy is not to be despised even in trifles. The drawing Raphael sent to Dürer is not a pen-drawing but a chalk-drawing. The outlines of Michelangelo's cartoons for the Sistine were not "pricked in" with dots to guide the painter." They were traced on the wet plaster with a point which produced an incised line. The large photograph of the Adam shows this indented line plainly, and also that the master, in painting this figure, neglected his outline and entirely redrew the right leg with the brush, making it some inches longer—a very interesting display of his power. We very much doubt if the so-called "study" for the Madonna of St. Lorenzo can be properly so called. It is boldly and rapidly sketched, but every fold of drapery is in the place it occupies in the statue, and even the light is just as it falls upon the group where it is placed in the chapel. We doubt if even Michelangelo ever conceived a work of art so absolutely in its entirety as this. It is likely that the Madonna was far advanced, if not to its present state, when the sketch was made from it. Is it even certain that the drawing is by Michelangelo? A comparison of the reproduction of the drawing and of the plate of the statue, also given in these volumes, is most interesting. We are much puzzled by a sentence on p. 167, vol. i. Speaking of Cellini's statement that "The Battle of Pisa" was superior to the frescoes of the Sistine, Mr. Symonds says: "It seems hardly credible; but if we believe it, the legend of Michelangelo's being unable to color his own designs for the vault of that chapel falls to the ground." Michelangelo certainly did color his own designs for the Sistine Chapel, but we are altogether unable to see how the superiority of an uncolored cartoon over his work in color should prove his ability to do so.

The book is well printed and got up, and provided with all necessary notes, appendices, and other aids, including a good index; and the illustrations are well chosen and well executed. It is only to be regretted that Mr. Poynter's colorless copies of the heads of the Delphic Sibyl and the Prophet Isaiah should have been allowed to take the place of reproductions from the originals.

MORE NOVELS.

The Magic Ink, and Other Tales. By William Black. Harper & Bros.

The Ivory Gate.—Verbena Camellia Stephanotis, and Other Stories. By Walter Besant. Harper & Bros.

The Chatelaine of la Trinité. By Henry B. Fuller. Century Co.

The Story-Teller. Boston: W. F. Clark & Co.

Crow's-Nest and Belhaven Tales. By Mrs. Burton Harrison. Century Co.

In Old St. Stephen. By Jeanie Drake. D. Appleton & Co.

Mr. Fortner's Marital Claims, and Other Stories. By Richard Malcolm Johnston. D. Appleton & Co.

Zachary Phips. By E. L. Bynner. Boston: Houghton, Mifflin & Co.

Characteristics. By S. Weir Mitchell. Century Co.

Etelka's Vow. By Dorothy Gerard. D. Appleton & Co.

The Woodman. By Jules de Glouvet (M. Guernay de Beaurepaire). Translated by Mrs. John Simpson (*née* Senior). Harper & Bros.

THERE is perhaps no profession in which a man works harder for the sake of reputation than that of a novelist; there is certainly none in which, having won the bauble, he seems often to work so hard to lose it. He is a strange, unpractical creature, who toils upward to the sun not that he may thrive and bloom in his light, but apparently for the single purpose of rushing down to his own destruction. It is curious and touching to observe the fidelity of the public, notoriously fickle, to an author who has once won its hearty admiration: he may almost reach the bottomless pit before the news that he has started on the downward track is spread abroad and generally believed. Wisdom, indeed, takes her seat betimes "in streets and openings of the gates," but the passing crowd long displays a discouraging indifference to her choicest utterances.

It is now several years since she began to insinuate that Mr. Black was, as a novelist, neither what he had been nor yet what any novelist worthy of the most honorable crowd's distinguished attention should be; but the hour has not yet struck when people who know the 'Princess of Thule' and the 'Daughter of Heth' are eager to accept a dictated judgment of Mr. Black's work. At least we suppose so; otherwise the publication of 'The Magic Ink' is an instance of disinterested regard for an "old contributor" with which publishers are rarely credited. In this neat volume there are three stories, "The Magic Ink," "A Hallowe'en Wraith," and "Nanciebel." If the author's name were unknown, the most favorable notice consistent with the shadow of truth would be but a useless unkindness to obscurity. His adoring young sister would have to close the book with tears and bid him hope no more. Nothing more incompetent in the way of story-telling is easily conceivable. The tales have neither meaning, probability, nor form. In "The Magic Ink" and "A Hallowe'en Wraith" there is a suggestion of the supernatural which, if worked out with care and skill, might have had some sort of value; but prolonged and attenuated, overladen with sentimental gush and swamped in verbiage, the poor suggestion feels its feeble way to inglorious extinction. In providing the name "Nanciebel" and the scene Stratford-on-Avon, Mr. Black may have thought that he excited as much interest as is proper and healthy. For any relevance, the story might as well have been called "Susan" and the scene laid in Tompkinsville. It is dreadful to dwell upon the inanity exhibited in "Nanciebel." Nothing can be more distressing than childish babble from the lips of a man.

The novel 'The Ivory Gate,' and the volume of short stories entitled 'Verbena Camellia Stephanotis,' offer abundant evidence that Mr. Besant is going down among the babblers. His deterioration results from a too highly cultivated benevolence, and a flow of language which does not express thought, whatever it may conceal. The defects of his virtues have taken possession of him; his naturally sympathetic and fluent style has become sentimental and prosy, and he babbles on serenely, dispensing paternal blessings with a wide, optimistic smile. So comfortably, indeed luxuriously benign is his state of mind that he entreats us to turn our backs on the Horn Gate, with its harrowing realities, and to dawdle around the Ivory Gate, revelling in false visions of universal bliss. Any impulse to face facts and the unpleasant aspects of human character necessarily perishes in the presence of perfect amiability; therefore, Mr. Besant has almost abandoned himself to the construction of idols whose feet are not of clay, and to ecstatic dreams of a socialistic paradise arrived at in contempt of reason. So cruel a force as Nature is, of course, a trial to him; so, while placidly ignoring her common ways, he represents her as a sort of juggler, performing tricks which relegate every known variety of magician to everlasting shade. It is easy to say that there exists on earth a human body inhabited alternately by two intelligences, each one unconscious of the thoughts and acts of the other; not so easy to give a convincing, circumstantial account of the phenomenon. Mr. Besant is not in the least convincing. The explanation of the mystery of the 'Ivory Gate' is preposterous, and there is no balm for wounded intelligence in the beautiful spectacle of care and sorrow retiring to their Stygian caves forlorn, and the inauguration of a general love-feast.

In his volume of short stories sentimentality and magic (queer companions!) go far to produce a volume of nonsense. The first story, with the floral title, pushes sentiment to a point where the tears which we are invited to shed turn irresistibly to laughter. The second, "The Doubts of Dives," relieved of its philanthropic motive, might be properly named "The Tale of the Artistic Mendicants," and described as a MS. found in a cellar in Bagdad. The third, "The Demoniac," describes a situation well within the bounds of human experience. Out of its inseparable misery De Maupassant would have made a study which no one could forget. With his smirking and preaching, Mr. Besant has very nearly annihilated the horror he conceived, and, with the horror, the moral lesson. The last story is a continuation of Ibsen's "Doll's House." It sums up the consternation felt by many worthy people lest the somewhat impetuous *Norah's* desertion of her husband should be widely held justifiable, and establish a righteous precedent. To this is added the author's profound personal alarm. If wives and mothers once begin to take an interest in themselves, as creatures possessing mind and spirit, who can measure the imminent calamity for society? What is to become of Mr. Besant's social pleasure-house if the heresy of individualism is to insinuate itself into the foundation? Without presuming to belittle the possibility of the gloomy Norseman's vicious effect on British morals, there doesn't seem any reason for being scared out of one's wits about it. But in "The Doll's House—and After" Mr. Besant has seized time by the forelock and invested himself with the robes of the son of Hilkiah when he went down to cry in the ears of Jerusalem.

When the old faiths begin to fail, one is rarely so jaded as to be unable to turn with expectation to the new. In spite of incoherencies and affectations, Mr. Fuller's 'Chevalier of Pensieri-Vani' had much attraction and promise. The attraction lay in the independent and satirical observation and the clever portrayal of eccentric people; the hope was that the author might grow in taste and cast off his objectionable mannerisms. 'The Chatelaine of la Trinité' is not wholly disappointing. By close attention a train of events may be perceived, and some deference is paid to the ancient and honorable claims of verbs and pronouns. The jealousies and squabbles of archæologists are described with humor and without depressing erudition. The adventures of Miss Aurelia West with the travelling opera company, and the search, in Salzburg, for original MSS. of Mozart's, are uncommonly funny; while the worn, long-suffering Swiss mountains are made to take on an air of virginal beauty. Very happy and admirably carried out is the idea which confers on Aurelia the distinction of novelty in that much used and abused character, the American girl in Europe. The imagination and physical energy which she throws into her reconstruction of the simple Chatelaine are thoroughly national and feminine, and no woman except an American could so magnificently ignore masculine resentment of petticoat government. Yet the three lovers dragged by Aurelia to the Chatelaine's feet did, when tyranny became intolerable, manage to run away. The coolness, not to mention ingenuity, displayed in their escape might be offered to Mr. Besant, gloomily pondering over the old story of Eve and the apple, as evidence that self-reliance still survives among men, and that they may be trusted to hold their own against "emancipated woman."

'The Story Teller' is a collection of twenty-six tales, all of which have been previously printed in *Two Tales*, a weekly magazine. The authors are American, and most of them are familiar to magazine-readers. Eight years ago the Scribners published a series of short stories, and comparison between the two publications is not flattering to the younger set. Generally speaking, the subjects chosen are weaker, the method is no better, and there is a noticeable deterioration in style. The passion of love holds its own, and the exhibition of mortal folly in a proverbially foolish condition is in one or two cases especially eccentric. Miss Wilkins is an authority on New England character, and perhaps in that kingdom of eccentrics the blind god suits himself to his company. We accept "Juliza" under the influence of love as a person possible to New England, but with the reservation that, if there are many like her, the comic or burlesque element in the Puritan States has been sadly neglected. Imagination, when present in these tales, mostly expends itself on the supernatural, the occult, and the fairy-tales of science. The danger of a little knowledge is appallingly exemplified. No pains are taken to produce an illusion, and it is always very clear that the author doesn't know enough about occultism, or hypnotism, or psychic phenomena to impose on the most liberal credulity. Mr. Hawthorne's "Interplanetary Episode" and Mr. Heard's "Experiment with Time" are excepted from this sweeping indictment. The stories presumably taken from life are strong in local color. The mania for actuality in description of locality and reproduction of local phrase may account for the regretted incompetence to represent things that are beyond common human vision. It has much to do with the reduction of our authors to the inartistic level of the actor who has only one rôle, and it is positively fatal to the acquisition of a good style, which adds so much to the worth of him who has something to say and is the salvation of him who has nothing. The literary impression derived from these stories, none of which

absolutely fails to excite a mild interest, is that the authors have not tried to write correctly and fluently, and that elegance is an obsolete ambition.

As a mitigation of the depressing suspicion that we are all hopelessly lost in sloughs of dialect and slang, Mrs. Harrison's volume, 'Crows-Nest,' comes opportunely. The moss-grown Virginian town, better known as Alexandria, has, in tranquil old age, found a graceful chronicler of its stirring youth. Charming is a word that nowadays signifies little; yet charming, and delightful too, are the right words to describe both subjects and workmanship. Figures gentle and courteous, yet with plenty of spirit and fire on occasion, pass before us, each spinning his life thread of mingled joy and sorrow. They pass but do not vanish, for some things that are written remain, and these tales are sealed with the seal of permanency.

The author of 'In Old St. Stephen' makes a conscientious effort to sustain a style consistent with the dignity of a gentleman who was young when fine ruffles and fine manners were the fashion. The effort is sometimes too conspicuous, but is nevertheless praiseworthy. Miss Drake has a tendency to meander aimlessly, as if she were not sure of her point, but hoped to find it. In the course of her wanderings she makes some pretty sketches of old times in Virginia, and manages to give her characters individuality. Tragedy is the natural outcome of the complication; still, the case is one where the death of the villain would have been quite as natural as that of the hero, and more cheerful.

Mr. Johnston, the chronicler of Middle Georgian manners and customs, is apparently inexhaustible. His latest volume, 'Mr. Fortner's Marital Claims,' closely resembles many of its predecessors. The primitive love-making still goes on, and the sectarian hostilities rage. It is needless to comment on the dialect, which remains the basest corruption of English ever seen in print. One story, or rather incident, entitled "An Adventure of Mr. Joel Pozzle," has nothing to do with either love or religion, and the situation is so comical and so well hit off that, for once, the Georgian jargon may be forgiven.

Still another tale of the good old times is 'Zachary Phips.' We hope those times were really good enough to condone the badness of a boy who ran away to sea at he tender age of eight, and to permit him, when barely of age, to become an acceptable attaché of the American Legation in London. Certainly Zachary did far better than if he had been good and stayed at home and pursued humdrum knowledge under the shadow of Master Tilleston's cane. Whatever of national importance was going on from Boston to Florida, he managed to be in it. A most innocent accomplice of treason, he made one of the picturesque Washita expedition planned in the angry heart of Aaron Burr. Barely old enough to blow a whistle, he shared the *Constitution's* naval fame. Again, in the hand-to-hand tussle between the *Chesapeake* and *Shannon*, he was literally right on deck. As a climax of adventure, to him was it given to witness those atrocities in Florida which make Andrew Jackson appear more of an assassin than a soldier. Zachary's career makes a capital book for youthful readers, and is not without serious interest. The author's historical vision, while patriotic, is unprejudiced, and he gives history a dramatic value without distortion of facts. Some touches of characterization are very vivid—for instance, in the passing glimpses of Mrs. Blennerhasset and of Burr. Burr's last appearance in New York, poor and persistently dishonest, apparently unmoved by private neglect and public scorn, yet sorrow-stricken by the death of his grandchild, makes one feel, not how ignoble he was, but how noble he might have been.

Dr. Mitchell's 'Characteristics' is a dangerous experiment for an author who is sensitive, as all authors are, to the imputation of dulness. A book of conversations, connected only by the personality of the talkers, must be superlatively brilliant to escape being, on the whole, rather tiresome. To sustain interest in character illustrated almost entirely through talk, the mental qualities of the persons represented have to be uncommon and perhaps sharply contrasted. Dr. Mitchell has selected four men too much on a level of education, worldly condition, and personal refinement, to permit of very exciting exchange of thought on subjects of supposed general interest. The talk has scope, embracing science, literature, and social topics, and it is sane and even in tone. Perhaps because a man is usually at his best when speaking out of the fulness of knowledge, the doctor who is the narrator is vastly the most entertaining of the group. His short stories of queer cases are particularly welcome interludes. The man of letters, on the other hand, is by all odds the weakest. His manners are modified Johnsonian; if he had only had the great doctor's tongue, the discussions would have gained much in liveliness and point.

'Etelka's Vow' is not by an American author, but its plot turns on an American custom which our writers have overlooked or perhaps deliberately blinked. "An American duel," it is gravely stated, "consists simply of the drawing of lots as to which of the two men shall within a given time and on his word of honor shoot himself." If the duel, as practised in America, has any national peculiarity, we have always supposed that it "consists simply" in the promptness as to which of the two men shall "get the drop" on the other. But no doubt the worshipful company assembled in the *Erzherzog Leopold* knew whereof they spoke, and the author is justified by her authority. Granting the American duel, the complications ensuing are not improbable, and are ingeniously arranged in English not inferior to the short quotation given.

The English-speaking public has not yet been captured by the fiction of the most modern French school. When the popularity of the Scandinavians is waning, then we may look for the rise of the French Idealists. It appears that a Frenchman cannot write or paint without announcing that he belongs to a school and definitely labelling himself. So these gentlemen who deny the supremacy of the *bête humaine*, who steer the middle way between Romanticism and Naturalism, call themselves Idealists. The truth is, that they try to give good and evil each its proper value, that they recognize spirit as distinct from mind, and that they represent human emotion and passion without degrading them. If the reaction against Zola & Co. should even hold its own for a few years, it will do much to relieve the fair fame of France from the shame of a grossly immoral popular literature. 'The Woodman' (*Le Forestier*) is an excellent example of the school. It is a pity that, in the preface, the translator has anticipated the critic's praise. Her sketch of the author positively burns with high appreciation of him, both as M. de Beaurepaire, Procureur-Général of France, and as Jules de Glouvet, Idealist of the Chemins Verts. The only point that has been left for the critic's independent enthusiasm is the beauty and freshness of the descriptions of the forest. That the people who for generations had dwelt on its outskirts loved it with a pagan idolatry can well be believed. Jules de Glouvet makes you feel as if you could go forth at any moment and do battle to the death for every tree. The translator dwells on the love of Renaud, the poacher, and Henriette. The author really makes little of that. What he makes much of, and what every one may reflect on with unstinted admiration, is the steadfast soul of the boy to worst conditions born, and the poetic spirit which, careless of its poor mortal habitation, identified itself with the sweetness of the wild wood's breath and the rapture of the birds' song.

Studies in Modern Music. By W. H. Hadow. Macmillan & Co. 1892. Pp. 335.

It is generally assumed by musical historians that the chill of Puritanism nipped the promising bud of music in England. It is likely, however, that the growth of commercialism and the extraordinary devotion of Englishmen to politics had as much to do in diverting attention from the divine art as the Puritan iconoclasm or raid on organs and other instruments. How much the musical spirit was weakened by all these causes was shown by the amazing length of time during which Handel and Mendelssohn were the sole composers idolized in the British Isles, and by the strict quarantine which the critics maintained against all new-comers. Even as a pianist Liszt was an utter failure in England in 1841, and his manager would have been impoverished had not Liszt, with his usual generosity, repaid him his share of the receipts. Fourteen years later Richard Wagner, the greatest conductor the world has ever seen, was shamefully abused when he condescended to conduct the Philharmonic concerts for a season; he was reviled as a humbug, and the directors joined with the critics in finding fault with everything he did, because it was different from Mendelssohn's way. As Wagner complained in a letter to Liszt: "'Sir, we are not used to this'; that is the echo I hear eternally"

That something of this spirit still lingers in England is shown in a recent volume by H. H. Statham, in which such gems occur as these, that Wagner was "the most remarkable charlatan who has ever appeared in art"; and, regarding his operatic poems, "It would be cruel to judge such trash by any known literary standard." But the vast majority of English writers have got beyond this silly stage. Indeed, nothing is more remarkable than the large number of enlightened, vigorous, and fluent writers on musical topics that modern England possesses. Grove's admirable 'Dictionary of Music and Musicians' is evidence in point. The new spirit of enlightenment which the late Dr. Hueffer did so much to foster, is evident in that monumental work. It is conspicuous also in other recent publications, among which is the volume of 'Studies in Modern Music' by Mr. Hadow, devoted to Berlioz, Schumann, and Wagner, with a preliminary essay on "Music and Musical Criticism." By the use of epistolary matter and other recent documents, the writer has succeeded in freshening up the familiar stories of these composers' lives, and his judgments seem to us almost always sound. The volume possesses a literary as well as a musical interest, the author being a man whose mind is stored

with other lore than music, and who is thus able in writing, for example, of Schumann's romanticism, to bring in side-lights from the literary movement in Germany.

Mr. Hadow has the courage to urge that there is no excuse for the "classical example" of the plagiarisms indulged in by Handel (p. 30); nor does he hesitate to bring forward facts (p. 94) which show up Mendelssohn in his narrow sympathies, as a man who had no appreciation for his contemporaries, Chopin, Wagner, Schumann, Liszt; who said of Berlioz, that "he is a perfect caricature without one spark of talent," and who even abused one of Schubert's quartets—the finest quartet ever written—as "poor music." But Mr. Hadow commits quite as great a *bêtise* in the sentence, "Few compositions are perfect unless they have been signed by Beethoven or Brahms." In our opinion there is infinitely more beauty of form in the songs of Schubert or Franz, the short pieces of Chopin and Schumann, the music-dramas of Wagner, the preludes and fugues of Bach, than in the artificial four-story symphonies of Beethoven and the reactionary Brahms, whose present popularity in London, by the way, cannot but be regarded in the light of a fad. But Mr. Hadow atones for this remnant of the old prejudices by the way in which he insists on the modernity of Bach: "He was the most daring harmonist of his century, and it may be said without exaggeration that, among his countrymen at any rate, there is hardly a single 'modern' progression or modulation which cannot be found in his writings." That modern lyric Bach, the immortal song-writer who has just died, Robert Franz, is, however, not mentioned by Mr. Hadow. He has apparently not yet been discovered by the English public; and inasmuch as it is only fifty years since Schumann reviewed his first songs so enthusiastically, more can hardly be expected.

In the chapter on Wagner there are a few minor errors. It is not the third act of "Lohengrin" that forms the transition to the Nibelung style, but the much more advanced second act, which was also composed last. The implication (p. 285) that it was the Emperor of Brazil who gave up the "Tristan" project is erroneous. The statement (p. 292) that the $225,000 needed for the Bayreuth festival of 1876 was collected by Wagner societies and concerts is misleading. Less than half the sum needed was subscribed by the societies; King Ludwig contributed $50,000, and the balance was—a deficit, which Wagner himself paid after the festival. The assertion (p. 294) that there was a profit of $3,500 from the Albert Hall concerts in 1876 does not tally with Dr. Hueffer's revelations in his 'Half a Century of Music in England.' But apart from a few such minor errors, Mr. Hadow's volume is reliable, and may be cordially commended to all lovers of good musical literature. Its value is enhanced by portraits of the composers discussed and of the young women who became the wives of Schumann and Berlioz.

A Companion to the Iliad for English Readers. By Walter Leaf, Litt.D. Macmillan & Co. 1892.

Fragments of the Greek Comic Poets. With Renderings in English Verse. By F. A. Paley, D.D. Macmillan & Co. 1892.

An ingenious divine, who illuminates one of our theological schools, has lately gleaned from Homer and the 'Iliad' an argument against the theory of evolution. The 'Iliad,' he says, is the greatest of poems, and Homer one of the earliest poets. He had, like Melchizedek, no forerunners nor inheritors; he is, indeed, a *lusus naturæ*, or, rather, a special creation. He proves, therefore, how needless it is to assume that slow growth and development are necessary either in the world of mind or of matter. Mr. Andrew Lang, without using the 'Iliad' as a theological weapon, seems, in a recent article, to agree with our divine as to the isolated and marvellous character of Homer. Mr. Lang will have only one poet, and no brothers near his throne; Mr. Leaf, on the other hand, believes in a great poet surrounded by brethren, and unfolds this not unreasonable view, together with other historical and literary questions, in his 'Companion to the Iliad.' The 'Companion' presents the novelty of a commentary, not on the Greek text, but on the well-known translation of the 'Iliad' by Messrs. Leaf, Lang, and Butcher. It is, of course, intended for the general reader who has no acquaintance with Greek. The position of Greek literature is indeed so fundamental in the history of the human mind that people who like to look into the origins of things can hardly dispense with some knowledge of it. To such inquirers the poetry of an original may be barred, while its historic value may be almost perfectly conveyed in a faithful translation. Hence Mr. Leaf's experiment. His commentary on the *Realien* of the 'Iliad' is entirely intelligible to the reader of a translation; and equally so is his discussion of the Homeric question in the elaborate introduction and occasional notes scattered throughout the volume. In fact, his treatment of the question shows how largely it turns on facts and discrepancies that lie within the judgment of any man of sense and culture. The abstruser points of language and dialect or vocabulary are by no means so decisive as certain broad indications that lie open to the general reader.

The bulk of Mr. Leaf's notes is the same as those offered in his larger edition of the 'Iliad,' and exhibits the same features and theories. He starts with Grote's assumption—which is indisputable—that the 'Iliad' has not the unity and continuity of the 'Odyssey'; it is not, like the 'Odyssey,' a literary whole. If we seek for such a whole in the 'Iliad,' we shall find it in a poem on the "Wrath of Achilles," contained in Books i, xi, xvi, and xxii, and embracing the quarrel of Agamemnon with Achilles, the rout of the Greeks, the exploits and death of Patroclus, and the slaying of Hector. Such a poem contains obviously the conception of one mind, flawlessly executed; it is, unlike the 'Iliad,' a unity and a creation. Its interest, moreover, is almost purely human; its machinery is not set in motion from Olympus nor from fairyland, like parts of the 'Odyssey' and of the rest of the 'Iliad.' Around this nucleus were gathered several short poems (such as the "Exploits of Diomed") whose purpose was to glorify the heroes of the great Achaian families. To these, as ornamental pendants, grew such lays as "The Embassy to Achilles," "The Making of the Arms of Achilles," "The Ransoming of the Body of Hector." The composers of the second series, while diminishing the artistic effect of the original poem, still bore in mind its scenery and atmosphere; the composers of the third series—of the Embassy and the "Fight at the Wall"—took liberties with some vital features of the original poem. The details of these divergencies and inconsistencies, of inferiority in conception or style, are pointed out in the notes to the respective books. There is really no denying that the quality of the 'Iliad' varies, that some of the battles are tedious reading, and that, here and there, avenues are opened which lead nowhere. Shelley admits this difference of quality when he praises so highly the 24th book. Whether several hands had the making of the poem, whether several makers could possess Mr. Matthew Arnold's "grand style"—these are questions which Mr. Leaf discusses with good sense, clearness, and plausibility.

Some of the most interesting notes in the volume deal with the discoveries at Mycenæ and the manner in which they illustrate the 'Iliad.' Mr. Leaf finds in them a confirmation of the Achaian origin of the poem. He accepts Mr. Petrie's date of 1150 B.C. for the contents of the shaft-tombs, and he conjectures 1050 B.C. as a probable date for the composition of the poems. Mr. Petrie's dates are still, with good reason, *sub lite;* but there is no reason to doubt that, after sifting and comparison, the relics of Mycenæ will eventually furnish positive dates as landmarks for the Achaian period. These relics offer a perplexing mixture of work which is very crude and work which is artistic and beautiful. They do undoubtedly illuminate certain passages of the 'Iliad'; yet, again, they offer problems which Mr. Leaf passes over rather lightly. The silver fragment, for example, which was recently cleaned and which figures as a frontispiece of the volume, represents a besieged city in a manner that, while reminding us remotely of Assyrian work, is unquestionably and delightfully Greek in the freedom and variety of the poses. Yet the entire nakedness of most of the warriors is a surprise and a perplexity to readers of the 'Iliad.' Again, while an expert like M. Perrot dates the Vapheio cups far back in the pre-Homeric heyday of Achaian civilization, an authority like Dr. Murray prefers to place them as late as the seventh century B.C.

Dr. F. A. Paley's little book is well enough conceived, but not so happily executed. It is a neat volume, intended, the author says, "alike for the schoolroom and the drawing-room"; and no one who can read the Greek will quarrel with the selections, which have in general wit, point, and grace. But the schoolboy will be perplexed by Mr. Paley's paraphrases; and the drawing-room reader will imagine sometimes that the Greek is obscure or has no Attic salt. The chief reason of this is that Mr. Paley's rhymes are butterflies which lead him too far afield. In pursuing them he does not hesitate to make up whole lines or phrases, or to leave out essential words; and this gives a blurred and awkward effect to an original that is full of grace and lucidity. The drawing-room reader must not, therefore, blame Eupolis or Menander for darkness of expression, but must have faith that, with the aid of the Greek as a commentary, Mr. Paley's riddles would be fully elucidated. And yet Mr. Paley is often almost felicitous, as in the following lines, which illustrate his virtues as a translator as well as his weakness under the beguiling influence of rhyme:

> "One course in life there is that's hard to roam,
> Back from a husband's to a father's home;
> And every decent wife should fear to tread it;
> The 'horning heat' wins nothing but discredit."

The Armies of To-day. Harper & Bros. Illustrated. 8vo, pp. 438.

Harper & Bros. have republished in handsome book-form the series of papers on "The Armies of To-day" which recently appeared in their *Monthly*. The papers vary a good

deal in scope and method, but this, perhaps, lends an agreeable variety to the book as a whole. The armies of America, England, Germany, France, Russia, Austria, Italy, and Mexico are separately discussed, with excellent full-page illustrations of uniform and accoutrement in the several arms of each service. The authors, with one exception, are officers of rank in the several armies described, and therefore speak authoritatively. The chapters on the armies of the United States, Germany, Austria, and Italy are business-like analyses of the organization of the troops and of the legal methods by which they are raised and recruited. In an appendix Lieut.-Col. Exner of the German Army adds a clear and very intelligent résumé of the military situation in Europe, which includes a comparison of the forces of the nations with respect to their preparation for war.

The paper of Gen. Viscount Wolseley on the British Army is less formal and more lively than most of the others. He gives an historical sketch of that army's progress and its growth in the qualities which have made the British soldier famous, but does not omit to criticise the happy-go-lucky methods of the Government in all matters of organization and support, in spite of which the army achieved its glory. He deals freely also with the questions of reforms now needed, and the possibility of making the system of voluntary recruiting a satisfactory mode of filling the ranks.

Gen. Lawal enlivens his sketch of the French Army with descriptions of the annual manœuvres, in which he puts us among the spectators and amuses us with the comments of the bourgeoisie and of the peasant on-lookers, as well as with personal traits and little adventures of the soldiers. Through the whole paper the dominant idea is that the German's day of reckoning is coming, and that France is as resolved to reëstablish her former Rhine frontier as she was in the gloomy days which first followed the loss of Alsace. The spirit of the whole paper and its scarcely restrained tone in this respect are perhaps the most significant thing in the book.

The paper on the Russian Army is the most reticent in its discussion of the future and most cautious in its disclosures. It strives more to present an intelligent idea of the Russian soldier than to give us encyclopædic information as to the military system. The Russian Army is necessarily an assemblage of different peoples and tribes, and the most characteristic thing in its organization is the skill with which the qualities of each are turned to account.

The book is so ornamental and so useful that it will prove a very acceptable source of instruction as well as an amusing companion for a leisure hour. The larger cuts are on separate leaves with no printing on the back, and are excellently done. The paper is heavy, the type large and clear, and the presswork of the first order.

Recent Rambles; or, In Touch with Nature. By C. C. Abbott, M.D. Philadelphia: J. B. Lippincott Co. 1892. 8vo, 330 pp. Illustrated.

IN this volume, compared with his earlier books, Dr. Abbott has given us less of incident and observation and more of introspection. His rambles, while, as before, mainly on the banks of the Delaware or the lowlands of New Jersey, among familiar yet ever interesting by-ways, in this instance have led him also into the western arid region, where it is evident he felt himself a stranger. The numerous brief chapters of which his record is made up are of unequal quality, some seeming really and others but artificially "in touch with nature." One of the best, perhaps, is a "Defense of Idleness"; another which we have found enjoyable celebrates "Persimmons." Here and there are bits which have much of the charm and freshness of this writer's 'Wasteland Wanderings,' yet there are others, and notably the introductory chapter (which we must regard as our author's low-water mark), in which he comes dangerously near forgetting that the treatment of an individual's attitude toward Nature may be as monotonous as Nature herself is infinitely variable.

This volume is presented by the publishers in most attractive style; even the haziness of the "process" illustrations from photographs is less irritating than usual, and one, a vignette of a tree-frog, has even a self-assertion which is charming.

Paraguay: The Land and the People, Natural Wealth and Commercial Capabilities. By E. De Bourgade La Dardye. English edition edited by E. G. Ravenstein. London: George Philip & Son; New York: Charles Scribner's Sons. 1892.

THE translation of this book was worth the making as well on account of its own excellence as of the dearth of competing volumes. It is not an interesting book, except as facts are interesting, and of these it is stuffed full. The personal element nowhere comes to the surface. There are no records of travel or adventure, almost no characterizations of landscape or people; but there is an excellent physical geography of Paraguay, with some important corrections made in the work of predecessors, a fairly full account of the flora and fauna and mineralogical wealth of the country, a condensed description of the Government, the laws relating to property, and the movement of population, and some full and valuable chapters on the agricultural and commercial resources and possibilities of Paraguay. M. de Bourgade's principal contribution to geographical knowledge is a rectification of the Brazilian frontier, and the demonstration, if we may trust him, that the Pilcomayo, owing to its interminable shallows and rapids, can never become, as has long been hoped, a great artery of communication with Bolivia. His English editor might well have cut out his prophecies in regard to Argentine finance, which time has left hanging ludicrously. Three statistical appendices have been added, and an excellent pocket-map is offered at the end as if in lieu of an index. A baker's dozen of plates are brought over from the French edition, but are too pallid to add much to the value of the book.

Fort Pitt and Letters from the Frontier. Pittsburg. 1892.

THIS is apparently a selection from the copies of manuscripts which were collected by or through the interposition of the late W. M. Darlington of Pittsburg, and now issued in print by his family. It seems that the public library of that place possesses a copy, procured for it by M. Margry, of the journal of Céloron, the French officer who, in 1749, followed down the Ohio, planting his inscribed plates in token of taking possession of the valley for France. From this copy the journal is here printed at length, but not for the first time, as the editor mistakenly supposes. It was printed in this way in 1885-86 in the "Catholic Historical Researches." Various letters of Gens. Grant and Forbes, as well as some of Col. Bouquet, relating to the campaign of 1758, and journals, letters, and orderly-books of Capt. Écuyer, the Commander at Fort Pitt in 1763, are also printed from copies made for Mr. Darlington from the Bouquet papers in the British Museum, where they form a part of the Haldimand Collection. It is a satisfaction to have these papers printed at full length, for the manuscript copies from the Bouquet papers made for Mr. Parkman and now in the Cabinet of the Massachusetts Historical Society are not easily accessible to distant students, and the Calendar of them published by the Archives Department at Ottawa raises an appetite without satisfying it. There is another series of letters from the Western posts, 1776-99, which has been gathered from different sources, apparently. They cover papers by Gens. Edward Hand, William Irvine, James O'Hara, Knox, Wayne, with a few from Alexander Hamilton and James Wilkinson. A sketch of Gen. O'Hara and a paper by Mr. Darlington on the erection of the region into Alleghany County in 1785-86, complete the table of contents.

The book is a good contribution to our knowledge of a certain phase of Western history.

The Place of the Story in Early Education, and Other Essays. By Sara E. Wiltse. Boston: Ginn & Co. 1892.

UNLIKE so large a proportion of the current haphazard productions for children, this volume of essays about children, their natures and needs, must command the respect of the older reader who looks through its pages. Homely sincerity and adaptability to the plain wants of a child as explained by modern methods of observation are its characteristic individual merits. Its faults are partly due to the circumstances of its production, and are partly those of its class. It suffers from the inevitable scrappiness and lack of anything like evolution of thought that are consequent upon the collection into a book of detached magazine articles and lectures delivered to a popular audience. Any one who expects to find here the progressive development, stage by stage, of educational methods, that may reasonably be looked for in the bound volume, will have to put up with disappointment. But the desire for more definite teaching that she succeeds in awakening is a proof of the clearness of the author's own convictions, while the hints and suggestions she gives not only are valuable in themselves, but will show the reader the way to more systematic authorities. Some, at least, of these oft-quoted authorities have been fathers. Why, then, do the writers who seek to popularize and distribute their ideas address themselves so exclusively to mothers? The complications likely to arise if one parent walks in the light of Freyer and Perez and *Babyhood*, while the other is still groping in ante-Fröbelian darkness, are worth forestalling, one would think. Perhaps if both parents were impartially addressed, the more or less sentimental appeals to the emotions which are a distasteful ingredient in writings of this class, not excepting the present one, might be altogether left out.

BOOKS OF THE WEEK.

A Conquering Heroine. Tait, Sons & Co. 25 cents.
Adams, W. I. L. American Annual of Photography. Scovill & Adams Co. $1.
Allen, S. F. Down in Dixie. Boston: D. Lothrop Co.

Atkinson, Canon. Scenes in Fairyland. Macmillan. $1.25.
Barrie, J. M. The Little Minister. 2 vo's. Lovell, Coryell & Co. $.12.
Bass, M. Florence. Nature Stories for Young Readers. Boston: D. C. Heath & Co. 30 cents.
Blavatsky, Helena P. From the Caves and Jungles of Hindostan. The Path. $2.50.
Bouvet, Marguerite. Prince Tip-Top. Chicago: A. C. McClurg & Co. $1.25.
Brémont, Anna, Comtesse de. The World of Music. 3 vols. Brentanos. $3.75.
Burr, Rev. E. F. Aleph the Chaldean; or, The Messiah as seen from Alexandria. W. B. Ketcham. $1.75.
Burt, B. C. A History of Modern Philosophy. 2 vols. Chicago: A. C. McClurg & Co. $4.
Campbell, H. J. Text-Book of Elementary Biology. London: Sonnenschein & Co.; New York: Macmillan. $1.60.
Church, Rev. A. J. The Story of the Iliad. Macmillan. 50 cents.
Copleston, Rev. R. S. Buddhism Primitive and Present in Magadha and in Ceylon. Longmans, Green & Co. $5.
Corbin, Caroline F. A Woman's Philosophy of Love. Boston: Lee & Shepard. $1.50.
Days with Sir Roger de Coverley. Macmillan. $1.50.
Dickens, Charles. Christmas Books. Macmillan. $1.
Dick's Festival Reciter. Dick & Fitzgerald. 30 cents.
Dodd, Anna B. In and Out of Three Normandy Inns. Lovell, Coryell & Co. $7.50.
Donaldson, A. L. A Millbrook Romance, and Other Tales. Thomas Whittaker. 75 cents.
Ellwanger, G. H. In Gold and Silver. Appletons.
Figure-Skating, Simple and Combined. Macmillan. $2.25.
Florio, John. The Essays of Montaigne. The First Book. London: David Nutt.
French-Sheldon, Mrs. Sultan to Sultan: Adventures among the Masai and Other Tribes of East Africa. Boston: *Arena* Publishing Co. $5.
Galton, Francis. Finger Prints. Macmillan. $2.
Gaskell, Mrs. Cousin Phillis. Chicago: A. C. McClurg & Co. $1.
Harland, Marion. The Story of Mary Washington. $1. Boston: Houghton, Mifflin & Co. $1.00.
Jukes-Browne, A. J. The Student's Handbook of Physical Geology. 2d ed., revised. London: George Bell & Sons; New York: Macmillan. $2.25.
Kelsey, Prof. F. W. Select Orations and Letters of Cicero. Boston: Allyn & Bacon. $1.25.
Kinnear, B. O. Impending Judgments on the Earth. New York: The Author.
Lamb, Charles. Essays of Elia, and Last Essays of Elia. 2 vols. Boston: Little, Brown & Co.
Lanciani, Rodolfo. Pagan and Christian Rome. Illustrated. Boston: Houghton, Mifflin & Co. $6.
Latimer, Elisabeth W. France in the Nineteenth Century, 1830–1890 Chicago: A. C. McClurg & Co. $2.50.
Monroe, Miss Harriet. Valeria, and Other Poems. Chicago: A. C. McClurg & Co. $1.50.
Moore, C. L. A Book of Day-Dreams. 2d ed., revised. Henry Holt & Co. $1.25.
Munroe, Kirk. Cab and Caboose; The Story of a Railroad Boy. Putnams. $1.25.
Nuttall, G. H. F. Hygienic Measures in Relation to Infectious Diseases. Putnams. 75 cents.
Payn, James. A Stumble on the Threshold. Appletons.
Pellew, George. Poems. Boston: W. B. Clarke & Co.
Perkins, W. R. Eleusis, and Lesser Poems. Chicago: A. C. McClurg & Co. $1.
Pleasant Surprises for Folks of all Sizes. E. P. Dutton & Co.
Poinsard, Léon. Libre-Échange et Protection. Paris: Firmin-Didot & Cie.
Porter, Rose. Men's Thoughts for Men. Randolph. 50 cents.
Régamey, Félix. Japan in Art and Industry, with a Glance at Japanese Manners and Customs. Putnams. $1.75.
Sargent, J. Y. Grammar of the Dano-Norwegian Language. Oxford: Clarendon Press: New York: Macmillan.
Schaff, Prof. Philip. History of the Christian Church. Vol. VII. Modern Christianity. The Swiss Reformation. Scribners. $4.
Scott, W. Guy Mannering. [Dryburgh Edition.] Edinburgh: A. & C. Black; New York: Macmillan. $1.25.
Sellon, Gertrude. Short Stories about Animals. Illustrated. Cassell. $2.
Slosson, Mrs. Annie T. Aunt Lucy. Randolph. 60 cents.
The Bookworm: An Illustrated Treasury of Old-Time Literature. London: Elliot Stock; New York: Armstrong. $3.
The Magnificat. Illustrated by Frank M. Gregory. Brentanos. $1.
The Mother's Nursery Guide (Babyhood). Vol. VIII. Babyhood Publishing Co.
The Principles of Pattern-Making. London: Whittaker; New York: Macmillan. 90 cents.
The School for Scandal. Illustrated. Dodd, Mead & Co. $3.50.
Weiss, J. J. Sur Goethe: Etudes Critiques de Littérature Allemande. Paris: Armand Colin & Cie.
Wide Awake. Vol. H. H. Boston: D. Lothrop Co. $2.
Willard, Mrs. E. S. Kin-da-shon's Wife: An Alaskan Story. F. H. Revell Co. $1.00.
Winchester, M. E. Adrift in a Great City. Macmillan. $1.50.
Woodberry, Prof. G. E. Complete Poetical Works of Percy Bysshe Shelley. Centenary ed. 4 vols. Boston: Houghton, Mifflin & Co. $7.
Yeats, W. B. The Countess Kathleen, and Various Legends and Lyrics. London: T. Fisher Unwin.
Zahn, Rev. J. A. Sound and Music. Chicago: A. C. McClurg & Co. $3.50.
Zangwill, I. Children of the Ghetto. 2 vols. Philadelphia: Jewish Publication Society.
Zangwill, I. The Old Maid's Club. Tait, Sons & Co. $1.25.

DECEMBER
EDUCATIONAL REVIEW.

ARTICLES.—Educational Influence of Arnold of Rugby, Goldwin Smith; Co-Ordination of Studies, Charles de Garmo; English Composition in Colleges, George R. Carpenter; What does the Oxford B.A. Degree Represent? Richard Jones; Catcolics and the Public Schools; The True Significance of "Tolerari Potest," Condé B. Pallen; Memory in Education, George T. W. Patrick; Reconstruction of the French Universities, Gabriel Compayré.
EDUCATION IN FOREIGN PERIODICALS.—Herbert Spencer's Chapter on Moral Education, S. S. Laurie.
DISCUSSION.—Is Greek Dead? John McMullen.
REVIEWS.—Williams's History of Modern Education—The Works of Joseph Payne—Roberts's British Universities—Burt's Story of the German Iliad; Baldwin's Six Centuries of English Poetry; Foster and Williams's Selections for Memorizing; Deighton's Johnson's Life of Milton—Greenwood's Studies in English Grammar; Ramsey's English Language and Grammar.

The Nation.

NEW YORK, THURSDAY, DECEMBER 15, 1892.

The Week.

THE Republicans challenged the verdict of the country upon McKinleyism, and professed their entire readiness to abide by that verdict. The judgment of the tribunal was unmistakable. So overwhelming a defeat has not befallen any party within the lifetime of the present generation. Every doubtful State was lost to the Republicans. Such "sure Republican States" as Illinois and Wisconsin were carried for Cleveland, and Ohio was barely saved for Harrison. Other States which the Republicans had always controlled, like Kansas, for the first time failed the party, and were carried by a union of the opposition. In a number of the largest States the official count shows that the Republican vote in 1892, despite the increase in population, was much smaller than in 1888, although previously the party total had always shown a large increase in each national contest over its predecessor, notably in the following:

	N. Y.	O.	Ind.	Wis.	Cal.
1872..	440,736	281,852	186,147	104,997	54,020
1876..	489,207	330,698	208,011	130,668	79,269
1880..	555,544	375,048	232,164	144,400	80,348
1884..	562,005	400,082	238 403	161,157	102,416
1888..	650,338	416,054	263,361	176,553	124,816
1892..	609,167	402,399	256,681	170,354	117,756

During the closing days of the canvass the Republican managers had declared with the utmost vehemence that the election would decide the political character of the Senate, as well as of the House of Representatives and the President, and that the people ought to realize that a vote for the Democratic ticket meant a vote for the unrestricted control by the Democracy of all branches of the Government. The people accepted the issue. They not only gave Mr. Cleveland a great majority of the electoral vote and chose a House of Representatives which was overwhelmingly Democratic, but they also elected enough Legislatures in opposition to McKinleyism to deprive the Republicans of their present majority in the Senate. No fact was more clearly established within a week after the election than that the Democrats were entitled to the Senate as well as to the House of Representatives and the Presidency.

But although the Republicans expressly asked the people to declare their will so unmistakably that all departments of the Government would be controlled by the victorious party, they are to-day engaged in a desperate attempt to steal more than one seat in the Senate. New York and Wisconsin elected Legislatures which will return Democratic Senators. Montana and Wyoming elected Legislatures which had a majority of members pledged to oppose the choice of a Republican to the Senate. The loss of these four seats would cost the Republicans their control of the body, leaving out of the account Kansas and California. It was therefore essential that Republican Senators should somehow be secured from Wyoming and Montana, and for some days past the Republicans of those States have been engaged in schemes to count out the opposition in the Legislatures and steal the two Senatorships at stake. As they have the Executives on their side, and also seem able to control the courts, they are thus far meeting with success in their plots, and it seems possible that they will in each State organize legislative bodies which will go through the form of choosing Republicans and giving them some sort of a certificate of election. It is too early to form a clear opinion as to the final success of these plots.

Secretary Foster's recommendations of changes of methods and policy in the fiscal affairs of the Government are presented in a deprecating tone, as though it did not make much difference what he says. This may be a true estimate of the gravity of his report; nevertheless he makes some suggestions that are not without interest. He recommends, for example, that section 8 of the McKinley Administrative Act be repealed, "as experience has shown that it is impossible of practical administration." This is the section which requires that all dutiable goods consigned to this country for sale on account of the manufacturer shall be accompanied by a statement of "all the elements of cost as stated in section 11 of this act." Section 11 defines these elements of cost to be "cost of materials and of fabrication, all general expenses covering each and every outlay of whatsoever nature incident to such production, together with the expense of preparing and putting up such merchandise ready for shipment." All these details, too, are to be furnished in triplicate and to bear the attestation of the consular officer of the United States for the district wherein the goods are manufactured. This was one of the sections of the Administrative Bill upon which we made some very plain but ineffectual remarks at the time it was pending; and now comes Mr. Charles Foster, the next friend and supporter of William McKinley, jr., and says that this section of the bill cannot be executed. Of course it cannot. The intention of this section was to prevent the consignment of goods to this country altogether.

Secretary Foster makes several other suggestions by way of amendment of the McKinley Administrative Act. All these suggestions should give way to a total and unconditional repeal of the act, and we will add our belief that it will be repealed as soon as the Republican party loses control of the Senate. The Administrative Act was an act of brutality over and above the McKinley tariff itself. It was an act for the benefit of favored classes and the detriment of consumers. It was set on foot before the election of 1888 as a means of additional "protection" at a time when the protected classes did not dare to call for additional duties. They thought they could get an increase of tariff "on the sly" by putting a duty on coverings, costs, charges, and expenses in foreign countries and ports, and also by putting new difficulties in the way of importation such as those in section 8. When the election of 1888 gave them a majority in both houses and the Executive also, they determined to have the Administrative Bill and a new tariff to boot. They got them, but also got in the next succeeding election the most smashing defeat in the annals of American politics. The Administrative Bill "must go."

Postmaster-General Wanamaker makes many suggestions for improving the mail service in New York city, all of them excellent, but he fails to mention the one change which is absolutely essential to improvement of any kind, namely, the substitution of a competent Postmaster for Mr. Van Cott. It would be worse than useless to put additional facilities in charge of an official who has shown himself incapable of exercising those which are now under his direction. From the moment of Mr. Van Cott's entrance upon office, the service in this city has been growing steadily more defective, until to-day it is in a worse condition than it has been for many years. Nobody places any reliance upon it for sure and prompt delivery. We are overrun with letters of complaint from all quarters of the city and adjacent districts, giving accounts of tardy delivery, of missent letters, and of mail matter of various kinds which has failed to reach its destination at any time. The delays and mistakes are peculiarly exasperating between this city and Brooklyn, for in the latter city as well as here President Harrison's appointee has succeeded in demoralizing what was an excellently managed service when he was put in charge of it. There is no question that New York has for many years suffered from insufficient appropriations for mail service, but Mr. Van Cott has been no more handicapped in that respect than his predecessor was.

Attorney-General Miller's annual report admits that the celebrated Anti-Trust Law of the Republicans has proved abortive. He says that in all cases where it has been tried it has been found that "great care and skill" had been shown by the law-

yers of the Trusts. But did not the President, no later than in his message of December 6, give his old law-partner a handsome tribute for his "fine professional skill"? And does the Attorney-General suppose people will forget how his anti-Trust cases have been thrown contemptuously out of court by the judges, even before the opposing lawyers had anything to say? He thinks that "the investigations made and the evidence accumulated" will be "valuable." About as valuable, we should say, as the hole in the window through which the Irishman's pig escaped, and over which he rejoiced as giving him an accurate measure of the size of the beast.

A fresh exposure of census blundering is made by the *Railroad Gazette*. It attacks the census bulletin giving the railroad mileage of the world as "a careless and incomplete job." The *Gazette* alleges that most of the information regarding foreign railroads was taken from the *Archiv für Eisenbahnwesen* of May–June, 1892, and was brought over most bunglingly. For example, there are some glaring omissions, no less than 4,122 kilometres of railroads in Jamaica and Asia Minor and Egypt and other countries being entirely left out. It was bad enough to take foreign statistics of 1892 to compare with American mileage of 1890, but what value is left in the deductions made when even the statistics used are so incomplete? Moreover, as the *Gazette* shows, even the simple mathematical problem of converting kilometres into miles was too much for the resources of our Census Bureau. No constant factor was used in making the conversion, it being found to vary in thirteen tested cases from .584 to .620—the proper one being .621—and considerable aggregate error resulting. A bright lad, says the *Gazette*, could have made the conversion of the whole table in two hours, and could have done it accurately to the units' place at least. This disgraceful botch is but the latest in Porter's long series of blunders, which he only needs to print to have exposed by specialists.

Oddities are all the time cropping up in Washington. One of these is a resolution of the Senate asking the State Department whether the agreement with Great Britain which restricts the naval force on the great lakes to two small vessels carrying one eighteen-pound cannon each, is still in force, and also whether this agreement had caused the rejection of any bids from shipbuilding firms for the construction of naval vessels. Both questions were answered in the affirmative. The usefulness of this agreement, which was entered into in 1817, is apparent in the fact that both countries have been spared the expense of maintaining any armaments on those waters except the very small force needed to execute their revenue laws. Both have been saved from the dangers of collision, which the existence of a naval force commanded by "Fighting Bob Evans," or other enterprising captains, would always entail. The second half of the resolution of inquiry is probably the really important part of it. If any shipbuilding firm has lost a contract for building naval vessels by reason of its location on the inland waters, there would seem to be only two remedies for that misfortune. One is that the agreement with Great Britain be rescinded so that warships can be put afloat on the lakes; the other is that the firm in question should remove its shipyard to the Atlantic or the Pacific. A third remedy might occur to some minds—that of building a canal from the lakes to the seaboard large enough to float an ironclad.

The daily chronicle of the Brussels Monetary Conference embraces a speech by Mr. E. Benjamin Andrews, President of Brown University, which, with much respect for that gentleman, we must call queer. The idea advanced by him that "there is no surer way to lower the American tariff than for Europe and the United States to agree upon a policy favorable to silver as money," implies some political connection between the tariff-reformers and the free-coinage men. There is no such connection. We will not say that these two groups are antagonistic to each other. They are neither allied nor opposed. They have no more affiliations than Knight Templars have with Theosophists. The New York Reform Club is low-tariff and anti-silver. The Farmers' Alliance, as nearly as we can make out, is low-tariff and pro-silver. The Manufacturers' Club in Philadelphia, if its organ speaks truly, is high-tariff and pro-silver. If President Andrews has perceived any connection between the two which warrants him in saying that international bimetallism will hasten the lowering of our tariff, he has made a discovery which nobody else has yet proclaimed. Moreover, the assumption that Europe wants to have our tariff lowered is as yet unproved. Most of the Continental countries are sunk to the eyebrows in protectionism, the governing classes in each being a home-market club, whose theory is that a body of consumers at home delivered over to them safely bound is the best possible thing for trade. These classes are in a constant state of alarm lest the home market shall rise in revolt and cast off its chains. Nothing is more likely to bring about such a rebellion than the example of the United States lowering its tariff. While there are undoubtedly many manufacturers on the Continent who would like to have our tariff reduced, we venture to say that not one vote in the Brussels Conference would be gained for bimetallism by a promise to repeal the whole American tariff.

Equally malapropos is President Andrews's assumption that the world has an interest in keeping up the price of silver. Perhaps that is a thesis which we, as a silver-producing nation, are interested in maintaining. If so, it had best be put forward by Senator Jones rather than by President Andrews. Mr. Jones is a silver-producer, and, as a long-winded talker on the silver question, can distance anybody whosoever in this country. He is especially strong in the doctrine that a high price for silver is an important thing in this world. But really this is one of the most pestiferous misconceptions that ever got into the head of a human being. The world has no more interest in high prices for silver than it has in high prices for potatoes. Intelligent members of the community should just let prices, whether of silver, or of gold, or of pig iron, regulate themselves. In fact, they will regulate themselves, however much they may be tinkered at by private persons or by international conferences.

There has been much public interest in the practical working of the new Corrupt-Practices Act in Massachusetts, as the act is by far the best of the few that have been adopted in this country, and as it had its first trial in a Presidential election. Unlike the New York act, it requires sworn returns by campaign committees as well as by candidates. The committees filed their reports on Thursday. The first revelation they make is of a defect in the law which the politicians have been quick to take advantage of. Full accounting is required for all contributions received inside the State. The name of the contributor must be given in each case, and the uses to which the money is put; but for contributions received from outside the State no such specific accounting is required. The result has been that, in the return of both the Democratic and Republican State Committees, nearly half the total of money received is put down as having been received from the National Committee. Thus of the $59,000 which the Republicans spent, $23,000 came from their National Committee, and of the $53,000 which the Democrats spent, $23,000 came from their National Committee. The obvious inference is that heavy contributors in Massachusetts who did not wish to have their names made public with the amount of their contributions, sent those contributions to the National Committee and had them sent through that source to the State Committee. With the exception of this defect, which is not an easy one to remedy, the law seems to have worked very well. It has certainly procured an amount of publicity as to campaign expenditures greater than has ever before been attained in any State. The itemized account of the Republican Committee fills over two columns of the Boston *Herald*, giving in each instance the source of every contribution and the specific use to which it was put.

The failure of Jay Gould to bequeath anything to churches or charities has probably saved some religious bodies from considerable embarrassment. It was confidently expected that his own church at least, and probably his own pastor, would receive handsome legacies, in which case both the church and the pastor would have been put to their trumps in composing excuses for accepting them. Charitable associations, had he made himself the benefactor of any such organizations, would have had less difficulty in pocketing whatever they got, for the bestowal of ill-gotten gains on the poor or helpless has always been looked upon as a proper form of restitution, when the lawful owners are not forthcoming. A religious organization composed of well-to-do people can put in no such excuse. Such a body would have been bound, in the Christian forum, to spend their own last cent on the church before touching Jay Gould's money. But Jay Gould has spared all the casuists a lot of trouble by keeping the little he had for his family. The silence that has settled down on his apologists since the will was published, gives a touch of comedy to the close of his career. They all thought he would furnish by his bequests some sort of answer to his enemies and detractors, but his testament shows, perhaps better than any act of his life, not so much his indifference to popular condemnation on moral grounds, as his unconsciousness of it. We have little doubt that he ascribed the raving of the moralists over him in his lifetime mainly to their having "got left" in the race for wealth. And then we must bear in mind the frightful amount of human baseness with which a successful speculator and millionaire comes in contact in a community in which money is held in such high esteem as in ours. If he had put on paper his experience of men, he would probably have furnished something in the nature of an excuse for ignoring all the local religious and philanthropic activities. Signs of the ease with which he might have justified himself, if he chose, were to be found in the eulogies passed on him after his death for not being "a hypocrite"—that is, for making no pretence of religion or morality. His one bit of weakness in this direction was the present of $10,000 to the Church Extension Society. But the way this was received by the public probably disgusted him with himself, and closed his career as a disseminator of Gospel truth.

There is a very interesting discussion among the clergy as to the efficacy of prayer, which has been precipitated by Evangelist Moody's claim that his prayers saved the steamship *Spree* from sinking. The most striking feature of it is the fact that evangelical ministers are saying precisely what the secular press would be inclined to say if it had commented upon the incident. Undoubtedly what strikes the average man most forcibly, when any such claim is advanced, is the appalling egotism of the man who assumes that he is of so much consequence that shipwreck was prevented by his prayers, while thousands of other vessels went down despite the most earnest prayers of their less important passengers. The clergy themselves are coming to perceive and admit the absurdity of such a position. The Rev. Dr. A. A. Miner of Boston puts the case very neatly when he says:

"It is magnificent assumption on Mr. Moody's part to think he has the power of directing just what the Almighty should do, and that is what his statement amounts to. Prayer had much less to do with saving the *Spree* than the work of the Captain and crew."

Even more impressive are the remarks of the Rev. Dr. Ensign McChesney, a Methodist minister of this city, who was himself a fellow-passenger of Moody's. While expressing his belief in the wisdom of prayer, he dissents entirely from Mr. Moody's position, and says:

"We certainly owed our safety to God. But are we sure that if there had been no prayer-meeting on the sinking *Spree*, the vessel would have sunk? Do we know enough of God's purpose to say that? Have we any information on that point? How about other ships that have been disabled, with no prayer-meeting on board, and yet did not sink? I find no warrant for saying that prayer saved the ship."

The only surprising thing about the conviction of Prof. Smith of Cincinnati for heresy is the size of the vote in his favor—26 to 32 on the closest ballot, and 20 to 36 on the most vital charge. This result will not bring great cheer to the prosecutors of Prof. Briggs. The prosecution in the two cases turns on substantially the same charges and evidence, and it was thought that the Cincinnati Presbytery would lead the way in an overwhelming condemnation of the obnoxious views. The New York Presbytery has always been under violent suspicion of doctrinal laxness, and if the majority was so narrow in orthodox Cincinnati, it might fairly be inferred that there would be no majority at all in New York. But in neither case is it likely that the decision of the lower court will be accepted as final, whatever it be, and "the higher criticism" seems certain to get a frequent airing before Presbyterian tribunals for a year or two yet.

The Briggs prosecutors decline to discuss the question of the truth of his views. His opinions about the reason, they say, may be perfectly sound, and so may be his contention that there are errors in the Bible, and that Moses did not write the Pentateuch or Isaiah all of the book that goes under his name. All they affirm is that these views, whether true or not, are not Presbyterian, and so that one holding them must be put out of that denomination. No one can deny that this is a valid argument. It is precisely on such reasoning that Prof. Briggs will be convicted, if he is convicted. But if such an argument is fatal to him, it will be fatal also, in the long run, to the church that uses it. The prosecution disclaims all intolerance: "We do not ask that men should be restricted as to their methods of research." But they do ask that Presbyterians should be so restricted. Thus their professed tolerance is like the religious liberty granted by the French monarch who said that all his subjects should be free to choose their religion, but that nobody must choose one different from the King's. "This is not a question between scholarship and ignorance," say the prosecution No matter if all the scholars in the world say there are errors in the Bible, the standards of the Church say there are not, and that settles it. No doubt it does in ecclesiastical law, but is the Presbyterian Church prepared to say that if the facts are against it, so much the worse for the facts? Is it going on endowing scholarships to send theological students to Germany, only to cut off their heads when they return? The course of the prosecution will lend support to those who think that the Briggs trial is the Nemesis of the Presbyterian Church, overtaking it in the shape of a logical result of its historic demand for an educated ministry.

Never has the hapless lot of the publisher been set forth more pathetically than by Mr. Heinemann in the last number of the *Athenæum*. He is at present suffering from a most extraordinary combination of hardships and adverse circumstances. First, there is the "manufacture clause" in the American Copyright Act, of which the best that can be said is that it has not harmed the English publisher so much as was feared. Then there are the printers' unions, which have caused wages to be "increased steadily for years past," and in addition the fact that "the public are more fastidious now with regard to print" and are protesting against "the horrible stuff that they used to buy under the good-natured generalization of 'books.'" On top of all has come the authors' union in the shape of Mr. Besant's Author's Society, further to oppress and outrage the publisher. Shocking demands for increased royalties, sometimes reaching as high as 25 per cent., are now frequently made in the Society's name, and all this, combined with the rapacity of booksellers, who insist upon 50 per cent. reduction on list prices, has brought the publishing business to a point where it must "grapple with the danger before it is too late." Mr. Heinemann's remedy is a publishers' union to resist the aggressions of the powerful author. He calls it, to be sure, "a brotherly band," but beneath this velvet name appears the cold iron of a real union, with hard-and-fast rules, secret passwords, walking delegates, and all. Such an organization could doubtless compel the overbearing author to disgorge a part of his swollen gains, and aid the distressed publisher to resume the custom of three meals a day.

A USEFUL REMINDER.

THERE was no more striking or characteristic passage in Mr. Cleveland's Reform Club speech than the following: "We should strive to rid ourselves and our countrymen of the idea that there is anything shabby or disgraceful in economy, whether in public or private life." There is in that sentence the whole of Mr. Cleveland's political creed, and there is to be found in it also the secret of his remarkable popularity. He represents to the plain people of the country the homely virtues of simplicity and economy. Those perplexed spectators of his career who cannot understand his hold upon the American people will find in this attribute of his character full and sufficient explanation of what is to them a mystery. Speaking directly to the people, with the accent of profound conviction, and with the full weight of his personal sincerity and honesty in every phrase, he promises them to do his utmost to bring the conduct of their Government back to that simplicity and economy of its founders which has always been the object of their reverence. In his mouth "Jeffersonian simplicity" is something more than a catchword—it is a pledge and a public creed.

Nothing more clearly marks the moral decadence of the Republican party than the growing inability of its leaders to comprehend the character of the American people. One would have supposed from the acts and utterances of these leaders during the past few years that we were a nation of money-worshippers. Those who possessed not wealth were assumed to be given over to the worship of those who did possess it. The President of the United States openly scoffed at cheapness as something abhorrent and disgraceful. "I cannot," he said, "find myself in full sympathy with this demand for cheaper coats, which seems to me necessarily to involve a cheaper man and woman under the coats." The Republican party's latter-day idol and oracle, Mr. McKinley, went even further than this, and declared that "cheap and nasty go together," that the "whole system of cheap things is a badge of poverty," that "cheap merchandise means cheap men, and cheap men means a cheap country," that "that is not the kind of country our fathers builded," and "furthermore it is not the kind the sons mean to maintain." Mr. Henry Cabot Lodge, the latter-day Republican scholar in politics, declared that the "cry for cheapness is un-American"; the organ of the Republican Protective Tariff League declared that cheapness was a "curse," and Mr. Henry Carey Baird denounced it as the "fetish of the Englishmen," and implored the party to "let us have done with this cheapness and its advocacy."

Acting in obedience to these high authorities, the Republican Congress literally voted to abolish cheapness. They took a great surplus in the Treasury and scattered it to the winds by favoring extravagance and jobbery of every kind. When they were accused of extravagance and were called the "Billion-Dollar Congress," the response from their leaders and from the press of their party was: "Well, what of that? This is a billion-dollar country. We can afford it. We do not need to be economical." Money was flaunted everywhere as the badge of honor. It was made the passport to political distinction. It was accepted as the price of Cabinet offices, of foreign missions, of legislation. The Republic of Franklin was represented at foreign courts as the republic of rich men who could surpass the titled aristocracy of European capitals in the magnificence and luxury of their living. It was assumed that the people of the country liked this display, that they were so enamoured of wealth that they would rejoice to put rich men in charge of their Government, and would abhor cheapness and economy both in public and in private life.

Surely, after all this, the time had come for some one to advocate a return to the simplicity of the fathers. That there should have been in any one's mind a doubt as to the popular answer to such an appeal simply shows how the glitter of wealth had dazzled many eyes. We are a nation of plain people. The overwhelming majority of our citizens find life a constant struggle with poverty. Frugality, economy, and unceasing labor are their daily companions. If we had really become a nation of money-worshippers, a people who were so dazzled by the spectacle of great wealth that we were willing to put men in high office simply because they were rich men, then our character as a people had undergone the most remarkable and the most deplorable transformation witnessed in any land since the closing days of the Roman Republic. But we had not changed. The assumption that we had was at once the most preposterous and the most fatuous any great political party had ever made. The inexplicable part of it was that men who had themselves been comparatively poor men, like President Harrison, should have so mistaken the character of the American people as to suppose for a moment that they could have been so transformed.

Mr. Cleveland, appealing straight to the people, in the plain language which the people recognize as their own, has been heard with joy in every corner of the land. That is the secret of his great popularity. More than any man since Lincoln, he has understood the American people, because he represents in himself the homely virtues which they most highly revere. He appeals to those principles in American character which have made the greatness of the American Republic in the past, and which alone are capable of insuring for it an honorable and lasting future.

STATE AND FEDERAL TAXATION.

IT will be wise for public men who are to deal with the pressing questions connected with national taxation to take into account the great change in popular sentiment bearing upon that subject. The change may be briefly described as one from a state of general ignorance and indifference in regard to Federal taxes, to a state of great uneasiness and sensitiveness about them, which promises to develop into a jealous scrutiny of all burdens imposed upon the taxpayer by the national Government. Such a scrutiny has long been given to taxes laid in the name of the State or municipality, but it is one of the anomalies of our system that the same people who have hurled State governments from power for a slight increase in the tax bills, have seen national expenditures doubled and quadrupled without a protest.

The explanation is to be found, of course, in the fact that national taxation is indirect. It does not bring a definite and personal tax bill to the door of every citizen, with distinct items set down to several accounts. In the language of an orator of the Long Parliament, the general Government "sups in our cup and dips in our dish," but does it so silently, and in a manner so unperceived by the average man, that opportunity has been given the national taxing power for abuses which would not be tolerated for a day if they were clearly understood. Hence has arisen the possibility of such astounding defences of squandering the public resources as have been made by Senator Evarts and others, who have said that certain extravagances and impositions in taxation could not be so very grievous to the people, since they would not amount to more than three cents a day per capita. It is safe to say that no unnecessary State tax of three cents a day, or a month, per capita could be laid without exciting popular indignation against the legislators enacting it.

For ease and certainty of collection, nothing could be more admirable than the system of indirect taxation by which our Government is supported; but for cultivating a spirit of responsibility to constituents on the part of legislators, and, on the part of taxpayers, a close watchfulness over public expenditures, nothing could be more inadequate. This came clearly to view when the committing of impost duties to the general Government was first proposed. One of Hamilton's earliest financial papers is the report which he laid before Congress December 16, 1782, in reply to the refusal of Rhode Island to assent to a national duty on imports. One of the objections which he had to answer was: "That by granting to Congress a power to collect moneys from the commerce of these States, . . . and for the expenditure of which they are not to be accountable to the States, they would become independent of their constituents; and so the proposed impost is repugnant to the liberty of the United States."

Hamilton had to admit that "the principle of this objection is true," and could only argue that it had no proper applica-

tion to the facts in the case. Certainly the history of Federal taxation for the past twenty-five years shows how true the principle is, and how easy it is for Congressmen to become "independent of their constituents." Only some peculiarly flagrant abuse, like the salary-grab of twenty years ago, or the defiant extravagance of Speaker Reed's Congress, has been able to rouse the people to insist upon that "rotation of the members of Congress" in which Hamilton saw the "security intended to the general liberty," and the "constant and effectual check" upon wasteful public expenditure. It is perhaps worth adding, in view of the doctrine of some of our latter-day statesmen who swear by the name of Hamilton, that, in the same report, he met the objection that a duty on imports would bear more heavily upon commercial States than others, by laying down the "general principle" that "every duty on imports is incorporated with the price of the commodity and ultimately paid by the consumer, with a profit on the duty itself as a compensation to the merchant for the advance of his money."

The exceptional conditions which have marked the conduct of our national finance for the past score of years will not much longer prevail. The happy-go-lucky management of the Treasury cannot be continued for any great length of time. When this fact has penetrated the mind of Secretary Charles Foster, as it now has, to judge by his annual report, it may safely be set down as one of those things that are clear "to the dullest intelligence." Nor can Congress hereafter go on letting one committee raise a revenue and a lot of others spend it, with a delightful disregard of the fact whether income and outgo will come anywhere near balancing. Something like the budget known to the finance of all civilized countries but our own, with a fixed and detailed scheme of taxation, and a fixed and detailed scheme of expenditures, must be gently but firmly introduced to our Congressmen. In fact, the era of overflowing revenues which almost take care of themselves has closed, and a new period in the discussion and imposition of national taxes has opened.

We think it certain that the people will insist upon carrying into national finance the practice of the principles which they apply in State finance. They have learned that a Federal tax is just as real a burden as a State tax, and they will more and more demand that the former should be laid with as much care, and expended with as much economy, as the latter. There is now a field for great financiers in our public life such as it has not afforded for a generation. Questions relating to our currency, indeed, have been much debated, and have brought out a high order of talent, as well as an extraordinary amount of quackery; but a thorough student and expounder of the principles of national taxation has not been seen in office in this country for many a day. The time is now ripe for him. All the signs point to a thorough overhauling of our whole system of Federal taxes, and public men should hasten to equip themselves for the work. A fundamental part of such equipment is, as we said at the beginning, a thorough realization of the great change of popular sentiment regarding the entire subject.

RAILWAY POOLING.

THE Inter-State Commerce Commission has forwarded to commercial bodies and prominent men throughout the country a circular letter asking for opinions "whether it is practicable, and if so, advisable, to amend the fifth section of the act to regulate commerce so as to legalize contracts between competing roads"—that is, to legalize railway pooling. These opinions are asked thus generally so as to enable the Commission to form a judgment on the advisability of reporting to Congress that pooling contracts should be made enforceable through the courts. It is deemed by all hopeless to expect the passage of any law making pooling contracts binding on the companies concerned, unless the terms of such contracts, including the rates to be charged, should first receive the approval of the Commission. Granger sentiment would not permit such apparently arbitrary power to be given to the railways without some check. Generally, therefore, the two proposals of legalization and a veto power go together.

Every one conversant with the railway situation must admit that, as matters now are, the railroads need protection more than the general public. By that is meant that transportation charges are now so low that the dividends, and even the fixed charges, of some companies, might be in some danger in a bad-crop year, and at least that the earnings of the ordinary year might not be sufficient to pay for such care of the property and equipment as would insure safety and at the same time allow of those continued improvements demanded by modern progress. Worse still, it is conceded that these low average charges are brought about, not through general and open reductions, but because of abnormally cheap rates granted to the favored few who control large shipments—a principle which, if carried out on all our transportation lines, would end in the creation of a commercial oligarchy. From every point of view, therefore, we are bound to approve of any legitimate means whereby our railways can earn a fair revenue through reasonable tariffs charged on the same basis to all citizens. Pooling has the great merit of striking at the root of the present evil by taking from the weaker roads the motive for rate-cutting, since they thus become entitled to their share of the traffic without resorting to underhand methods of securing it. Pooling is not a panacea for all our transportation ills, but is merely a device to help in keeping those ills within harmless limits, so far as possible.

Under existing conditions, then, legalized pooling would do little harm. The commerce of the country is now moved from producer to distant consumer at only a small margin of profit. If the freight rates were materially advanced, the volume of traffic, no longer profitable to the shipper, would be correspondingly reduced, to the injury of carrier and shipper alike. In short, exorbitant charges on the part of the railways are not commercially possible. As before remarked, if any adjustment is necessary, the cut rates should be raised to the general level. But the proposition to give the Inter-State Commissioners the right to forbid pooling among any group of railways unless the freight rates were approved by them, might before many years result in putting the control of our railway charges into the hands of the Federal authorities.

To such a result there would be very grave objection. Let us suppose such a law to be now in force, and the roads between Chicago and New York city to apply for the pooling permission. The Western farmers, finding wheat yielding them less than 50 cents a bushel, might object to the present trunk-line rate of 15 cents per bushel and demand a rate of 9 cents. If the Commission happened to agree to this demand, a low charge would be forced upon the companies as an alternative to the continuing of the present state of affairs Of course the Commissioners would be conscientious in their judgments as to the rates demanded; but should such power be given to any set of men? Is it not true that railway charges cannot be determined theoretically, any more than the proper volume of currency, or than the price of meat? And must we not rely for fair transportation tariffs upon the workings of commercial forces, if we would have the community fare the best in the long run? And if, under the rate-fixing of the Commission, a railway should have to omit dividends or bond interest, would not the Government become responsible? We must assume that the Commissioners' power would be exercised; otherwise either their oversight would be merely nominal or else from the beginning unnecessary. Against these suggestions it may be argued that, theories aside, a law permitting pooling under the Commission would no doubt work well in practice; and, if proved otherwise, the statute could be repealed. Nevertheless such a law, giving the control of transportation charges indirectly into Federal hands, would be contrary to all our precedents and dangerous in its tendency.

Whence, then, can the needed relief come? A practical proposal would be simply to strike the prohibitory section from the law, leaving the legal status of pooling the same as before 1887. Agreements between railways could then be freely made, though not legally enforceable. Though this plan would not give the railways all

the relief to which they think themselves now entitled, yet it would have some merits. It would enforce pooling to the extent to which the terms and rates might find unanimous consent; it would allow a combination among carriers just so far as combinations in other trades are permissible, putting all businesses in that respect upon an equality, which would be an important consideration; it would allow of enough competition, direct and indirect, in rates or in facilities, to forbid the argument that the commerce of the country had been given over to the railways. The decision of Judge Riner a week ago in Topeka, sustaining railway associations as not contrary to the Anti-Trust Law, has many quotable opinions on the general subject: "While it is true that the public are entitled to adequate facilities and to just and reasonable rates at the hands of these corporations, they are entitled to just that and no more." "The public are not entitled to free and unrestricted competition, but to fair and healthy competition, and I see nothing in this contract which necessarily tends to interfere with that right." The repeal of the section of the law prohibiting railway pooling, but without adding a section legalizing such contracts, would to that extent relieve the present situation, with the further advantage of presenting the subject to the farmer's mind in a way to overcome prejudices which would surely be excited by any bill allowing carriers to enforce seemingly high rates against each other through the courts.

ENGLISH ELECTION CONTESTS.

THE thoroughgoing character of the English Corrupt-Practices Act has been demonstrated in a striking manner by some contests over seats which followed the last Parliamentary election. These contests are decided by the courts, and are conducted like ordinary judicial trials, with counsel on both sides. There seem to have been an unusually large number of them this year, due to the idea possessed by many candidates that a strict observance of the law was not likely to be insisted upon. The result in three of the cases is not calculated to encourage future candidates to make this mistake, for the provisions of the law were enforced by the judges with a rigor which will have a very wholesome influence for many years to come. Students of corrupt-practice legislation for America cannot do better than to consider carefully both these trials and the nature of the law under which they were conducted, for the results show that the prime requisite of all such legislation is minuteness of detail—that is, specific and unmistakable provision for every form of corrupt or undue influence in elections.

The first case which resulted in the unseating of a candidate was that of one Frank James, a Conservative, who had been returned as elected for the town of Walsall. The charges upon which the petition against his election had been based were gross bribery, treating, and general corruption. A great mass of evidence was taken, and while it was shown that a great deal of "treating" had taken place, it was not proved to have been done by the candidate or his agent. The charges of bribery and general corruption were also not sustained. Among the expenditures set down in the sworn statement required by the law was a charge for 6,000 hat badges, or cards, upon which there was a portrait of the candidate, with the words "Vote for James," "We're Bound to Win." Expenditure by a candidate for this purpose is specifically forbidden by the law, which provides in its sixteenth section that "no payment or contract for payment shall, for the purpose of promoting or procuring the election of a candidate at any election, be made on account of bands of music, torches, flags, banners, cockades, ribbons, or other marks of distinction." The offence is declared an "illegal payment," and the penalty, when the guilty person is the candidate, is loss of his seat, and disqualification as a Parliamentary candidate before the same constituency for seven years; and, when his agent is the guilty person, loss of his seat and disqualification during the existing Parliament. The candidate's agent in this case was his son, who pleaded in extenuation of the card expenditure that he did not know that such use was forbidden by the law. The two judges who were conducting the trial decided that such an excuse could not be accepted, holding that "if it was once allowed that a breach of the law, in the sense that there was misconception of the law, was to be treated as inadvertence, the Court did not know where it could fix the limit." They decided, therefore, that the candidate was guilty through his agent, and had therefore lost his seat and was disqualified from being a candidate again for the existing Parliament.

At first glance this looks like a very strict interpretation of the law, and the unseating and disqualification of a candidate for such an apparently trivial offence seems extreme treatment; but this is not the case. Before the law was framed there were enormous abuses in English elections disguised under expenditures for precisely the purposes forbidden in the section which we have quoted. It was necessary to forbid all these in order to keep expenditures within legal limits and to prevent illegal expenses from being disguised under alleged outlays for cards, badges, bands, etc. As the London *Times* says, the "excessive scrupulosity of the law may be justified on grounds of public expediency," and since "one of the main objects of the statute was to keep all election expenses within narrow limits, if there were no prohibition, a great deal of money might be spent on bands, badges, etc."

The decision in the case of the second candidate unseated was on somewhat less technical grounds. Mr. Nathaniel G. Clayton was returned as elected from the Hexam Division of Northumberland by a majority of 82 votes. The petition for unseating him was based upon charges that he had influenced the voters by treating them to numerous picnics, excursions, teas, etc., which had been organized by one Mr. Baty, acting through the local Conservative Association. It was shown by the evidence that Mr. Clayton had paid bills amounting to £326, which Mr. Baty told him the Association had incurred. Mr. Clayton testified that he had paid them without asking what they were for, that at the time of some of the various "treats" he had no thought of being a candidate, and that the payment was made before he was a candidate and before he had engaged Mr. Baty as his election agent. It was shown also that the "treats" were not entirely free, reduced prices being asked for drink, food, and railway fares, and that it was only to pay up the deficiency that the £326 was necessary. Mr. Baty testified that he engineered the treats and paid the bills for the Association and not for Mr. Clayton. Yet the two judges forming the court held that Mr. Clayton constituted Mr. Baty his agent by the act of paying the bills without examining them; that he added to the offence by making similar illegal payments after he had thus recognized him as his agent, and that both the candidate and his agent were guilty of corrupt practices. The penalty for Mr. Clayton was loss of his seat and disqualification as a candidate before the same constituency for seven years, and for his agent a fine of one hundred pounds and five years' disfranchisement.

The third case turned entirely upon the question of religious or spiritual intimidation of voters. Mr. Patrick Fullam had been returned elected as an anti Parnellite candidate in South Meath, Ireland, by a majority of 83 votes. The petition to unseat him was based upon charges that the Catholic Church had used its full spiritual authority to aid in his election. The evidence was overwhelming in support of the charge. It was shown that the priests had gone to extraordinary lengths in Mr. Fullam's behalf—refusing the last sacrament to a dying Parnellite woman whose husband would not vote for Fullam; preaching that opposition to Parnell and Parnellites was opposition to sin, and that a vote for Fullam was a vote for holy religion; that no man who voted for the Parnellite candidate could "get eternal salvation"; that Parnell was the "devil of impurity," and that it was the duty of all good Catholics to support Fullam. The priests exhorted for Fullam openly at mass, and it was charged that they had used the confessional for similar purposes; a charge which they declined to affirm or deny. In a sermon which he had preached, the Bishop of the diocese, Dr. Nulty, declared that nobody

could remain both a Parnellite and a Catholic. In deciding against Fullam, the two judges, one of whom is a Catholic, said that the idea at the bottom of the Bishop's appeal was that "Parnellism was a sin, and on a vote against Parnellism depended the voter's salvation," adding: "The whole organization of the Church was thrown into the contest. Every priest was a canvasser. They canvassed everywhere, at the altar, at the houses, on the roads."

The law provides, in section 2, that any candidate whose election shall be influenced by a threat to inflict temporal or spiritual injury against any voter shall be guilty of undue influence, for which the penalty is loss of seat and disqualification as a candidate for seven years. It would be difficult to find a more flagrant violation of this provision than was afforded in South Meath by the entire Catholic priesthood, acting with the knowledge and consent of Mr. Fullam.

The moral which Americans who are studying the question of corrupt-practice legislation should draw from these cases is, that a law to be effective must be minute and, on that account, voluminous. There has been a pernicious notion at work in all American legislation of the kind that a law to be effective must be short. A long law is denounced as "cumbersome" and "complex"—charges which were made against the ballot-reform laws when they were first broached. What makes the strength of the English Corrupt-Practices Act is its length, and we must imitate that characteristic of it if we wish to secure as thorough a reform here as has been accomplished there. We must have "excessive scrupulosity" in the provisions of the law, or we shall not abolish the corruption at which it is aimed.

THE AUTUMN'S ART IN LONDON.

LONDON, November 28, 1892.

THE opening of the New English Art Club Exhibition—once in the autumn and once in the spring—is now always the signal for the more serious consideration of the present condition and the future prospects of British art. The Academy has long ceased to prove anything except the mediocrity, or worse, of the average Academician and the prevalence of the amateur in Great Britain. The old Grosvenor has closed its doors. The New Gallery is not even true to the neo-Gothic School, who were its first supporters. Of the Institute, of the British Artists (since Whistler's reign), there is nothing to be said except that they persevere bravely in the path of commonplace. It is to the New English Art Club one must turn for whatever vitality and originality still remain among British painters.

This being the case, the Club's latest exhibition just opened is a disappointment. It is not only that the members seem unable to maintain their once high standard, but the few who have always ruled the fortunes of the association begin to reveal a narrowness and a prejudice not unworthy of Burlington House. First they disposed of the Scotch contingent, really the strongest element in the Club; and but one or two of the Glasgow men are to-day counted among the exhibitors. The rule of the Club to reject all but really good work, no matter by whom sent, is excellent in theory, but in practice it has been far less commendable. Artists of genuine ability have found their canvases fired, while the pictures of the little inner circle, good, bad or indifferent, seldom fail to secure the best places on the walls. As a consequence, one man after another has gradually deserted, until this year the exhibition is monopolized chiefly by a small group of so-called London Impressionists and certain others from whose rivalry they probably think they have less to fear.

Unfortunately, it is these very so-called Impressionists who have made the least advance in their art. From the very beginning it was not originality that distinguished them, but rather the desire, here in conservative Great Britain, to break away from Academical traditions by the study of such innovators as Whistler and Degas, Monet and Manet. As yet they have not succeeded in striking a distinct note of their own; on the contrary, they have exaggerated the methods or mannerisms of their masters, until they have now reached the point where their undoubted cleverness threatens to degenerate into caricature or banality.

Another disappointment is the quality of the contributions sent by Mr. Sargent, who has been a member of the Club since the start. Careless of its fame and his own reputation, he exhibits three canvases of mediocre interest and no great technical merit. It is not easy to forget his "Javanese Dancer," which hung in this same exhibition a year ago, and the memory of it makes it all the more difficult to forgive him for showing portraits which the average exhibitor at the Champs-Élysées Salon could have painted as well. The best work in the Gallery comes not from England, but from France: it is a little pastel of a music-hall by Degas, a reproach to the large majority of the contributors who have accepted him as prophet. There are also water-colors by Mr. Brabazon, an artist but too little known, which are masterpieces, not only of impressionism, but of technique; there is no man to-day who understands his medium more perfectly. Another painter, not content to deteriorate into a mere imitator, is Mr. Arthur Tomson, who draws and paints cats with a freshness of observation and feeling for their subtler qualities which not the "Cat-Raphael" himself has equalled. And a small study of a cloud, delightful in modelling and color, will make one watch with interest the career of Mr. Furze, who hitherto has been notable, if at all, simply for his faint echoing in paint of Whistler. This is all that can be said in praise of the latest showing of the New English Art Club.

It is discouraging at this juncture, when the most promising of the younger men appear to have exhausted their resources, to find that the number of poor models given to the great artless public is to be increased by a permanent gallery of bad pictures, relieved by an occasional canvas of genuine excellence. Undaunted by the official and critical rebuff of last year (about which I wrote at the time to the *Nation*), Mr. Tate, a sugar-refiner, has offered to the new Government the gift of his collection of paintings for the nation. Since the Tory Chancellor of the Exchequer declined the present with thanks, the general quality of the collection has not increased in artistic value. But this is a small consideration. Liberals cannot be expected to be of the same mind as Conservatives even in matters of art; the protest against the acceptance of the gift, so loud and vehement last winter, has not been renewed, save in one or two papers—a fact which would be inexplicable were it not that the loudest protests of all came from the Liberal and Radical press; and then, just now, the unemployed are being heard from on every side; and what better chance for the new Government to make itself popular than to say it will provide them with work by pulling down old Millbank prison and allowing Mr. Tate to build—and to pay for—his gallery on the site thus left free? Art has but little chance against politics, and the poor nation, already burdened with Sheepsbanks and other collections of horrors, is soon to become the proud possessor of the Tate pictures. Among them are a few that ought now, or at some future day, to hang in the National Gallery. Mr. Tate owns one or two fine Constables and Cromes; I believe it is only within the last months that he has bought that wonderful "Ophelia," painted by Sir John Millais in the early period when he was still an artist and not a Royal Academician. It is plain, therefore, that Mr. Tate has no deep-rooted objection to good work; but unfortunately he does not know it when he sees it, and the great mass of his treasures are, as art, valueless. Had he bestowed his few masterpieces upon the country, he would have been its benefactor for ever. But he must needs send his name down to posterity with a flourish; the Government must take the whole Tate Gallery or nothing. And is it any marvel that the people, when the Brummagem imitation is thus foisted upon them with official sanction, should continue to mistake it for art? Were a puff of Mr. Tate's sugar handed to every visitor at the door of his gallery, one would not be surprised, for his gift savors somewhat of the advertisement. We shall next hear of the Pears' Soap or the Singer's Sewing Machine National Museum.

The picture and print-dealers have been much abused, by a certain section of the London press, for advertising themselves and their wares by means of monthly exhibitions, to which critics are invited and upon which press notices are showered. But whatever be their crimes, they at least have the grace to show good work, if not always, at least at intervals. To the dealers we owe the few exhibitions of importance which so far have been given this autumn: one, fairly representative, of Hervier's paintings, etchings, and lithographs at the Goupil Gallery; another, containing admirable examples of the Barbizon men and the much-talked-about canvas of De Groux, which at least has the stamp and virtue of individuality, at the Hanover Gallery; while it has been left to a publisher to hold what must be called the show of the season.

Mr. T. Fisher Unwin has just brought over from Paris Vierge's original drawings for 'Pablo de Segovia,' the English edition of which he has published. This is the first time Vierge's work has been seen in London, nor could it be studied to better advantage, for with the drawings are hung the proofs by Gillot, the photo-engraver who reproduced them, and on the table is the book itself, the production of the ordinary printer. The refinement of Vierge's drawing, its subtleties, and his mastery of line made themselves felt even in the sadly reduced and not too well printed process blocks of Bonhoure's French edition. But to all who know his work merely by these blocks, the originals are revelations. In them alone can be realized to the full extent the knowledge with which he draws any and everything whether it be the human figure or the distant

landscape, whether the most elaborate architecture or the chairs and tables of primitive construction; in them alone can be appreciated duly his economy of line and triumph of selection. Not a superfluous touch is in his drawing, not an unnecessary detail included in his composition. And more than this: though he never sacrifices the freedom of his method, though he never suppresses his own strong individuality, he is still master of the art of working for the photo-engraver. He is sure that his every line will "come," that his every black will tell. Comparison with the proofs of Gillot's new blocks proves how little has been lost in the reproduction. For this reason a visit to the exhibition is, to the would-be illustrator, worth months of drawing lessons. Vierge has sent other examples, among them some of his wash drawings, which technically are no less distinguished. But as yet he has done nothing to surpass the 'Pablo' series. N. N.

Correspondence.

THE POST-OFFICE IN POLITICS.

To the Editor of The Nation:

Sir: A few weeks ago I noticed in your paper a request for information as to failure of the paper to arrive. Since then it has appeared regularly some time on Friday, but several other deficiencies have come to my notice which I thought might interest you.

On the two successive days before Thanksgiving the mail due at about nine A.M. from New York at Peace Dale, R. I., was carried by to Providence, and only reached Peace Dale late in the afternoon and too late to get off an answer the same day. The mails between this place and Peace Dale have been very irregular. About two-thirds of the time letters mailed there in time for the P.M. mail reach Syracuse at seven the next morning; the other third they come either in the afternoon or the next day.

Similar things I find constantly occurring between Brooklyn and this place. On one occasion I mailed two letters at the Post-office here, with several hours' interval between, to the same address in Brooklyn, with the result that the second was delivered about four hours before the first.

These probably were merely the results of carelessness or incompetence, or both, but a month ago there was an occurrence in the town of Geddes, adjoining Syracuse, which cannot be looked on so charitably. On Friday morning, November 4, there were mailed from Syracuse to voters living in the neighborhood of the Post-office of Solvay in the town of Geddes a large number of pasters for use at election, averaging perhaps three to a voter. So far as I can discover, not one of these reached its destination before Wednesday, November 9—the day after election—though a very large number which were shown to me by employees and tenants of mine to whom they were addressed all bore a postmark showing that they had been received at Solvay at four P. M. November 4. Some of these men said they had called for their mail and had been told there was none; and again, one inquiring for a neighbor was told there was nothing of importance. The day after election the Solvay Postmaster appeared at the office of our works with a huge pile of these pasters (mingled with a few other letters which had apparently been detained with them by mistake), which were addressed to men in our employ, as are three quarters of the population whom he serves. There was a similar batch the next day. He apparently took this way of distributing them as likely to excite less comment than if every box in a country post-office should contain three or four letters at once.

As this Postmaster is a Machine politician and doubtless interested in the *straight* Republican ticket, the apparently necessary inference is plain. There seems to be a fitting opportunity for the official axe.

Yours faithfully, N. T. B.

Syracuse, N. Y., December 6, 1892.

[Our correspondent's letter makes a fit occasion for saying that, in our endeavor to discover the cause of the especial delinquency in the New York Post-office about election time, we were (unofficially) informed that for several weeks an extraordinary number of copies of the *Irish World* were dumped into the office, under orders to give them precedence over all matter of their class. We cannot vouch for the truth of this, but we are quite sure that the Post-office authorities are capable of such courtesies to the "Blaine Irishman."—Ed. Nation.]

THE PENNSYLVANIA BALLOT LAW.

To the Editor of The Nation:

Sir: Your correspondent "C. P. R." of Pittsburg, in your issue of November 24, calls attention to certain defects in the Ballot Law now in force in Pennsylvania. Some of his criticisms, indeed, concern matters as to which the law works well enough if not wilfully or negligently misinterpreted, and no law can execute itself in spite of popular ignorance or an intention to violate it. Granting, however, that the law is far from perfect, any one familiar with the history of its passage must object to its being represented as "prepared with a single eye to forcing Republicans and Democrats to vote the straight party ticket." It was "prepared" with the intention of being inferior to that of no other State, and its faults are due to its having had to run the gauntlet of a Quay-controlled Legislature.

A very strong effort will be made at the coming session to correct these faults, and it can hardly fail of some measure of success. If "C. P. R." really wishes to see a better law, he can join the Ballot-Reform Association, or at all events send a contribution to its treasurer, A. N. Chandler, Esq., N. E. corner Fifth and Chestnut Streets, Philadelphia, and he can also see that the influence of the press of Pittsburg is properly exerted.

Charles C. Binney.

Philadelphia, December 5, 1892.

PHOTOGRAPHY VERSUS WOOD-ENGRAVING.

To the Editor of The Nation:

Sir: I know no action so unwise as that of attempting to argue a point of difference with your critic; and with the critic of 'Old Italian Masters' I have no difference to argue, for "de gustibus," etc. But I think I might be allowed to correct a misapprehension as to my own meaning when it occurs. The blunder as to Louis XIV. I can in no wise account for, and I have not yet a copy of the book to refer to, but it was a blunder which can do no harm, and any schoolboy might have seen it to be one. Your critic does not mention where it occurs, so that I do not know in which number of the magazine to look for it. It may have been carelessly carried over from one of my authorities, where it may have been a blunder. But the inconsistency supposed in the Veronese Tintoretto dates is only in the wrong choice of a word. I said, "The moment was most favorable for his [Veronese's] entry into the capital of the arts," when I should have said "the epoch," meaning not the day of Veronese's arrival (*i. e.*, 1555), but the stage at which the evolution of the arts and the demand for his form of it had attained. Substitute the word "time" or "epoch" (*i. e.*, 1555 to 1563) for that which I used, and you have my meaning. The context would, I should think, indicate this, and your critic uses the word in the same sense—"This was the 'moment' for such work as Mr. Cole's."

But your critic makes a very serious mistake in what he says of the relation of photography to reproduction, and as this does not touch my merits, but those of the entire work of my coadjutor, Mr. Cole, as well as a scientific question, I hope you will not consider as contentious what I have to say. It is not true that by the recent improvement in the photographic reproduction of pictures known as "orthochromatic," the color-values are given with a fidelity "as marvellous in their rendering of tone and color-value as the first photographs were in their rendering of form, and as much beyond any hope of human rivalry." "Orthochromatism" avoids the glaring contrasts which used to be made by photography between the color-values of blues, yellows, and reds, but it has by no means reached the accuracy of rendering them which has been attained by Mr. Cole—it simply gives us a better mean. This is a question of fact on which I speak with positiveness, as an expert, being in the constant habit of using the orthochromatic plates myself, and I have a letter from Mr. Burne-Jones in reference to some of Mr. Cole's renderings, in which he says "they are better [in this respect] than any photographs that ever were made." This is absolutely true: photography gives us a version which is not so glaringly false as that which it used to give, but it does not, by an important space, approach color-values as Cole renders them. This might be apprehended from the fact that, starting with the orthochromatic photograph, he is still obliged on that to make his further corrections for the true values.

Yours truly, W. J. Stillman.

Rome, November 29, 1892.

STAINED GLASS AGAIN.

To the Editor of The Nation:

Sir: "S. W. W.," after a very great compliment to the writer of the review of Burne-Jones's work in No. 1430 of the *Nation*, proceeds to express the opinion that that writer's desire for stained glass, of a combination of design comparable to that of Burne-Jones with color comparable to that of La Farge, cannot be gratified, "owing to the nature of the elements involved in the production of glass design." May I be permitted a few words by way of reply? I am not ignorant of the difference in method of production between English and American glass, and am, for one, of those to whom it seems "that subtlety of color rather than subtlety of drawing is the more legitimate goal in the production of stained-glass work." What I asked for was not "the intricate, subtle, and beautifully modulated drawing" of Burne-Jones, but something

like his power of *design*—that is, his power of composition and arrangement of line and mass. Surely "S. W. W." would not maintain that if color is to be still the chief object, design may not be improved? My object was to point out the weakest point in the American school of stained glass, and to disturb our (possibly) too great complacency in the results we have attained, by showing wherein we are surpassed by workers who yet do not, in my opinion, understand their material, as such, nearly so well as we do.

I am, very respectfully,

THE REVIEWER.

COUSIN AND NIECE.

TO THE EDITOR OF THE NATION:

SIR: The word *cousin* is still used as synonymous with *niece* in this part of the country, at least. A letter this day received from a gentleman eighty-six years of age living in the eastern part of Mississippi, is addressed to his *niece*, and is signed, "Your affectionate uncle"; but in the body of the letter he expresses his sorrow for the death of another *niece*, whom he calls his *cousin*. This is not a case of lapse of memory or confusion of mind, for in other letters the same gentleman has often spoken of his *grandniece* as his *cousin*.

CARROLL CUTLER.

TALLADEGA, ALA., December 9, 1892.

Notes.

THE Cupples Co., Boston, will publish immediately 'J. W. von Goethe: His Wit, Wisdom, Poetry,' edited by Newell Dunbar; and 'Inspiration and Truth from the Rt. Rev. Phillips Brooks, D.D., Bishop of Massachusetts,' with a portrait.

Leach, Shewell & Sanborn have nearly ready 'The Private Life of the Romans,' a manual for schools and colleges, by Harriet Waters Preston and Louise Dodge; and 'Jason's Quest,' a mythological reader, by D. O. S. Lowell.

'A Plot-Book of Some Elizabethan Plays,' edited by George Pierce Baker, is in the press of Ginn & Co.

G. P. Putnam's Sons are about to publish by subscription the Quadricentennial Edition of Irving's 'Columbus.' The edition is limited to 401 copies, numbered from 1492 to 1892 inclusive, and is comprised in three royal quarto volumes, very fully illustrated, the illustrations including a number of designs drawn particularly for this work, together with facsimiles of certain curious old plates. The binding is antique vellum. The first number in the series, No. 1492, has been reserved for President Harrison, and the set numbered 1892 has been reserved for President-elect Cleveland.

In our recent report of Mr. Gladstone's Romanes lecture at Oxford, want of space forbade mention of the enthusiastic recognition accorded by the lecturer to a remarkable work now printing at the Clarendon Press, namely, Mr. Hastings Rashdall's book on Medieval Universities, of which advance sheets were placed at Mr. Gladstone's disposal. Mr. Gladstone's memorable lecture has been published by the same press under the title of 'An Academic Sketch,' and it is interesting for those who demur at a certain tendency to depreciate the value of Euripides as compared with his two compeers, Æschylus and Sophocles, to note that the only Greek quotation made by Mr. Gladstone in his Romanes lecture is, like the one line of Greek quoted by Lowell in his Harvard address of 1886, from Euripides. Mr. Gladstone pointed his own definition of a University with a line (201) from the "Bacchanals" of the same tragedian whose "Iphigenia at Aulis" contains the famous verse which, when Mr. Lowell quoted it in the Memorial Hall at Cambridge, seemed at once a record and a consecration of lives which were laid down that our country might still live. Those who have the opportunity of doing so will find a comparison between these two great academic addresses most interesting, and they will, out of gratitude to Mr. J. G. Romanes, the benefactor to whom Mr. Gladstone's lecture is due, rejoice to hear that he is regaining health and strength at Madeira, whither illness has banished him for a time.

Frederick Warne & Co. offer a new edition, in three volumes, "North," "South," and "Midland," of the close-packed 'Abbeys, Castles, and Ancient Halls of England and Wales,' by John Timbs and Alexander Gunn. They have had it revised and brought down to date, and illustrated with four photogravures in each volume. The work is hardly one to be read continuously, but is a serviceable book of reference or supplementary guide-book. The plates are ornamental and the binding tasteful. The device of the French publisher Jouaust is on the title-page of three volumes of the "Exquisite Series" which come to us with the imprint of Estes & Lauriat, Boston. That the manufacture is English may be inferred. Out of so much collaboration there issues a very handsome result—the 'Vicar of Wakefield' in two volumes, 'Paul and Virginia' in one. The form, the print, and the binding (vellum back and half blue-cloth sides) are dainty and irreproachable. Lalauze's etchings come off badly in our copies. As designs they are graceful and scholarly rather than strikingly imaginative; they might have been deemed "exquisite" but for the pressman.

In a neat little volume, entitled 'Outlines of Ancient Egyptian History' (Scribners), Miss Mary Brodrick has performed a service for Auguste Mariette somewhat similar to that which she performed about a year ago for Heinrich Brugsch—with this exception, that in the present case she has acted as translator as well. The work here presented with annotations is the *aperçu* originally prepared for use in the Egyptian schools in Cairo. As an outline it is excellent, and the work of translation has been well done, not so much in the strict sense of that word as in the sense that Miss Brodrick has given in English the meaning and views of the author, while eliminating those opinions now no longer received. Additions have been made at several points and they increase the value of the book. One important subject does not come in for mention at all, however—the pyramid texts. A criticism might be made upon the order of presentation in the present volume. Seventy-five pages are devoted to a sketch of the history down to the Mohammedan invasion, and about as much more to the sources of the history and to the monuments from the successive dynasties. The ground is thus traversed twice. Manifestly a combination of the parts in a single account would have added to the completeness and perspicuity of the presentation. At the same time such a course would have resulted in a book practically new.

A work privately printed in London, entitled 'Some Account of the Huguenot Family of Minet, from their coming out of France at the Revocation of the Edict of Nantes, 1686,' has been edited by William Minet, F.S.A. It is a sumptuous quarto of 240 pages, with admirable portraits and other illustrations, and contains much that is of general interest. The editor has made a skilful use of the scattered memoranda, diaries, and letters in his possession, so as to enable the various members of the family to tell their story, as far as possible, in their own language. The nucleus of the volume is the recently discovered "Relation" of Isaac Minet, which gives an interesting account of his escape from Calais after the Revocation, and his subsequent fortunes in Dover, where he founded a large and very successful mercantile and banking business. In his letters, as well as in those of his grandson, Hughes Minet, which form the major part of the original documents, there are many references to quaint customs of both the family and the business life of the last century. There are also a number of genealogical tables, wills, and inscriptions. But the chief value of the book to the general reader is the additional testimony which it bears to the great integrity, industry, and true manliness of the men whom France in her folly drove into exile. The volume is in every respect the worthy record of a noble race.

One more literature has been placed within the reach of the blind, the Chinese. The enormous difficulty of representing in raised characters a language which has no alphabet proper, but 4,000 symbols representing syllables, and which takes a lifetime for those who see to learn, has at length been overcome. The system employed is by an ingenious reduction of the *sounds*—as distinct from the syllables—to 408. These, it is found, can be learned easily, even by the very young. The inventor is a self-taught genius, the Rev. W. H. Murray, son of a Scotch mechanic, who was prevented from following his father's trade by an accident in which he lost an arm. Becoming an agent of the Bible Society, he showed great facility in learning languages, and was sent by it to carry on its work in China. Here the miserable condition of the blind, of whom there is an unusual number in the empire, attracted his attention, and led him to devote himself to the discovery of a method by which they might be enabled to read. An account of his work has recently been given by Miss C. F. Gordon Cumming in a little book entitled 'Work for the Blind in China' (London: Gilbert & Remington).

A second edition of Jukes-Brown's 'Handbook of Physical Geology' is lately issued (London: George Bell & Sons; New York: Macmillan). As palæontology and historical geology are left for another volume, space is gained for a fairly deliberate treatment of the physical side of the science. The book is essentially English, and it is interesting to note how full a compendium of the subject may be gained from the domain of Great Britain and Ireland alone. Yet the omission of examples from other countries gives too local an aspect to a world-wide science, and in the chapter on physiographical geology the influence of the conservative English school in contrast to the more progressive attitude of American investigators is clearly apparent. The diagrams are hardly as good as the text deserves.

T. B. Smart's 'Bibliography of Matthew Arnold' (London: J. Davy & Sons) will prove valuable for libraries and for private collectors, as well as for the teacher of English literature. It contains, first, a full and accurate description of Arnold's various poetical publications, 39 in all, including reëditions and contributions to periodicals; second, his prose publications, 196 in all, including reëditions, contributions to magazines, and letters to the

press; third, a list of about 300 criticisms and reviews of Arnold's various writings; and, fourth, a synoptical table which is an index to every poem in each of the collected volumes. The whole is conveniently arranged and clearly printed.

Signor Giulio Canestrelli, under-librarian of the Victor Emanuel Library in Rome, has published an accurate Bibliography of Mazzini's Writings, which comprises 558 numbers, Italian and foreign. Only 120 copies of this work have been printed. It is adorned with a facsimile of an inedited letter from Mazzini to Mauro Macchi.

Alexandre Dumas *fils* has just issued a seventh volume of his "Théâtre Complet" (Paris: Lévy: New York: F. W. Christern), containing his three latest plays, "La Princesse de Bagdad," "Denise," and "Francillon." All these have been published separately before, but they appear now with long appendices in which the author discusses their subjects, their success, and their actors—for all were produced at the Théâtre-Français, and M. Dumas is not sparing of his praises to the performers of that unrivalled organization. Two of these plays have been adapted in America, but without success. All turn on points of what we may call, not unfairly, psychologic casuistry. In all, again, questions of sexual morality are discussed on the stage in a manner which playgoers who speak English think unprofitable. The comedy least suited to American taste is "Francillon," which is a marvel of constructive skill; its action is closely knit and extraordinarily powerful in its simplicity; its characters are vigorously etched, and its dialogue is of unfailing brilliance. But it is calculated solely for the meridian of Paris.

Considering the variety and the general superiority of French books of reference, it is curious that there is in French no book exactly corresponding to Mr. Bartlett's 'Familiar Quotations.' Many sayings and quotations are traced to their sources in several of the late Édouard Fournier's gossiping and inaccurate books; and something of the kind is attempted also in Larousse's invaluable dictionary. Now M. Roger Alexandre has just published 'Le Musée de la Conversation' (Paris: Bouillon; New York: F. W. Christern), which does not quite fill the vacancy, partly because it is loose and journalistic in method, and partly because it is quite as much a collection of famous sayings as it is of literary quotations. But it is useful and welcome, and the reader of its pages makes more than one amusing discovery. He finds, for example (p. 202), a French origin for Mrs. Glasse's "First catch your hare," and also for the dialogue which accompanies the tune of the "Arkansaw Traveller" (p. 46), and this suggests that the story with its accompanying tune may be derived from some early *voyageur* who had brought it over the ocean with him. It is amusing to see that some absurd person has suggested that Hugo's "Ruy Blas" was plagiarized from Bulwer's "Lady of Lyons." It is amusing also to see that the phrase in Beaumarchais's play about calumny and its results can be traced to Bacon; perhaps it will next be asserted that Bacon wrote Beaumarchais's plays as well as Shakspere's.

Musical literature seems to be a profitable part of the publishing business, if we may judge by the extraordinary activity recently displayed in that branch. Among the books on musical topics which have accumulated on our table within a few weeks are the following, some of which we reserve for more extended discussion. No fewer than three are devoted to Chopin, following upon the heels of Niecks's admirable two-volume biography. 'Frederic Chopin,' by Charles Willeby (Scribners), a volume of 300 pages, will be a good substitute for those who have not leisure to read Niecks's 700 pages. Clayton F. Lummy (Chicago) sends us a little volume containing a translation and arrangement of the sketches of Chopin and the biographic material scattered through George Sand's 'History of My Life' and 'A Winter in Majorca,' the island on which Chopin's immortal "Préludes" were written, amid the most distressing circumstances. A 'Life of Chopin,' with a list of his works, is also published in Brentano's "Petite Library"—a dainty little pocket-piece. From Macmillan we have a book of personal and theatric interest, 'Student and Singer,' being the reminiscences of the eminent English baritone, Charles Santley. Mr. Tretbar of Steinway Hall has issued a new edition of Ehlert's musical essays, 'From the Tone World,' translated by Mrs. Tretbar. These essays are all concerned with modern music, from Mendelssohn to Wagner and Brahms, and if the opinions advanced are not always sound (Ehlert himself outgrew some of them), they are always suggestive. Several new essays have been added to this edition, the best of all being those on Schumann and Chopin. 'The Art of Singing,' by Sinclair Dunn, is just received from T. Fisher Unwin (New York: Putnams). Of technical and scientific interest are 'A Noble Art,' three lectures on the evolution and construction of the piano, by Fanny Morris Smith (G. Schirmer), and 'Sound and Music,' by the Rev. J. A. Zahm (Chicago: A. C. McClurg & Co.), a treatise on acoustics and the physical basis of musical harmony. From Brentano we have, finally, 'The World of Music,' three volumes, by Anna, Comtesse de Brémont, on 'Great Composers,' 'Great Singers,' and 'Great Virtuosi'; short, chatty biographic sketches of the most eminent musicians, creative and executive, of the past. These sketches are of unequal value and length, but generally proportioned to the importance of the subject, and the narrative is enlivened by numerous anecdotes, some of which are comparatively unfamiliar. The author's taste is so catholic that she calls the banjo a "fascinating instrument." It is a suggestive fact that of the nineteen "great virtuosi" described, although all are (or were) famous, only four or five were really men of genius.

Columbus reveals anew his sway over the year in the bound volume of *Harper's Young People* for 1892, in which articles and pictures directly concerning his personality, the continued story of the age of the discovery, "Diego Pinzon," and illustrations and letterpress in abundance relating to the World's Fair and the Columbian celebrations in this city, are the most striking feature. For the rest, this periodical has continued to move on in its established lines, furnishing a range in its miscellany of adventure and sports and story and description which ought to yield something for every juvenile taste.

The *Magazine of Art* (Cassell & Co.) puts forth a foreign-art supplement entitled 'European Pictures of the Year [1892].' There are in all perhaps 150 examples, grouped nationally, and among the few instances of statuary is the painter-sculptor's "Pygmalion." These memoranda are well executed and serve to show, so far as the selections are typical, the character of schools. The editor remarks on the dominant influence of the French. The American section is but poorly represented.

The Christmas number of the *Art Journal* (International News Co.) is, as usual, given up to illustrating the work of a single artist, in this case Prof. Hubert Herkomer, whose *sacer vates* is Mr. W. L. Courtney.

Cruikshank is a leading topic in the November *Portfolio* (Macmillan), apropos of the recent gift to the British Museum's Print Room, by the artist's widow, of "a stupendous assemblage of his sketches, 1,141 in number," besides other artistic relics of the great George. A liberal assortment of facsimiles from this store accompanies Mr. F. G. Stephen's letterpress. Mr. Hamerton's contribution is a critique of Vierge's illustrations to 'Pablo of Segovia.'

In the *Fanfulla della Domenica* for November 6 is a note from Signor A. Valgimigli, suggesting a novel interpretation of Dante's famous "Pape Satan, pape Satan, aleppe," which has been in turn regarded as Hebrew, Arabic, Greek, French, or, with more reason, mere gibberish. The new interpretation consists in identifying *pape* and *aleppe*, by the aid of recent English dictionaries, as being respectively good Middle English words for "father" (*i. e.*, priest) and "help." The line then becomes, simply enough, "Father Satan, Father Satan, help!" As it is so highly possible, according to Mr. Gladstone, that Dante studied at Oxford, he must have been acquainted with the current English idioms of the day, though Mr. Gladstone may not be pleased to find Dante's familiarity with English displayed in precisely this form.

At the November meeting of the Royal Geographical Society, Dr. Nansen described his coming expedition across the Polar regions. This he hopes to accomplish by taking advantage of the ocean current running north from Siberia and south by Greenland which was discovered a few years ago, through the drift of some of the wreckage of the *Jeannette*. He has had constructed a steamer, rigged as a three-masted schooner, of some 800 tons burden, with an engine of 160 horse-power and carrying supplies for a crew of twelve men for five or six years. This vessel, named the *Fram* (Forward), has been modelled so as to rise under the pressure of the ice, rather than resist it, with sloping sides and a "plump and rounded" hull. For heating, besides coal, the explorers will carry petroleum, while their cooking will be done by alcohol. A dynamo for electric lighting has also been provided. Nansen's present intention is to start next spring, his first goal being the delta of the Lena River. From thence he will sail north as far as the open water permits, and then "run into the ice at the most favorable spot, and from there trust entirely to the current running across the Polar region." He will carry two large boats, each capable of holding all the crew, in which they could continue their voyage in case the ship were crushed in the ice. "The only difficulty would be to get duly into the current north of Siberia; when this was done they must be carried somewhere northward. Whether they succeeded or not, he felt convinced that this was the way—not a new one—in which the unknown regions would some day be crossed."

The Booksellers' and Stationers' Provident Association of the United States will give under its auspices an Authors' Reading at Chickering Hall on the evening of January 16, 1893. Among the authors who will read from their own works are F. Hopkinson Smith, "A Day at Laguerre's"; Charles Dudley Warner, "A Bear Story," by request; Gen. James Grant Wilson, "An Episode of the War"; Edward

Eggleston, Will Carleton, Marion Harland, Gertrude Atherton, Robert Grant, William H. McElroy, Thomas Nast, and other popular authors. Of the committee having the matter in charge the Chairman is Mr. Charles A. Burkhardt, with E. P. Dutton & Co.; the Treasurer, Mr. John A. Holden, with Thomas Whittaker.

"A. M." writes to us as follows: "A letter in the current number of the *Nation* begins with this sentence: 'Some one has said, and it sounds like Walter Bagehot, that the greatest pain the human mind is capable of is the reception of a new idea.' Doubtless the writer had in mind this sentence, to be found at p. 163 of Bagehot's 'Physics and Politics': 'One of the greatest pains to human nature is the pain of a new idea.'"

—At twenty years of age Jay Gould had already published a history, filling more than 400 pages, of his native county, Delaware, N. Y. In 1875 Sabin, in his 'Bibliotheca Americana,' declared this work "very rare," and added that, while in press, almost the entire edition was destroyed by fire. This loss is oddly spoken of in the very midst of the book itself (p. 226), to wit: "The reader who has glanced at our preface has already been made aware of the almost total destruction of this work by fire." We are reminded of that book of Moses wherein he describes his own death and burial. The author goes on with a lugubrious paragraph concerning his irremediable loss of matter that could not be replaced. In after years, however, he changed his mind, buying up and burning all copies he could discover. Did he induce Allibone to leave it unnoticed in his omnium-gatherum? This juvenile production of Mr. Gould is thus seldom met with, and hence is more provocative of curiosity. A copy which early came into the possession of the Wisconsin State Historical Society has long been notable among its rarities. It contains on the whole nothing to be ashamed of as regards its matter, moral tone, or style. It was a valuable contribution to local history derived from original sources. The writer, in traversing as a surveyor the region of which he treats, had fallen in with many of its oldest and most intelligent inhabitants. Information regarding the rise and progress of the county, pioneer hardships, Indian raids, and industrial interests, was secured with much painstaking and written out in a readable volume, less sophomoric than was to be anticipated, and one which every future writer on the same theme must consult, or he will not do his perfect work. Few local historians, while still in their teens, no matter what their educational advantages, have written so instructive books.

—These remarks are specially true regarding the first half of the volume. Much of the last half, it would seem, was not thought of at first, but was added after the disastrous fire before mentioned, with a view to help out the sale of the work. As padding of this sort may be mentioned about forty pages of obituaries culled from newspapers, and as many more serving to advertise mineral springs, newspapers, academies, banks, etc. Possibly we should class under the same head half of threescore pages concerning Anti-renters. Some of the most sensational sentences describe Mr. Gould the elder with his little son surrounded, in 1844, by Anti-renters who had come to tar and feather the father. The writer says: "We were that son. . . . Oh, the agony of my youthful mind as I expected every moment to behold him a lifeless corpse—fifteen guns poised within a few feet of his head," etc., etc. Mr. Gould's youthful hostility to monopolies was patent and pronounced. British restraints on land-monopoly he shows to have been cunningly eluded by scheming speculators, but the public domain when control passed to the people "was made subservient to the best interests of the State" (p. 247). He lamented, however, that more English landgrants had not been annulled by the State of New York, inasmuch as land-monopolies, centring in single individuals a mighty controlling influence, would give to capitalists the reins of weal and woe, yea, might control the machinery of Government, etc. No more zealous plea can be found than Mr. Gould's for supporting and improving common schools (p. 241). He prints District Libraries in capitals as of preëminent importance. He exults in "the march of improvement consequent on missionary preaching, prior to which society had presented one vast gulf of moral degradation" (p. 228). On this topic he would have expatiated more largely but for the burning of his manuscript. The fact that neither school libraries nor home missions nor any other public objects have received bequests from Mr. Gould, shows

> "The hardening of the heart, that brings
> Irreverence for the dreams of youth."

—The most important fact disclosed in the Thirteenth Annual Report of the Society for the Collegiate Instruction of Women (1891-'92) is an unusual record of growth. In numbers the Harvard "Annex" now ranks fourth among women's colleges, with 258 students; its teaching force comprises over seventy of the Faculty of Harvard College, and, as usual, represents the older professors as well as later additions to the University staff. The tables show that the students were sent by 113 institutions as against 77 the year previous, and that twenty-two graduate students came from such women's colleges as Bryn Mawr, Barnard, Smith, Vassar, and Wellesley, and from such coeducational institutions as the State Universities of Kansas, Nebraska, and Wisconsin, Oberlin College, and Boston University. Among the 120 courses offered, there was "a great increase in the particular classes, this growth being specially noticeable in the departments of Greek, Latin, English, German, French, Italian, philosophy, political economy, history, fine arts, mathematics, astronomy, chemistry, botany, physical geography, and geology." In the Annex's pioneer days its students stuck rather closely to the conventional path of Latin, Greek, and mathematics; but a healthy change has come about, and last year there were three times as many students in the English classes as in any others, while the next most popular studies were history, German, Latin, French, Greek, philosophy, and mathematics, in the order named. The steady growth and unostentatious tone of the work of the Society for the Collegiate Instruction of Women lend additional significance to some recent public utterances from within the University. At a parlor meeting called in the interest of the Endowment Fund of the Annex (of the $500,000 needed, but $75,000 has been secured in twelve years), the President of Harvard University made some welcome but unlooked-for confessions as to his attitude towards the Society, whose endeavors he regarded "as the most intelligently directed and the most successful effort for the higher education of women in the United States." Moreover, although speaking only for himself, and not for the governing body of Harvard, President Eliot is reported to have said "that little besides financial considerations seemed to stand in the way of giving the Annex the full privileges of Harvard University."

—The Pennsylvania Tax Conference publishes a report upon the value and taxation of property in that State which has some features of interest. Little assistance upon the subject was obtainable from the United States Census, and the returns to the State officers were very defective. Accordingly, special agents were employed to ransack the offices of the county commissioners, and to make such further investigation as was practicable. In addition to this, a novel expedient was resorted to in ascertaining the amount of property insured, and making this a basis of calculation. In spite of the fact that this was apparently nothing more than "guessing at half and multiplying by two" (for it was necessary to depend upon the conjecture of insurance agents as to the ratio between property insured and property not insured), it is not improbable that evidence of some value may be obtainable from this quarter. It seems that the amount of insurance carried upon property in Pennsylvania is $2,000,000,000, and if this be 40 per cent. of the value of insurable property, such property is worth $5,000,000,000. The data collected at the county offices, however, make this value only $3,000,000,000. Real estate is estimated by the Tax Conference not at its value at forced sale, but at what the owners would sell for if they had offers—a very different thing. According to this estimate, and adding $300,000,000 of exempt property, the real property in the State is worth more than $4,000,000,000, while it is assessed at $2,333,000,000. Its value is about equally divided between land and improvements. The value of farms is put at about $1,000,000,000, substantially the same as reported in the census of 1880. The total amount of property in the State is swollen by adding $1,250,000,000 of "moneyed capital," which consists chiefly of evidences of debt. Upon this principle any two friends can make themselves millionaires by exchanging their promissory notes. A like value is put upon corporate property, and a like criticism to a certain extent applies, as it does to the return of income as property. Upon the whole, we are unable to attach much importance to these valuations of property, and the report upon taxation appears to contain nothing novel.

—Most readers will remember well the great disturbance that arose upon the publication by the Duc de Broglie of the first volume of Talleyrand's long delayed memoirs. Hints as to their contents had been rife for fifty years. Parts of the original manuscript had been shown by Talleyrand to various people, notably to M. de Vitrolles, as he himself relates. There was every reason to expect a disclosure of the secret history of French politics and diplomacy from the time of the Revolution, through the Napoleonic epoch, to and beyond the Restoration. But when at last the book appeared, the eager reader found nothing that he had expected: no disclosures, hardly a gleam of new historical light, no wit from one of the greatest of wits, nothing beyond a decorous and rather dull plea for Talleyrand's consistency as "homme de France." The book fell flat, and would have fared even worse than it did if a controversy had not arisen at once as to the *origines* of the volumes. M. Aulard, professor at the Sorbonne, started the polemic by inquiring where the Talleyrand manuscripts were, and in what condition; and

he pressed the unhappy Duc de Broglie with questions till he was obliged to confess that the only document in his possession was a copy of the 'Mémoires' made by a former possessor of the Talleyrand manuscripts, M. de Bacourt. Where the manuscripts themselves were he did not know. M. Funck-Brentano believed that they had been destroyed. Others doubted if there ever had been more than notes, some of Talleyrand's own making, others dictated to M. de Bacourt. At any rate, the whole credibility of the memoirs was seen to rest upon the trustworthiness of Bacourt. The Duc de Broglie believed this to be unimpeachable, and made much of his "scrupulous delicacy" and "irreproachable literary probity." But to this estimate of Bacourt M. Aulard and the others could by no means agree. He had published, they said, the correspondence of La Marck, in 1851, and that book was one of the worst instances of the shameless mutilation of an author known to literary history. Why might he not have done the same, or worse, in the present case?

—So the affair has stood till just now, when the last volume of the 'Mémoires' has appeared, and M. de Bacourt's copy (itself grossly mutilated) has been deposited in the Bibliothèque Nationale. The historians have again renewed their attacks: M. Aulard in the *Revue Bleue* and M. Jules Flammermont, professor at Lille, in the *Révolution Française*. New documents are brought forward which show such suppressions and falsifications of the La Marck correspondence as to put M. de Bacourt quite outside the number of reputable historians. He cuts down, for example, one letter of Pellenc's (Pellenc was Mirabeau's private secretary) from sixty-seven lines to twelve, cutting out all offensive remarks about Talleyrand, of which there are many, and completely changing the purport of the letter. M. Aulard recites these offences of Bacourt's, and asks the Duc de Broglie if he still has the same confidence in him as before, and still believes it impossible that he should have tampered with the Talleyrand papers. The Duke makes no reply beyond saying in an interview that he has nothing to add to the preface of his first volume. The whole controversy is a capital illustration of the old and new ways of looking at history, and the work and duty of a historian. M. de Broglie belongs to one day and generation; M. Aulard to quite another. Controversy between them is futile; it is the duel between the elephant and the whale.

RECENT POETRY.

THE Spanish satirist Quevedo, visiting the infernal regions and looking through some bars, sees many million figures moving restlessly about, and is told that they are a class of people known on earth as poets, but known there only as fools. It is no wonder if the minds of these poor people are somewhat unsettled, since they have embarked everything in the most uncertain of all possible lotteries. Good poetry ranks unquestionably at the top of all literature, and poor poetry at the bottom. All admit that the poor poetry is incomparably the more abundant; and it is pretty certain that neither the author nor his contemporaries can tell with any great certainty which is which. One must therefore approach any new harvest of song with humility, with charity, and, if possible, with infinite patience.

It certainly seems a pity that Lord Tennyson's fame could not have rested, where it was left by his last volume, on the unsurpassed beauty of "Crossing the Bar," instead of collecting the odds and ends which fill 'The Death of Oenone, Akbar's Dream, and Other Poems' (Macmillan). The contrast between his noble early poem on the same subject and the feebleness of this "Oenone" is almost pitiable; and after the magnificent vigor of William Morris's "Death of Paris" the comparison becomes more appalling. Lord Tennyson's poem is not really above the level of Andrew Lang's 'Helen of Troy,' which now attains its second edition (London: Bell). In the supplementary note to this book there are some interesting details of tradition, mostly from German sources, but Mr. Lang is very rash in inviting comparison between his own languid tale and the fine paper of Paul de St. Victor in 'Hommes et Dieux.' In 'The Professor, and Other Poems,' by the author of 'Moods' (London: Kegan Paul), we have apparently a skit at Tennyson in a poem called "A House of Lords" (p. 145), in which the same voice takes two wholly different views of hereditary rank at an interval of twenty years. For the rest, there is much good and independent thought in the book, without very much of the poetic quality. 'By the Sea, and Other Poems,' by "Fred Henderson" (London: Unwin), is a work far more touched by the muses; the author's sea is the ocean of life, and he writes, with intense feeling and some radical sympathies, of the ills and problems of London. The volume is bravely dedicated "To my friend Frederick Charles, who is now undergoing ten years' penal servitude for his alleged part in what is known as the Walsall Anarchist Conspiracy." It is worth noticing that the book thus heralded has reached its second edition.

'The Brethren of the Cross,' a translation of one of Werner's wild dramas by E. A. M. Lewis (London: Bell), carries us back to the alleged origin of freemasonry in the suppressed mediæval order of Knights Templars, and recalls also the once familiar article of Thomas Carlyle, in which he annihilated Werner less thoroughly, it seems, than he had supposed. Even now the long drama is not very readable, but the notes are interesting if the poem is not. Heine once said of Werner's dramas that they never found much favor from mortals below; and whether the angels liked them much better he had no means of knowing.

London poetry would seem to be in a bad way when it can only be cured of affectation by inoculating it with some other affectation. Mr. Richard Le Gallienne, though handicapped with a most un-English name, writes 'English Poems' (London: Mathews & Lane) complaining that "youngsters blush to write an English song," and protesting that

> "Not of thee this new voice in our ears,
> Music of France that once was of the spheres."

But the book opens with an archaic title-page, it is feebly dedicated to "Sissie Le Gallienne," and its "English" love-making is of this diluted quality (p. 73):

> "O love! love! I fear,
> For the air is too sweet—
> Softly, love—O my dear!
> Yea, too sweet
> On a sudden to meet
> Mortal mouth!
> O my sweet! O my sweet!
> The long drouth.
> And at last, dear, O think!
> The long drink!"

Surely this gives only the impression of some Early English drink which has quite befuddled the lover, and even the brutal doggerel of Mr. Meredith's 'Jump to Glory Jane' (London: Sonnenschein; New York: Macmillan) is welcome in comparison.

To revert again to Mr. Le Gallienne, the *Saturday Review* attributes to him "a deliberate quaintness of style, as of a new Euphues"; but, on the whole, we prefer even the Debonair Verse of the current London fashion to the needle of Sir Piercie Shafton. Yet there must be some genuineness left in the heart of a man who can write thus (p. 45) "To My Wife Mildred":

> "Dear wife, there is no word in all my songs
> But unto thee belongs!
> Though I, indeed, before thy true day came,
> Mistook thy star in many a wandering flame,
> Singing to thee in many another's name
> Before I knew thine everlasting eyes."

The genuine and passionate thrill of Irish poetry is well sustained by Katharine Tynan in her 'Irish Love-Songs' (Cassell), although perhaps a chronological arrangement would be better than that which mingles George Darley's later lyrics with the older bards. It is not strange that she could not forbear the insertion of that high-water mark of modern Irish poetry, Mangan's "My Dark Rosaleen," but it should have been left, on the whole, among the poems of patriotism, where it belongs. She has done well to keep clear of the pseudo-Irish muse of Oscar Wilde; but why omit Lover's graceful and melodious "What will you do, Love?"

Ireland also gives us, in 'The Countess Kathleen, and Various Legends and Lyrics,' by W. B. Yeats (Cassell), one of the most original and powerful of recent poetic volumes, drawing its strength, however, largely from its material—a fragment out of what the author well calls that "huge body of tradition behind her [Ireland] in the depths of time," which gives that island really the advantage over England, since the Arthurian legend, for instance, is cold and limited compared to that wealth of fable and fancy which Aubrey de Vere and others have found so fertile. The theme of "The Countess Kathleen"—witches disguised as merchants, who come, in time of famine, to buy the souls of the poor, and to whom the young Countess sells her own soul finally for the relief of others, saving it in the selling—is nobler than the Faust legend and is nobly handled here. Mr. Yeats was already known by his 'Wanderings of Oisin.'

In the collected poems of Philip Bourke Marston (Boston: Roberts), although there are some poems new to us, there are perhaps none which give any added evidence of clear title to genius. There is everywhere the poetic temperament and most careful execution; but upon all his work is the impress of Rossetti, or, perhaps, only of the local and temporary environment in which both were reared. Mrs. Moulton, the young poet's ever faithful friend, writes a memoir which does honor to them both.

Mr. William Watson, well known to the lovers of Wordsworth, comes before us with two thin volumes, the one of selections, the other original. His 'Lyric Love: an Anthology' (Macmillan), is a pleasing collection, though it marks the editor's limitations. It has most of the stock poems and some others; but there is something almost grotesque in a collection of love lyrics which leaves out Shelley's "One word is too often profaned," Rossetti's "Song of the Bower," and Swinburne's "Madonna Mia." This last poet is indeed ignored altogether. The collection includes no American poem save Saxe Holm's "Three Kisses of Farewell," which is attributed, odd-

ly enough, to an else unknown "Agnes E. Glase." The time is not distant when spurious Saxe Holms sprang up in various directions throughout America; but this is, so far as appears, the first English claimant. Mr. Watson's volume of his own verse, 'Lachrymæ Musarum, and Other Poems' (Macmillan), is a little handicapped by the rather extravagant applauses that heralded his first; and so much of it is given to the praises of other poets that he seems, after these and his "Wordsworth's Grave," like a self-elected laureate of the bards. Yet his eulogies of Shelley and Tennyson and Coleridge are well sung, though his final song of Columbus must take rank with most of the Columbian tributes, thus far, as being rather feeble.

It is pleasant to be able to select from this general condemnation the one official performance of the Columbian year, Miss Harriet Monroe's ode for the dedicatory ceremonies at Chicago. This lady, before known only by her strong drama of "Valeria," has certainly taken at one bound a high position among American poets, both by her "Cantata" for the Chicago Auditorium and her so-called "Commemoration Ode." It is perhaps unfortunate that she permitted herself to employ this title, so distinctly identified with Lowell's great poem; but with Lowell's minor odes—never quite so successful as his masterpiece—she may fearlessly invite comparison. It is certainly another feature of the singular good fortune which has thus far marked our great national enterprise that it has thus found its competent laureate in a wholly unexpected direction. Miss Monroe takes occasion to reprint her 'Valeria, and Other Poems' (Chicago: McClurg), printed for subscribers only, last year, but now regularly published, and including the "Commemoration Ode."

Miss Agnes Replier, like Mr. Watson, has edited 'A Book of Famous Verse' (Houghton), and, which is rather surprising, has included in it American poetry as well, her taste being usually transatlantic. It might, perhaps, have been well to explain on the title-page—since many omit to read prefaces—that it is a collection for children especially. For this purpose it is fairly well chosen and edited, but not always with discretion. The lovely ballad of "The Lass of Lochroyan," for instance, is sadly maimed by omitting the third and fourth verses, which give graceful and tender answers to the plaintive questions in the first two verses; and there is an occasional substitution of English for Scotch readings beyond what is agreeable to the ear. Aytoun's rendering, for instance,

> "He saw his young son in her arms
> Baith tossed abune the tide,"

is far more appropriate than the "both" and "above" here substituted, while much harder Scotch words are left unchanged. The references to Notes 9 and 10 (pp. 71–3) are misplaced. In the classic "Rose Aylmer," which it is not safe to alter by a syllable, Miss Replier gives

> "A night of memories and sighs,"

whereas it was printed in 1846 "and of sighs." In Landor's day, *memories* would have been a dissyllable and perhaps written "mem'ries." In the same way the editor gives us, in Browning's "Home Thoughts, from Abroad,"

> "And whoever wakes in England,"

instead of the original "who," and

> "The fields look rough with hoary dew,"

instead of "are rough." But she cannot here be held to account, as she follows Browning's later emendations, which in this case are certainly no improvement.

Of recent American volumes, notable rather for the interest of their themes than for any inspiration they betray, the showiest is 'Alaskana,' by Prof. Bushrod W. James (Philadelphia: Porter & Coates), which has really some value as a guide-book through its abundant illustrations, although its letter-press, in the "Hiawatha" measure, is rather hard reading. In the same way 'Poems of Gun and Rod,' by Ernest McGaffey (Scribner), has value by reason of Mr. H. E. Butler's spirited delineations of birds and fishes. 'Some Rhymes of Ironquill of Kansas' (Chicago: McClurg) is crammed with local coloring; 'Songs from Nahant,' by Anne E. Johnson (Lynn: Nichols), has some modest glimpses of seaside life; and a book called 'Night Etchings,' by A. R. G. (Lippincott), has an irregular poem, "A Bat awakes by the Amazon," which has a touch of real tropical delineation and is such as Lanier might have written. A later volume by the same author and publisher, 'Gleams and Echoes,' shows no increase in real power, while the illustrations, though graceful, afford little assistance. In that portraying the wood-thrush, for instance, we see that shy bird sitting conspicuously on a bare bough in the foreground like a familiar robin. 'Legends of the Netherlands, to which are added some legends of Manhattan Island,' by Gideon J. Tucker, A.M., M.D. (New York: The Author), has a good deal of historical material in the rough, but rather tends to confirm the popular impression that the gods did not make the Dutch-American race poetical.

Among American poems which are in themselves interesting, the first place of course belongs to the enlarged edition of Whittier's 'At Sundown' (Houghton, Mifflin & Co.), the first edition having been privately printed for the author's friends two years ago. Seven new poems have been added, two of which are addressed respectively to Lowell and Holmes; and there are illustrations, sometimes quite attractive, from designs by Garrett. Mr. Clinton Scollard, in his 'Songs of Sunrise Lands' (Houghton, Mifflin & Co.), shows the peril attendant on an exceedingly poetic temperament which risks itself fearlessly amid the wealth of Oriental objects. Give a tolerably ready ear, and the "dim kiosk" and the "attared rose" sing themselves very easily, as Bayard Taylor found forty years ago; he sang them quite as well as Mr. Scollard, but the success gave him no immortality. Mr. Arlo Bates, who perhaps has never visited Oriental lands himself, yet puts more positive flavor into his 'Told in the Gate' (Roberts Bros.) simply because he handles his Eastern properties with a stronger grasp and is less fascinated by the bewitchment of the embroidery. But there is something to be said, after all, for the materials which one's home yields, and Mrs. Julia C. R. Dorr extracts more vigorous verse from the Ethan Allen legends in the Vermont of her childhood ("The Armorer's Errand" in her 'Poems,' Scribners) than out of the many themes she borrows from foreign lands. This is partly because her natural theme is the daylight, while there are far more gifted poets, like the late Anne Reeve Aldrich ('Songs about Love and Death,' Scribners), whose whole existence dwells, like Emily Dickinson's, in the dim twilight, so that it matters not what the chosen theme may be: the subjective quality is all in all. Who would not guess that the following verses, for instance, were by Emily Dickinson herself (p. 128)?

> A LITTLE PARABLE.
>
> I made the cross myself whose weight
> Was later laid on me.
> This thought is torture as I toil
> Up life's steep Calvary.
>
> To think mine own hands drove the nails!
> I sang a merry song,
> And chose the heaviest wood I had
> To build it firm and strong.
>
> If I had guessed—if I had dreamed
> Its weight was meant for me,
> I should have made a lighter cross
> To bear up Calvary.

A new and enlarged edition of 'Swallow-Flights,' by Mrs. L. C. Moulton (Roberts), takes us to a region quite alien from the gypsy longings of Miss Aldrich, a region of matured art and assured power, within certain limitations. It is almost a pity that the publishers should have followed the English custom, only slowly creeping into our own books, of following up each volume by a few profuse laudations of its predecessor, especially as in this case they are all English, and hence somewhat remote from the real qualities and properties of American verse. When Prof. Minto, in the London *Examiner*, says that "in this little volume there is no trace of the provinciality of tone which has hitherto prevented any American poet from attaining the first rank," this preposterous utterance necessarily creates a prejudice in the unregenerate American mind against the very pleasing poet thus exalted over Emerson and Lowell. For it must never be forgotten how it was thought by critics of the Minto calibre that it was very provincial, and indeed almost vulgar, when Lowell ventured to sing of the bobolink and Emerson of the chickadee, instead of properly repeating the praises of the lark and the nightingale. Fortunately, Mrs. Moulton is better than her critics, and in her very first poem chants, without fear, of mayflowers and of "Plymouth town."

The first instalment of what threatens to prove a formidable harvest of Columbian poetry consists of 'The Song of America and Columbus, or the Story of the New World: A Greeting to Columbus and Columbia,' by Kinahan Cornwallis (New York: *Daily Investigator* Office), and 'Columbus: an Epic Poem, giving an accurate history of the great discovery in rhymed heroic verse,' by Samuel Jefferson, F.R.A.S., F.C.S., author of 'The Epic of the Invincible Armada' (Chicago: Griggs). The two books might seem at first to have their theme in common, but the treatment is as different as are the two representations of the caravel *Santa Maria* which adorn their respective covers. Mr. Jefferson's vessel has two masts, two sails, and no visible sailors; Mr. Cornwallis's has three masts and a bowsprit, six sails, and decks crowded with little men. A similar difference exists in the poetic structure, Mr. Jefferson's work being couched in the most placid description of heroic couplet, such as the once lamented Hayley might have written, while his rival interrupts a similarly measured strain with bursts like this (p. 64):

> "'Twas thus in 1492
> The Old World here espoused the virgin New.
> Here 1492 gave praise
> While 1892 gives bays
> And glorifies that great and grand event.
> All hail, Columbus! thou by Heaven sent;
> The New World shakes immortal hands with thee,
> O great explorer of the Western sea."

On the whole, we prefer the work of Mr. Jefferson, F.R.A.S., F.C.S., both because his epic is the shorter of the two, and because it seems to limit his ambition. Mr. Cornwallis,

on the contrary, proposes to "shake immortal hands" with posterity through a large part of the history of America, promising in the next volume the tales of other early explorers, to be followed by "the stories in detail of the Discovery of the Pacific, the Conquest of Mexico by Cortes, and the Conquest of Peru by Pizarro." His frank suggestion that it will be "an elephantine work" is possibly the only point on which the opinion of his critics is quite sure to coincide with his own.

To the foregoing two may be added a yet larger volume, 'The Quest of Columbus: A Memorial Poem in twelve books,' by Henry Iliowizi (Chicago: Smith). This has no portrait whatever of the *Santa Maria*, but has one of Columbus and one of the poet; it is written in iambic verse, the first half of the volume being in heroic measure, while the latter half, without visible reason, shifts to alternate rhymes. Of this book as of the two others, it may be said that he who can read it may undertake Barlow's once famous 'Columbiad' without fear of slumber.

The 'Poems' of George Pellew (Boston: Clarke) are edited, since the death of that promising and attractive man, by his warm friend Mr. Howells. While his work has the qualities attributed to it by his biographer, it must still be admitted that it shows promise rather than fulfilment. 'Rhymes and Ballads for Girls and Boys,' by Susan Coolidge (Roberts Bros.), is sumptuously printed and illustrated and is very attractive. Both this volume and 'Little Folks' Lyrics,' by Frank Dempster Sherman (Houghton, Mifflin & Co.), may be fearlessly commended for children. There is real thought and some power of expression in 'The Cup of Life, and Other Verses,' by Hannah Parker Kimball (Boston: Cupples), but more of both of these qualities in 'A Book of Day Dreams,' by Charles Leonard Moore (Holt). We have not, we think, had occasion to notice the first (privately printed) edition of these really strong and thoughtful poems. The author's earlier volume, 'Poems Antique and Modern,' published in 1883, gave no full promise of his later power, though the verses were facile and finished. In the later work he has chosen a dangerous form of expression—a whole volume of continuous sonnets—whereas it is now the tendency of poets to distribute their sonnets among other forms of verse, for fear of monotony. He has also chosen the most monotonous form of the sonnet, the Shakspearian, with its alternating lines, whereas the present taste is altogether for the more varied Italian and Miltonic arrangement. The thought is also frequently involved and hard to follow, but it is often clear and noble, and is couched in such vigorous lines and fresh, strong phrases as to make these hundred sonnets outweigh many volumes from the tamer muse. We may well close—though it is rather forcing the season—with this profound and jubilant hymn to Spring (sonnet 51):

LII.

The Spring returns! What matters then that War
On the horizon like a beacon burns,
That Death ascends, man's most desirèd star,
That Darkness is his hope? The Spring returns.
Triumphant through the wider-archèd cope
She comes, she comes, unto her tyranny,
And at her coronation are set ope
The prisons of the mind, and man is free!
And beggar-garbed or over-bent with snows,
Each mortal, long defeated, disallowed,
Feeling her touch, grows stronger-limbed and knows
The purple on his shoulders and is proud.
The Spring returns! O madness beyond sense,
Breed in our bones thine own omnipotence!

BROWNELL'S FRENCH ART.

French Art: Classic and Contemporary Painting and Sculpture. By W. C. Brownell. Charles Scribner's Sons. 1892.

It is a favorite idea of the literary critics of painting and sculpture that they are the better critics for their very lack of technical knowledge, as they are not biassed by their personal predilection for one sort of technique or one school over another, and are free to judge all artists and all schools without prejudice and from the standpoint of general culture. Singularly enough, this doctrine is seldom applied to the other arts, and we do not often hear it maintained that a critic of music is the better for being no musician, or a critic of literature more able for being no writer. Still, something might be said for the theory if it were true, in fact, that special ignorance prevented special bias. Unfortunately it does not, and no artist in the thick of artistic battles could be more bitterly partisan than some of the critics who look on from the heights of the arena. Let us hasten to add that Mr. Brownell is not of these, and that his book is a most favorable specimen of purely literary art-criticism. He is ingenious, subtle, catholic. Indeed, over-subtlety and over-catholicity are his dangers. His motto is "Tout comprendre c'est tout justifier"; and though he expressly excepts bad drawing from the list of things so justified, he sometimes comes perilously near forgetting even this exception.

The general aim of these essays, most of which are reprinted from *Scribner's Magazine* and the *Century*, seems to be to point out the stream of classic feeling running through all French art, even that which is most revolutionary. Mr. Brownell knows France and Frenchmen wonderfully well, as his admirable 'French Traits' proved; and his judgment of the French spirit in art is worthy of serious consideration. The way in which the French social sense modifies art in the direction of collectivity and tradition, and away from mere personality and idiosyncrasy, so that there is really a "French School" and not merely French painters and sculptors, is shown by him in a very interesting way. His discussion of the nature of style is admirable, and so is his demonstration of the influence of the Institute in producing the general atmosphere of art from which spring the very artists who revolt against the Institute's control.

His characterization of individual artists and their work is also often very ingenious, and he succeeds remarkably well in conveying the total impression receivable by a person of culture and sympathetic mind from the works he discusses. His characterization of Corot is especially felicitous in this way, and so is that of the painters of the eighteenth century. But it is all (Mr. Brownell must pardon us the word) irredeemably literary. He deals entirely with thought, intention, sentiment, never with *painting*. To those who know pictures as very tangible things, with distinct qualities and differences of form and color and method and handling, it is puzzling to find them volatilizing before their eyes and evaporating into a haze of words. Mr. Brownell's style, always diffuse and indirect, becomes sometimes almost unintelligible in the effort to make subtlety and allusiveness supply the place of definite statement or description; and to read what he has to say about Daubigny, for instance, is to doubt the very existence of that robustly real painter. The effort at translation is too great, and one feels as if one had employed one's time with about the same degree of profit as if one had listened to a painter without musical knowledge trying to describe the effect upon his mind of a Beethoven symphony.

Mr. Brownell's abundant catholicity and his desire to comprehend and justify everything lead him very far—for example, in his praise of Dupré and Diaz as, "of modern painters, perhaps the nearest in spirit to the old masters, pictorially speaking"; of Monticelli, whose fondness for constructing nonsense pictures he calls "that curiously elevated detachment from the material and the real"; and of the "dramatic grandeur" of the "lofty landscape of Michel," for whom the dealers seem to be succeeding in making a reputation, while they are unable to insure any real understanding of or delight in Baudry, whose qualities are so entirely artistic that none but artists are likely to recognize them fully for some years to come.

Such are the defects of our author's qualities. A certain lack of discrimination in praise, and a certain "detachment from the real" which gives his appreciations the aspect of criticism in the air, are almost inevitable by the literary critic who is without that technical sense which enables the artist to distinguish between the genuine and the factitious in any style. Mr. Brownell's discussion of realism is an instance, wherein he seems unable to distinguish between the true realistic temper and mere *trompe-l'œil*, and considers Carolus Duran as a "realist to the core" because of a certain ostentation of lifelikeness in coats and gowns, and in spite of the utter absence of that respect for fact which is the essence of realism. But it is in the discussion of purely technical questions that the weakness of the "lay" critic shows itself most sharply, and such discussion cannot always be avoided. No painter would have been likely to make Mr. Brownell's blunder of choosing Schreyer's grotesquely impossible horse-anatomy as a term of comparison for the measurement of Fromentin's confessed insufficiency of technical training; nor would any painter capable of writing fairly good English have so confused the question of actual as against relative values as Mr. Brownell has done. Here he has hit the right idea, but has chosen his example so badly as to throw darkness rather than light on the subject. "Manet's great distinction," he says, "is to have discovered that the sense of reality is achieved with a thousandfold greater intensity by getting as near as possible to the *actual* rather than resting content with the *relative* value of every detail"; and then he takes up Gérôme's "Éminence Grise" as an example of the older method of reliance on comparative value, and asks "what would happen to this house of cards shored up into verisimilitude by mere *correspondence*, if Gérôme had been asked to cut a window in his staircase and admit the light of out-of-doors into his correspondent but artificial scene." One could not well aim more beside the mark than this. It is in just such pictures as this of Gérôme's, where there is *no* "light of out-of-doors" to struggle with, that the *actual* values of things are, and have always been, imitable and imitated. It would have been after the window was cut through that the system of correspondences and relative values would have come into play, and that Gérôme would, as Rembrandt did, have darkened everything else in his picture and lowered its tone far beyond that of nature to give relative brightness to his window. Manet's discovery, in so far as it was a discovery, was, that he got more of the effect of light by keeping the other objects

as high in value as they really were, and then getting the window lighter if he could, or letting it take care of itself if he could not. We say "in so far as it was a discovery," for, not to speak of the primitives who worked naïvely on this principle without knowing it, Veronese and Velasquez showed a comprehension of it, while Van der Meer pushed it to its fullest perfection and is as modern as Manet. Where the same principle is applied to landscape, and the absolute brightness of out-of-doors as compared with the gallery walls is what is searched for, at some expense of the truth of relations of light and shade in the landscape itself, we get modern "Impressionism"; but even here Van der Meer is ahead of the moderns, as witness his wonderful little "View of Delft" in the gallery of The Hague. The real discovery of Manet and Monet is in color, not in value, and it is in securing the effect of light by its *decomposition* that they have taught something to the world; though even here their practice is an advance on what had been done, or an exaggeration of it, rather than a totally new departure. That the juxtaposition of small particles of pure color produces a vibration which gives more the effect of pure light than does white paint itself, has been dimly felt, if not understood, by all true colorists; and it is in virtue of this fact that Monet gets his effects of dazzling sunlight without really going very high in key, and without any of the "chalkiness" that infects so many of the modern attempts at *plein air*. Only Titian got his vibration by glazing and scumbling and kneading his colors with his fingers, while the Impressionists get theirs by the bolder and more direct manner of hatching and dotting.

With Mr. Brownell's chapters on sculpture we have less fault to find, possibly from less special competence on our own part. He seems to us a trifle unjust to Paul Dubois, but, on the other hand, he is refreshingly cordial in his admiration for that great and insufficiently appreciated artist, Frémiet. In the last chapter, on Rodin and Dalou, there is sounded, for the first time in the volume, something like a note of partisanship. Mr. Brownell is strongly under the influence of Rodin's striking artistic personality, and praises him with a vehemence and lack of discrimination which smacks of the advocate. He is so impressed with Rodin's vivid realism, his command of anatomy, and his wonderful sense of structural significance and structural unity, that he fails to see that artist's equally marked lack of the decorative and architectonic sense, his inability to conceive of a *whole*, the absence in him of the power of composition. He imagines a modern irruption of barbarians who should break to pieces the sculpture of to-day as those of old broke the statues of Greece. "Would anything survive mutilation," he asks, "with the serene confidence in its fragmentary but everywhere penetrating interest which seems to pervade the most fractured fraction of a Greek relief on the Athenian acropolis? Yes, there would be the débris of Auguste Rodin's sculpture." The fragments of Rodin's sculpture would undoubtedly be far more satisfactory than the fragments of any other modern, not merely because they are superb fragments, but because they are *now* nothing else. The "Dante Gate" exists only as a mass of fragments—marvellous fragments, many of them, and worthy of the praise that has been lavished upon them; but no one has ever been able to give any idea of the gate as a whole or of its scheme of decorative composition. The various fragments of the group of the "Burghers of Calais" were hailed with delight when shown separately, but suddenly they were pitchforked together anyhow, and it was revealed that the mighty plan of which they were supposed to be a part did not exist, and that the splendid indications were for ever to remain indications only. "When his Dante portal for the new Palais des Arts Décoratifs shall have been finished"—Mr. Brownell prophesies all sorts of things; but will it ever be finished? We have heard that the commission has been definitively abandoned. In any case, it might not be too bold to predict that the gates will never be set up. No one can model a back as M. Rodin can—with such vital force and such grasp of the interdependencies of bone and muscle and attachment, such play of living flesh, such structural perfection; yet Rodin is a curious example of impuissance, and his lifework seems likely to remain a collection of *disjecta membra*. With a little more of that classic temper which Mr. Brownell has so clearly discerned in French art as a whole, and with a little more respect for tradition and a little more capacity for proceeding on known lines, even if these qualities had been balanced by a little less originality and personal force, he might have produced more lastingly satisfactory art.

CHILDREN'S BOOKS.—III.

How difficult it is to write fairy tales and wonder-books at the present day, in spite of the marvels of science, or perhaps because of them, is clearly shown in some examples before us. Miss Julia Goddard, in her 'Fairy Tales in Other Lands' (Cassell Publishing Co.), instead of endeavoring to invent new plots, frankly borrows the old ones and transfers them to other climes; that is, she has given us a Chinese "Beauty and the Beast," a Scandinavian "Jack the Giant-Killer," an ocean "Sleeping Beauty," etc. Her versions are not without ingenuity and charm, but alas! the innocent naïveté of the genuine fairy tale is lacking, and Miss Goddard has inflexibly eliminated all love-making and marriage. The Beast turns out to be Beauty's uncle, the kiss that awakens the sleeping princess is imprinted on her cheek by her brother, and Cinderella is adopted by the governor at whose ball she lost her slipper. No child was ever scandalized by the way these stories ended in the good old versions, and if it is deemed wise to suppress all mention of matrimony in the nursery, it would be better to exclude fairy tales altogether than to rewrite them as Miss Goddard has done.

Mr. Lockwood's wonder-book, 'Baron Trump's Marvellous Underground Journey' (Lee & Shepard), deals with the adventures of little Baron von Trump and his dog Bulger in an underground journey which they begin by sliding down a narrow pipe in the north of Russia, and end by being ejected by a geyser five hundred miles from their starting point. They, that is, the Baron and his dog, encounter people with transparent hearts, a blind, deaf, and dumb race, who read the works of the poets with their feet by walking over slabs with raised letters, and a cold-blooded nation called Koltykwerps, and end with the land of the Happy Forgetters. These remarkable people live mostly on fish, and dress in silk obtained from moths inhabiting these underground regions. The present volume seems to be the fourth of a series, which leads the critic to infer that the class of children for whom it was written like it, and, if so, nothing further need be said.

It is a relief to turn to Mr. Jacobs's book, 'Indian Fairy Tales' (G. P. Putnam's Sons). His works are always entertaining and valuable, and his series of fairy books grows in interest with each new volume. After giving us English and Celtic tales, Mr. Jacobs goes this year to India, which to many seems the home of the fairy tale. The stories are of a wide range, from fable and droll to the serious story, and from the hoary antiquity of a Buddhist birth tale to a story taken down but yesterday from the mouths of the people. It is the modern collections which will be found most interesting to children, and which, after all, contain most of the fairy stories, as the older collections consist of fable or apologue, lending itself better to moral instruction than the fairy tale pure and simple. The editor has made a judicious selection, and accompanied it as usual by notes which the children's parents will find pleasant and novel reading. Mr. Jacobs gives a history of the collection of Indian tales, and dwells briefly on the subject of their diffusion throughout Europe. He holds, correctly, we think, that the comic folk-tale or droll of Europe may in almost every case be traced to India. In regard to the fairy tale he is more conservative, and thinks that only those stories common to the Indo-European world (from thirty to fifty per cent. of the whole) have come from India—mainly at the time of the crusades, and chiefly by oral transmission. This, it will be seen, is quite a different thing from the exaggerated view held by some that India is the home of all European folk-tales of every class. To the American reader the most interesting of Mr. Jacobs's notes is the one on the Buddhist birth tale of "The Demon with the Matted Hair," in which he sees the prototype of Uncle Remus's "Tar Baby." It was shown some time ago that the central idea of the "Tar Baby" story was found in South Africa, whence it had probably spread to Brazil, the West Indian Islands, and our own South. It is not impossible, of course, that the African version was obtained from Buddhist missionaries, and that "Brer Rabbit" is an incarnation of Buddha. Has the episode of "adhesiveness" in European folk-tales (Grimm No. 64, "The Golden Goose") any connection with the Buddhist story?

In a very graceful and modest preface to 'Uncle Remus and His Friends' (Houghton, Mifflin & Co.), Mr. Joel Chandler Harris closes his memorable series; and certainly when we are shown the old man at the telephone and the phonograph and in an electric car, Uncle Remus begins to have a *fin de siècle* air preliminary to his translation. Yet we marvel afresh at the delineator's art, his extraordinary versatility in narration, and his ever-extending vocabulary and phraseology. In other words, of exhaustion, either on the part of Mr. Harris or of his material, there is no sign in this final volume, which includes some secular negro songs and some episodes illustrative not of the old plantation, but of present Southern problems and perplexities, such as the exquisite "Some Advice to a Colored Brother," "Views on the African Exodus," "Called to Account by the Preacher," and the "William Henry" adventures. It is curious to notice the consciousness, on Mr. Harris's part, of a certain danger to childish morals from much familiarity with his animal fables. He touches on this in his prelude to "Brer Billy Goat's Dinner," and later on he tells a tale ("The Man and his Boots") expressly by

way of deprecating any confusion "'twix' creetur doin's en folks' doin's." "How de name er goodness," he asks "the little boy," "kin folks go on en steal en tell fibs, like de creeturs done, en not git hurted? Dey des can't do it." It will perhaps be surprising if parents do not at least have to trace prankishness and mischievousness to the same exemplars. Another reflection which occurs to us is, that Mr. Harris has added Uncle Remus to the gallery of popular negro types to which belong Topsy and Uncle Tom. Millions are reading of them all—have been reading of the earlier two for forty years. How much has been done by this means towards breaking down the unchristian prejudice against color? How much will that prejudice be strengthened by introducing to the nursery, through Mr. Harris's classic pages, the word "nigger" used opprobriously (as it is in fact) by colored people one towards another?

Mr. A. J. Mounteney Jephson's 'Stories Told in an African Forest by Grown-up Children of Africa' (Appletons) begin and end with animal fables, the first exhibiting the Rabbit in his customary rôle of cunning prevailing over brute strength. The other tales have an 'Arabian Nights' cast, as was befitting, seeing that they issued from the mouths of Mr. Stanley's Mohammedan Zanzibar followers in their camp in the great forest. They have been well chosen and are related with refinement, and the whole book has a very humanizing influence. Mr. Jephson conveys in an artless manner a clear idea of the camp, the perils of the expedition, the dwarfs and other savages, and thus provides matter which parents can read aloud to their children without tedium and with positive enjoyment. Mr. Buckley's illustrations are good and numerous, but fall somewhat short of Mr. Frost's in the Uncle Remus volume.

Mr. Andrew Lang's 'Green Fairy Book' (Longmans) is his third and last, resembling the Blue and the Red in being a levy upon the tales of all countries in old and in expressly new versions, with illustrations of the stock kind by H. J. Ford. The series is now closed, and the variety and prettiness of it make it exceptionally attractive. Mr. Lang intimates another juvenile project for next year.

The 'Short Stories about Animals,' by Gertrude Sellon (Cassell & Co.), are really fables; the animals acting and talking in a moral, instructive way. The book is full of pictures, of which the black-and-white ones are much the best; the large colored plates are flat and lifeless, and out of harmony with the text besides. A "black colt," for instance, is colored light bay, and a pig which is spoken of as "he" is pictured as a mature female.

Many as the books are which show Mrs. Ewing's influence, few will be found to come so near her own spirit as 'Mum Fidgets,' by Constance Milman (D. Appleton & Co.). The absence of "play to the gallery" of grown folks, the careful finish of style, the genuine refinement in thought and expression, remind us forcibly of Mrs. Ewing, while freedom in plan and detail prevents the disagreeable effect that comes from slavish copying of a model.

Another one of the same series, "The Dainty Books," this time 'For Grown-Up Children,' is by Mrs. L. B. Walford, and is not inferior to its companion volume. Four short stories are bound up together, "The Difficulty of a Darling" heading the list—a simple tale of generous giving, and equally unselfish receiving of an unwelcome gift, so well told that we could wish nothing changed but the name.

Three books by well-known authors ask for a word of notice, though they mark no new departure. A robust constitution, we fancy, will be needed by any one who intends to follow Mrs. Laura E. Richards's young heroine through a third volume, for 'Hildegarde's Home' (Estes & Lauriat) shows her as tiresomely vivacious as ever. She runs, jumps, exclaims, and claps her hands almost without relief, except when she is "crying quietly." In 'Scenes in Fairyland,' by J. C. Atkinson (Macmillan & Co.), a certain Miss Mary, with her friend Mr. Greenbeard, visits the fairies under ground. All the appurtenances of the fairy court are described with particularity, while the credit of the book with overwise children is guarded by allowing the surmise that the underground visits were only a series of dreams. John Kendrick Bangs offers another book of the 'Alice in Wonderland' type. 'In Camp with a Tin Soldier' (R. H. Russell & Son) might be welcomed as an amusing bit of nonsense if it were not such a flagrant imitation (and not the first its author has perpetrated) of a book which owed its principal charm to its originality.

In his 'Stories from the Greek Comedians,' Prof. Church continues the series which began with 'The Story of the Iliad,' and condenses for young people most of the remaining plays of Aristophanes, together with specimens of the "New Comedy," the latter, of course, coming through Terence and Plautus. To one acquainted with these plays, the undertaking seems risky and unpromising, yet Mr. Church has performed it with great discretion and success. His style is spirited and idiomatic, and his sketches are capital reading for clever young people, or for older persons once caught in his snare. The "Chautauqua Circle" might do well to look into them; if they do, let them remember that Phylæ (see note, p 233) should be spelled Phyle. The book itself, with its handsome pages and its colored illustrations after Flaxman, reminds one of French work in point of cheapness and good taste.

'The Fortunes of Toby Trafford' (Lee & Shepard), by J. T. Trowbridge, is a vigorously told, thoroughly interesting story of a boy by no means perfect, but an honest, manly, self-reliant young fellow, who, having a good deal to fight against, achieves a well-merited success. There are few exciting incidents, the interest of the story depending wholly upon the way in which Toby defeated the evil designs of his enemies. Most of the subordinate characters are distinctly drawn, and some of them, as the teacher and Mildred, are only less attractive than the hero himself.

'Through the Wilds' (Boston: Estes & Lauriat), by Capt. Charles A. J. Farrar, is an account of the tour of four boys through the Rangeley Lakes and the region adjacent, including a part of the White Mountains and the Dixville Notch. From a certain lack of imagination in the author and the particularity with which the daily doings of the party are related, even their meals being frequently mentioned, the book, as a story, is hardly successful. But it will doubtless awaken a strong desire in most readers to visit a most picturesque part of New England. In this case the book would prove useful, as it shows carefully how the various points of interest can best be seen, though, as the tour was taken nine years ago, we are left in some doubt as to whether or not the conditions are still existing. The best fishing and hunting places are indicated and there are some useful hints about camping and cooking in the woods; but the main object of the book is the description of routes. We are surprised that no map of the region is given, as even with an ordinary map at our elbow we found it impossible to trace the boys' course. Some of the illustrations are excellent, while others are execrable.

'Adrift in a Great City' (Macmillan), by M. E. Winchester, is a pathetic story of child-life in England. A boy, the heir of a large property, is carried away through various misfortunes when only five years old, first to an humble lodging in a suburb of Liverpool, and afterwards to a cellar near the docks. In telling of the more than four years spent in the slums, the author uses very skilfully the opportunity of picturing the life of the gutter children. While dwelling necessarily upon the frequent hunger, cold, and general misery chiefly caused by intemperance, to which they are exposed, the author does not hesitate to affirm, we believe truthfully, that there is much real happiness in the life of these children. This part of the story cannot fail to arouse the sympathy of its young readers in the very poor of our great cities, and lead many to a genuine interest in the efforts to aid them. Very touching also, we may add, and true to nature, is the description of the gradual awakening of the old memories in the child's mind, in which music plays a prominent part, and of the final train of circumstances which leads him and his faithful dog back to their old home.

Hezekiah Butterworth has given the title 'In the Boyhood of Lincoln' (D. Appleton & Co.) to "A Tale of the Tunker Schoolmaster and the Times of Black Hawk." He calls it "a true picture in a framework of fiction," but it does not impress us as being a true picture of the boyhood of Lincoln. It has not the accent of reality which we find in the account which Herndon and Lamon give of that boyhood, or even Hay and Nicolay, and this notwithstanding the fact that all that is best in the book, all that is vitally concerned with Lincoln, is lifted bodily from Herndon's book. That idealizing temper which gave us the cherry-tree Washington in Weems's Life and much subsequent biography, almost spoiling the Father of his Country for many of his children, is evidently at work on Lincoln. The most elaborate Life of him yet issued is written in the spirit of the statues of him in New York and Brooklyn, which try to cover up the actual man with tailor's clothes. Mr. Butterworth's representation of Lincoln's mother as "a woman of deep inward experiences and subjective ideas," also as "a mystic," will, perhaps, cause those to smile who are the best informed. The vehicle which Mr. Butterworth has chosen for his narration does not impress us as fortunate. The Tunker schoolmaster is an ineffable bore. Such a life as that of Lincoln cannot, of course, be guarded against the writer of fiction, but it must be one of the greatest who can improve upon the simple facts. The best page in the book is that facing p. 262. It is a picture of Lincoln from a photograph taken in 1858, two years before he marred his countenance with a scrubby beard. It is the same picture that is a frontispiece in vol. i. of the new edition of Herndon's 'Life of Lincoln,' and reproduces very well the photograph that is magnificently interpreted in Krueli's famous series. The illustrations generally are a happy feature of the book. The anticipation of the man's face in the boy's is remarkably well done, and best of all in the picture called "Abraham as a Peace-Maker," which anticipates the man's face as it lighted up with feeling in his public speech, when it was very different from its appearance in repose.

Mr. Charles Carleton Coffin, in his 'Abraham Lincoln' (Harper & Bros.), does not make his appeal avowedly, as heretofore, to young people, and especially to boys; but the manner of his book is the same as that of his former books, and, with the exception of the earlier chapters, is virtually an abridgment of what we have had before in his four quartos on the civil war. It is written in their scrappy manner, with their entire lack of charm of style, but with the advantage of the author's having been conversant with a great many of the persons and events involved. As a war correspondent he saw something of Lincoln, and it was his special good fortune to go down to Richmond when Lincoln visited the conquered city a few weeks before his death. Hence there is frequently an intimacy in the touch which tells for good upon his story. In his account of Lincoln's lite there is little evidence of original research. The tracing of his ancestry to the Lincolns of Hingham, Mass., will not bear the weight of critical investigation. The strength of a chain is in its weakest link, and several of the links of this chain are as weak as possible. In the treatment of Lincoln's boyhood there is the same disinclination to face the hard and cruel facts of the utter sordidness and misery of his environment that we find elsewhere; and especially is his own mother, Nancy Hanks, spoken of in a reverential way which finds little countenance in Lincoln's own disinclination to speak of her at all. One particular of Mr. Coffin's method goes far to give his narrative a pleasurable vivacity—we mean his throwing of a great deal of it into the dialogue form; but this part can, of course, least of all be trusted as a faithful mirror of actual occurrences. On page 294 there is an incorrect account of the origin of Whittier's poem,

> "We wait beneath the furnace blast
> The pangs of transformation."

This was written before Frémont's proclamation, and appeared in the *Independent* in July, 1861. In Whittier's arrangement of his poems it precedes his poem to Frémont, and is referred to no special incident.

Mr. Coffin's book is rich in illustrations. The most admirable are portraits which we have seen before in Mr. Higginson's larger 'History of the United States' and elsewhere. The picture of Lincoln and "Tad," on page 407, is called "Sunday Afternoon"—a pleasing fiction, for the book on Lincoln's knees is evidently not a Bible but a large photograph album. From such pictures as those of Grant and Sheridan to some of the poorest the descent is more considerable than should have been allowed. The frontispiece portrait of Lincoln, which should certainly have been as good as any, is unfortunately one of the very worst.

EIGHTEENTH-CENTURY DIPLOMACY.

B. F. Stevens's Facsimiles of Manuscripts in European Archives relating to America, 1773-1783. Vol XV., Nos. 1451 to 1544. London: B. F. Stevens.

A PART of the fifteenth volume of this series is taken up with the continuation of the correspondence between Lord Stormont and Lord Weymouth in March, April, and May, 1777, and with other Parisian matters of the same dates; another part with the theft of Arthur Lee's papers at Berlin. That fractious envoy, accompanied by a Mr. Sayre, visited the Prussian capital in the summer of 1777 in the hope of inducing Frederick the Great to assist the struggling Republic of the United States. The proceedings of these Americans were watched with interest by the English authorities, and, on the 9th of May, Hugh Elliot, the Minister of Great Britain at the Prussian court, was warned by Lord Suffolk, the Secretary of State for the Northern Department, to give every proper attention to their conduct and the impression which it might make (1452).

Hugh Elliot was an eager young man, only twenty-five years old, and well connected in England. He now saw his chance to make a bold stroke. By means of a German domestic of his own, he bribed the servant at the inn where the American agent lodged, and, having heard that the latter had long entered in a journal at night the transactions of every day, determined to possess himself of that journal. He was informed that Lee kept it in a writing-case, which was sometimes locked and sometimes not, but that the door of the chamber was always locked when Lee was absent. Elliot's first step was to get false keys made both of the door and of the bureau which contained the writing-case. Then, hearing that both Lee and Sayre were going out of town, where they generally stayed until eleven at night, he sent the German servant to bring off the papers. But strangers were just arrived at the inn, and the man could not get in at the door; he therefore entered the room at the window of the first floor, opened the bureau with his key, and brought the writing-case away out of the window, without being seen except by one of the people who were bribed. This was about four o'clock in the afternoon. Mr. Elliot was at dinner with several English gentlemen when the servant arrived with the stolen papers. The gentlemen were all enjoined to the most sacred secrecy, and set to copying instantly, while Mr. Elliot went about to pay visits and show himself. This he did till eight o'clock in the evening, when he called at the inn on the pretence of visiting Lord Russborough, who was staying there. He found both Lee and Sayre, that moment arrived and with Lord Russborough, and, knowing the papers not to be yet replaced, had no resource but to join them and to endeavor to amuse them with conversation. This he did for nearly two hours, without any introduction or acknowledgment of each other's names, but merely as men happening to meet who spoke the same language. About ten o'clock Mr. Lee got up and said he must go to write, and soon afterwards Elliot heard a violent clamor in the house, of a robbery, the loss of papers, etc. He now drove home, and, finding the most material part of the papers copied, resolved to send back the whole parcel immediately. They were accordingly delivered by Mr. Elliot himself disguised, late that night, to the mistress of the inn, who was in the plot, and who said they were brought by a porter who left them and ran off. Elliot took the precaution of sending away his own servant, who actually had done the stealing, post-haste to Hamburg, outside of Prussian jurisdiction (1468).

The stolen papers appear to have been nineteen in number, and to have included chiefly the not very interesting correspondence of Lee with Frederick's Minister, and some French and Spanish matters. The information conveyed to the British Ministry was not very valuable. The incident is interesting, however, as showing the tone of diplomatic morality of the day. And first for the Englishmen concerned. Here is Hugh Elliot's report to Lord Suffolk of his subsequent proceedings:

"Such strong suspicions had fallen upon a servant of mine who was actually employed in bringing them to me, that I thought it my duty to take a step I had previously resolved upon in case a discovery was likely to be made. I waited upon the Minister, and declared that what had happened had been occasioned by my imprudence in having shown too great inquisitiveness concerning Mr. Lee and Mr. Sayre; that a person employed to give an account of their motions had from over-officiousness committed this unwarrantable action, that though the papers had been sent back as soon as I knew what had been done, yet I felt myself so much to blame that I could not help begging leave to represent to his Prussian Majesty, either in person or through the Minister, that my court had no knowledge of this affair, that I alone was in fault, and that if his Prussian Majesty chose, I was ready to ask my recall, and to submit to any decision he might think proper to give.

"The day after I received for answer that the King could not help looking on what had been done as *fort vif et fort précipité*: that as I had declared my court was totally ignorant of this affair, *il ne la releverait pas*, but advised me to take care that nothing of the kind should happen for the future.

"If I might be allowed to express to your Lordship what appears to me becoming of his Majesty's dignity upon this occasion, I should not hesitate to beg that I might be ordered to tell either the King of Prussia himself or his Minister that although the King of England is sensible of the indulgence shown me by his Prussian Majesty, yet he disapproves of my conduct in this business, and his Majesty offers to nominate another in my place if I have made myself disagreeable to his Prussian Majesty. Whether this will be accepted or not I cannot determine with certainty, tho' I am rather inclined to think it will not. I make no apology to your Lordship for having risked everything when I thought his Majesty's interest so essentially concerned. I knew that by the sacrifice of an individual every publick inconvenience could be prevented; and as I have not scrupled to make that sacrifice when called upon, I flatter myself I have not forfeited your Lordship's protection or my sovereign's approbation.

"Mr. Liston will inform your Lordship, that matters were so arranged as to make it appear that I had not had time to peruse the papers, and will explain in full every circumstance of this affair.

"I am much obliged to Sir Trevor Corry, Mr. Barnier, and Mr. Liston for their assistance in copying the papers. The expence incurred by gaining some, silencing others, and different articles, amounts to five hundred pounds" (1465).

Such was Hugh Elliot's official account, and such was the story he wanted the world to believe. More than twenty years afterwards he made the acquaintance of John Quincy Adams in Dresden, and, after observing that the matter of Lee's papers "was now a circumstance that might with full freedom be talked of as a mere historical occurrence," he solemnly declared that the seizure of Mr. Lee's papers was not made by his orders; that it was entirely the act of an officious servant, who thought to do him a service by it; that when the papers were brought to him he did look them over indeed, and found among them only two of any consequence—one the draft of an unfinished treaty with Spain, and the other a letter from Frederick the Second, or one of his Ministers, promising that if any great Power in Europe would set the example of acknowledging the independence of the United States, he would be the first to follow it. "I am inclined to believe," adds Mr. Adams, "that this account is true, and I was pleased to see the anxiety with which Mr. E—— wished to remove the imputation of having premeditated that act of violence." (J. Q. Adams, 'Letters on Silesia,' p. 257.)

While the story about the officious servant was being put about in Prussia, Mr. Liston,

one of the gentlemen who had copied the papers, was sent to England by a circuitous route with the copies and requested to tell the true story to Mr. Eden, who was brother-in-law of Mr. Elliot, and was a confidential agent of the British Ministry for American affairs. Mr. Eden reported the particulars to Lord Suffolk, who replied on the 14th of July:

"I have ruminated much on Elliot's Adventure—and think it won't end as quietly as he imagines. His secret is in too many hands. I applaud his Zeal, but I don't mightily affect a Dasher; and tho' I wish to encourage the former, I by no means wish to encourage the latter. All steps whatever relative to this strange Business must wait my Return" (1471).

And again Suffolk writes on the 18th of the month:

"I return Elliot's papers which are curious. But, tho' his Zeal & activity merit notice, his Indiscretion has been excessive! and I cannot persuade myself that there is an end of the Business—if he could not have succeeded in his adventure without confiding it and *such Communications as were involved in it*, to such men as Sir Trevor Corry & young Harvey, He certainly might have had Prudence enough to have desisted: I tremble for the future conduct of such a Quixot" (1473).

On the 1st of August his Lordship sent Mr. Elliot a strongly worded letter, a regular official scolding, evidently intended to be shown (1477); but in October he wrote again, and announced to him a gift from the King of £1,000 (twice the amount which Elliot said he had expended), in consideration of his loyal zeal and of his great expenses in the business, and in proof that the exceptionable circumstances thereof were entirely overlooked (1482).

Meanwhile the affair had attracted the notice of other courts. Lee and Sayre had been loud in their outcries and denunciations. The French Minister at the court of Berlin had reported to the Count of Vergennes in Paris and received the comments of the latter on the news:

"The event which you report is worthy of the sensation which it has excited, that of the strongest indignation, whether the act be considered in itself or in relation to the person who promoted it. That a public minister should condescend to have the lock of a bureau picked, in order to get information which he believes it be important to obtain, is an outrage which secrecy and success would not justify. But as Mr. Elliot had acknowledged himself the promoter of the burglarious robbery of the papers of the Americans who are at Berlin, the King of Prussia had no other course to take than to stop the progress of legal proceedings which thenceforth ceased to have an object; but I do not doubt, sir, that His Prussian Majesty has complained of it to the court of London, which can not refuse him complete and authentic satisfaction" (1474).

The King of Prussia was free enough in his own expressions. He wrote to the Count of Maltzan, his Minister to the Court of St. James, as follows:

"POTSDAM, 30 June, 1777. . . . I have received nothing from you by the last regular post. But I cannot refrain from informing you of a singular and bold piece of vivacity and foolishness on the part of the Chevalier Elliot. That minister has gone so far as to have one of his servants carry off the writing-case of Lee, the American, from his bureau at the Corsica Inn, at Berlin, and, when trouble was made about the theft, he not only carried the writing-case back to the American, but he also came himself and acknowledged the theft to my cabinet ministry, with all its accompanying circumstances, and added various bad excuses to color the share he had taken in it. This is indeed what is called a public theft; and if I had cared to make him feel the resentment which the law of nations allows me, and which he deserved in every respect, I should have immediately forbidden his appearance at my court. But as he acknowledged his wrong-doing himself, and as he submitted his person and his fate to my disposal and my generosity, I did not care to push the thing rigorously, and I only let him know by my ministry how irregular and revolting his conduct is.

"Meanwhile, such is the minister that the court where you are has chosen, to reside at mine, and you will judge for yourself what are the feelings that such a trick must cause here, and how we must look on the Chevalier Eliiot. In Bute's school such pupils are formed

'By the very hand of the King.'

Oh! Bute's worthy scholar! Oh! the incomparable man your goddam Elliot is! Truly the English ought to blush with shame at sending such ministers to foreign courts."

Moltke: His Life and Character, sketched in journals, letters, memoirs, a novel, and autobiographical notes. Translated by Mary Herms, with illustrations from drawings by Moltke, portraits, and facsimile letters. Harper & Bros. 8vo, pp. xi, 332.

THIS volume is uniform with Moltke's 'Franco-Prussian War' and his letters to his mother and other near relatives, though they are not numbered as a series. The purpose of the editor (Moltke's nephew) to let the great soldier speak for himself, is the ruling one in this as well as in the preceding volume, though some documents are introduced which were written by other hands. One's first impulse is to question whether any satisfactory notion of Moltke's personality can be got from a collection of papers such as these; but as we read on, we find that the plan justifies itself, and that his character grows upon us as trait after trait is shown by his own expressions in his own words, and we close the book at last with a strong sense of acquaintance with the man himself.

The dominant characteristic in Moltke's mind was evidently a lucid precision. He will be content with nothing which is not well defined, with no knowledge that is not exact. Vagueness he cannot abide; he insists that his premises shall be solid and definite, and then he works out his conclusions with logical force and certainty. This is apparent in his earliest letters, and it is strikingly so in his latest intellectual effort, his thoughts on life and the future—a brief paper which he had recast and condensed several times, and which was found on his desk after his death. It is pathetic evidence of the strength of his impulse to think clearly, even on matters which most stubbornly resist sharp definition.

The same trait is beautifully shown in the reproductions of his original sketches of scenes in Silesia, in the Danube Valley, and in Turkey. These are all drawn in line, but we look in vain for a hesitating purpose or a doubtful touch. His fingers obeyed a will that was absolute, and were trained to a skill that excluded the possibility of slip between thought and execution. This series of drawings is extremely interesting as pictures, having a great deal of true artistic feeling; but their greatest value is in their illustration of the thoroughness of Moltke's subordination of every phase of his education to the military purpose which dominated his life. He evidently looks upon them as aids to his topographical study of the regions he traversed and part of the military reconnoissance of the kingdoms he visited. They, as well as the text of his journals and letters, show that he was thoroughly alive to natural beauty of scenery, and must have felt deep pleasure in reproducing it in sketches or in words; but it was not for the pleasure that the work was done. Duty was the incentive, though he rejoiced that so much of beauty and of pleasure could be found in the path of duty.

His habits were simple and unostentatious, and, though he knew how to take dignified part in the most important public ceremonies, his eagerness to throw off all trammels and to return to the most informal private life shows itself constantly. His ardent desire for a country home was gratified when he bought his Silesian estate of Creisau, and there the last years of his life were chiefly spent. He eagerly returned to his tree-planting and his farm management whenever he could get away from the duties of army headquarters at Berlin.

The marvel of his life is the tenacious vitality which enabled him to run a great career after he had reached the age when most men retire from active work. He was sixty-six when he directed the campaign against Austria, seventy when he conducted the French war, and still had before him twenty years of constant and fruitful work, till his wonderful organization stopped at last, without sickness or suffering, because the limits of human powers had long been passed. For his military character and genius we must look to the history of Prussia's wars; but in these volumes we come near to the man himself, and learn that true greatness is quite consistent with an almost childlike simplicity and modesty which made Moltke an object of devoted love to all who were close to him.

The World's Metal Monetary Systems. By John Henry Norman. G. P. Putnam's Sons.

UNDER this title Mr. Norman has gathered together in one volume a number of papers contributed to various periodicals during recent years. From his preface the reader is led to anticipate a lucid statement of the present condition of monetary science and an exposition of its recognized truths; but the book is necessarily fragmentary, there is a lack of coherence between its parts, and there is an amount of repetition which is exceedingly wearisome. Moreover, it is essential that a writer who deals with such subjects should be able to state his case clearly, whereas Mr. Norman candidly admits that if his doctrines fail of general acceptance, it can only be because of his lack of perspicuity. And, in truth, his style is obscure, his propositions do not follow each other in any natural sequence, and his constant reference to his other writings, with names of publishers, etc., savors somewhat of Mr. Wanamaker's methods of advertising. It is pleasant, however, to be able to record the fact that Mr. Norman is entirely sound on all fundamental points, and that he gracefully acknowledges his indebtedness to Mr. Cleveland, Prof. Sumner, and other distinguished Americans for the light they have shed over the dark places of the currency question.

Mr. Norman's claim to originality is based on what he calls his unit-of-weight system. He informs us that in 1888 he sent a memorandum of his views to a number of eminent financial authorities, with an earnest request that they would confute or confirm his doctrines, and that he received but one reply. In face of this somewhat chilling reception he feels that he is under a moral obligation to let the world know the "simplicity, beauty, and power" of the unit-of-weight system. It is recorded of a certain Oxford undergraduate that, having with much labor mastered the theory of the action of the common pump, he endeavored, with very limited success, to ap-

ply this theory to the solution of all the other mathematical problems that fell to his lot. We are reminded of this story by the hopeful earnestness with which Mr. Norman offers his unit-of-weight system as a panacea for the cure of all financial ills. Theories are very useful things, and there is much to be said in favor of this particular theory, but men of business will understand why Mr. Norman's eagerness to explain his views, in season and out of season, has rendered him a *persona non grata* in London bank parlors. Whether he is entitled to the entire credit of originating the unit-of-weight system, or whether he should share it with Soetbeer and others, is not a question of serious importance. As a matter of fact the germ of the idea is as old as the book of Genesis.

But Mr. Norman fails to show that the application of the system to practical exchange operations would be productive of any marked advantages to the world of commerce. Any schoolboy can make exchange calculations with the aid of the elaborate tables now in general use, and it does not appear that Mr. Norman's theory would appreciably facilitate such calculations. He very justly holds that the only scientific way of quoting exchange is by premium or discount on one factor, that factor being the weight of pure gold or silver in the standard coins of different countries; and he looks to America to initiate this reform in commercial methods. But he is evidently not aware that a determined effort was made some twelve years ago to adopt this system of quotation in the New York market, and that it was abandoned as inconvenient after a ten days' trial. In this instance the scientific method did not commend itself to those most largely interested in the matter. Of course the real difficulty in exchange operations is not within the reach of any cambist, and is not touched by Mr. Norman's theory. Its successful solution involves knowledge of credits and of multitudinous operations in merchandise and securities which are not to be found—as chess-players say—"in the books," and which are more complex than the action of the common pump.

Incidentally Mr. Norman has a good deal to say about silver, and what he says is very much to the point. He quotes Ricardo's axiom that the cost of production must ultimately regulate the price of commodities, and he naturally applies it to silver, which is today being produced in different localities at a cost of 25 to 50 cents per ounce, as against a market price, resulting from insane legislation, of 85 cents per ounce. In reply to the bimetallists' argument that the fall in prices of commodities is due to a rise in the value of gold, he asks, very pertinently, why there has not been a similar fall in the prices of gold securities.

At the present moment, when the relation between gold and silver is the one financial question of supreme importance, and when such crass ignorance on the subject has to be combated, we may welcome any book which inculcates such eminently sound views. The defects we have pointed out are unfortunate, but do not seriously impair the value of Mr. Norman's contribution to monetary science.

Neohellenica: An Introduction to Modern Greek in the form of Dialogues, containing specimens of the language from the third century B. C. to the present day. By Prof. Michael Constantinides. Macmillan & Co.

THIS work will be found invaluable to the student of modern as well as of comparative Greek, for it contains excellent examples of transitional epochs of the language from the earliest times down to the present, with an almost word-for-word translation on the same page. The range of subjects and style is very varied, beginning with passages from different versions of the Bible compared, from the Chronicon Paschale, 610 A.D.; Leo Grammaticus, 1013, and so on through the succeeding centuries, with extracts from history, popular songs in the different dialects of the demotic, proverbs, fairy-tales, enigmas, translations from Homer, Dante, Shakspere in the popular language. The dialogues interpolated in these extracts, which distinguish themselves in most books of this class by being so devoid of sense and so hopelessly unfit for common use, are in this case full of information interesting to travellers. Many of the questions a foreigner would inevitably put as to manners and customs, the growth of the language, the metres of modern Greek poetry, the priests, monks, and nuns, and the orthodox faith are answered here. Any one having a fair knowledge of classical Greek could, by the help of Prof. Constantinides' book, thoroughly understand the modern language as it is written by the best writers, although he might still feel puzzled by the circumlocutions and the pretentious style of Athenian newspapers. It is indeed difficult for any foreigner to understand the involved phraseology in which the commonest news is conveyed, or to seize at a glance the meaning of words coined as occasion requires to meet the most modern inventions; and in this no dictionary exists to help him.

A letter of the learned Philippos Johannou upon the modern Greek language, with which this volume begins, explains the difficulties that existed when, recovering from the demoralization of their long servitude, the Greeks, towards the beginning of this century, found it necessary to reconstruct their language so that it should become in common use a national tongue. There were three different opinions as to how this should be accomplished, the first being that the prevalent language of the common people should be adopted, as having spontaneously formed itself. This was objected to as being too restricted in expression for the scientific development of the nation. Others advocated that there should be a return to classical Greek; while the third opinion was that, while the ancient forms of speech were inadequate to meet our modern requirements, and the vernacular too wanting in precision and form, an emendated language, having the spoken tongue, purified of its corruptions, for its basis, should be formed, in accordance with ancient grammatical rules as far as practicable; and this third opinion was shared by the majority of the learned Greeks, although the limiting of this adaptation proved an endless source of discussion among them till the war of independence made them exchange the pen for the sword, which they all used in the common cause.

As soon as the Greeks had gained their independence, the need of an established language was felt still more keenly, and the discussions between those who advocated the adoption of the demotic and those who desired to return to an approximation to ancient Greek rekindled. It was evident to all that the confusion of mixing ancient forms with modern vulgarisms then prevailing could not be tolerated. Johannou's objections to the adoption of the popular tongue are, that the variety of local dialects would create great difficulties; the absence of grammatical form in these and the prevalence of mutilated expressions made it impossible to choose any; and the sanctioning of each in its own province or island would mean giving up a common language. The other alternative, of returning to ancient Greek, he condemns equally. We quote from the translation of his letter:

"The vocabulary of ancient Greek is utterly insufficient to express the innumerable ideas with which the progress of the arts and sciences from ancient times to the present day has enriched the human intellect; there is therefore an absolute necessity for the creation of innumerable new words to express those modern ideas. But in this case the ancient Greek language remains no longer really ancient; it will resemble an antique statue which has been clothed to meet the requirements of modern fashion, or furnished with a gun, a telescope, or a microscope, etc. By the ancient Greek language, then, we are obliged to understand that only its form is here meant —that is to say, its grammar."

He continues to explain how many forms of this grammar have become quite strange to the people, and the syntax absolutely unintelligible; the diffuseness of modern languages being common also to vernacular Greek, which, by means of prepositions, expresses many relations shown by terminations in the ancient tongue, but more usually resolves participles into relative, causal, hypothetical, adversative, and other clauses. "The correct use of the moods of the active and middle voice of verbs, and also of many particles, demands an amount of subtle discrimination which is beyond the power of the mental perception of the common people. The ancient Greek language being of this character, it is impossible to believe that it will ever become intelligible to them, and out of the question that it can become their vernacular." Johannou therefore counsels young men following a higher course of education to study the ancient language for the uses of poetry, and "such works as are composed for the use of the learned." He proposes that some common language should be agreed upon suitable for teaching from the pulpit, for parliamentary debates, for legislation, etc., etc. He insists that this language should not be strange to the mass of the people, but formed from their own spoken language, purified of barbarisms and alien words, and reduced to simple grammatical form.

Thirty years have gone by since Johannou wrote thus concerning the national language. In the meantime, judging from the Athenian newspapers of to-day, the more ambitious opinion, for approaching as much as possible to ancient Greek, has largely prevailed, and Johannou's strenuous injunctions as to the unreasonableness of writing so as not to be understood by the people have been lost sight of. We doubt whether the Athenian hall porter derives as much information as he might do from the newspapers which pass through his hands, though, like all the Greek populace, he has an intense admiration for fine and sonorous language. There still exists a party of learned men who prefer the demotic—among them D. Bikélas, who has translated several of Shakspere's plays very successfully into the vernacular. This would go far to prove that its resources are not so limited as the advocates for a return to ancient forms pretend. Spiridion Tricoupis's 'History of the Greek Revolution' is a work which may be considered a standard example of the demotic language.

Prof. Constantinides gives a selection of klephtic and popular songs in different dialects. We regret that in many instances he has preferred giving us published English metrical

versions more or less exact rather than the word-for-word translations so much more useful to the student.

Selections from the Letters of Geraldine Endsor Jewsbury to Jane Welsh Carlyle. Edited by Mrs. Alexander Ireland. Longmans, Green & Co. 8vo, pp. xviii, 443.

MRS. CARLYLE was a woman whom it must have been a liberal education to love, and whose bestowal of intimate friendship was the highest kind of credential to the recipient. Miss Jewsbury's best claim to remembrance has thus far been the fact that Mrs. Carlyle called her "my most intimate friend in the world." This distinction was clearly due to Miss Jewsbury's talent for friendship, amounting almost to genius. At her "works" Mrs. Carlyle herself indulged in gentle sarcasm, and now these letters come to furnish new proof that the bond of union was not so much intellectual as emotional. They reveal a woman whose point of view is well shown in her belief that a "passionate sensibility" is the noblest endowment of man, and whose life was so morbidly centred in the affections that one can understand how Mrs. Carlyle's Ann would have been so impressed by her lack of practicality as to say of her, "Miss can write books, but I'm sure it's the only thing she's fit for." This volume has an undoubted right to occupy a corner in the Carlyle literature, though as a whole, and in itself alone, it makes tedious work for one who tries to keep the run of all Miss Jewsbury's lovers and loves, and to get at the few flashes of genuine wit in the prevailing sentiment and commonplace. This tediousness is no doubt heightened by the needless mystification of the editing. The names of persons are almost always left blank, though many of them can be easily identified by reference to Mrs. Carlyle's published letters. This shows that their suppression was not necessary, at least not in all cases, out of motives of delicacy, and surely the reader had a right to be spared the frequent occurrence of passages like the following: "Dr. —— told me at Mrs. ——'s on Wednesday that he wanted to bring Mr. ——, Mr. ——, and M. —— on Saturday. So accordingly, about five o'clock, Mr. —— and another man arrived, whom I affectionately greeted for ——, but it proved to be ——" (p. 219).

Life in Motion; or, Muscle and Nerve. By John Gray McKendrick. London: Adam & Charles Black; New York: Macmillan. 1892. Illustrated. 8vo, pp. 200.

THESE pages on the motions of living matter make a really excellent introduction to the study of animal physiology. They are in the form of half-a-dozen lectures, models of simplicity and precision, the conciseness and clearness of which are greatly enhanced by numerous illustrations of the apparatus with which the conclusions were reached and proved. If in original delivery charms of voice and manner were added to present attraction, this course undoubtedly met with a success far beyond the average. From beginning to end electricity is used as a stimulant or an excitant by means of which the motions of life are determined in muscle and nerve. Not much is said regarding its similarity or relationship to what is ordinarily termed the nervous force of the living body, but there is not a little that is highly suggestive of affinity, especially in the culmination, where, among electric eels and other types, certain muscles are shown to be transformed into batteries for the production or use of this agent. Molecular motion is exhibited in chemical mixtures and in crystallization, is made perceptible in vibrations, and its effects are set forth in the phenomena of magnetism. Thus defining his subject and introducing his powerful assistant, still known only through results, the lecturer passes to the discussion of the structure and properties of muscle and nerve—the contractions, elasticity, nourishment, respiration, work, fatigue, latent periods, sounds, heat, etc., of the one, and the cells, fibres, endings, and currents, with their rapidity, energy, duration, or effects, of the other. Approaching reflex action and voluntary motion, the electrical phenomena of muscle are considered, and the batteries of Torpedo, Gymnotus, and different forms are explained; but the author concludes just where he seems to be within reach of the mental features. To the question where the impulses sent inward on the nerves are arranged and transmitted, whether in the spinal cord, the cerebellum, the cerebrum, or the nervous system as a whole, he has no ready reply. In regard to the manifestations in general he remarks:

"All these phenomena are undoubtedly connected with molecular movement. Such movements occur even in the brain itself, and there is little doubt they are also associated with all mental phenomena. It does not follow, however, that mental phenomena are the result of such movements alone. Wider knowledge strengthens the view that behind mental phenomena, and indeed behind all phenomena, there is something more than movements of matter and transformations of energy."

Afloat and Ashore on the Mediterranean. By Lee Meriwether. Charles Scribner's Sons. 1892.

MR. MERIWETHER'S books have a novel interest and a matter-of-fact style, and this, the third of his travel narratives, describing an economic trip along various parts of the northern shores and islands of the Mediterranean, begins with Lisbon, where the author landed. The most original chapters are those which deal with the southwestern Italian coast and its islands, and the Grecian Archipelago, which were visited in a common Neapolitan lateen sail-boat thirty-four feet long. The bicycle was used along the Riviera and in a part of Italy. The Balearic Isles, Corsica, Sardinia, the Adriatic, and Northern Africa excepting Tangier, Ceuta, Alexandria, and Cairo, are neglected. There is much detailed information of permanent value on the management of prisons and convicts in Portugal, Spain, Italy, and Greece. Droll incidents and some romance are not lacking to counterbalance this serious side. The author met with hard luck at Smyrna among Turkish officials, and was compelled to travel from that port to Alexandria as a deck passenger, experiencing *en route* a fifty-hours' fast because of his food being stolen. Many out-of-the-way and quaint places and localities are described. The trip was made on rugged lines, likely to be followed by a limited number; for few are so competent to use, or care to be burdened with, the trusty club and revolver, and it is hardly in the average traveller's philosophy to brave the risks and irritating discomforts of cheap inns.

The book well sustains its interest and is without padding. There are some few exaggerations and pardonable errors. It is Lieut. Kelly, U. S. N., not Dr. Kelly, from whom he quotes yacht descriptions; nor can we quite approve Mr. Meriwether's use of the word "Herculanean" in discussing seriously the work of transforming the poor quarter of Naples. The original illustrations are from "snap-shots," and are placed without relation to the text. During the time of his great misery on the forward deck, crowded in with Orientals and Russian Jews, Mr. Meriwether once "kodaked a kodaker," a first-class passenger, who remarked, "By Jove, if that fellow hasn't stolen a kodak!" There is a competent index.

Some Strange Corners of Our Country. By Charles F. Lummis. The Century Co. 1892.

ALTHOUGH these sketches were primarily intended for the rising generation, yet children of a larger growth may consult them with pleasure and profit. This, however, is but scant praise, for without exaggeration it may be truly said that we know of no volume in which, without the least apparent effort at being instructive, there is packed away, within the same compass, a greater amount of information about the southwestern portion of our country and its people. Divided according to the subjects of which they treat, the sketches will naturally fall into two classes. In one, our author brings before us in somewhat vivid language, but with as little use of superlatives as the case would seem to admit, pictures of the cañon of the Colorado, the petrified forest of Arizona, Montezuma's well, and other notable features in the scenery of that region. In the other, he makes us acquainted with some of the arts, customs, ceremonies, and superstitions of the Pueblo Indians, and adds thereto an account of the self-crucifiers—a degenerate branch of the order of Franciscans, which has been repeatedly excommunicated, and, according to Bandelier, is now on the decline.

As these sketches are all good, it would be invidious in us to make selections among them for special notice, and we content ourselves with calling attention in a general way to those which deal with the social and political organization of the Indians, and which may be said to possess not only the charm of novelty, but also a decided anthropological value. Evidently, they are the fruit of familiar intercourse with these people in the freedom of home life; and as our author was a close observer and not given to hasty generalizations, his conclusions will be found to be in accord with the best results of modern investigation. In some instances they embody a truth that is much more general in its application than the mere statement of an isolated fact would imply, for, when read aright, they suggest the existence of a condition of affairs which was at one time universal in this country and must have been productive of far-reaching consequences. Take, for instance, what is said (pp. 66-74) about the belief in witchcraft and the punishment meted out to those who are supposed to be guilty of the crime, and it would be difficult, in view of the facility of conviction, to overestimate its influence in keeping down the native population. Certainly, if in the Pueblo of Isleta, the inhabitants of which are vouched for as being "the kindest of parents and the best of neighbors," nearly one-half the entire population of 1,100 are believed to be witches, and owe their lives to the proximity of a large body of Americans, it does not require any great effort of the imagination to estimate the loss of life that must have been caused by this delusion when it prevailed among all our tribes, and there was no restraining influence at hand to stay the bloody sacrifice. Even if we admit

that the number of the suspected in other parts of the country was relatively but a fraction of those in Isleta, it will at once be seen what a potent factor this belief must have been in confining the aboriginal population to the narrow limits within which it was found when the whites first landed upon these shores. Probably no other cause, unless we except intertribal warfare, contributed as much to this result. This is one of the trains of thought to which our author's statements on this subject give rise, but it is by no means the only one. There still remains food for reflection in the idea that, so far as this particular phase of superstition is concerned, there is not much room for choice between our witch-killing ancestors of two hundred years ago and their Indian neighbors.

In conclusion, our author points out the routes by which these scenes may be reached, together with the cost of the journeys; and, in view of the ease with which such visits can now be made, he expresses the hope that Americans will be induced to familiarize themselves with the wonders of their own country, before going abroad to look upon "scenery that is far inferior."

Schoolboy Days in Russia. By A. Laurie. Translated by Laura E. Kendall. Boston: Estes & Lauriat.

THE popularity of everything Russian has called into existence a mass of worthless books which profess to enlighten and amuse the public. It is only the undiscriminating public, which has entirely neglected its previous opportunities for authentic information on the most rudimentary facts in Russian life, that will be taken in for a moment by André Laurie's 'Schoolboy Days in Russia.' It is perfectly evident from the beginning that the author has never set foot in Russia. He is merely putting into marketable form, in response to a supposed demand for the wares, what he imagines he has read or heard. The result is one of the worst hodge-podges which have been inflicted on the suffering public for a long time. The story itself is trivial, hardly worth the telling, but is told, nevertheless, with tolerable smoothness in the original, and well translated. The original language, which is French, is not mentioned, but is left to be inferred from the author's name. We touch lightly on the incidents of the story, merely for the sake of setting forth the most glaring of the many absurdities.

The son of a country doctor is gifted with great musical talent. In his boyhood the only outlet for this talent is singing in the village church, under the tuition of the village pope. He "practises with the pope on the eve of every great church festival." As a matter of fact, that is the very last time in the year when he could practise, since the church services on the eves of festivals are renowned for being frequently more elaborate and beautiful than even the services on the morning of the feast, with special music, some of which is sung only once a year. In the course of the description of village life, much space is devoted to the annual fair. The pope's son, wearing his father's boots, *with spurs*, gets thrown from a horse. This is the second great sensation of the volume, and it certainly can lay claim to its title, by virtue of these unprecedented spurs. After a while, the hero is transported to Moscow, where we are speedily treated to two of the "strongest situations" of the book. They differ from the other situations chiefly by the reinforced grotesqueness of their absurdity. In the country, whence hero Dmitri has just come, the common beverage is *kvass*, a sort of very small beer brewed from black rye-bread. It would take a Pacific Ocean of it to make any one intoxicated. Nevertheless, there is a grand tragic scene in which Dmitri gets thoroughly drunk on his second glass. He says that he has never seen kvass before—though he has consorted with nobody but peasants all his life—makes the customary remorseful appeals to the memory of his dead father, and throws in some gratuitous information as to the adulteration of this specimen of "ardent spirits." As he had named his father's horse "Vodka" in his infancy, one would suppose he understood that that, and not kvass, is the equivalent of brandy.

On his first Sunday in Moscow the other tremendous crisis occurs. He has observed children "gliding swiftly along the streets on their skates," instead of walking. One could as easily skate along the clean sidewalks and the mealy snow streets of New York! Accordingly, he gets out his skates, buckles them on, and sets out for an exploration. He sees whole families of wealthy people walking sedately to church, followed by a tall footman carrying their prayer-books. Wealthy, even moderately well-to-do Russians, do not walk to church; and not one Russian in a million ever uses a "prayer-book." They are too well trained and educated in the church service to need them, even the peasants who cannot read being perfectly familiar with it, and independent of books. Presently he comes to the Red Square and catches sight of St. Vasily. "The massive doors stood open. The worshippers were in their places, and the rich tones of the great organ already filled the nave." Evidently, the congregation were seated in their pews, and the view through the doors down the nave was quite unobstructed. Any one who has ever been in Moscow will recollect that St. Vasily consists of a conglomeration of eleven tiny churches, in two stories, the nine upper entangled in a perfect labyrinth of narrow corridors approached by two sets of steep stairs, so that there could be no view through the massive doors, supposing that the massive doors existed anywhere but in the imagination of the author, to which we are indebted also for the pews and the organ. No Russian church ever has an organ; neither are the choristers ever placed in a gallery. Having thus cut away the foundation of the "powerful" scene which follows, based on the organ, we may leave it, merely remarking that there are no trills and runs in the beautiful music of the Russian Church, and that solos are so very rare, especially in the morning liturgy, as to be practically non-existent.

After this ridiculous error, the rest of the book is not worth our attention, as the whole of it is built up on the musical education given to the heaven-born genius by the celebrated Hungarian organist with the mongrel Bohemian-Polish name, who has played at St. Vasily for thirty years, and has been honored even with the Czar as an auditor.

The Breech-Loader, and How to Use It. By W. W. Greener. *Forest and Stream* Publishing Co.

IF, as the author states in his introduction, he writes for "that numerous class of sportsmen who delight in a day's shooting, but have neither the time nor the means to make the sport a life's study," and if "the book is not written for experts," he has hardly accomplished his purpose. It is undoubtedly difficult for a man thoroughly conversant with his subject to put himself in the position of the uninitiated, and Mr. Greener somewhat confuses, with insufficiently explained details, the reader who knows little about a gun except that it suits him, and who cares less for its mechanism, provided it works satisfactorily.

The portion of the book treating of the *use* of the breech-loader is much more interesting than that which describes its mechanism. The author has wisely spent little space in attempting to teach any one how to shoot, and confines himself largely to the use of the gun as contrasted with its abuse. His remarks on the proper cleansing and oiling of guns, and on the care requisite for avoiding accidents, are good and give the work a value. He also makes some excellent suggestions for young or would-be sportsmen in the hunting-field, such as: "Smartness of manner is considered very bad form," and "A young man is not supposed to be an unerring shot nor expected to tell good stories."

As a whole, the book has many faults. It is somewhat discursive, repetitious, and fragmentary in its composition, but its most obvious defect is that it gives, justly or unjustly, the impression of being an advertisement of the "Greener gun."

BOOKS OF THE WEEK.

Adams, Myron. Creation of the Bible. Boston: Houghton, Mifflin & Co. $1.50.
Adams, Rev. C. J. Where is my Dog? or, Is Man Alone Immortal? Fowler & Wells. $1.
Advanced Building Construction: A Manual for Students. Longmans, Green & Co. $1.50.
Ahrenberg, J., et Fernande de Lysle. Les Illuminés: Scènes de la vie des Hihulites en Finlande. Paris: H. Simonis Empis.
Alden, Mrs. G. R. The Pansy. Illustrated. Boston: D. Lothrop Co. $1.25.
An Englishman in Paris. M. J. Ivers & Co. 50 cents.
Austin, Alfred. Fortunatus the Pessimist. Macmillan. $1.75.
Babyland for 1892. Boston: D. Lothrop Co. 75 cents.
Bangs, J. K. In Camp with a Tin Soldier. R. H. Russell & Son.
Bent, J. T. The Ruined Cities of Mashonaland. Longmans, Green & Co. $5.
Bethune, J. G. The "F" Cipher. St. Paul: Price-McGill Co. 50 cents.
Birkheimer, W. E. Military Government and Martial Law. Washington: J. J. Chapman. $5.
Black, W. Lady Silverdale's Sweetheart, and Other Tales. Harpers.
Blaikie, J., and Thomson, W. A Text-Book of Geometrical Deductions. Longmans, Green & Co. 80 cents.
Bonnassieux, Pierre. Les Grandes Compagnies de Commerce. Etude pour servir à l'histoire de la Colonisation. Paris: Plon.
Bourinot, J. G. Historical and Descriptive Account of the Island of Cape Breton. Montreal: W. Foster Brown & Co.; New York: Scribners.
Bunner, H. C. Rowen: "Second Crop" Songs. Scribners. $1.25.
Caine, R. H. Love Songs of English Poets. 1500–1800. Appletons.
Chapin, F. H. The Land of the Cliff-Dwellers. Boston: W. B. Clarke & Co. $2.25.
Clare, Austin. Another Man's Burden: A Tale of Love and Duty. E. & J. B. Young & Co. $1.50.
Dudley, Sarah. Strangers Yet. Thomas Whittaker. $1.25.
Dufour, Rev. Alphonse. A French Reader. Boston: Ginn & Co. 90 cents.
Dumas, A. The Son of Porthos. M. J. Ivers & Co. 25 cents.
European Pictures of the Year. Cassell. $1.
Field, Eugene. With Trumpet and Drum. Scribners. $1.
Fletcher, Margaret. Sketches of Life and Character in Hungary. London: Sonnenschein; New York: Macmillan. $2.25.
Fowler, J. K. Echoes of Old Country Life. London: Edward Arnold; New York: Macmillan. $2.50.
Gates, Rev. C. F. A Christian Business Man: Biography of Deacon C. F. Gates. Boston: Congregational Publishing Co. $1.
Goldsmith, Oliver. The Vicar of Wakefield. 2 vols. Boston: Estes & Lauriat. $3.50.
Goodell, Prof. T. D. Greek Lessons. Henry Holt & Co. $1.25.
Hamerton, P. G. Man in Art. Macmillan. $30.
Harlow, L. K. The World's Best Hymns. Boston: Little, Brown & Co. $1.50.
Harper, Mrs. Frances E. W. Iola Leroy; or, Shadows Uplifted. Philadelphia: Garrigues Bros. $1.
Harper's Young People, 1892. Harpers.

Harris, J. C. Uncle Remus and his Friends. Boston: Houghton, Mifflin & Co. $1.50.
Heliman, Frances. Lyrics and Ballads of Heine and Other German Poets. Putnams. $1.50.
Hertwig, Prof. Oscar. Text-Book of the Embryology of Man and Mammals. London: Sonnenschein; New York: Macmillan. $5.25.
Hewitt, W. A Graduated Course of Simple Manual Training Exercises for Educating the Hand and Eye. Longmans, Green & Co. 80 cents.
Hopkinson, J. Original Papers on Dynamo-Machinery and Allied Subjects. W. J. Johnston & Co. $1.
House, E. H. The Midnight Warning, and Other Stories. Harpers.
Howard, Gen. O. O. General Taylor. [Great Commanders.] Appletons.
Hughes, Mrs. Reginald. Sybil Trevyllian. Ward & Drummond. $1.50.
Hughson, S. C. The Best Letters of Shelley. Chicago: A. C. McClurg & Co. $1.
Hume, Fergus. Aladdin in London. Boston: Houghton, Mifflin & Co. $1.25.
Hunter, Sir W. W. A Brief History of the Indian Peoples. Oxford: Clarendon Press; New York: Macmillan.
Huss, Prof. H. C. O. Hugo's La Chute. Boston: D. C. Heath & Co. 30 cents.
Hutchinson, Rev. H. N. Extinct Monsters. Appletons.
Jackson, Helen H. Poems. Illustrated. Boston: Roberts Bros. $3.
Jagemann, Prof. H. C. G. Materials for German Prose Composition. Henry Holt & Co. 90 cents.
Jefferies, Richard. The Toilers of the Field. Longmans, Green & Co. $2.
Jephson, A. J. M. Stories Told in an African Forest by Grown-up Children of Africa. Appletons.
Johnson, Virginia W. Genoa the Superb. Boston: Estes & Lauriat. $3.
Keeley, R. M., Jr., and Davis, G. G. In Arctic Seas: The Voyage of the *Kite* with the Peary Expedition. Philadelphia: R. C. Hartranft.
Lee, A. S. The Chemical Basis of the Animal Body. Appendix to Foster's Physiology. Macmillan. $1.75.
Life and Times of Frederick Douglass written by Himself. New revised ed. Boston: De Wolfe, Fiske & Co. $2.50.
Lindau, Paul. Hanging Moss. Appletons.
Manning, E. F. The Coming of Father Christmas. Frederick Warne & Co. $2.
Marshall, Mrs. Emma. In the Service of Rachel Lady Russell. Macmillan. $1.50.
Merwin, H. C. Road, Track and Stable: Chapters about Horses and their Treatment. Boston: Little, Brown & Co. $2.
Milman, Constance. Mum Fidgets, and the Two Richards. Appletons.
Milton, J. Paradise Lost. New American ed. Chicago: A. C. McClurg & Co. $1.
Minchin, Prof. G. M. Hydrostatics and Elementary Hydrokinetics. Oxford: Clarendon Press; New York: Macmillan.
Minto, W. Autobiographical Notes of the Life of William Bell Scott. 2 vols. Harpers.
Molesworth, Mrs. The Man with the Pan-Pipes, and Other Stories. E. & J. B. Young & Co. $1.
Molloy, J. F. An Excellent Knave. National Book Co.
Morley, H. Spenser and his Time. [English Writers, vol. ix.] Cassell. $1.50.
Munkittrick, R. K. The Moon Prince, and Other Nabobs. Harpers.
Newth, G. S. Chemical Lecture Experiments. Non-Metallic Elements. Longmans, Green & Co. $3.
O'Reilly, Mrs. Joan and Jerry. Thomas Whittaker. $1.
Palgrave, Prof. F. T. Amenophis, and Other Poems, Sacred and Secular. Macmillan. $1.25.
Parkes, Sir Henry. Fifty Years in the Making of Australian History. Longmans, Green & Co. $5.
Paull, Minnie E. Ruby and Ruthy. Boston: Estes & Lauriat. $1.
Pearce, A. J. Longman's School Mensuration. Longmans, Green & Co. 80 cents.
Poyser, A. W. Magnetism and Electricity: A Manual for Advanced Classes. Longmans, Green & Co. $1.50.
Putnam, M. Louise. The Children's Life of Abraham Lincoln. Chicago: A. C. McClurg & Co. $1.25.
Quilter, H. Preferences in Art, Life and Literature. London: Sonnenschein; New York: Macmillan. $9.
Schreiber, W. L. Manuel de l'Amateur de la Gravure sur Bois et sur Métal au XVe Siècle. 2 vols. Berlin: Albert Cohn.
Sharp, G. Villemain's Souvenirs des Cent Jours. Longmans, Green & Co. 75 cents.
Some Rhymes of Ironquill of Kansas. Chicago: A. C. McClurg & Co. $1.
Sprague, Rev. F. M. Socialism from Genesis to Revelation. Boston: Lee & Shepard. $1.75.
Stanley, Rev. A. P. Historical Memorials of Canterbury. 2d American from the 11th London ed. Randolph. $6.50.
Step, Edward. By Sea-shore, Wood and Moorland. Illustrated. Thomas Whittaker. $1.25.
Stephen, Sir J. F. Horæ Sabbaticæ. Third Series. Macmillan. $1.50.
Stevens, Alice F. Thoughts from Modern Authors. Boston: Greenough, Adams & Cushing. $1.
Summary of English History from the Earliest Times. Longmans, Green & Co. 40 cents.
Swan, H. Travellers' Colloquial Italian. Brentanos. 75 cents.
Sweet, H. A Short Historical English Grammar. Oxford: Clarendon Press; New York: Macmillan.
Thomas, Miss Phœbe E. Tables of Rulers and Genealogies. Cincinnati: The Author.
Thompson, J. P. British New Guinea. London: George Philip & Son; New York: Macmillan.
Thomson, J. The Seasons. 4 vols. Boston: Estes & Lauriat. $4.
Timbs, John. Abbeys and Castles of England and Wales. New and revised ed. 3 vols. Frederick Warne & Co. $7.50.
Trowbridge, J. T. The Fortunes of Toby Trafford. Boston: Lee & Shepard. $1.25.
Tunstall, J. O. Household Nursing. London: T. Fisher Unwin.
Watson, William. Lyric Love: An Anthology. Macmillan. $1.
Wedding Bells: A Marriage Record Book. Baker & Taylor Co. $1.
Whitney, Maj. A. C. Life on the Circuit with Lincoln. Boston: Estes & Lauriat.
Wieser, Laura. Chopin: Sketches from George Sand's History of My Life and a Winter in Majorca. Chicago: C. F. Lummy.
Wilkins, Miss M. E. Jane Field. Harpers.
Williams, Prof. S. G. The History of Modern Education. Syracuse, N. Y.: C. W. Bardeen. $1.50.
Wilson, Olivia L. At the Sign of the White Swan: A Tale of Old Pennsylvania. Boston: Estes & Lauriat. $1.25.

Readers of the FORUM *will remember Dr. Weir Mitchell's recent enthusiastic article on the privately printed sonnets of* MR. CHARLES LEONARD MOORE. *Messrs. Henry Holt & Co. have pleasure in announcing that they have arranged to publish Mr. Moore's works as follows:*

(I.) A Book of Day Dreams; or, A Century of Sonnets. Sq. 16mo, 104 pp., Second Edition. $1.25.

(II.) Poems Antique and Modern. Sq. 12mo, 334 pp. $2.00.

(III.) The Banquet of Palacios. A Romantic Modern Comedy in Prose. 16mo, 196 pp. $1.00.

"This rosary of Sonnets, for which without the least indecision I claim the serious attention of all who love verse. . . . Here is a distinct and individual singer."—*Dr. Weir Mitchell in the Forum.*

". . . We call this poetry."—*Harper's Monthly.*

"Pleasure can surely be counted on when his books turn up."—*Atlantic Monthly.*

"The nameless charm with which all true poetry thrills us is never absent."—*Critic.*

"Some phases of the drama are the very essence of poetry; it is a striking book."—*Literary World.*

A MOST excellent book for personal or domestic practice is **Stepping Stone to Homœopathy and Health.** 256 pages. 12mo, cloth, $1 00, post free. A good book for the family. Published by
BOERICKE & TAFEL,
1011 Arch Street, Philadelphia, Pa.,
Homœopatic Pharmacists and Publishers.
Book Catalogue mailed free.

*A FEW PERFECT AMERICAN HIS*torical Plates. OLD CHINA, *Nation* office.

SPECIAL BRAIN FOOD & NERVE TONIC.
CROSBY'S VITALIZED PHOSPHITES.
Composed of the Phosphoid Principle of the Ox Brain and Wheat Germ.
The very elements which produce vital force, increase brain power, sustain in vigor all the functions, prevent mental and nervous debility.
It is a *vital nutrient* phosphite, not a laboratory or acid phosphate. Formula on each label. Pamphlet with full information free on application to
56 West 25th Street, N. Y.
For sale by leading druggists.
F. Crosby Co.

Dyspepsia

Dr. T. H. Andrews, Jefferson Medical College, Philadelphia, says of
Horsford's Acid Phosphate.
"A wonderful remedy, which gave me most gratifying results in the worst forms of dyspepsia."

It reaches various forms of Dyspepsia that no other medicine seems to touch, assisting the weakened stomach, and making the process of digestion natural and easy.

Descriptive pamphlet free on application to
Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.
For sale by all Druggists.

The Nation.

NEW YORK, THURSDAY, DECEMBER 22, 1892.

The Week.

A VERY anomalous situation in the American money market was brought to something of a crisis in the closing days of last week. The coincidence of the International Monetary Conference with our unseasonable gold exports had carried to an acute stage the uneasiness over our currency situation. Both the American and British delegates at Brussels had, by their speeches and proposed remedies, deepened the impression that the "silver situation" had become exceedingly grave. Europe, taking alarm, had proceeded with redoubled energy to withdraw from America all of its maturing credits, and the slackness of our export trade had enabled it to obtain payment, not in commercial bills, but in gold. Over seven millions had already gone out since the middle of November, and the Treasury reserve had again begun to shrink. Probably, too, the London operators had expressed their own forebodings in renewed sales of stocks in our market. Yet, in the face of this unpleasant outlook, two factors rarely witnessed under such circumstances had continued to govern the Wall Street market: low rates for money and rising prices for stocks. For the second of these there were various causes, more or less legitimate, all of which had been utilized by a combination of clever speculators to force a "boom" in the Stock Exchange's industrial securities. But the easy money market was a plain anomaly. It was generally conceded that, although the quoted figures of sterling exchange justified gold shipments, circumstances were such as to give to the entire sterling movement an abnormal character. For such a situation, the corrective is naturally to be looked for in the local money market. High rates for money will delay, if not absolutely stop, a gold movement of this kind, simply because when one foreign banker is withdrawing his American credits, another, attracted by the inducements of the loan market, will adopt precisely the reverse policy, and, by borrowing in London to lend in New York, will to a greater or less extent regulate the machinery of the sterling market.

It is undoubtedly our steady output of new silver notes, at the rate of $3,000,000 a month, which has prevented this machinery from working. In other words, Gresham's law was beginning to operate in its usual subtle manner; our gold coin going out largely because of our continuous issue of silver currency. The brief monetary convulsion of last week was plainly the effort of the market to restore the normal equilibrium. In less than two days much of this purpose was accomplished. Money was bid up to 25 per cent.; stocks broke from 2 to 4 points, and immediately upon the establishment of a higher loaning rate foreign money appeared for use in our money market, and the gold-export movement had its first check. In view of the flurry which attended the large exports on Monday, it is impossible to say how far these new conditions will continue to keep our market in proper shape. The unpleasant fact is, that the cause of the whole trouble, our output of silver currency, continues unchecked, and cannot be checked except by the absolute repeal of the Law of 1890.

The latest Treasury statement of imports and exports of merchandise continues the story of steady decline in the value of the latter and of increase in that of the former. The exports first began to fall behind last year's record in July, when the decline amounted to $4,267,000; in August it was nearly $8,000,000, in September about $20,000,000, in October $15,000,000, and now come the November returns showing a falling off of $13,000,000. This makes a relative loss for the five months of the fiscal year of nearly $60,000,000. Doubtless a part of this decline is due to the low prices of some staple exports, but the falling off in the foreign demand is the main cause. Imports, on the other hand, have shown a gain, month by month; the total thus far in the fiscal year footing up about $48,000,000 more than in the corresponding period in 1891. This increase, with the consequent enlargement of duties paid, has undoubtedly kept the Treasury from falling into even a more critical situation than that in which it now finds itself.

The most important item of news connected with the Brussels Conference was a statement made by Sir Charles Rivers Wilson on the 6th of December, which somehow failed to reach the American press. We find it in the London *Times* of the 7th. Sir Charles said:

> "In the first place, I desire to explain to the Conference the attitude of her Majesty's Government upon the monetary question. The invitation of the United States in its original form contemplated the meeting of a conference to examine the possibility of establishing by international agreement a fixed relation between the values of the two precious metals. Her Majesty's Government did not find it possible to accept an invitation conveyed in terms which might give rise to a misunderstanding, by implying that the Government had some doubt as to the maintenance of the monetary system which has been in force in Great Britain since 1816."

He went on to say that when the American invitation for a conference was changed in form so as "to consider what measures, if any, could be adopted for the purpose of increasing the use of silver as currency," then her Majesty's Government felt that it could participate in the Conference; "but," he continued, "we are not authorized either by speech or by vote to bind our Government to any particular course of action." So it appears that England had ruled out bimetallism, so far as she was concerned, before she agreed to come to the Conference at all. Germany and Austria ruled it out, so far as they were concerned, immediately after the Conference began. Now, what is to be said of all the rubbish cabled to this side of the water implying that Great Britain was acting an underhand part in the Conference by putting forward Germany and Austria to deal a blow at bimetallism which, on account of her Indian possessions and Mr. Chaplin's Agricultural League, she dared not strike herself?

Mr. Gustav H. Schwab of this city, speaking in behalf of various transatlantic steamship companies before the joint Committee on Immigration at Washington on Friday, made it very plain that these companies are willing to coöperate heartily in all efforts to prevent cholera and other infectious diseases from being brought to this country by immigrants. He said that the companies would be willing to put their European agents under heavy bonds, and hold them responsible for the strict performance of their duty, if the work of examining the health of intending immigrants were intrusted to them. They would also welcome the assistance and supervision of United States agents in this work, and, so far as his particular company, the North German Lloyd, was concerned, it would be willing to erect buildings and enclosures for absolutely segregating immigrants in case cholera should break out in a dozen European ports. Mr. Schwab was of the opinion that a foreign quarantine was the only feasible method, and in this, as in his other views, he is in substantial agreement with Dr. Andrew H. Smith, whose plan is to restrict immigration to four or five foreign ports, and subject all intending immigrants to thorough medical examination.

Senator George's speech on December 14 on the Anti-Option Bill was perhaps the most curious performance of its kind heard in the Senate since the retirement of the eccentric Blair. Prices on the New York Cotton Exchange had been advancing for some time prior to the revival of the Anti-Option Bill, but had reached their highest point and receded about the time that Mr. Washburn's measure again came up for discussion. This, Senator George gravely affirms, represents the attempt of dealers in cotton futures "to force the Senate to cease the performance of a great constitutional duty." This being a rather serious charge to be made in the Federal

Legislature against a responsible body of business men, inquiry must naturally have arisen as to the Senator's authority. He supplied it, announcing seriously that "he saw" the statement "in one of the New York papers," name not mentioned. The further question perhaps arising as to whether "one of the New York papers" might not conceivably have been mistaken, Mr. George further undertook to furnish logical demonstration that it was not. "To show that the fall in cotton was purely fictitious, purely in the spirit of bravado," the Senator triumphantly continued, "I call attention to the fact that while cotton has gone down in New York, corn and provisions have gone up in Chicago." It is not easy to deal seriously with such puerilities as these. But Senator George's speech is worth examining as a fine illustration of the average anti-optionist's mental processes. It will be observed that his fundamental assumption is, that if cotton prices advance it is due to the natural operation of trade, whereas if they decline, the wicked dealer in futures is alone responsible; and this captivating style of argument is in fact at the bottom of the whole agitation. The Senator's own innocent little syllogism sums up fairly the whole chain of reasoning: Corn has gone up; cotton has simultaneously gone down; therefore the price of cotton was artificially and maliciously depressed.

We are glad to see that a special meeting of the Chamber of Commerce is shortly to be held to discuss the operation of the McKinley Administrative Act. It is only necessary to bring out the facts regarding the working of this measure to leave it without a defender. It was admitted by Senator Allison when it was framed that one of its features, the section relating to extra charges for the boxes and other receptacles in which goods are imported, amounted to an increase of from 5 to 8 per cent. in the tariff above the rates in the McKinley Tariff Act. It is estimated by Mr. D. A. Wells that the method in which the Administrative Act has been interpreted and applied has resulted in another additional increase of from 5 to 10 per cent. Its repeal should be one of the first acts of the Fifty-third Congress.

It is worthy of note that the business of making a Cabinet for President Cleveland has been revived, for the first time since his return from his vacation, at a point so far removed from this city as Albany. No effort of the kind has been made here, neither has the pilgrimage of hungry Democratic statesmen, which Mr. Cleveland's farewell address arrested so suddenly, been resumed except in the most limited and cautious manner. His house is no longer besieged, and the newspapers are able to put into very brief space all the gossip which their reporters can collect about the callers at his office and his intentions in regard to them. All this calm after the storm furnishes a very instructive commentary upon the most effective method for dealing with the national disease of office-seeking. No quarantine is needed. Mere notification that the man who begs for office will be put on a black-list and thus have his prospects greatly damaged if not hopelessly blasted, is sufficient, especially when accompanied with a threat by the besieged to "shut up his house and go away for the winter" in case the black-list prove an ineffective protection.

It is admitted by the friends of Mr. Murphy that his election to the Senate is not so "sure a thing" as it was thought to be a few weeks ago. Various reasons are given for the change in the situation, including the hostility of Boss McLaughlin of Brooklyn, but the real reason is, we believe, a fear of consequences to the Machine itself. Mr. Murphy's unfitness for the position is so notorious that his election will serve to emphasize the belief, already very strong throughout the Democratic party in the State, that the time has arrived for the party to rid itself of the burden of an organization which so thoroughly misrepresents it. This reflex action of Mr. Murphy's election is what the Machine leaders are afraid of. Their apprehensions are aggravated by the undisguised eagerness of many eminent "anti-snappers" for Mr. Murphy's election in spite of all opposition. These opponents of the Hill Machine are confident that the Democrats throughout the State are in no temper to stand further assaults upon their intelligence and character by the Hill-Murphy-Sheehan combination.

The interest in the Senatorial contest in New Jersey has only been intensified by the recent declaration of Gov.-elect Werts and Senator McPherson in favor of gratifying Gov. Abbett's ambition; and the intensity of the feeling manifests itself in the form of a determination that Abbettism shall not be prolonged by the Governor's success. There is only mild surprise that the Governor-elect should so early signify his submission to the State boss, for his opposition to the Governor was distrusted during the campaign, as was proved by the distance he ran behind the Presidential ticket. Of Mr. McPherson better things were hoped, and it was believed that if he had not been caught in the Quarantine prison, a distinctly anti-Abbett candidate would have been nominated at Trenton. He is already learning, however, that it is easier to make promises than to fulfil them. Some of his warmest supporters, like State Senator Winton of Bergen County, have declared that he "cannot deliver his goods." The last Senatorial election in New Jersey proved that caucus dictation cannot be depended on at Trenton. It is given out that Abbett, in the Senate, will be a strong Cleveland man (even if of recent conversion), and it is hoped in this way to silence the opposition to him. But that opposition will not down. The people are against him, and many of the people's representatives can, it is believed, be depended on to carry out the popular desire. Abbett, it is understood, stands ready to favor the pardon of the Hudson County ballot-box-stuffers in order to gain the Hudson County vote. But if he does this, he will only give another indication of his political morality.

The action of the Bar Association in reopening the Maynard case and passing resolutions to be sent to Gov. Flower protesting against his reappointment is highly commendable. The resolutions declare that though the Legislature refused to impeach Judge Maynard, the reasons assigned for his removal in the Bar Association's memorial of last year "still exist and constitute disqualifications for his appointment to a new vacancy" created by the advancement of Judge Andrews to the position of Chief Judge, and that such an appointment, in the opinion of the Association, would be "eminently unfit." There is a moral vigor about this protest which is decidedly refreshing. Whatever intentions the Governor may have had in this matter, he is hardly capable of disregarding an appeal of this character. What constitutes its strength is the fact that Judge Maynard has never made anything which can be truthfully called a defence against the charges which the Association not merely preferred against him, but proved.

Some of the items in the sworn returns of election expenditures made under the Massachusetts Corrupt Practices Act, show the wisdom of the strongly prohibitive provisions of the English act. Thus, the Republican Club of Massachusetts, in a total expenditure of $11,000, puts down $2,000 under the single item of "flags," and the Republican Club of New Bedford, in a total expenditure of $652, assigns $575 of it to "campaign uniforms and torches." The English Act prohibits any expenditure whatever by a candidate or his agent "on account of bands of music, torches, flags, banners, cockades, ribbons, or other marks of distinction," and a member of Parliament has been unseated recently because he paid for 6,000 cards with his portrait, which the voters put in their hats. The English voters are permitted to pay for all the cards, bands, torches, etc., that they please, but the candidate must not pay a penny for such purpose. The reason for the prohibition was that in England, before the act went into effect, there were excessive expenditures for these purposes, and under pretence of such expenditures many illicit uses of money were disguised. The Massachusetts reports show a similar condition

of affairs. In fact, the first sworn returns under the law show that the persons making them have sought in every way to "get round the law"—that is, to comply with its provisions to the least degree consistent with safety from punishment. This is the tendency of political workers and candidates everywhere, and it should always be taken into account in drafting restrictive or prohibitive laws. The first object of every politician in examining such laws is not to ascertain the best way of observing and enforcing it, but the best way of "beating it."

Votes on Constitutional amendments are apt to be surprising, but one of the oddest developments in this line on record is the extent of the opposition recently shown in Massachusetts to one of the most obviously just changes that could be proposed. In the old days the State used to impose property qualifications upon officials and voters, but all of them were abolished long ago except the requirement that the Governor should be seized of a freehold estate to the value of £1,000. After Mr. Russell was elected two years ago, somebody looked up this forgotten provision and notified him in time to permit his legal inauguration, as the ownership of his home had previously stood in his wife's name. He immediately recommended to the Legislature an amendment to the Constitution doing away with the antiquated clause of that instrument. No opposition was shown in the Legislature, and no opposition was anticipated among the voters, but the returns show that, while 141,321 declared in favor of it, 68,045 were against it. The amendment is therefore adopted, but why a third of those who expressed themselves at all opposed it, is a mystery. Can it be that a lot of those "ignorant Republicans," of whom the Boston *Journal* has had so much to say in connection with the secret ballot, became confused and voted no when they meant to vote yes?

Whatever may be the final result of the trial of Prof. Briggs, the progress of it has certainly given him a secure reputation with the public for the keenness of his mind and the courage of his bearing. Whenever he gets the floor, the hunted heretic takes up the chase on his own account, and gives the prosecutors themselves the air of being on trial for monstrous opinions. His bold striking through the mask of the prosecution last week, to arraign, with effective sarcasm, the theologian who really wrote what was presented in another man's name, was doubtless much enjoyed by those who were cognizant of that open secret. His assaults upon the Biblical knowledge and interpretations of his opponents bring to mind what was said of Selden in the Westminster Assembly itself:

"And sometimes when they had cited a text of Scripture to prove their assertions, he would tell them, 'Perhaps in your little pocket Bibles with gilt leaves the translation may be thus, but the Greek or the Hebrew signifies thus and thus'; and so would totally silence them."

In fact, the accused professor and the hard-headed and learned Selden exhibit more than one point of likeness. Another chronicler of the Westminster debates says of Selden what might be said of Dr. Briggs in the Presbytery: "He was a thorn in their sides, for he was able to run them all down with his Greeke and antiquities."

Chancellor Caprivi, in his late speech in defence of the Army Bill before the Reichstag, replying to those who wanted him to attack France at once, and put an end to the suspense which occasioned the burden of these present enormous armaments, showed that such an attack, even if it ended in victory, would simply lay the foundation for future wars. Germany does not want any more territory or any more colonies. Moreover, the invasion of France in 1870 was child's play compared to what an invasion would be to-day. In 1870 seventeen German corps d'armée had to deal with only eight French corps, and where there was only the fortress of Metz to bar the way in 1870, there are to-day at least three other fortresses — Verdun, Toul, and Épinal—which are as strong as Metz and Strasbourg then were. All of these would have to be masked before an advance on Paris could be made. Moreover, after the fortresses had been disposed of, a large army of reserve such as France did not possess in 1870 would have to be encountered, and after it was beaten the Paris which would then be besieged would be no longer the Paris of 1870, but "a fortress the like of which the world has never seen—a fortress surrounded by fifty-six forts on a line eighty miles long." To take the place by famine with what remained of the German army after the prodigious losses which the previous operations would cause, would, he says, take too long, and "other means would have to be tried," but what these means would be he does not explain. There could not be a better answer to those who think the suspense and burden of great armaments can be got rid of by attacking somebody, than this is. The war of 1870 was precipitated in Germany and joyously accepted in France by the dislike of both countries to "suspense." Their relations had become "strained." The feeling that they would have to fight some day, and might better fight at once, led Bismarck to hatch an excuse for war and Ollivier to accept his challenge with "gaieté de cœur." Both of them told the world that they were fighting for a prolonged peace. We see what the result was. The causes of war between the two countries were doubled or trebled, and their mutual hostility greatly intensified, and Germany, which was victorious, has had to make just as much preparation for fighting again as France, which was defeated. Another crop of politicians has since sprung up, like Caprivi, to repeat the old story of 1870, that the only way to have cordial relations with neighbors is to be in a constant state of preparation to give them a good drubbing. We have an increasing number of them among ourselves, as was shown in the Chilian trouble last winter, when they maintained, even in 1892 in America, that true national dignity and self-respect can only be maintained by "licking" somebody or showing ability and willingness to "lick" somebody.

There is little doubt, however, that the German armaments are doing immense service to the democracies of the world by showing that, no matter how powerful you are, or how successful you are, war can only in rare cases be made the instrument of lasting peace. A successful war of independence may do so, like ours, or the war of the Spanish republics, or a war of complete subjugation like the Russian conquest of Poland; but a war between equals, ending in a peace of exhaustion, usually leaves behind ten causes for renewing the struggle for the one which led to its beginning. Napoleon's differences with Bismarck were a mere trifle compared to those which now divide the French and German people. A few years more of peace and patience, and both Napoleon and Bismarck would have disappeared from the scene. Now the French nation in arms is maddened not only by the military humiliation of 1870, but by the loss of Metz and Alsace and Lorraine, and it would probably cost the Germans as much to restore them as it costs the French to go without them. Not one word, however, does the Chancellor's speech contain of any prospect of any end to the present system of military competition. He does not hold out any prospect whatever of peace based on mutual good will, or of any cessation of the really horrible spectacle which the Parliaments of these two great nations now present every year on the production of the military estimates of their respective war ministers, when each compares the killing or ravaging capacity of his forces to those of the other, and asks to have his power of mischief increased and made more permanent. What makes this spectacle all the more wonderful is that the classes on which the burden of this barbarism falls are now in both countries voters as well as taxpayers, and do not as yet demand either that an end shall be put to the system now, or that its end shall be brought into sight by some sort of human compromise or negotiation. Caprivi's whole speech is worthier of a pugilistic champion eager to keep "the belt" than a Christian statesman addressing the representatives of an industrial nation.

END OF THE SILVER CONFERENCE.

THE only agreement that the Brussels Conference came to on any subject was an agreement to adjourn till next May, and there is even considerable doubt whether the delegates will reassemble at that time, or at any time. The reasons given for taking a recess instead of adjourning *sine die* are extremely puerile. It is said that time is needed to consult the several governments represented, as though there were no telegraphic communication. It is said that the delegates need time to digest the information presented to them, as though they were novices who could not without hard study appreciate the nuggets of wisdom laid before them. It is said that time is needed especially to study the Rothschild proposition, although Mr. Rothschild himself had withdrawn it after his colleagues had declined to support it.

It is to be hoped that the Conference will follow the example of the Conference of 1881 and simply pass out of sight and hearing, for it is based upon humbug. It was initiated in order to save the silver-producing States to the Republican party. The European States accepted the invitation as a matter of courtesy merely, with an inward contempt for the whole proceeding and with an expressed reservation of their own liberty of action, whatever the Conference might recommend. Our delegates knew that the only thing that had a chance of being ratified at home was international bimetallism. They knew that all agreements for merely buying silver for a few years would be rejected with equal scorn by the bimetallists and the monometallists. They dared not call for a vote in the Conference on international bimetallism because they knew it would be rejected, probably by the unanimous vote of the European delegates. They dared not call for a vote on any lesser scheme because they knew it would be rejected at home. So they retreated under the guise of taking a recess.

There is very little likelihood of the Conference reassembling in May. The question, therefore, for us is, what shall be done with the Sherman Law of 1890? This ill-starred measure hangs like a nightmare on the money market and all the other markets of the country, and actually curtails instead of increasing the supply of money. The natural supply consists of all the money in the world that is seeking investment, for which this country still furnishes the greatest opportunities. To all such investors the Silver Bill is a terror. Not only is the inflow of money cut off, but an outflow has started. This is seen in the exportation of gold at the present time—the time of year when we are usually importing that metal. And what do we get as an offset to the natural increment of the money supply? Some bits of Government paper which might better be issued on Government credit solely, since they rest on nothing else. A pile of silver bullion that is not used, and cannot be, is worse than useless, because it requires care and watching and cartage and places to hold it. Moreover, the buying of the stuff takes out of our foreign commerce an article of export, while the accumulation of the Treasury hoard alarms all other buyers, and causes them to cut down their purchases as much as possible. Time and space would fail us to tell all the misery and mischief that this law entails.

Senator Sherman himself says that he desires to have the Act of 1890 repealed. He is quoted in an interview in the *Sun* to the following effect:

"I am in favor myself of repealing the Act of 1890. The fact is that silver is going the way of the other metals, probably, such as nickel, copper, and iron. The methods now used to cheapen the production of silver diminish its value as a standard of coin, such as it held when it represented a large percentage of labor. We had copper once for coin, but its fall in value was inevitable upon the cheapening of its production and the quantity produced. Nickel, once $1.30 a pound, has fallen to 30 cents. Pig iron is worth about $13 a ton, and steel rails, once $100, are now $30 a ton, or nearly a cent and a half a pound. . . ."

"Will not the effect be to depreciate our silver notes?"

"No. I took care in that act to limit the issue of the silver notes to the gold value of the silver bullion when purchased. All we could lose would be the depreciation of the price of silver below that gold value at which we purchased the bullion. The Bland Bill provided for the coinage of silver in the proportion of 16 to 1, not regarding the gold value of the silver. Having given the experiment a full trial of purchasing silver at the gold quotations for it, I think we need go no further with it."

The platform of the Democratic party calls for the repeal of the Sherman Law, and the party must live up to the platform or be buried in its ruins. It is time to begin, too. The Republicans may or may not help to get this paralyzing act off the statute book. They may refuse to relieve the incoming Administration of an obvious financial embarrassment, but there is danger to them in such a policy. Already leading organs of the party, which have hitherto been indifferent to the silver issue or incredulous of the perils attending the present national policy, are demanding the repeal of that law. Business men are demanding it even more emphatically. It is time for all the opponents of that deplorable measure to unite in a resolute, unremitting war against it. They ought to put it before every other occupation of a public sort, and make it the supreme object of their lives to abolish it, just as people worked against slavery forty years ago.

UNITED STATES PENSION BONDS.

THE great pension debauch that is now in progress called for $134,583,052 last year. For the year ending June 30, 1893, the Secretary of the Treasury estimates the pension demand at $158,000,000, and for the following year at $166,000,000. It is entirely safe to assume that each of these estimates is at least from $10,000,000 to $15,000,000 short of the reality. In other words, the incoming Administration will find itself burdened with nearly $350,000,000 of pension obligations during the first two years of its term. This will be the handicap placed upon any measure of tariff reform that may be prepared, to execute the verdict which the people rendered at the recent election.

Even this, we apprehend, does not represent the whole truth, since we find in one of the Republican morning newspapers the following statement, which is important enough to be quoted in full, viz.:

"It is of interest in this connection to know the fact, not before published, that there are now on the completed files of the Pension Bureau the names of almost 200,000 veterans, or their widows, the proof of whose claims is finished, and who could be added to the pension rolls within a week. These names have been upon the completed files for months, and their number grows daily. The question of placing them upon the pension rolls at once was the subject of a special Cabinet meeting the other day. This information was brought out through a visit made by Representative Doan of Ohio to Assistant Secretary Bussey to-day. Gen. Doan called upon Bussey to protest against the present order of Secretary Noble prohibiting the Commissioner of Pensions from giving to members of Congress, or anybody else, the status of pension claims. Incidentally, Gen. Doan stated to Gen. Bussey that, in his opinion, a grave political error was being committed by the present administration of the Interior Department, in not allowing at once the pension claims upon the completed files.

"Gen. Bussey stated to Gen. Doan that the reason for the delayed final action upon this vast body of completed cases of qualified pensioners was the lack of funds in the Treasury. He stated that if these cases had been finally acted upon and certificates issued as rapidly as the cases had in fact been made complete, *the Treasury would months ago have been bankrupt*. Gen. Bussey then added that the subject had been carefully considered at a special meeting of the Cabinet recently, and that after prolonged discussion no conclusion had been reached. All this will be of great interest to an army of expectant beneficiaries of the pension laws, and will also become known for the first time to members of the Ways and Means Committee when they read this despatch."

The total number of names on the pension rolls when these are added will be 1,046,893, and this will be, as the *Sun* shows in an interesting table, more names than were ever on the army rolls at one time, and 200,000 more than were ever present for duty at one time. These facts certainly add new terrors to war, and ought to be a warning to remotest posterity to endure almost anything rather than draw the sword, even against a South American republic. If we had had a war with Chili last year, the pensions growing out of it would have risen to millions, and the widows of the Chilian war veterans would have lasted well into the twenty-first century.

The present Secretary of the Treasury estimates that there will be a surplus of $2,000,000 of revenue at the end of the present fiscal year, which, added to the balance in the Treasury, will leave a little more than $20,000,000 on hand in addition to the fund held for the redemption of greenbacks. He says, however, that this greenback redemption fund should be increased 20 per cent. on account of the increase of Treasury notes, which are virtually new greenbacks, being legal-tender notes issued against silver bullion. Twenty

per cent. added to the greenback-redemption fund would absorb the entire estimated surplus at the end of the present fiscal year, and if there should be a pension deficiency (as is usual) there would be a bankrupt Treasury without more ado. Senator Sherman, who is a good authority in such matters and has had abundant experience, says that the Treasury ought always to have a working balance of $30,000,000. Not even the shadow of a working balance can be discerned in the foregoing figures.

What is to be done in a case of this kind? Evidently an emergency fund must be provided to meet these demands and to enable the new Administration to turn around and provide a plan of taxation adequate to the needs of the Government. Some people say, enact an income tax. But even if this were agreed to, it could not be put in working order under two years. The machinery of the old income tax required more than that time to get in a state of efficiency. Moreover, an income-tax bill will meet with bitter opposition in Congress, and there is no certainty that it could be passed at all. It could not be made an Administration measure without some previous discussion on the stump, and nobody can say what the result of such a discussion might be. Probably the abstract justice of an income tax would be of small importance in the councils of either party in determining whether it should be enacted or not.

But neither that tax nor any other new tax can be made available in time for the present emergency. The only other way is to make provision for borrowing, if the worst comes to the worst. Congress ought to authorize the Secretary of the Treasury to borrow $200,000,000 on Pension Bonds bearing 2 to 3 per cent. interest and payable at the option of the Government. It may not be necessary to issue any of these bonds. It is to be hoped that the sanguine predictions of the retiring Secretary may be realized, and that the end of the fiscal year may find the Treasury with a working balance sufficient for its needs. But we do not look for any such halcyon days in the near future. We cannot shut our eyes to the renewed exportation of gold, which the best judges consider indicative of distrust in our financial future. The ability of the Treasury to maintain gold payments and its ability to meet current expenses are dovetailed together and cannot be separated. The outlook is not reassuring, but fortunately the credit of the country is good. Its ability to tide over a crisis is abundant and superabundant. Authority to issue bonds of the character described ought to be granted. Whether they are called pension bonds or not is unimportant, but everybody can see that that phrase would properly describe them.

MORE FOREIGN JOY AT REPUBLICAN DEFEAT.

ONE of the few sources of consolation left to the Republicans after the rout of November 8 was the ability to point to "great European rejoicing" over their defeat. It was apparently a solid comfort to them to feel that they were repudiated and held in contempt in other countries as well as their own. But it is a little singular that they have kept so silent about the way the election of Mr. Cleveland has given delight to all South America. Yet one can see that the latter phenomenon is not easy to explain on strict Republican principles. Europe exults, of course, because it now sees a chance of ruining our country under a deluge of cheap goods. But the Spanish American republics are not manufacturing nations. Moreover, they have been taken under the special protection of the Republican party, have been assured of our willingness to aid them in fighting all Europe, and have been thoroughly instructed in the great doctrine of "America for Americans." Why should they hail the defeat of the party that has done all this for them?

The fact that they do hail it was clearly indicated by the despatches following the election, and has been established beyond all question as the South American mails have arrived. For example, the *Rio News* of November 15 said:

> "The native press has been very complimentary to Mr. Cleveland upon his election to the Presidency of the United States. The fact seems to be that South America was always nervous over President Harrison's foreign policy, and expects Mr. Cleveland's Secretary will show less inclination to have a finger in every pie."

This is an especially significant admission, as the editor of the *News* is an American, and had steadily defended and praised the Republican policy in his paper. The general tone of the South American press is well summed up in the *Revista Ilustrada*, a journal devoted to South American interests, which says: "The electoral victory of Mr. Cleveland, and of the principles of justice at home and abroad which that austere statesman represents, has been received with great satisfaction from the Rio Grande to the La Plata."

Certainly this joy at Democratic success does not spring from an historic sympathy with the Democratic party on the part of South America. On the contrary, Spanish-American sympathies had been all the other way for two generations. Through all the years that Democratic policy was identified with slavery and involved the constant threat of annexation, or filibusterism, or conquest, for the sake of extending and more securely establishing slave rule, it distinctly repelled and alarmed South American sentiment. It was with the Republican party throughout the war and up to 1881 that all the hopes of the Spanish-American countries were bound up. Then came the initiation of the Republican policy of meddling and bullying, which was for a time held in check after Mr. Blaine's dismissal from Arthur's Cabinet, but which broke out again in the most offensive form with his return to the Department of State four years ago. Since then our attitude to South America has been that of thrusting our advice and protection where it was neither asked nor needed, of masking the most wretched personal and mercenary motives under the pretence of benevolent schemes for putting an end to war on this hemisphere, and, at the same time, of threatening to make war upon a weak and inoffensive nation so as to sustain a falling party by giving it a fictitious reputation for great patriotism.

It is the prospect that this trickery and overbearing and cowardly treatment will now come to an end, which accounts for the joy expressed by the organs of South American opinion over the Democratic victory. Some Spanish-American countries have peculiar reasons for gratification. Chili has no cause for sorrow at seeing Mr. Harrison left to fume and threaten in his law office. Colombia and Venezuela will shed no tears over the fate of the man who tried to club them into reciprocity. Hayti will not mourn at the humiliation of the Administration that attempted to humiliate her, and steal away her territory, by the process publicly described by the American Minister to Hayti, Frederick Douglass. But above and beyond all these particular reasons is the general conviction that a domineering policy, which was a constant threat to the peaceful and independent development of the republics of South America, is no longer popular or possible in the United States.

It will be no small part of Mr. Cleveland's success in rehabilitating the Democratic party, if he is able permanently to restore it to favor in South America. Surely the work will not be difficult. All that will be necessary will be to observe the same decency and deference in our relations with Spanish America that we practise in regard to the rest of the world. The republics to the south of us ask no especial favors of our Government either in trade or diplomacy. Certainly they have a right to protest against unfair discrimination. One of the first acts of Mr. Cleveland's Administration should be to recall President Harrison's proclamation laying discriminating duties on the imports of Venezuela, Colombia, and Hayti. He ought to do it on grounds of common sense, so as to get rid of the absurdity of punishing those countries by putting extra taxes on American citizens. Especially ought he to do it as a measure of international justice, and as a means of showing the world that we do not mean to get trade by the methods of a highwayman.

PROGRESS OF THE WORKING-CLASSES.

THE adoption of the McKinley tariff in this country and of a corresponding measure in France, while causing irritation everywhere, aroused especially grave apprehen-

sions in Belgium. That country is pre eminently a workshop. It imports a large part of the food consumed by its inhabitants, the value of the grain alone imported in 1889 being 250,000,000 francs; and it also imports a very large part of the materials used in its factories. It is distinguished for manufactures of metals, but it possesses neither iron nor zinc ores, and its textile manufactures employ to a large extent substances of foreign production. With a population of but 6,000,000, the country evidently depends for its prosperity upon the exportation of the goods which it manufactures; and the reactionary policy of France and the United States produced in the entire business community, including the working-classes, something very like a panic,

Under these circumstances the Belgian Government was moved to undertake an investigation of the industrial conditions of the country, with a view to ascertaining its ability to cope with the hostile duties imposed upon its products, and the results of this investigation have been set forth by M. Armand Julin in some recent numbers of the *Réforme Sociale*. The industrial capacity of Belgium is not a matter of especial interest to American readers, and we need not review the results of the investigation in their bearing upon this question. But it so happens that in the country of Quetelet a considerable body of statistics of genuine scientific value has long been in existence, and that this investigation was carried on by men competent, through their abilities and training, to deal with statistical problems. In consequence we have a research that is instructive in many respects to the whole world, and which in its methods might well be universally copied. It is to be regretted that the management of our Bureau of Labor Statistics is so generally committed to an inferior class of politicians as to make it only an impertinence to commend M. Julin's articles to them as embodying a model of statistical research. To invite the attention of Mr. Peck, the New York Commissioner who recently had greatness thrust upon him, to a statistical inquiry in the French language, would probably be regarded by the public as a malicious and cruel suggestion.

The scientific manner in which this inquiry was conducted is indicated by the fact that its scope, in the first place, was carefully limited to the rate of wages, the price of provisions, and the "budgets" of working people, at or within definite periods. Then, in determining these facts, the assistance of the "conseils de l'industrie et du travail," which represent the principal industries of the country and are established in the principal centres of trade, was obtained, and this information was further checked by being submitted to the workmen themselves. Thus the returns of wages were verified by the scrutiny of both workmen and employers, and were accepted only when declared correct by both. Wages, moreover, were not expressed in averages, but were given for particular occupations and branches of occupations and with regard to the age and the sex of the workers. Thus, in the case of mines, twenty-five classes of workmen were recognized as engaged below the surface, while above ground thirty-six other classes were distinguished. In this way much light was thrown upon the comparative wages of men and women, the rates prevailing in different industries, etc., but the fact of especial interest disclosed was the general increase of wages and their purchasing power.

Taking the city of Brussels and comparing the results obtained in 1891 with those obtained by Quetelet in 1846, it appears that there has been a practically universal rise in the rate of wages, which may be expressed as follows: With the exception of the glove-makers, there were extremely few workmen in Brussels who earned in 1846 more than 2 fr. 50c. per diem; and if the total wages earned in the twenty-four trades represented in the tables were divided by the number of workmen, the average wages would be scarcely over two francs a day. But in 1891 the number of workmen earning less than four francs a day was very small, and although the rate of remuneration in the different trades varied extremely, the average wages could not fall much below 4 francs 50c.

Before concluding that the lot of the Belgian workman had been so greatly ameliorated, it was necessary to determine the comparative purchasing power of money wages. For this purpose it was not regarded as sufficient to learn the average price of bread, but the actual "hygienic ration" or quantity of food of standard kinds and qualities consumed, with its prices, was also ascertained. There is considerable divergence of opinion among physiologists as to the amount of albumen required by the ordinary workingman, but for the purposes of comparison this is immaterial. Assuming that 483 kilogrammes of wheat bread contained a year's supply of albumen, it was found that this quantity would have cost in 1846 at Brussels 178 francs 78 c., while the same quantity could have been purchased there in 1891 for 164 francs 24 c. Thus, while the labor of from 85 to 95 days would have been needed in 1846 in most cases to buy this quantity of bread, in hardly any case in 1891 would the labor of more than 45 days have been required for this purpose, while on the average less than 40 days' labor would have sufficed.

But as man does not live by bread alone, recourse to the "budgets" of workmen was had, for which the necessary data were found in 1886 and 1853. We cannot review the somewhat intricate methods employed in determining these budgets, but, selecting the case of a miner at Wasmès, and a budget consisting of 100 kilos of wheat bread, 50 of potatoes, 10 of beef, 30 of milk, 7 of butter, and 2 of coffee, we find that in 1891, with wages of 4 francs 37c per day, 19 34 days' work would be needed to purchase the above quantities of the given articles. In 1886 wages for the same work were 3 francs 10c. per day, and 25.21 days' work would have been requisite to accomplish the same result. In 1853 wages were but 2 francs 40c., and in order to earn enough to make the above purchases the workman would have been compelled to work 33.67 days. In this case, if the purchasing power of wages is represented by 100 in 1853, it had risen in 1886 to 125.12, and to 142.56 in 1891.

The most important lesson to be derived in this country from this investigation is the necessity of scientific methods in collecting and dealing with statistics. Such an investigation is only possible where a series of statistical observations has taken place which serve as a basis for comparisons. Such a census as ours of 1890 not only is bad in itself, but renders it almost impossible to make use of the comparative method, because it introduces into the series a term of unknown value. To the European observer, however, the lesson derived by M. Julin which will seem the most important is, that the claims of the Socialists as to the increasing misery of the working classes are unfounded. It is obvious that the "iron law" which so disquieted the soul of Karl Marx has no existence, and if we regard Belgium as a typical modern State, the evidence is conclusive that the poor are growing richer and not poorer.

THE FRENCH CORRUPTION.

THE one man in France who comes out of the Panama scandal covered with glory is M. Leroy-Beaulieu, who now fills his paper with wrathful "I told you sos." For five years he has never ceased to warn the French public against the Panama Canal as an investment, and he would probably have succeeded in saving the "small people" (*les petites gens*) who went into it, a vast sum of money if the Government had not interfered in 1888 to help Lesseps, when he first began to get into deep water. In that fatal year it not only gave him a "satisfecit," but it allowed the company to start a lottery for the sale of its bonds, and, more still, sent out an engineer to examine the works. When he made his report, it neither published it nor suppressed it, but did the worst possible thing—let it get out piecemeal, so that it was possible for insiders to use its revelations in speculation on the Bourse. From that moment the company became the prey of the members of the Chamber and of the press. M. Leroy Beaulieu estimates at $2,000,000 the amount spent on the Legislature and on the newspapers, and the official revelations confirm this estimate. The Company got about

$2,500,000 from the *petites gens*—the small investors—and this was nearly all swallowed up in various forms of advertising and blackmail. For as soon as it was found that the Company was in distress, and had secrets to keep, all the poor men in the Chambers and all the struggling Parisian newspapers saw in it a chance to retrieve their fortunes or provide for their old age. Newspapers were actually started to "strike" it, as we say, and some died as soon as they got fifty or even twenty-five francs out of it. No periodical was too insignificant to get something to make it "shut up."

This process can hardly be understood by us here without remembering the indifference of the French public to accurate news. Beyond the *Temps* and *République Française*, and perhaps the *Débats*, no French newspapers spend any money or take any pains to get reliable news of important events at home or abroad. The expenditure of the best ones for such purposes is what we should consider very trifling. Nor do they fill up the space which really important intelligence should occupy, with the scandals and crimes of low life, as our little papers do, because there is, under the French law, great risk in intrusions on privacy. They simply gossip, in the style of our "Loungers" and "Listeners," about everything or nothing in particular. News they are not expected to furnish, and, as machinery for collecting news forms by far the largest item of expense in the establishment of a newspaper, "petits journaux" are started in Paris by any two young fellows with fluent pens who can get a printer and paper maker to trust them for a week. They are often started without any expectation of living longer than a week, in order to "get even" with somebody, or to "strike" a theatrical manager who has refused their plays, or an editor who has rejected their contributions, or a financial enterprise, or simply to give editors and publishers specimens of their writing powers.

If it be asked what makes them formidable to anybody, or, in other words, how they get any sale, the answer is that the Parisian public does not buy newspapers to get information out of them, but to be amused, and there is always a vague expectation that a newly started "petit journal" will be for a while at least more piquant and entertaining than those already in existence. Paradoxical as it may seem, however, the French public, although buying its newspapers simply for amusement, is the most open minded public in the world to rumors it sees in print. Its general credulity as displayed in times of great public excitement has been made too well known by the history of its various political revolutions. It is this credulity, combined with the great suspiciousness which nearly always goes with credulity, that furnishes so many "spies" to the Parisian population during either foreign wars or domestic broils In the interesting collection of "Récits" of personal experience of actual combatants in the war of 1870, published a few years ago, there is an account of a female spy being brought in, firmly bound in a cart, and guarded by *twelve* men of the Francs-Tireurs—a spectacle which would have excited shouts of derision in any other army in the world, but which the narrator passes without note or comment, as if it were the most natural thing in the world. It is on this credulity that the projector of the blackmailing journals calculates. The "Flâneur" who makes up the gossip of the Boulevards, has only to put in an "on dit" here and there about a financial enterprise to set all the concierges, and little shopkeepers, and governesses, and porters, and *bonnes* frantic with terror, and the Panama Company had to rely largely for its funds on these classes.

The participation of Members of Parliament in the plunder of the Company—the odd man in the equally divided committee which sat on the lottery scheme, actually bargained with the directors until he got 200,000 francs for his vote—is more easily explicable than the power of the small newspapers. That legislators are "weak and yield easily," and grow more and more so, in the presence of rich men and corporations, is a phenomenon with which all democratic countries nowadays are becoming very familiar. We know a good deal about it in this country, but they are getting to know more and more about it in others with similar institutions. The French Parliament, all the best observers say, after every election contains a larger and larger number of needy men, who go to Paris with the expectation of making something out of their new position—if not actual cash, a chance of a "good thing" in the way of investment or speculation. Every French Parliament, too, finds itself, as do all modern parliaments, surrounded by men eager to acquire legal rights and privileges which only the Legislature can bestow, out of which they expect to make great sums. The process of reasoning by which the poor legislator, to whom even $1,000 is a fabulous sum, reaches the conclusion that there can be no wrong in making these applicants share with him a small portion of their expected profits, and thus enable him to pay off a mortgage, or give a daughter a little dowry, or provide for an aged mother, or set a son up in business, is one of the easiest in which the human understanding can engage, and there is a great deal of human understanding in these days engaged in it. The non-payment of members in England is one of the chief defences against this view of a legislator's rights, in that country, but this obstacle will probably not last long, and the poor men will get a chance to meet the men with the money-bags in the gate, as they meet them at Albany.

POETRY IN ITALY.

PISA, November 20, 1892.

THE times are not propitious to poetry. There are perhaps the usual number of aspirants to the favors of the muse, but their successes are few and of little worth. The public is indifferent and gets but indifferent verse. Not that the two facts are connected as cause and effect: in matters of art, demand can only secure the supply of such as there is to give; it cannot convert mediocrity into genius. No conceivable circumstances could change the value of the productions of Sir Edwin Arnold, for instance, or of François Coppée, or Giuseppe Giacosa. The utmost that could be accomplished—were there, by any possibility, a sudden outcry for poetry—would be that a few, who might otherwise be politicians, or financiers, or book agents, or temperance lecturers, would be led to confide their metrical indiscretions to the public. In view of such an event, few will maintain that the present state of things is as bad as it might be, though it is discouraging work just now to talk about poetry in most of the countries of Europe.

Still, one might claim that Italy is better off than the rest of the world. She has one real poet, who is such in the sense in which Rossini was a musician in the later years of his life, and one, still producing, who is probably second to no other in Europe. Both live in Bologna and are attached to the University there, the former as librarian, the latter as professor of Greek—a fact which gave occasion to a recent little volume entitled 'I Poeti Bolognesi.' The author, a clever young poet himself, the better to justify his title, perhaps, rounded out his book by a notice of Panzacchi, a poet, so to speak, like another, though not lacking in grace as a writer of lyrics. These, with an occasional ode or cantata, constitute, at least in verse, his literary baggage.

As for the other two of the Bolognese poets, they are, if not the only ones, at least the best worth considering of all in Italy. Together they mark an epoch and each has in a way made a school. That of Stecchetti did not long outlive the period of his popularity. The preface of his first volume bears the date of February, 1877. Its effect was immediate: a storm of mingled applause and blame was raised, in which it was difficult for the voice of reason to make itself heard. It is perhaps not often that friends and foes are both so much in the right, but Stecchetti justified some of the worst that was said of him, as well as most of the best; the victory, fortunately for him, has remained with his friends in the semi-silence that has closed about his fame.

The preface, by Dr. Olindo Guerrini of the University of Bologna, to the little volume of 'Postuma' of Lorenzo Stecchetti was the biography of the author, a young man who adored Byron, Heine, and De Musset, who lived wildly, loved far too much in the unwise way, and finally died of consumption, leaving the verses therewith published by his friend. These, with a grace and charm all their own, suggested by turns the several models the young man had chosen, but in them Heine and Musset had become so decidedly *fin de siècle* that it is no wonder that good people and goody people cried aloud against them. Of course, the goody people cried the loudest, and so, when the secret was out, when it was known that Lorenzo Stecchetti never existed, and that the real author was a reputable citizen, holding well an honorable position, Dr. Guerrini published a second volume, 'Polemica,'

and still a third, 'Nova Polemica,' half filled with verse similar in character to that in the first, and half with a preface in which he slew many Philistines; but not as did Samson. His weapon was a blade of keenest and brightest steel; in other words, a clear exposition of the revolt against outworn forms and beliefs, against frauds and hypocrisy, which his poetry represented. Sometimes the defence was better than the offender deserved; that is, the revolt committed in the fervor of youth had been carried so far as to shock legitimate susceptibilities, and was not to be excused by any amount of righteous indignation against hypocrites and prudes. Thus much allowed, few will deny that the poetry to which the name of Stecchetti still clings, has many most admirable qualities. The contrast of sadness and mockery is as exhilarating as the similar contradiction in Heine; the elegance that reminds one of De Musset has the advantage of being in a language more favorable to poetic expression than is the French. Moreover, there is something very winning in the nature of the poet which is visible in his verse and lends to it a singular attractiveness. It is impossible not to regret that the author of works so graceful and melodious has not given us more of the same sort. The case is that described in De Musset's lines:

"Il existe, en un mot, chez les trois quarts des hommes,
Un poète mort jeune, à qui l'homme survit."

Only, when the poet is of the value of Stecchetti, it is his duty to live as long as the man who houses him.

The other poet, Giosuè Carducci, has always been a combatant. Nature had furnished him abundantly from the outset both with the disposition and with the talents for warfare, and the use he has made of them has been such that he may already apply to himself the half confession, half excuse that Heine made of like misdeeds in the *Nachwort* to his 'Romancero': "I grant you, I have scratched many, bitten many, and was no lamb. But, trust me for it, your vaunted lambs of meekness would demean themselves less piously if they only had the teeth and the claws of the tiger." Carducci has from the beginning made free use of teeth and claws. Consequently, aside from considerations to be mentioned hereafter, it is probably as much to avenge their wounds as because they neither liked nor understood it, that his poetry was for years subject to assaults from the critics. Nowadays everybody pretends to admire it and know it by heart, but there are reasons why, at the beginning, even had the author been a lamb of meekness, his verse should have been received with difficulty. It may be owned at once that much of it is far from easy reading, and, until one is sure that an author is worth so much trouble, it is distinctly against his work that it should be hard of comprehension. Moreover, not only is the style against the reader, but many of the early poems bristled with classical allusions to such an extent that they are "Greek" indeed to any but the specialist of antiquity. I can scarcely give a better example of this than that given in the little book already named. It is the beginning of an ode to Phœbus Apollo:

"Della quadriga eterea
Agitator sovrano,
Sferza i focosi alipedi,
Bellissimo Titano.

"Te pur, dell' ugna indocile
Stancando il balzo eoo,
Chimaro in van ne' vigili
Nitrite Eto e Piroo,

"Quando la bella Orcamide
Ti palpitò su 'l core,
E gli achemenii talami
Chiuse ridendo Amore."

Carducci was good, however, for something else than sports with the mythological dictionary, and in later work he amply repays all the trouble one may bestow on surmounting the difficulties occasioned by his extreme compression and his Latin, rather than Italian, constructions. Even the earlier volumes, 'Juvenilia' and 'Levia Gravia,' are full of the surprises that are still one of the charms of the poet. Such an ode as that instanced just now may be sandwiched between a page of patriotism, where wrath and scorn of the unworthy help to heat the words of devotion, and, on the other side, an idyll sculpturesque in its simplicity. The only thing common to all is the manner of writing. Of no one is it truer that the style is the man. His favorite poets—the ancients, together with Dante and Petrarch—have combined with his own nature to form a style that, from the beginning, was classic in its purity, conciseness, and force. The word sculpturesque, used just now, indicates of what sort is its beauty. Perhaps no other poet living has an equal power of condensation, and of producing with few words a concrete image. The means used are simple even to austerity, but from them the form emerges vigorous, clearly defined, and with a still grace that suggests Hellenic work.

It is a curious fact in the development of the poet that, with the advance of years, his manner becomes more and more classic at the same time that the exact contrary is true of his matter. It was in his early days that he gave us such odes as that to Phœbus Apollo, to Diana Trivia, and the like. In the 'Odi Barbare,' written without rhyme and in Horatian metres—principally sapphics and alcaics—the verse is as nearly Latin as anything in a modern language could well be, while the subjects are chiefly of to-day. These metres are largely used in the expression of the aspirations and reminiscences of Italian patriotism, but, after all, there is no lack of harmony between the thoughts and their setting. Patriotism in Carducci is of the antique Roman stamp. There is no trace in it of modern sentimentalism; it is fierce, proud, sometimes even arrogant, as is also his democracy, or what Italian democrats used to take for such. The classic metres are no affectation: they are the expression of the author's nature, which, in more respects than one, is that of an ancient. In religion, for instance, he often seems less a modern sceptic, or rationalist, than a pantheistic pagan. In the beautiful ode to the springs of Clitumnus, he records the flight of the ancient deities at the advent of Christianity in words that recall Milton in the "Hymn to the Nativity"; only, for him the victory of the Galilean is a calamity:

"—— una strana compagnia, fra i bianchi
templi spogliati e i colonnati infranti,
procedè lenta, in neri sacchi avolta,
litaniando;

e sovra i campi del lavoro umano
sonanti e i clivi memori d'impero
fece deserto, ed il deserto disse
regno di Dio,"

and so on with growing bitterness. Christianity had turned men away from industry, had denied human nature, and, making of humility a virtue, had made it abject. Elsewhere he wrathfully apostrophises the "Secoletto vil che cristianeggia."

His complaint against Christianity, however, is not only that of a Greek but also of a modern. Perhaps nothing that the poet ever wrote has created more hubbub than the "Hymn to Satan," written in 1863, but given to the public several years later. Satan for him is nothing but nature and reason as against superstition and dogma. Protestants will be less likely to be frightened by this hymn, as they will find among the soldiers of Satan Savonarola and Martin Luther; but among Church people in Italy the scandal was immense. At the same time it was seized upon with avidity by the anti-clerical party, and at once raised the author to fame—a fame for a poet not of the purest sort. The performance was not to be classed with the noblest work of Carducci. He himself characterized it later as a "birbonata utile"—a rascally trick though useful—referring to its execution rather than to its intention; but to the noisier part of his friends it was a political weapon—its poetic value was a secondary question, with which they had little to do. It has been a misfortune, in a way, to Carducci that, during most of his career, the anti-clericals and democrats have insisted on identifying him with themselves. I say *in a way*, because the battles waged over much of his poetry have been anything but literary contests. He writes a series of sonnets glorifying the French Revolution, or he commemorates deeds of Garibaldi or Mazzini, and straightway the entire radical press rings with praises of the performance; he dedicates an ode to the Queen of Italy, and the same press abuses him as a traitor. Of course, the Government prints take in each case the opposite view, and with equal reason. Meanwhile the poet keeps on his way, singing of what to him is beautiful or noble, without being turned aside by praise or blame; but with his warm, even violent, nature (he speaks himself of "il petto ov' odio e amor mai non s' addorme"), it is no wonder that he becomes more and more scornful of his kind, and that so many of his prefaces are masterpieces of contemptuous sarcasm.

Whatever now may be said of his politics, the question of the value of his poetry was settled long ago. Nobody now ventures to dispute Carducci's position as the one really great poet living in Italy, and for myself I am disposed to maintain that, now that Tennyson is gone, the Anglo-Saxon world has not a poet equal to Carducci. The house of Zanichelli in Bologna is engaged in publishing a complete edition of his works, which, however, as long as the author lives and produces, can scarcely be definitive. All the verse published up to 1872, at least all of it which Carducci has thought worth preservation, had been previously included in three volumes, 'Juvenilia,' 'Levia Gravia,' and 'Giambi ed Epodi.' Posterior to these are three series of 'Odi Barbare,' comprising much of his noblest work, several odes recently published separately, and the volume 'Rime Nuove,' the very flower of all that the author has written in rhyme. The 'Odi Barbare' can probably be best appreciated by those who have well studied Horace and loved him; they will generally find that these odes, like their ancient models, yield their full flavor only to him who returns to them again and again. But sooner or later they can scarcely fail to acknowledge that such odes as that "Alle Fonti di Clitumno," that dedicated to the Queen of Italy with the title "Il Liuto e la Lira," that "In Morte di Napoleone Eugenio," or "Miramar" or "Scoglio di Quarto," not to mention many others, are worthy to be ranked among the highest achievements of modern poetry. As to the 'Rime Nuove,' one finds there so many gems that I will not try to enumerate them. One single sonnet, a favorite with all who know the book, entitled "Il Bove," may serve to give a notion, to those

who have yet to make acquaintance with the poet, of the pleasure his books have in store for them:

T'amo, o pio bove; e mite un sentimento
Di vigore e di pace a 'l cor m' infondi,
O che solenne come un monumento
Tu guardi i campi liberi e fecondi,

O che a 'l giogo inchinandoti contento
L' agil opra de l' uom grave secondi:
Ei t' esorta e ti punge, e tu co'l lento
Giro de' pazienti occhi rispondi.

Da la larga narice umida e nera
Fuma il tuo spirto, e come un inno lieto
Il mugghio ne 'l sereno aer si perde;

E de 'l grave occhio glauco entro l' austera
Dolcezza si rispecchia ampio e quieto
Il divino del pian silenzio verde.

S. K.

MS. CHARTS IN THE PUBLIC RECORD OFFICE.

LONDON, November 28, 1892.

IT would require long years of research to enable one fully to realize the extent of the accumulations at the Public Record Office. Students can, it is true, get a bird's-eye view of the stores of this hive of historical documents from Mr. Scargill-Bird's valuable 'Handbook to the Records'; but how many people are aware of the wealth of maps and charts, printed and in manuscript, preserved in that institution? It does, indeed, seem a pity that these cartographical treasures are not better known, for, as the utmost facility is given to the inquirer by the staff of the Department, research in this direction is a mere matter of looking over the 'Index' and then asking to see what you may deem worthy of inspection. The maps and charts relate to all parts of the world and are preserved in volumes and in cases. They are grouped in some forty-six divisions. Of these the most interesting to Americans will be: 10, book lettered New England; 11, book lettered New York, New Jersey, and Pennsylvania; 12, book lettered Maryland and Virginia; 13, book lettered North and South Carolina and Georgia; 14, book lettered East and West Florida; and 28, book lettered English Plantations.

The 'Index' was compiled by a member of the staff of the old State Paper Office, which was afterwards absorbed into the Public Record Office. The author of it was a brother of Mark Lemon, for some years the editor of *Punch*. This is his admonition to those who might from time to time refer to the 'Index':

"Gentle Reader: The following catalogue is only in draft, and has not even been read over: it must therefore be consulted with all its faults. But if you find any—mend them.

"R. LEMON.

"S. P. O., March, 1854."

Some of the maps noted in the 'Index' were missing at the time the 'Index' was made. It is unfortunate that among the maps not to be found should be the original of Warner's survey of the Rappahannock and Potomac, which was "attested by the Commissioners on the part of the Crown and Lord Fairfax." Those conversant with the history of New York may be able to determine the date of the "Ancient Chart of the Port of New York and Map of the Country." The River Hudson is called "Hudson's River." Staten Island is noted as "Statin Isle and Richmond County." On the island "Old Town" and "New Town" are marked off. As, however, trees are represented in various parts, the island cannot have been thickly peopled. Opposite to "Amboy" on the Jersey shore is a spot noted as "Ferry." There is another "Ferry" opposite to "Hendriks" on "Nassaw or Long Island."

As regards the land granted to the Palatines on the Hudson River, of which there is a map, referred to in Col. Hunter's letter of the 8d October, 1710, it may be well to note that papers relating to the settlement of Palatines in New York are preserved in the British Museum, with a letter signed James du Pré (11) (*Harleian*, 7021–28). In the same grand storehouse of historical treasures will be found "A Journal of the Dividing Line drawn between the Colonies of Virginia and North Carolina, begun March 5, 1728, per Colonel [William] Byrd and others." It forms a small quarto (28,620). The collection abounds in maps of various parts of Canada.

The following list contains most, but not all, of the manuscript (as distinct from the numerous printed) maps and charts of places now comprised within the United States of America preserved in the Public Record Office. It cannot but prove interesting to the students of the cartography of the United States.

D. D.

Albany—Plan of the town and lands, W. R[omer]..... 11, 26
Albany—Plans of the forts.....11, 24, 25
Albany—Plan of lands near, 1698..... 11, 27
America—Map of the new Western States of.....Case 36, 5
America, North—Old map of part of (about 1720, very curious)..... 7, 18
America, North—A map of the Southern Indian District of North America, compiled under the direction of John Stuart, Esq., Superintendent of Indian Affairs. By Joseph Purcell. 1775?.....Case 36, 11
America, North—A new map of the Southern District of North America, compiled for Lieutenant-Colonel Brown, Superintendent of Indian Affairs. By Joseph Purcell, 1781. This is a most elaborate and beautifully executed work.....Case 36, 12
Beaufort—South Carolina, 1721..... 13, 32
Beaufort—Town, Plan of..... 13, 46
Carolina, North and South, and the Bahama Islands, describing the position of the Indian Tribes and the numbers in each Tribe. About 1712?..... 7, 26
Carolina—Compiled description of the Province, in 3 parts. Edward Crisp. (In a very decayed condition)..... 13, 44
Carolina, North and South..... 13, 30
Carolina, North and South, and Louisiana —Describing the country, battles with the Spaniards, Indians, etc. About 1788?..... 7, 27
Carolina, North—Map of the Boundary Line between North and South Carolina. Wm. Gray..... 13, 20
Carolina, North—2 Plans of the Boundary Line between North and South Carolina, attested by the Surveyors. 1764..... 13, 49
Carolina, North—2 Plans of Earl Granville's Boundary Line, about 1765. Transmitted in Mr. Tryon's letter, January 27, 1766..... 13, 52
Carolina, South, Georgia, and Florida—Map of 1738, transmitted with Gov. Bull's letters, May 25, 1738..... 14, 21
Carolina, South—Map of Boundary Line between South Carolina and the Cherokee Indians. G. Wilkinson, 1766. With the names of the Cherokee chiefs..... 13, 53
Castle Island, in Boston Bay—Plan of Fortifications, 1695..... 10, 33
Castle Island, with plan of Castle William, 1705..... 10, 53
Castle Island—Sectional view of the above. 10, 54
Castle William, Boston—Iconographical plans of J. Redknap, 1705; attested by J. Dudley.....10, 35, 36
Catawba Indians—Survey of their lands. S. Wyly, 1764..... 13, 48
Cattanboes, or Nassau Town—Plan of, and adjacent rivers..... 13, 36
Charlestown (S. Carolina)—Iconographical Plan of John Herbert. 1721..... 13, 8
Charlestown—Plan of projected Fortifications. Wm. de Brahm, 1742, after.. 13, 9
Charlestown—Copy of Brahm's plan for fortifying. 1757..... 13, 47
Charlottenbourg (Georgia)—3 plans of.. 13, 27
Cherokee Country—Map of, with Indian Towns, the warriors and forces. George Hunter. Received from Jas. Crokatt, agent, May 27, 1752..... 13, 5
Connecticut—Describing the ancient boundaries of the Colony. Transmitted with the letter Sept. 14, 1720..... 10, 51
Connecticut River—From its source to the boundary line, which divides the Province of New Hampshire and Massachusetts Bay. In ten sheets, with one Index Plan showing the whole course of the River. Holland & Grant.....Case 38, No. 32
Creek Nation—A Draught of the, with original sketches of their houses, implements, costume, &c. Wm. Bonor, 1757..... 13, 13
Crown Point—Plan of the Fort, received with Governor Wentworth's letter, May 9, 1744..... 11, 17
Crown Point—In Sir H. Moore's letter [No. 31], December 16, 1768..... 11, 49
Erie, Lake—Outline of the shores of Lakes Erie, Huron, and Michigan.....Case 38, No. 54
Erie, Lake—Survey of the south shore, commencing at the Narrows at Fort Erie, and ending at the Entrance of Detroit River. H. Ford, E. E. McNiff. 1789.....Case 38, No. 55
Falmouth (Maine) Fort..... 10, 19
Five Nations—Map of Col. Romer's journey to..... 11, 20
Five Nations—Map of their country. 1724. Engraved and MS..... 11, 17
Florida, East—Map of..... 14, 24a
Florida, East—Translation of Spanish Map of, John Gordons..... 24, 24
Florida, East—Spanish Map of part of the Coast..... 14, 16
Florida, East—Spanish Map of Part of Inland..... 14, 17
Florida, East—Sketch of Coast, from St. Augustine to Bay of Musquitos..... 14, 34
Florida, East—Large Survey and Chart of Part of E. Coast of E. Florida: from St. Mary's Inlet, North to Mount Halifax, South; showing the ascertained boundary between E. Florida and the Creek Indians.....Case 39, No. 8
Florida, East—A Survey on the Largest Scale, in two portions, of the E. Coast of E. Florida, from the Musquito Inlet, North, to Cape Sable, the most Southern Point of the Promontory, by Van Gerard de Brahm, Surveyor General...Case 39, No. 9, 10
Florida, West—French map of..... 14, 57
Florida, West—Large map of, extending from Appalachicola River to the banks of the Mississippi as high as Jago River, with a long MS. description of its soil, climate, extent, and natural productions, by Bernard Romans.....Case 39, No. 11
Florida, West—Part of, from Pascagoula Bay and River to the River Amit, beyond Lake Maurepas: with specification of lands granted on the Amit.....Case 39, No. 12
Florida, West—Boundary line of the lands ceded to His Majesty by the Chactau Indians: from the North boundary of West Florida, on the Jago River, to the River Pescagoula: on two sheets: by Joseph Purcell, 1779.....Case 39, Nos. 13, 14
Fort Rosalia (W. Florida)..... 14, 56
Fort St. George (New York)—Plan of the Battery. John Dies..... 11, 15
Fort William and Mary, on the Piscataqua River—View of it. 1699..... 10, 42
Frederica, and Savannah (Georgia)—Plans and sections of the fortifications. Brahm. Received with Gov. Reynolds's letter, January 5, 1756..... 13, 14
Georgia—Part of the land petitioned for by Sir William Keith and others. Transmitted with the Duke of Newcastle's letter, August 3, 1731..... 12, 13
Georgia—Boundary line with the Creek Indians. Samuel Savery, 1769. This shows the situation of the great swamp called by the Indians "*Ekanphonoka*, or *the Terrible Ground*. The Indians, from an ancient tradition, have a notion that it is inhabited by a race of immortals which they call *Estè Mèsh-ko*, or Invisible People, of whom they tell many marvellous and absurd stories."..... 13, 53
Georgia—Map of the inhabited part of, Brahm..... 13, 15
Georgia and Florida: With the site of one of the tribes of Apalachee Indians..... 13, 12
Hudson's River—A New Mappe of Part of. Col. W. Romer, 1700..... 11, 34
Iberville River—Actual Survey from the Falls of, Journeaux, 1771..... 14, 68
There are various other charts of this river.
Indian Country, West of Albany, New York, ceded to King William III.—Map of Samuel Clowes. 1701..... 11, 21
Indian Country—Sketch of, North of New York..... 11, 28
Indian Country—Indian Grant to Sir Wm. Johnson. 1766..... 11, 43
Indian Nations,—Map by an Indian Chief. Presented to Francis Nicholson, Governor of S. Carolina. Mounted on coarse canvas..... 7, 25
Duplicate of above..... 13, 37
King George's Fort (S. Carolina), with the colors of the Swiss Company. 1742..... 13, 38
King George's Fort (S. Carolina), with the colors of the Swiss Company, 1742..... 13, 45
Maine—Map and description of the "Pineries" in the Province of Maine. Scammell, October 8, 1772.....Case 40, No. 53
Marble Head, Fort—Plans of, 1705 (?) . 10, 39 and 40
Maryland—Ancient Map of the Province, on vellum, colored..... 12, 12
Maryland—Boundary line between Maryland and Pennsylvania. J. Smither... 12, 19
Massachusetts Bay—Ancient map of, by Capt. Cyprian Southack. Printed in Boston in 1717, *with numerous MS. additions* and notes..... 7, 16
Massachusetts Bay—Boundary line with New Hampshire. Ric. Hazzen, 1741.. 10, 16

Massachusetts—Map of the Northern English Colonies, from the Gulf of St. Lawrence to the mouth of the River Hudson, showing numerous ancient boundary lines of various Colonies. Done at the request of Wm. Shirley, Esq., Governor of Massachusetts, by Charles Morris. Case 40, No. 58
Michigan, Erie, and Huron Lakes—Survey of, with part of Ohio River. 1765.... 11, 39
Michigan, Erie, and Huron Lakes—Plan of the "Streyts" between the two lakes 11, 47
Minisink and Wawayanda Patents—Plans of. In Governor Colden's letter, April 13, 1765.... 11, 36
Mississippi River—Survey of, from the River Jasons to the Ibberville. Durnford, 1771. With schedule of grants made, Proprietors' names, number of acres granted, etc.... Case 41, No. 2 and 14, 70
There are various other MS. charts of the Mississippi including one by Des Barres in 1779 (Case 41. No. 1.)
Mitchilimackanack (New York) Fort—Plan of.... 11, 47
Mobile Harbour.... 14, 10
Mobile—Plan of Town and Harbour.... 14, 11
Mobile—Plan of the Fort. Pitman.... 14, 12
Mobile River—Map of its course.... 14, 59
Mobile and Alabama Rivers—Schedule of grants made, specifying the Proprietors, number of acres granted, etc., 1771.... 14, 68
Mobile—Field Survey of River Mobile and part of Rivers Alabama and Lerisa, with the different settlers' lands marked thereon, from the Town of Mobile to the Boundary Line of the Chactaw Indians. Durnford.... B. T. Vol. 14, No. 69
Mobile—Very extensive survey of the Bay and River Mobile, with list and references to the lands granted, the Proprietors' names, etc.... Case 41, No. 3
Mohawks River—Plans of lands granted to various parties. A. Colden. 1765.. 11, 38
Monongahela River—Plan of Fort Duquesne, and Plan of the field of battle and encampment of the troops, July, 1755.... 24, 56
Newbern (North Carolina)—Plan and elevation of the Governor's house.... 13, 54
New England—Plan of part of the Province, including Connecticut, Rhode Island, and the boundaries of the County of New Cambridge. 1697.... 10, 30
New England—Plan of the Province of. Received from Col. Dunbar, with his letter, May 2, 1730.... 10, 31
New England—Plan of the sea coast from Ogunkett River to Cape Elizabeth, including the Bays of Wells, Suco, and Black Point. James Grant.... Case 41, 8
New England—Plan of part of the coasts of New Hampshire and Massachusetts, from Little River Rocks to Cape Town. Grant and Wheeler.... Case 41, No. 9
New Hampshire—Part of, between the Rivers. Jas. Jeffry, May 2, 1720.... 10, 23, 25
New Hampshire—Plan of the Rivers and Boundary Lines. Geo. Mitchell, 1737.. 10, 26
New Hampshire—Showing the boundary line with Massachusetts Bay. Bryant, 1741.... 10, 5
New Hampshire—Map of the Merrimack River. E. Mitchell. Enclosed in Gov. Wentworth's letter, March 6, 1741-'42. 10, 10
New Hampshire—Shewing the Townships granted by Massachusetts Bay. Mitchell, 1745.... 10, 4
New Hampshire and Massachusetts—Outline maps of, with descriptive references 10, 18
There are other MS. maps of New Hampshire.
New Jersey—Ancient map of part of.... 11, 18
Newport (Rhode Island)—Town and Harbour.... 10, 14
Newport (Rhode Island)—Plan of Fortifications. Harrison, 1755.... 10, 15
New York—Ancient chart of the part of, and map of the Country.... 11, 18
New York—Ancient map of, dedicated to the Earl of Bellamont, by Augr. Graham (1698?), showing the most important grants of land.... 11, 19
New York—2 Maps of divisional lines between New York and Massachusetts, by W. Alexander, 1754.... 11, 13, 14
New York—Map of the Provinces of New York, part of New England, and New France.—Francis Pfister, 1759.. Case 41, No. 34
New York—Four sheets, Nos. 9, 10, 11, 12, of a very extensive survey of the Province of New York. Probably a portion of the map formerly in Vol. II., then consisting of 12 sheets.... Case 41, No. 35
New York—Exhibiting the boundary line established at Fort Stanwix, 1768.... 9, 11
New York—Plan and survey of lands granted in the Province.... 11, 48
Niagara River—Sketch of from Lake Erie to Lake Ontario.... Case 42, No. 1
Ohio—Map of lands belonging to Ohio Company. G. Mercer.... 12, 5
Ohio—Map of lands belonging to Ohio Company. G. Mercer.... 12, 6
Palatines—Lands granted to, on the Hudson River. Referred to in Col. Hunter's letter, October 3, 1710.... 11, 23
Penaquoid Fort (Maine)—Plan of. 1699. 10, 48
Penaquoid Fort (Maine)—Plans by Red knap, 1705. Attested by J. Dudley... 10, 47
Pennsylvania—Map of part of the Province of, west of the River Susquehanna..... 11, 20
Pensacola—Plan of the new Town of, and Country adjacent, with gardens, allotments, etc. Durnford.... 14, 42
Pensacola—Schedule of the lands surveyed and granted, stating the proprietors' names, number of acres, etc., 1771.... 14, 55
Pensacola—Map of the Road from Pensacola in West Florida to St. Augustine in East Florida, with numerous MS. Observations. Jos. Purcell, 1778.... Case 42, No. 33
There are several other plans of Pensacola in MS.
Pistacataqua River (New Hampshire)—View of Forts on, 1699.... 10, 41, 42
Pistacataqua River—Survey of, by J. B.... 10, 52
Pistacataqua River—Map of, 1738.... 10, 55
Pistacataqua River—Map and Plan of Harbor and adjacent country.... Case 42, 35
Port Royal (South Carolina)—Plan of Gascoigne.... 13, 7
Rhode Island—Plan of, with the Boundary Line of Connecticut Colony. John Mumford, 1720. Attested by Gov. Cranston.... 10, 29
Rhode Island, including the Boundary Dispute with Massachusetts Bay. Jos. Conant, 1736. Attested under the Colony Seal of Connecticut.... 10, 36
Rhode Island—Survey of the Colony, made for the Commissioners for settling the Boundary Line with the Province of Massachusetts. Helme and Chandler, Sept., 1741. Attested by the Commissioners.... Papers, Bundle, 492
St. Augustine—Map with description. 1763.... 14, 20
St. Augustine and its environs, showing the allotments and names of proprietors. Moncrief, 1765.... 14, 41
St. Augustine—Sketch of City and Obviations.... 14, 2
St. Augustine—Plan of the City, Harbor, and Fortifications.... 14, 83
St. Augustine—Plan of King's Ground at. 14, 7
San Ildefonso—Mapa del Puerto de San Francisco en Nuevo Monterrey... Case 43, No. 15
Salem Fort—Plan of. J. Redknap, 1705.. 10, 13
Virginia—Map of boundary line between Virginia and North Carolina. W. Mayo, 1728.... 12, 2
Virginia—Map of boundary line with Carolina, 1728. Transmitted with Mr. Lorick's letter, Decr. 12. 1728.... 12, 10
Virginia—Map of boundary line with Carolina. Transmitted in Mr. Byrd's letter of June 27, 1729.... 12, 10
Virginia—Map of the Northern Neck, W. Mayo, 1737. In Major Gooch's letter of August 19, 1737.... 12, 8
Virginia—Northern Neck, Jefferson and Brooke, 1746. Attested. Transmitted with Sir Wm. Gooch's letter, June 10, 1747.... 12, 16
Virginia—Map of boundary line with N. Carolina. Original Commissioners, 1728. 13, 1
Virginia—General Map of the known and inhabited parts of.... 12, 15
Virginia—A true and accurate survey of the Rivers Rappahanock and Potomack. John Warren. Original. Attested by the Commissioners on the part of the Crown and Lord Fairfax. N. B. *Missing*.... 12, 14
Virginia—Map of part of, with the boundary lines of lands ceded by the Indians.... 12, 17
Virginia—Boundary between Virginia and the Cherokee Indians. J. Donelson, 1771. Transmitted by Lord Dunmore, March, 1772 (?) No. 7.... 12, 11

Correspondence.

ONE THING NEEDFUL.

TO THE EDITOR OF THE NATION:

SIR: In your article upon the English Corrupt Practices Act, comparing it with that of Massachusetts, you state "that the prime requisite of all such legislation is minuteness of detail—that is, specific and unmistakable provision for every form of corrupt or undue influence in elections." If you will pardon me, there is one thing still more important, and that is some provision for putting the law in force. In its total failure to do this the Massachusetts Act is so extraordinary that it is difficult to understand how such clear-headed men of business as those whose names are attached could have been satisfied with it.

It began by stating that candidates for nomination or for election must not do certain things, but nowhere is there the slightest hint that the doing such things will invalidate their election. All that the offender incurs is the remote risk of having to pay a fine of not more than one thousand dollars—a penalty ludicrously inadequate, even if it were imposed, to check any candidate who really sought office for corrupt purposes. The English penalty is much more logical and effective: that he who uses money in elections shall lose his election and his money too.

The act then proceeds to state that no money shall be expended except through a political committee, which must have a treasurer, and that such treasurer shall within thirty days file a statement of receipts and expenses with his town or city clerk. For failure to do this, which—at all events morally speaking—is much the least of the two, the penalty is much more formidable. The offender is to be punished by a fine of not exceeding a thousand dollars *or* (as if it were an equivalent) by imprisonment for not more than one year.

The astonishing part is that not one word is said by whom or how the punishment is to be enforced. It is true that if any treasurer of the hundreds of political committees throughout the State fails to make his statement, the Supreme Judicial Court and the Superior Court are given full equity powers to compel him to do so, presumably by threats of the penalty; but this seems by implication to cut off his liability for the original offence. It is not risking much to predict that nobody will ever be fined or imprisoned under that act.

There is something touching in the simplicity with which, when our citizens see wrong things done, they combine to get a law passed that they shall not be done any more, apparently with the idea that with a law-abiding people nothing more is necessary. In 1890 a law was passed that every lobbyist should make a return of his expenses. Certain guileless and conscientious persons did this, but it is notorious that a large number of other persons did not; yet nobody has molested or pursued them. When the old Roman jurists said "There is no law without a penalty," they had not had experience of Massachusetts, or indeed of any State in the Union, in all of which plenty of such laws flourish in full vigor.

It is the perfectly natural result of putting all power in the hands of legislatures which are not responsible for and care nothing about executive administration. In our insane dread of executive power, we have so emasculated and strangled it that there is not enough left for the ordinary requirements of government, and even those who hold executive office dare not raise their voices in criticism of their masters in the Legislature. It is impossible to believe, however, that, with the spirit of the American people, there will not be found sooner or later some man with the courage to tell them the exact truth; and when he does, he may meet with a response which will astonish a good many people.

GAMALIEL BRADFORD.

BOSTON, December 16, 1892.

THE PRICE OF SILVER.

TO THE EDITOR OF THE NATION:

SIR: I have read in your paper of December 1 your editorial entitled "Repeal the Silver-Purchase Act" with much interest. You say:

"Our Government is now buying 54,000,000 ounces per year of one of the products of the country—an article of merchandise which would otherwise be exported and would enter into our balance of trade with the world. At eighty-five cents per ounce this represents

$46,000,000 per annum. Our balance of foreign trade is $46,000,000 less than it would otherwise be, and this vacuum must be filled with gold or something equally good."

If the above is true, then it follows that Europe would buy 54,000,000 ounces of silver from us at eighty-five cents per ounce even if the United States Government bought none. That is about the best news we "Western silver cranks" have heard for a long time. Being an editorial statement of the *Nation*, it must be true, but we should feel better about it if you would kindly give your reasons for such important and positive statements. Will you kindly enlighten us on the subject?

Yours truly, J. J. HAGERMAN.

COLORADO SPRINGS, COL., Dec. 12, 1892.

[We presume that nobody misunderstood the purport of the paragraph quoted by Mr. Hagerman, which was that the buying of silver bullion by the Government intercepts one of the products of American industry on its way to a foreign market, and so renders the exportation of gold, or its equivalent, necessary. We did not commit ourselves to the belief that silver would sell at eighty-five cents per ounce if the Government's purchases were stopped. It might sell for less, or it might sell for more. Mr. Louis H. Ehrich of Colorado Springs, in a valuable publication, has advanced reasons for thinking that our Government's purchases of silver have really curtailed the aggregate demand for that metal in the world, and lowered the price by alarming other nations, who know perfectly well that such purchases must stop some time, and who apprehend that unloading will follow. Consequently they cut down their own purchases to the lowest notch, and substitute other things for silver wherever they can. The movement of Austria-Hungary to the gold basis was powerfully stimulated by the apprehension of American unloading of silver. Austria determined to unload first, and now India is hoping that she may be able to follow suit for the same reason. But it is a matter of conjecture whether the price would fall or not if the Sherman Law were repealed, and we are not committed either way.—ED. NATION.]

THE WASHINGTON PEDIGREE ASSURED.

TO THE EDITOR OF THE NATION:

SIR: Apropos of the Hayward will, printed in the *Nation* (No. 1429), Mr. Henry F. Waters writes to me as follows:

"It is certainly (apart from its great value for the light it throws upon the American family) the greatest discovery that has been made since I found that memorandum upon which my theory of the solution of the Washington problem (*i. e.*, as to the English connections) was chiefly founded.

"That theory undertook two tasks: first, to identify the Virginians, John and Lawrence Washington, with the eldest sons of Lawrence and Amphillis Washington, named in the will of Andrew Knowling of Tring; secondly, to identify Lawrence, the husband of Amphillis and father of the Virginians, with Lawrence, the Fellow of Brasenose College and Rector of Purleigh. When the theory was published we did not know that there was any evidence existing to show that the parson of Purleigh was married. Probably (as it appears) Col. Chester knew; but, if so, his knowledge died with him. Then Mr. Conway, looking up documents referred to in Chester's MSS., came upon evidence which established the fact that Lawrence Washington of Purleigh had a wife living as late as the latter part of September, 1649. Afterwards Miss Walford found the burial of Mr. Lawrence Washington at Maldon (the date being 21st of January, 1652). This was undoubtedly the burial of Lawrence of Purleigh, who had been holding a poor and miserable living a few miles from Maldon, to which there was no parsonage attached. He was, therefore, in all probability, making Maldon his headquarters. With these new facts it seemed evident that nothing really stood in the way of eventually establishing a complete parallelism between the two. On the one side we had Lawrence, the husband of Amphillis, undoubtedly M. A., in all probability a clergyman, married probably in 1633 (if we may judge from the age of his eldest son), deceased between 1650 and 1655; on the other side, Lawrence of Purleigh, M. A., a clergyman, married probably in 1633, when he gave up his Fellowship, and dead in 1652.

"In addition, I was able to prove an interesting connection between Lawrence of Purleigh and his family and Tring and Middle Claydon, the homes of Amphillis and her brother. Then the negative testimony was of tremendous value. Not another Lawrence, with all our searching, could be found, except the Purleigh man, who could meet the conditions; and now more than three years have elapsed, and we can still make the same assertion. M. A.'s do not grow on every bush. The records of Oxford have been ransacked, and we can pronounce it impossible to find there another Lawrence Washington, M. A. (other than the parson of Purleigh); and those at Cambridge have been so well examined that we can declare it altogether improbable that one will be found there. And nowhere else can we look for that other Lawrence Washington, M. A. In fact, there was no other—so you may imagine I felt quite sure that whatever evidence should turn up would be in confirmation of my theory, or certainly not opposed to it.

"Take the case of that sister of the two brothers in Virginia. We did not know what her name was until the will of her brother John was brought to light. According to my theory, she must have borne one of three names—Elizabeth, Margaret, or Martha. If any other, then the worse for my theory. We learned from that will that she was Martha, who, according to my theory, was the youngest sister of John, and he, as the youthful head of an orphaned family, would be likely to assist his youngest sister. Then came your discovery of that letter written in 1699 by John Washington of Stafford Co., referring to an Aunt Howard. Of course, this must be that Martha whom we have been discussing. Now comes your last discovery, showing us that this Aunt Howard (or Hayward, for they are one and the same) was that Martha Washington, the youngest sister of the two Virginians. And she mentions sisters in England. Here would be another danger to my theory if that had been a weak one. That theory demanded that Martha's sisters should be two in number, and named Elizabeth and Margaret. Note the obliging way in which Mrs. Howard says 'my *eldest* sister, Elizabeth' and 'my *other* sister, Margaret,' and the married name of the eldest caps the climax. The naming of Mrs. Elizabeth Rumbold clinches the matter. It is the keystone of the arch we have been building, securely binding the two sides together. When we find Mrs. Mewce, the known sister of Lawrence of Purleigh, calling Mrs. Rumbold 'niece,' and Martha Howard, the sister of John and Lawrence of Virginia, calling her 'sister,' we can no longer doubt the descent of our Washington from Lawrence Washington, the Rector of Purleigh."

WORTHINGTON C. FORD.

BROOKLYN, December 13, 1892.

MRS. GLASSE.

TO THE EDITOR OF THE NATION:

SIR: In the last *Nation* (p. 450) mention is made of "a French origin for Mrs. Glasse's 'First catch your hare.'"

One may read in Bracton, 'De Legibus' something over six centuries ago, at folio 191, where he is speaking of the necessity of possession in certain cases: "Et vulgariter dicitur quod primo oportet cervum capere, et postea 'cum captus fuerit' illum excoriare"—*i. e.*, "It is the common saying that you must first catch your buck and then, *afterwards*, skin him."

As to Mrs. Glasse, what is it exactly that she says, and where? In examining what purported to be her cookery-book once, I came to the conclusion that the saying attributed to her was merely a take-off of her stock remark in beginning the recipes: "*Take* a cup of flour," "*Take* an egg," etc.

Is this so? J. B. T.

CAMBRIDGE, MASS., December 16, 1892.

[Dr. Murray, in his 'New Dictionary,' under *case* (v.), 'to strip of the case or skin; to skin,' quotes Mrs. Glasse's 'Cookery' (1796), vi. 126: "Take a full grown hare and let it hang four or five days before you case it."—ED. NATION.]

Notes.

NEW matter and new pictures have been added to Mrs. Margaret Sidney's 'Old Concord: Her Highways and Byways,' for the second edition just published by D. Lothrop Co., Boston. It is a pretty book and appeals to the historical sense, the love of the picturesque, and to pure sentiment in eve measure. Not much can be said by way of praise of reprints of Herman Melville's 'Moby Dick' and 'White Jacket' (U. S. Book Co.). The print at least is large. The Harpers add 'Lady Silverdale's Sweetheart, and Other Tales' to their uniform edition of William Black's novels; and Charles E. Merrill & Co. extend their Brantwood Edition of Ruskin with two volumes, 'Aratra Pentelici' and the Edinburgh (1853) 'Lectures on Architecture and Painting.' Mr. Norton's prefaces to this series continue to furnish the reader with just *aperçus* of Ruskin's erratic genius, and a wholesome admonition to read with a critical understanding.

From the J. B. Millet Co., Boston, we have the first four numbers of 'Famous Composers and Their Works,' edited by Prof. J. K. Paine, Mr. Theodore Thomas, and Karl Klauser. This work when completed will contain articles by twenty-five European and American critics on all the famous composers of the past and present, with articles on music in America, Russia, etc., together with representative pieces or songs by each composer, selected by Mr. Thomas, and hundreds of portraits, facsimiles, etc., selected by Mr. Klauser. It is almost an *édition de luxe*, and will form a cyclopædia of music written by specialists, with all unimportant names omitted.

The first part of an 'Illustrated History of Norwegian Literature,' by Henrik Jäger, the well-known biographer of Ibsen, has recently been published by H. Bigler of Christiania. The work when completed will be in two volumes, the present issue forming the introduction to the second, including writers since 1814. The literary treatment by the author will be supplemented by the discussion of technical works by various specialists in theology, philology, medicine, etc. An added interest is given to this publication from the fact of its being the first serious attempt to treat Norwegian literature in its entirety. If it attain the excellence of the author's study

of Ibsen, it is to be hoped that it may shortly appear in an English dress.

The 'Grande Encyclopédie' in course of publication by H. Lamirault & Cie., Paris, has arrived at the United States (États-Unis), and upon this very full article the competent pen of A. Moireau has been employed. The historical summary is brought down to the eve of the late election, with its opposing issues—"on one side, the McKinley Bill and excessive protection; on the other, a moderate lowering of duties and an economic administration."

The first part of Mr. Bernard Quaritch's 'Contributions towards a Dictionary of English Book-Collectors,' as also of some foreign collectors whose libraries have been incorporated in English collections or whose books are chiefly met with in England, dealt, it may be remembered, with Cranmer and B. Firkheimer. Parts II. and III. have since appeared, with eight and five collectors noticed respectively, beginning with Mary, Queen of Scots. Among the deceased, Henry Huth (1815-1878) is the most modern, and he is honored with a very attractive etched portrait. Mrs. John Rylands is deservedly admitted, by reason of her public-spirited purchase for Manchester of the Althorp Library in August last, as well as for her own private collection, which has cost her about $100,000. There is also a brief notice of Benjamin Heath Malkin (1769-1842), whose translation of 'Gil Blas' has been fraudulently attributed to Smollett, as was lately set forth in these columns. He was a graduate of Harrow and of Trinity College, Cambridge, became head master of the Free Grammar-school at Bury St. Edmunds, "and acquired a certain small literary reputation as an author," by the translation aforesaid and by his 'Scenery, Antiquities, and Biography of South Wales.' His library sold for nearly $18,000. Horne Tooke is yet another name on Mr. Quaritch's list, and George John Earl Spencer, of whom a steel portrait after Thomas Phillips is reproduced. Other embellishments of these two parts are a binding of Mary Stuart's, and the first and last pages of the Mentz Psalter of 1459, from Mr. Quaritch's vellum copy.

'The Book-Lover's Almanac for the Year 1893,' of Duprat & Co., is a Franco-American production, the major part of the text having been prepared by M. Henri Pène du Bois, and the sketchy full-page designs in color being by Henriot, while the De Vinne Press has manufactured the little volume. The result is attractive enough, and the contents are neither ancient nor unreadable. One of the illustrations represents the contest in Boston last April for Poe's 'Tamerlane,' which fetched $1,850—"the dearest book of the century," the editor calls it, and Henriot dubs the auction-room "Poe's Pantheon," in contrast with his humble home. Other views are of Sotheby's, the Hôtel Drouot, the Grolier Club, etc.

B. Westermann & Co. send us the second issue of what has now become an "annual of the learned world," *Minerva*, published at Strassburg by Karl J. Trübner, under the editorial direction of Dr. R. Kukula and K. Trübner. This invaluable compendium begins with a survey of the constitution of universities in Europe and India; and then follows in alphabetical geographical order a list of universities, technical schools, scientific institutions, libraries, etc., the world over, with the personnel, which is all caught up in a *Personal-register*, or index of persons, at the end. Assistance has been freely rendered by scholars on this side of the water. The little book is beautifully printed, and though it contains 827 pages, besides 80 of advertisements, it is not inconveniently bulky. A strong etching of Theodor Mommsen initiates a series of illustrations in the years to come.

Mention of two belated volumes will close our account with the juvenile publications of the season. In 'Christmas Every Day, and Other Stories' (Harpers) Mr. W. D. Howells gathers together some of his children's stories already printed. The book contains much that is bright and original, but the free range it gives to some ill-behaved children mars it seriously. For rather young children is 'The Three Grandmothers, or Rainy Day Stories,' by Mrs. Sarah E. Heald (Philadelphia: Sunshine Publishing Co.). The grandmothers are at their best when they relate incidents of family history, like the concealing of a British officer in Revolutionary times, a little girl's saving of the burning house, etc. Some of the stories about pet animals will find a welcome, too.

For a number of years past, Prof. Forel of Morges, Switzerland, has contributed a series of articles to the scientific journals of his country on the natural history of Lake Geneva in all its aspects. The result of his extended study now appears in a treatise, 'Le Léman, monographie limnologique,' in three volumes, of which the first is now before us (Lausanne; Rouge). An excellent map of the lake is included. The universities on our Great Lakes have here a model for the work of some of their professors. With us, as in Switzerland, the origin of lake basins has excited much discussion, and Forel's contribution to the settlement of the question in favor of the warping of preëxistent valleys deserves careful study.

Messrs. Margerie and Schrader have contributed to the Annual of the French Alpine Club an excellent summary of the structure of the Pyrenees, from which several interesting conclusions are drawn. The most important of these concerns the occurrence of an upward divergence in the planes of folding and fracture from the axis of the range, known as the fan-structure, similar to that observed in the Alps, but here indicated by different structural details. The essay is accompanied by a well-executed geological map, and by a full reference to the geological literature of the region.

Two papers of more than usual importance in the December number of the *American Journal of Science*, by Mr. C. D. Walcott of the United States Geological Survey, and Prof. G. H. Williams of Johns Hopkins University, merit attention from the serious changes of interpretation that they call for in the understanding of the rocks of South Mountain, between the Susquehanna and Potomac Rivers, from that previously given them by the Pennsylvania geologists. The first point, brought out by Walcott, concerns the relative attitude of the several members in the rock series; he maintaining that the normal order of superposition has been frequently reversed by thrust-plane faults. The occurrence of such inversions of structure, first brought prominently to the attention of geologists in the Scotch Highlands, and since then in various other regions, as in Alabama by Hayes and others, does not seem to have been sufficiently considered in the Pennsylvania reports; hence the need of their correction when the inversions are discovered.

The second point, announced by Williams, concerns the origin of certain rock masses, heretofore regarded as sedimentary, but now clearly shown to be volcanic. Ancient lava flows, probably of an age similar to that of the lavas in the Lake Superior copper region, with a plentiful amygdaloidal and brecciated structure, are detected in great volume; in part altered chemically, in part altered also mechanically, so as to take the appearance of slates, under which name they have generally been described in the Pennsylvania reports. The reason why their true nature has not previously been recognized is in part the relative neglect of petrographic methods by the members of the Pennsylvania Survey, and in part the influence of the theoretical views of Hunt, by whom these rocks were classed as altered sediments. A third item that certainly deserves mention in connection with these papers, is found in a footnote by Prof. Williams, to the effect that many of the facts announced by him have been collected by Miss Florence Bascom, a student at the Johns Hopkins University, whose thesis, now in preparation, will go far toward furnishing detailed proof of the general conclusions here set forth in brief form. In short, the results obtained by two generations of geologists in a region to which much attention has been directed, are now reversed by the introduction of modern methods by a woman.

The Scientific Alliance of New York, an advisory union of the seven principal scientific societies in this city, invites contributions toward a fund for carrying out its objects, and, to begin with, towards publishing the addresses delivered last month in exposition of the plans of the Alliance. Subscriptions may be sent to Prof. N. L. Britton, Columbia College.

The Association of Officers of Colleges in New England voted, at Williams College last month, to recommend the introduction in New England grammar-schools (1) of elementary natural history in the earlier years, to be taught practically rather than by books; (2) of elementary physics in the later years, to be taught by the experimental or laboratory method; (3) of elementary algebra at an age not later than twelve; and (4) of elementary plane geometry at an age not later than thirteen. Also, the offering of opportunity to study French, or German, or Latin, or any two of these languages from and after the age of ten, and "increased attention in all classroom exercises in every study to the correct and facile use of the English language." These reforms are to be made possible by reducing the time allotted to arithmetic, geography, and English grammar.

In a paper recently read before the German Historical Society of this city and the Pionier-Verein of Philadelphia, on the "Sources of German-American History," Mr. J. G. Rosengarten described the surpassing wealth of manuscripts and books in the library of the late George Bancroft. He gave a particular account of this material, derived from German archives, journals of the German regiments and their officers and men serving in this country during the war of Independence, together with a great collection of original and unprinted State papers, particularly those of Frederick the Great and other German and foreign sovereigns, both those favorable to the American struggle for independence, and those whose troops were hired to Great Britain to fight with the English Army against the colonies. He urged an appeal to Congress to purchase the library for its intrinsic value and as a memorial of its late owner. Mr. Rosengarten further suggested that the German-American historical societies should join in procuring complete and descriptive catalogues of the manuscripts in the German Archives at Berlin, Marburg, Cassel, etc., many of which have never been printed, relating to the part taken by Germans serving in America during the Revolutionary War.

Capt. F. D. Lugard, the recent Administrator of Uganda, modestly calls his interesting address before the Scottish Geographical Society, published in its magazine for December, "Characteristics of African Travel." It is full of bright and picturesque descriptions of people, scenery, and incidents of his three years' life in East Africa. The most striking of these was the parade of the remnant of Emin Pasha's troops on the plain above Lake Albert in the summer of 1891. After long negotiations they had been prevailed upon to enter the British Company's service, provided the Khedive gave his consent. These Sudanese, with their families and followers, 8,200 in number, were stationed by Capt. Lugard in five forts built to protect Uganda from the raids of the King of Unyoro. The Wa-ganda are described as a "singularly intelligent people, excessively eager for knowledge of all kinds, whether it be of reading and writing, of religion, or of useful artisan trades. Those few who have had an opportunity of learning any trade have become most superior workmen. They will construct you a new stock to a rifle which you will hardly detect from that made by a London gun-maker." Very remarkable is the difference at times between two tribes living close together. On the eastern shore of Lake Victoria you pass at a single step from open plains and grain-fields, inhabited by absolutely nude savages, to a country of dense, endless banana groves, and plantations of potatoes and cassava. Here the people are clothed, men and women alike, "in the beautiful soft *mbugu*, made from the bark of various figs."

The commercial importance of Uganda was made the subject of an address before the London Chamber of Commerce by Capt. Lugard. He rates it very high, not, of course, in the immediate future, but on the completion of the railway from the coast to the Victoria Nyanza. Ivory, of which there are "vast preserves" about the sources of the Nile, would at first be the principal article of export. After this he apparently places coffee, which is indigenous in Uganda, and, even in the wild state in which it is now found, produces a berry of good flavor. Large areas of black porous soil, especially adapted to the growing of cotton, abounds, and as the Sudanese whom he ad settled in the country had brought with them cottonseed, "by this time he had no doubt they had extensively planted it." There were also tracts suitable for the cultivation of wheat and other cereals, as well as tobacco and vines, while the forests abounded in rubber and many kinds of trees producing gums. The natives also are beginning to demand European wares, the last request to him of the principal chief being "that he would send up white donkeys and opera glasses, for which they would pay any price, while stationery, utensils, etc., would be eagerly bought." He closed with an earnest appeal for the retention of the country, chiefly on the moral ground that England was pledged to this by the treaties which he had made with the natives in her name.

We have received the first number of the monthly *American Athenæum*, devoted to literature, the arts, and sciences (New York: Mitchell's), a quarto sheet of 32 pages, of rather heterogeneous contents; George Augustus Sala furnishing "Gossip of the Month," M. Fène du Bois an article on Renan, etc. Also, the first number of the monthly *Good Citizen*, "the only official organ of the Columbian College of Good Citizenship," "a new organization with its principal office located at Columbus, O.," and whose motto is "Education, Fraternity, and Fidelity." Also, the first number of *Childhood* (New York: A. L. Chatterton & Co.), "a monthly magazine of all that concerns the welfare of the child," edited by Dr. George William Winterburn and Florence Hall. Prospectuses are before us of *American Young People*, having "for its prime object the education of the youth of the nation in the principles of patriotism and true citizenship," to be published next month in Chicago; and of *Modern Art*, another Western enterprise, for which subscriptions may be sent to J. M. Bowles, Indianapolis, Ind. This journal will be, in its periodic issue, of the four seasons, limited at present to 300 copies, will be handsomely printed with one illustration to each number, and the "leaves will not be wired, but stitched by hand to open flat."

We have received from Franz Hanfstaengl (Munich and New York) a set of remarque-proofs on Japan paper of photo-engravings of Dutch and old German masterpieces at the scale of the original, and a few isochromatic reproductions of modern German paintings, such as the famous "Blind Girl" of Bruno Figlhein, the leader of the new school in Munich. The five masterpieces are Rembrandt's two best corporation pictures, "The Lesson in Anatomy" and "The Syndics of the Clothing Guild," Paul Potter's "Young Bull," Franz Hals's "Banqueting Officers of the Yeomanry," and, slightly reduced in scale, Dürer's Munich portrait of himself. All these, if in different degrees, are admirably effective reproductions, which approach the quality of etchings. From the same publisher we have received a copy of C. W. Allers's large album of Capri drawings. As a delineator of life in Capri, Allers is the direct successor of the younger Kaulbach. His series of sixty-two typical scenes and persons on the island are of mixed quality. Many of the pictures are humorous, after the manner of the Henschel drawings, though the humor is often ponderous. Among the nine colored landscapes the best is a street corner in Capri, with a bright red poster on the wall. The others show but an indifferent grasp of color, and cannot compare with some of the beautiful landscapes of Kaulbach. The portraits are the best part of the book.

—The December *Atlantic* affords its readers a selection from Lowell's early letters, written to Mr. W. J. Stillman, which gives a foretaste of the quality of his correspondence, and excites interest in it. The period which these few examples illustrate is that of the first series of public lectures delivered in Boston, and of Lowell's stay abroad while preparing to enter on his duties as a professor at Harvard. They disclose his habit of work, its rapidity, spontaneity, and irregularity; but, better than that, they show how fully and freely he put his whole individuality in play in writing to his friends, so that the letters as a whole may be looked to as the most complete expression of his diverse nature. The attitude of kind consideration to those whom he could assist, of simple thoughtfulness in friendly ways, his generosity, and the youthfulness of his temperament, are noticeable; and Mr. Stillman's frankness in respect to their mutual relation puts the brief story in its proper setting. Mr. McLaughlin's historical analysis of the negro question as developed in Mississippi is the only other paper of special importance. He describes the situation and the devices that have been resorted to in that State, with some discussion of the legal points that may be involved, and the bearing of the new constitutional provisions on the question of representation. He brings out the undemocratic methods used in the affair, and demonstrates a difference between the State and the general theory of our Government which is sufficiently indicated by the fact that the Mississippi Constitution was not submitted to the people for adoption—a course which has not been followed in any Northern State since 1818. The account given by Mr. McLaughlin takes into consideration all the circumstances of the case, and suggests many reflections upon the problem of democracy as a political order in the South.

—*Harper's* is in holiday dress, and, as usual at the season, takes notice of Christmas as one of the motives of Christian art. The late Theodore Child furnishes the text for a series of types of the Madonna, taken, with one exception, from Italian painting of the great period. Miss Wilkins makes her début as a writer of plays, and her prose drama has the interest of curiosity. The subject is Giles Corey and his fate under the dominance of the witchcraft delusion in Salem. The characters are few, and the plot, such as it is, involves a love story, and jealousy as the direct occasion of the charges of witchcraft brought. The play will not stand analysis, even as a literary production, and there is no action in it; the dialogue form is a mere convention. All that is really given is a short story with such characterization and atmosphere as belong to the sketch, and even within such limits no unusual insight into Puritan life is shown and no true power in rendering it. The narrative has, in fact, become trivial under the treatment: the demented old servant, crawling under beds, and the foolish child with her doll, and the girls with their chattering perjury, are out of the pale of serious writing; and the lover is as colorless as he is useless. Old Giles is the only character with a meaning, and he is unable to make himself felt under such disadvantages. Thackeray's illustrations to "Lord Bateman" are interesting, and Mr. Aldrich's long poem, "Nourmadee," displays his qualities in light verse with full success. The "Editor's Study" takes on something of the manner of the old "Easy Chair," which is perhaps its purpose; and it comes now with illustrations—graceful prose being no longer able to justify its separate existence in these pages.

—The *Century* also wears a decorative cover, and its Christmas tribute is likewise of the Madonna in art; but the selections are confined to modern painting, of which the examples given are interesting both in artistic and in other ways. A distinct democratic quality, for instance, is to be observed in several, in the Dagnan-Bouveret which is the frontispiece, and in "The Mother," by Simmons. An appreciative criticism of the work of the American painters is given by Mr. Fraser in the "Open Letters," which may easily be referred to. A strong, simple rendering by John Malone of the poem of "The Cid," exceptional in directness and form of phrase and telling in its full rhymes, is elaborately illustrated with picturesque effect. The sketches of "Picturesque New York," both cuts and text, are novel in what they reveal of common sights in the city. Salvini's "Autobiography" opens with characteristic Italian scenes and persons, and has from the start the atmosphere of the theatrical world. In the more serious portions of the number Mr. Gladden's paper in the "Present Day" series, on the

"Problem of Poverty," is of most interest, and should be considered by those who desire to pass to a scientific and not merely sympathetic frame of opinion regarding social questions. He bases his conclusions, or rather his generalizations, upon the statistical view of the population of London; but he finds much to say of nearly universal application. His remarks on the overestimate of intemperance as a cause of poverty, on the margin of the unemployed necessary as a constant quantity in the economic system as organized, on the reasons why women's labor is objected to by male laborers—not from the prejudices of sex, but because of the depression of wages on an unequal basis of competition—on the true character of the isolated laborer, ready to underbid to the point of starvation, as a factor in the industrial community, are all admirable in their temperance, their coolness, and their impartiality; they show how much must be granted of the case of workingmen from the point of view of rational analysis, independent of all "movements"; and they are especially instructive in view of the prejudices they successfully combat.

—*Scribner's*, like its companions, puts a Christmas wreath on its cover, but does not in its contents show any special attention to the holidays, unless the colored frontispiece be regarded as a Christmas card. Art, however, has a large share in the number. Mr. Will H. Low writes of the "Mural Paintings in the Pantheon and Hôtel de Ville of Paris," and joins with Mr. Kenyon Cox in an essay on "The Nude in Art," of which each furnishes an example. Mr. Millet writes of the artistic decoration of the World's Fair, in the same strain of pleasure in its success which is universally heard wherever the work of the Art Guild, which has taken so strong an interest in the Fair, is spoken of; and some of the figures are effective, even on the page, to a degree that is very satisfactory to observers of American art. Prof. Boyesen continues this group of papers by one on Norwegian painters, of whose works some examples are given. The number is very closely devoted to artistic interests, and has presented its topic with much diversity and skill.

—Vierge's illustrations to Quevedo's 'Pablo de Segovia' (London: T. Fisher Unwin; New York: Putnams) are so exceedingly clever that one would have been tempted to say that it is impossible to praise them too highly if Mr. Pennell had not, in his prefatory "Comments," performed that seeming impossibility. It only raises the combative spirit in the reader to tell him that the work he is about to look at is better than Rembrandt's, or Holbein's, or Dürer's; that only "the few artists who are artists" can be expected to understand it; that the world is mainly composed of blockheads, and that he must expect to be considered one himself if he does not at once admit that modern illustrators are the greatest artists that ever lived and the most shamefully neglected, and that this special illustrator is the greatest of his tribe. Neither is it judicious, even if it were true, to call the Sistine Madonna "as blatant a piece of shoddy commercialism as has ever been produced." One does not win converts so. And M. Vierge's drawings are quite able to get on without such ill-judged rhetoric. He is one of the most skilful of pen-and-ink draughtsmen, knows his material perfectly, and handles it with great simplicity and mastery, and is, withal, possessed of much grim and somewhat coarse humor. Add to these qualifications the assured knowledge of local color natural to a Spaniard, and you have enough to make an exceedingly good and interesting set of illustrations, which have gained greatly by the increased size of the reproductions in this edition. Mr. Pennell has said so much that we can hardly say more. The book is magnificently printed on heavy glazed paper and handsomely bound in parchment, and has, besides the 110 drawings of M. Vierge, a beautiful reproduction of Velasquez's portrait of Quevedo.

—It is hardly worth while for any one to waste much time over the 'Preferences in Art, Life, and Literature' of Mr. Harry Quilter, M.A., which are gathered together in a bulky and very ugly volume and published by Swan Sonnenschein & Co. in London and by Macmillan in New York. It is a very scrappy collection of miscellaneous articles, the greater part of which have appeared in various English periodicals during the past seventeen years. So much of it as we have been able to read gives no idea of what may have been considered the author's qualifications for criticism. The ability to write the English language is certainly not one of them, for a worse style is seldom met with, and many sentences might pass for specimens of "English as she is wrote," or of 'Arryese, as the reader may elect. It is well known that "the ingenious Mr. Whistler," as Mr. Quilter calls him, delights in worrying the critics, and one of his pets was Mr. Quilter himself, whom, by depriving him of the initial letter of his name, he made a type of the cockney Philistine. It was a very refined piece of torture, but a little reading of this book convinces us that it was not altogether unjustifiable, and had more than a verbal felicity. A ranker outsider never wrote of art. There are a good many illustrations which are not very good, and most of which have no discoverable connection with the text. The most interesting are those which show the quite astonishing technical ineptitude of the Pre-Raphaelite brethren.

—The Academy of Natural Sciences of Philadelphia has just awarded to Prof. Eduard Suess of Vienna, the distinguished orator and leader of the Left in the Austrian Reichsrath, the Hayden Memorial Medal and accompanying fund, in recognition of the eminent services of this scholar to the cause of geological science. This honor is well deserved. For upwards of forty years, Prof. Suess has been an indefatigable worker in the domain of geology and palæontology, and it can be justly said of him that there is scarcely a paper from his pen during this period which does not possess more than ordinary merit. To a mind richly stored with facts is added a perceptive and reasoning faculty which is as broad and far-reaching as it is brilliant, and from which have emanated many of the more luminous conceptions that are to-day inseparably bound up with the "new geology." The Suess-Neumayr theory of mountain constructions, which recognizes a one-sided thrust as the dominant motor of orographic flexures—a view, however, that has not yet been accepted by all geologists—is principally the creation of his mind; to him, likewise, must be credited the conception, or at least the elaboration, of the hypothesis that the earth is undergoing a process of continuous sectioning (*Verstückelung—i. e.*, of having its superficial parts dropping in "blocks" towards the planetary centre). Prof. Suess is a firm non-believer in secular movements of elevation and depression of the continental areas, and an equally firm upholder of the doctrine of oceanic instability, viz., that the relative changes in the position (levels) of the land and water are due primarily to differential movements of the oceanic surface. This conception, which has only latterly begun to gain a foothold among English and American geologists, has long served as a starting point with many of the foremost geologists of the continent of Europe. Prof. Suess's most extensive work is the 'Antlitz der Erde,' of which two volumes have thus far appeared (1885, 1888), which shows the impress of the master on almost every page, and which, for breadth of scholarship, can find a fitting place only between the 'Cosmos' of Humboldt and the 'Origin of Species' of Darwin.

—At the fortieth annual meeting of the State Historical Society of Wisconsin, on December 8, the number of books and pamphlets in the library was reported as amounting to 152,474, more than half of them bound volumes. The accessions during the last year were 9,802. In the picture-gallery there are 168 portraits, most of them of prominent Wisconsin pioneers in all lines of life. An address was given commemorative of Daniel S. Durrie, for thirty-seven years librarian, who died in service last August. Among other addresses was one proving that slaves had been held in Wisconsin. This discovery explodes a long-prevalent popular delusion, but it seems indubitable. One of the slaveholders, George W. Jones, still survives in Dubuque, Iowa. The first wave of settlers flowed into Wisconsin from the South, and its object was lead-mining. Slaves could be profitably employed in mining, and so were naturally brought North by their owners. At least a dozen came with Mr. Jones, who, in 1827, established himself in the southwestern part of the State, and was the first man to enter land there. But Yankees from the East were soon in the region, and a negro directly sued Mr. Jones for wages. Though he was non-suited, the Court holding that a negro was not legally capable of bringing a suit, Jones's victory was not lasting. Gov. Dodge also brought in slaves from Missouri, but only those negroes he had there owned who chose to come with him on the promise of freedom at the end of five years, as well as a forty-acre lot and a yoke of oxen for each man. When negroes became legal persons, one (and, so far as appears, only one) brought suit at Lancaster and obtained papers of manumission. In Plattville the Rev. James Mitchell, who had two female slaves when the leaven of free-soil principles began to work, sent them back into a slave State. For this proceeding, the sole instance of its kind, he was brought to trial before the authorities of his church. These slavish rudiments were confined to the western portion of Wisconsin. In the east, which was occupied by immigrants from the East, only one slave, a girl at Green Bay, has been detected. She was probably held by a Southern office-holder. In all Wisconsin the irrepressible conflict began at once and was soon over.

—A correspondent writes:

"Adding anything to what Dr. Elliott Coues writes in No. 1432 regarding the spelling of Capt. Clark's name may seem a wasteful and ridiculous excess. But he speaks of that spelling as 'in question downward from 1806.' The spelling which he now advocates appeared thirty-six years ago in the collections of the Wisconsin Historical Society, and has been employed there 'without question' ever since. Had Dr. Coues seen a volume of Clark manuscripts which was long ago laid up in the archives of that Society, he would himself in 1876 have had no question about the spelling of Clark's name, much less would he have favor-

ed a false orthography. This volume of Clark papers fills 225 pages. It contains all those varieties of document which have at length made Dr. Coues reverse his old opinion. It contains some evidence unknown to him. It opens with a letter of good advice written to Clark by his father in Richmond, November 27, 1781. The name William Clark occurs more than a hundred times, and always, save in two instances, without a final *e*. In two cases (p. 151 and p. 201) it is spelled Clarke, not Clark, by Major Wyllys, and by Gov. St. Clair. Capt. Clark's own signature is unmistakable and is even a nobler hand than Washington's. It is surprising that Dr. Coues, in speaking of the first edition, did not state that both in the copyright and on the map the name Clark does not end in *e*. One of the Wisconsin letters was written by Capt. Clark near Bismarck in the spring of 1805, after which nothing was heard of him till he had pushed on to the mouth of the Columbia and recrossed the continent to St. Louis."

—As our readers are aware, two biographers have recently taken Cotton Mather in hand. Their researches among the ancient sources we propose to supplement with a bit of evidence derived indirectly from the same, but directly from a very modern and very unexpected source, to wit, Dr. Murray's 'New English Dictionary, on *Historical* Principles.' The late Mr. Sibley, in the third volume of his 'Harvard Graduates,' says of our divine: "Without doubt he was the chief author of 'The Declaration of the Gentlemen, Merchants, and Inhabitants of Boston, and the Country Adjacent, April 18, 1689,'" which was the signal for the revolt against Sir Edmund Andros. Mr. Whitmore, in reprinting this Declaration in his 'Andros Tracts' (i., 11), quotes Gov. Hutchinson's shrewd guess that, judging "by the style and language," it was "the performance of one of the ministers of Boston (Mr. Mather) who had a remarkable talent for very quick and sudden composures." Now in section x. we read: "And yet that our calamity might not be terminated here, we are again Briar'd in the perplexities of another *Indian War*." This metaphorical use of *briared* is sufficiently striking to send one to Dr. Murray for the usage in regard to it, and we find two citations, Hooper in 1554, and Cotton Mather himself in his 'Magnalia' (1702), in these words: "New England was miserably briared in the perplexities of an Indian war." This is so conclusive in its identification that had Mr. Sibley had it before him, we are sure he would have included the Declaration in his voluminous Mather bibliography, as we think he would have been warranted in doing, with Hutchinson, from the style alone.

FLORIO'S MONTAIGNE.

The Essays of Montaigne, done into English by John Florio, anno 1615. Edited with Introduction by George Saintsbury. The First Book. London: David Nutt. 1892. 8vo, pp. xxix, 379. [The Tudor Translations, edited by W. E. Henley. I.]

THE title on the back of this volume is happily descriptive. It is *Florio's* Montaigne that we have here; not the man himself, nor even a very accurate reflection of him. But "Florio's" Montaigne is in itself interesting. As Mr. Saintsbury reminds us, it is one of the few translations that have been widely known, not only by men of letters, but by the general reader. It was for two or three generations read by the English people with full acceptance, and exerted an undeniable and traceable influence on English thought through the medium of English poets (Shakspere at their head) and English philosophers (represented by Bacon). Mr. Saintsbury speaks of a passage in the "Tempest" as "almost" unmistakably close to a passage in Montaigne. That there is absolutely no possibility of question of this fact the following citations will show.

Montaigne (*Florio's* Montaigne), speaking of the newly-known people of Brazil, says:

"It is a nation that hath no kind of traffike, no knowledge of Letters, no intelligence of numbers, no name of magistrate, nor of politike superioritie; no use of service, of riches, or of povertie; no contracts, no successions, no partitions, no occupation but idle; no respect of kindred but common, no apparel but natural; no manuring of lands, no use of wine, corn or mettle. The very words that import lying, falsehood, treason, dissimulation, covetousness, envy, detraction, and pardon, were never heard of amongst them."

Shakspere, representing old *Gonzalo* describing what he would do if he had "plantation of this isle" and were lord of it, says:

"I' the commonwealth I would by contraries
Execute all things; for no kind of traffic
Would I admit; no name of magistrate;
Letters should not be known; riches, poverty,
And use of service, none; contract, succession,
Bourn, bound of land, tilth, vineyard, none;
No use of metal, corn, or wine, or oil;
No occupation; all men idle, all;
And women, too, but innocent and pure;
No sovereignty."

As Prof. H. Morley has pointed out, Montaigne wrote "nulles occupations qu'oisifves [none but easy occupations]," which, being phrased by Florio as "no occupation but idle [ones]," Shakspere was led by the construction of Florio's sentence to write "no occupation; all men idle, all"—a not quite acceptable enlargement of Montaigne's thought.

Florio's Montaigne is the only book which we know positively that Shakspere owned. One of the poet's few autographs is in a copy possessed by the British Museum. And, oddly enough, another copy of the book which the Museum purchased with a view to protecting the Shakspere autograph, turned out to have the autograph of Ben Jonson in it. It is chiefly associations like these with the book that give it its value, and it may be questioned how much value a mere reprint of it has. The three editions that have appeared in the last six years—those of Prof. H. Morley, of Mr. Justin H. McCarthy, and now of Mr. Saintsbury—seem a little unnecessary, especially since no one of these so-called "editors" has in any sense properly *edited* the book. Mr. Morley's is a convenient volume for reference. Mr. McCarthy's are good little volumes for the pocket. Mr. Saintsbury's has no special merits, and has the great demerit of being, as yet at any rate, only the First Book of the Essays (by far the least interesting portion). The air it wears of possessing some interest for bibliographers has little to rest upon. A short bibliographical note states that the title is reprinted from the first edition of 1613. The first edition (a folio) appeared in 1603; the second (again a folio) in 1613; but Mr. Saintsbury's own title says, "Done into English by John Florio, anno 1615," which is not easily to be explained.

The simplest duty of an editor is to correct misprints, but Montaigne's English editors seem never to think of comparing their text with the original, and so edition after edition appears, repeating passages as unintelligible as this: "Epicurus doth dispense with his age touching the foresight and care of what shal insue." The original is, "Epicurus dispense son sage de la prevoyance et soucy de l'advenir."

It is difficult to imagine editing Florio's Montaigne without acquiring (if it were not already acquired) an interest in Montaigne himself; but it is still more difficult to conceive how any one interested in Montaigne and editing Florio can fail to point out the injuries constantly inflicted by the translator on his author. Florio's English has an Elizabethan quality which often makes his own phrases effective, but his mind abounded in the conceits of Euphuism, than which nothing can be more alien from Montaigne's manly vigor of expression and native simplicity of phrase. However diffuse and wandering may be Montaigne's thought, his style is never lax; it is always the style of a writer whose familiarity with Latin authors was equalled and concealed only by his love of his own tongue; of a writer who, with others, was shaping his native language into forms not so much of grace as of lucidity, of a noble clearness whose eloquence was wholly different in character from the noble cloudy richness of Elizabethan eloquence. Florio is on the whole excellently homely, pithy, and idiomatic; but he frequently does not catch the sense of a passage, and entangles himself in consequence in complete unintelligibility; and there is hardly a sentence in which his English love of *richness* does not play at cross purposes with Montaigne's deep sincerity. Over and over again, on every page, where Montaigne uses one epithet, and that a fitting one, Florio employs two, hastily chosen. On p. 63 (for instance) "those glorious and farre-fetcht remonstrances of the Emperor Charles the Fifth" stands for "ces belles remonstrances," etc., where "belles" is used in precisely the ironical sense of our word *fine* and needs no addition. But this is also a case where certainly the editor should point out that Florio used "glorious" in the old sense of *boastful*. But Mr. Saintsbury is guilty of worse sins than indifference to the text: he is indifferent to the author—the author of the editor's author—to Montaigne himself; he is indifferent to Montaigne's good repute, and in his Introduction he once more gives currency to a complete misunderstanding of Montaigne which has prevailed for nearly forty years, ever since it was created by M. Grün in his valuable 'Vie Publique de Montaigne.' The matter is in itself trifling, and turns on a short letter, but so much weight is continually laid on it—such extraordinary weight by Mr. Saintsbury now—that it is worth while to state the facts briefly, or, at least, as briefly as possible.

In 1585 Montaigne was Mayor of Bordeaux. A terrible pestilence broke out, in consequence of which the emigration from the city was so great that, in the phrase of the Maréchal de Matignon (an eye-witness), "no one remained who had the means of living elsewhere." Montaigne's term of office was to expire on the 1st of August. A few weeks before that (it is not known exactly when), he left his own house, near Bordeaux, and, with his old mother, his wife, his young daughter, and his servants, entered on those terrible months of dangerous wandering which he describes in so calm and brave a tone in one of his last essays. Under these circumstances he wrote on the 30th of July to the "Jurats" (Council) of Bordeaux that he would leave it to them to judge whether any service he could do them by his presence at the election to take place the next day but one could be of sufficient importance for him to venture into the city. He proposes to meet one of them at Feuillas (a castle on the opposite bank of the river), there to transact the forms necessary to be gone through with on the occasion. This conduct on the part of Montaigne has been twisted into an expression of lamentable weakness and cowardice, and never has it been so perverted to mean something not in the least implied in

the facts as by Mr. Saintsbury. He treats it in the same spirit that dictates the next sentence: "A hundred more or less similar instances of meanness, selfishness, candid cynicism . . . receive . . . illustration in Montaigne." A lover of Montaigne cannot hear such words unmoved. He knows them to be false. Familiar with the large virtuousness of Montaigne's life, whether of thought or action, he indeed feels himself rather than Montaigne wounded by so baseless a judgment. His indignation is soothed by the remembrance of the hosts of good men who have honored Montaigne, by the remembrance of that tomb of Auguste Collignon which Mr. Emerson saw in Père-la-Chaise—a name unknown, of a man who died in 1830, aged sixty-eight years, and who, said the stone, "lived to do right, and had formed himself to virtue on the Essays of Montaigne."

THE WORLD'S GREAT STREETS.

The Great Streets of the World. Charles Scribner's Sons.

ALTHOUGH this handsome reprint from *Scribner's Magazine* is plentifully illustrated, it is noteworthy for the quality rather of its literary matter than of its illustrations. Mr. R. H. Davis treats of Broadway, Mr. Andrew Lang of Piccadilly; the Boulevards of Paris are described by the facile pen of M. Francisque Sarcey; Mr. W. W. Story tells us about the Corso of Rome; Mr. Henry James writes of the Grand Canal at Venice; Herr Paul Lindau gives the history of Unter den Linden, Berlin, and Miss Isabel F. Hapgood that of the Nevsky Prospekt, St. Petersburg. Such names lead one to expect interesting articles, and, as each writer has treated his subject in his characteristic manner, the book is as witty and amusing and instructive as it well could be. As the writers have been chosen for their special knowledge, so the illustrators have been chosen according to nationality; but they are very unequal in quality of work. It is easy to detect the abuse of the camera in some of them.

Of the essays, Mr. Andrew Lang's on Piccadilly is quite the most delightful reading. He takes us through this crowded thoroughfare as a friend would do, giving us all the amusing gossip of those heroes of the past, real and imaginary, whose memories haunt the houses which line this street. He begins with the history of Piccadilly from the old Elizabethan times, when Hyde Park was a forest, with "herbege, pannage, and browze wood for deer," being frequented also by robbers until many years later. Even in 1662 no street of Piccadilly existed; it was merely the Reading Road leading into London from the west. Mr. Lang finds the first mention of the name Piccadilly in Gerard's 'Herbal' of 1596, in which the author remarks that on the banks of its dry ditches "the small white buglosse," or ox-tongue, is to be found. It was only in Charles II.'s reign that houses were built westward toward Hyde Park Corner, and these seem to have been large palaces with gardens for the rich and noble—for instance, Berkeley House (where Devonshire House now stands), of which Pepys writes in 1672: "The gardens are incomparable by reason of the inequality of the ground and a pretty piscina. The holly hedges on the terrace I advised the planting of." These grounds of Lord Berkeley extended over Berkeley Square, but in the eighteenth century the house was burned down, the garden was turned into streets, and Devonshire House built in its place. When Clarendon House, standing beside it, came to belong to the second Duke of Albemarle, its gardens and pleasaunces became the site of Dover Street, Albemarle Street, Old Bond Street, and Grafton Street. The chambers called the Albany were built on the gardens of the Duke of Sunderland, and thus gradually, by such transformations, the great street was evolved.

Mr. Lang reminds us that as late as 1745 Fielding makes Squire Western alight at an inn called "The Pillars of Hercules," next to where Apsley House now stands, and which must then have been on the outskirts of the town; and near here, at the end of the last century, lived the infamous Duke of Queensberry, of whom Burns wrote, after having spent an evening with him and having sent him his poem of "The Whistle": "Though I am afraid his Grace's character as a man of worth is very equivocal, yet he is certainly a nobleman of the first taste and a gentleman of the finest manners." Mr. Lang goes on to say:

"Deaf of one ear, blind of one eye, this wicked nobleman used to sit in his balcony, watching the world go past and looking down on Piccadilly. He preferred that flood of human beings to the view of the Thames at Richmond. 'What is there,' he asked, 'to make so much of in the Thames? I am quite tired of it; there it goes—flow, flow, flow, always the same!' But of the torrent that went 'flow, flow, flow' past his house he never wearied; and it is said he always had a man and a horse ready to pursue any naiad who charmed him from the stream of Piccadilly."

Further on, Mr. Lang tells us:

"In No. 139 Byron parted from Lady Byron 'in the utmost kindness,' says Moore. She was going to visit her father, who wrote to the poet that she would return no more. What mysteries passed in No. 139, part of old Queensberry's old house, we shall never really know; the cause of the separation is said to have been so simple that nobody could ever find it out. Some poets are 'gey ill to live wi',' as Mrs. Carlyle said about her son. Some ladies never, never can understand that a man of letters should sometimes be left alone in his den. Byron himself says that, however much in love he might be at any moment, he always felt, even when with the fair, a hankering to be back in his untidy library. There is a story of Lady Byron's entering the den and asking: 'Do I disturb you, Byron?' 'Yes, damnably,' answered Childe Harold in, shall we say? an intelligible, if not a pardonable irritation. Lawyers, doctors, business men are not interrupted by their dear wives when they are at work. The sex understands that their duties are serious; they don't always take this view of mere poetry and prose.

"I have a private theory, an innocent hypothesis, that Lady Byron was jealous of the Muse; that she left her lord because he said she disturbed him damnably. Dr. Lushington knew what Lady Byron said at the time; Mrs. Beecher Stowe told the world what Lady Byron said in later life; but 139 Piccadilly keeps its secret. The skeleton in the cupboard has 'flitted,' like the North Country Brownie. Old Queensberry would have explained the whole mystery by saying, 'All women are so extremely wrong-headed.' That philosopher never married, or there might have been another hegira from 139 Piccadilly."

Of the mobs and riots which have taken place here Mr. Lang gives us a graphic account; also of the appearance the street presents on the Derby Day and on other memorable occasions. Of the different classes and conditions of men who tread its pavement he also discourses. He points out its architectural shortcomings, remarking that the houses are large and clean, if not dignified; and though he confesses that his essay is not by any means entirely in praise of Piccadilly, we cannot deny that he has done full justice to his subject and kept us amused and interested all the while.

Mr. Henry James's study of the Grand Canal, Venice, is very characteristic. He affirms without being able to explain wherein lies the charm of this great waterway. Here is what he has to say of the Custom-house and the hotels:

"The charming architectural promontory of the Dogana stretches out the most graceful of arms, balancing in its hand the gilded globe on which revolves the delightful satirical figure of a little weathercock of a woman. This Fortune, or Navigation, or whatever she is called—she surely needs no name—catches the wind in the bit of drapery of which she has divested her rotary bronze loveliness. On the other side of the canal twinkles and glitters the long row of the happy palaces which are mainly expensive hotels. There is a little of everything everywhere in the bright Venetian air, but to those houses belongs especially the appearance of sitting, across the water, at the receipt of customs—of watching, in their hypocritical loveliness, for the stranger and the victim. I call them happy because even their sordid uses and their vulgar signs melt somehow, with their vague sea-stained pinks and drabs, into that strange gayety of light and color which is made up of the reflection of superannuated things. The atmosphere plays over them like a laugh. They are of the essence of the sad old joke. They are almost as charming from other places as they are from their own balconies, and share fully in that universal privilege of Venetian objects which consists of being both the picture and the point of view."

Mr. James looks at Venice as "the most beautiful of tombs." The greatest pleasure its visitor can enjoy is reconstructing the past, imagining the kind of life which went on in its now ruined palaces, turned into the shops of antiquity-dealers or to other baser uses. He describes the aspect of Venice, its customs, its festas, its palaces and gardens, in a modern impressionist manner, always finding fresh observations to make on well-worn themes; always assuming a critical attitude wholly uninfluenced by the best authorities. This independent frame of mind is evidently not without effort, and perhaps the reader who does not know Venice well will not gather any very distinct idea of the Grand Canal; but those who do will find this article delightful reading, and will not fail to recognize "the friendliest house in all the wide world," the "porto di mare" on the Grand Canal, called by a pleasant American name; or the "old Venetian home," which has retained so much of the "inner spirit of the place," but where the hospitality enjoyed compels him to reticence.

Mr. W. W. Story writes of the Corso of Rome and the many changes it has undergone during the last fifty years. He tells us of its more picturesque aspect in early days, when one met street singers in costume, singing their pretty *ritornelli*. It must always have been a most inconvenient thoroughfare, for, even in the eighteenth century, Madame Piozzi remarks that Rome is the one city in the world where ladies drive up and down the street without any pretence of taking the air—merely to show their fine clothes. The same practice continues to this day. In all seasons of the year towards sunset the Corso is crowded with carriages full of people, who seem to be displaying the latest fashions in dress, while along the narrow pavement the idle in throngs gaze at the fine ladies as they slowly drive past. Since Mr. Story wrote his article, the Sciarra pictures, which he mentions as belonging to one of the most interesting galleries on the Corso, have found their way to Paris, and the prince, their nominal trustee, is sued for alienating State property. The palaces which are worthy of remark on this street are few indeed, and of these several have their first floors given up to shops with plate-glass win-

dows, lighted by electricity. The modern utilitarian spirit has gone far to destroy anything which remained of the old sixteenth-century grandeur of Rome. Mr. Story tells us of the Carnival as it was in the bygone days, of the races (of the wild horses called Barberi) which gave their name to the street, of all the sights that were seen and are seen to-day, in his pleasant, discursive manner; also of many strange customs no longer in use. One spectacle which he tells of as not being unfrequent in old Papal days was that of a thief, when convicted, being led down the Corso with an iron-spiked gorget on his neck, to prevent him from hiding his face, accompanied by two men playing drum and fife to attract attention.

The Berlin street Unter den Linden is very thoroughly described by Paul Lindau, with plenty of anecdotes of the old Emperor and his simple manner of life, and general local color. Perhaps Miss Isabel Hapgood's essay on the Nevsky Prospekt is the least entertaining, although it is thoroughly conscientious. It would naturally be more difficult to write lightly of what is not so generally known as of the more frequented highways; and most people prefer reading about things they know about—to be reminded rather than to undergo the mental effort of having to understand an entirely new vista.

SOME ILLUSTRATIONS OF ENGLAND.

English Cathedrals. By Mrs. Schuyler Van Rensselaer. Illustrated with one hundred and fifty-four drawings by Joseph Pennell, also with plans and diagrams. The Century Co. 1892.

Charing Cross to St. Paul's. Notes by Justin McCarthy, M.P., and vignettes by Joseph Pennell. Macmillan & Co. 1893.

The Inns of Court and Chancery. By W. J. Loftie, B.A., F.S.A., with many illustrations by Herbert Railton. Macmillan & Co. 1893.

MRS. VAN RENSSELAER'S book is made up of her articles on English cathedrals contributed to the *Century*, revised and extended on the technical side, and it is a book for magazine-readers still. Mrs. Van Rensselaer is too clever and too practised a writer not to have made the articles very good in their kind, and retain collectively the animation that made them attractive in their original form. She has a genuine enthusiasm for her subject that lends interest to her discourse, she knows how to treat the historical part of it effectively, and she has a right appreciation of the artistic side. There is no book, we believe, which gives so well what the ordinary reader likes to know about these great buildings. So far as we can judge in reading, the author has reported their history faithfully, and her study of the buildings on the spot gives freshness and clearness to her description of them. She takes half of the cathedrals of England—the most important, and enough for such a book—makes an itinerary of them in the order, so far as is practicable, of architectural sequence, tells their story, criticises and describes their architecture with good judgment and with a fair understanding of the broader facts of its history and development.

If she had known wisely where to stop, we could say that she had done her work thoroughly well. We sometimes wonder, to be sure, whether the average reader really enjoys the flavor of kindergarten instruction with which the non-professional writer is apt to tincture his writing on a professional topic, though we assume that the editor and his experienced contributor know their business better than we. But there is a temptation in such work to expose one's self in criticism, and to lay down the law on questions which demand wide and exact special knowledge. We cannot follow with satisfaction Mrs. Van Rensselaer's analysis of the front of Salisbury Cathedral, for instance, though she estimates its whole effect justly. It might be wiser to let alone such questions as that of the comparative propriety of Wren's dome of St. Paul's and of Gothic roofs; and it was a pity to undertake the lecture on vaulting which she has interjected into her description of Gloucester Cathedral, for her facts are quite wrong and her account of the subject disordered. It would be well, in the *édition de luxe* of her book, to omit these five pages altogether, and there are other exegetical passages where a little pruning would not come amiss. Care might also improve the use of technical terms, and weed out a number of random statements, such as that Brunelleschi's dome at Florence was "built in the simple Roman way," or that the dome of St. Peter's is a polygon of sixteen sides, which is a reckless use of language, or that in Salisbury "the roof-ridge lies very near to the vaulted ceiling," when it is some thirty feet above it.

One of the things that quickly strike the reader of Mrs. Van Rensselaer's book is that there is very little solidarity, as a Frenchman might say, between the text and Mr. Pennell's illustrations. His view of the subject is an independent one, and concerns itself little about anybody's text, so that the illustrations have been eked out with very different drawings from several other hands, and even then many things to which the author calls particular attention are unrepresented. When Mr. Pennell chooses to draw the architecture, he does it admirably, but his attention is in large measure taken up with the scenes in which the cathedrals lie, and in many cases the buildings are only spots in his compositions. These are apt to be so charming that one cannot wish them exchanged; and how Mr. Pennell can combine the picturesque with the architectural is shown in such a delightful vignette as the view in Canterbury on page 46. A comparison of this drawing of the central tower with one two pages back illustrates curiously on what subtle differences depends the true representation of architectural quality. That on page 46 shows the real character of the tower with unusual fineness; the other just misses it by an almost imperceptible exaggeration of the vertical features, and makes it look like the work of another designer. We could wish that Mr. Pennell had indulged us with a drawing on a considerably larger and adequate scale of this tower, which is perhaps the most beautiful piece of Perpendicular work in all England. That he is at his best in pen-and-ink work appears when we turn to the cuts that are made from his brush drawings. The frank forcing of values to which pen-and-ink entices, and to which we pardon its insufficiency for the sake of its peculiar qualities, is apt to revenge itself on draughtsmen who change their tool for the brush. Mr. Pennell is enamoured of brilliancy, contrast, texture: when he takes the brush in his hand, they lead him astray. Some of the brush-drawings here cunningly imitated are charming enough, especially the slighter ones, but others are crude and disastrous. Instead of the fascinating if wilful brilliancy of pages 143, 168, 173, we get the drawings on pages 110, 118, 134, 254, where the subversion of values which we forgave before becomes harsh and repelling under the brush. Another exception to Mr. Pennell's use of the brush here is that while his pen-work is admirably adapted to his architectural subjects and to his foregrounds, his brush-work often does very little justice to either. His touch has lost its sureness; his light and shade their concentration and effect. Perhaps the brush was a necessary resort for saving time in some cases; but when it comes to the interior of St. Paul's, with an architecture for which brush-drawing was natural and appropriate, his performance seems perfunctory, and is certainly unsatisfactory. If Wren's architecture had not the refinement of the Italian Renaissance or the French, it is not the coarse and misproportioned work that is here represented; and we doubt if such careless drawings as that on page 302, from Gloucester, or several of those from St. Paul's, would have been accepted for such a book from an ordinary artist.

'Charing Cross to St. Paul's,' in which Mr. Justin McCarthy is Mr. Pennell's collaborator, shows the artist on another side. These, too, are magazine papers collected, and the illustrations are slight, rapid sketches of streets full of life and traffic. Mr. Pennell has a rare power of indicating a crowd of people which looks like a crowd and not like a company, and of filling it with individuals sketched with great freedom and spirit. He shows us an endless variety of *flâneurs*, policemen, ladies, soldiers, sandwichmen, and what not, now cleverly grouped, now amusingly contrasted, like the coachman, barrister, and costermonger on page 170. Where there is so much life we cannot complain of the careless handling of the sketches, but it would be well if illustrators would make account of the difference in treatment due to sketches that may be hung on a studio wall and seen from a flattering distance, and illustrations in a book to be looked at within a foot or so. In old days the woodcutters saw to this, but in this time of abject reproduction the painter counts every departure from his most negligent handling a blasphemy. He forgets that there are things in his art which are not fit for a book, and occasionally afflicts us with a pitiless display of mere ink and paper. On page 71 is an example, for which the proper place, we must think, was in the artist's portfolio.

Mr. McCarthy frankly accepts the rôle of chaperon, and gives in a pleasant vein of reminiscence or suggestion a commentary on the illustrations and their scenes. He is a congenial companion to Mr. Pennell, and his chat is generally easy and entertaining, though naturally it sometimes labors, and makes us think that, as Turner complained of Ruskin, he sees things in the pictures that the artist never put there. But a cicerone must find something to say, and Mr. McCarthy does it agreeably.

Mr. Loftie's book on 'The Inns of Court' is also made up of serial papers, and is illustrated by an English artist whose work may be classed with Mr. Pennell's—Mr. Herbert Railton; but it is a much more serious undertaking than Mr. McCarthy's, and leads instead of following the illustrations. It is a close and thorough historical study of the Temple buildings and the Inns associated with them, written in an animated style and enlivened by many anecdotes and brief sketches of famous men. There are more famous places in England, but perhaps none that is to readers of English literature associated with so many familiar figures. It pervades the whole length of that literature, from Chaucer, Spenser, and Shakspere

to Thackeray and Dickens, and a long procession of its inhabitants passes across Mr. Loftie's pages—earls, knights, bishops, and chancellors, and writers without number. The Templars had before the end of the twelfth century transferred their growing establishment from the neighborhood of Holborn, and had built on the western verge of the city their palace and the famous round church since known as the Temple Church. Their imputed wealth and license—possibly the first more than the second—led to their suppression by the Council of Vienne in 1313, within two centuries. Their possessions were given by the Council to the Knights of St. John, who presently leased the buildings to a company of students of the law for a rent of ten pounds a year. The lawyers have never been dispossessed, but, after the dissolution under Henry VIII., came into permanent possession. The imputation of wealth no longer hung about the Temple, and *bibere templariter* changed its application without perhaps losing all its force. Literature has in England held pretty close to the law, barristers, whether briefless or not, constantly distinguishing themselves as writers; and the Inns of Court and of Chancery that have gradually grouped themselves about the Temple have been, as the world knows, an immemorial rookery for authors, many of them having nothing to do with the law. It is not easy to make a clear history of a region so moss-grown with vicissitude and tradition; but Mr. Loftie keeps his head, and enables his readers to keep theirs, while he enlivens his web of story and antiquarianism with threads of anecdote and reminiscence. He tells us of Johnson and Boswell, of Goldsmith laid by the heels while Johnson makes his memorable market of the 'Vicar of Wakefield,' of Cowper trying in vain three times to hang himself with his garter, of Lamb turning in bed to look out at the white sails on the Thames, of Fielding, Dickens, Thackeray, and a host more. As a historian he is animated and sharp-eyed; as an antiquarian, precise, and, we doubt not, accurate; and an unqualing enemy of the restorers, who have left us, in truth, very little that is genuine in the buildings, even in the famous church.

Mr. Railton has illustrated Mr. Loftie's book with a vivacity even greater than Mr. Pennell's; his touch is incomparably sure, brilliant, and graphic. Perhaps no one else draws the same class of subjects with such unfaltering sureness of hand. But he has less breadth than Mr. Pennell, and in that way less effect and less charm. The full-page plates are less successful than the vignettes, for in them he seems incapable of repose. He can keep his lights broad, but not his shadows. His touch is so emphatic that it comes to the surface everywhere, and his whole plate is a coruscation in black and white. The processwork of these plates is surprising; the lines seem in part too delicate for any surface printing, yet the darks are impossible to the etching needle. In the smaller pieces there is more breadth and greater charm, the shadows being more restricted and the elaboration less. In many there are simple broad effects, a subdued richness and brightness that are unsurpassed, as on pages 23, 61, 84; in others a fascinating sparkle. In some Mr. Railton shows that he can use a quiet flat tint with good effect; and, in fact, one cannot turn the pages without being charmed. Nevertheless, Mr. Railton's work is not work for every one to imitate. We do not wonder, but we regret, that young draughtsmen are led away by such brilliant work as this to try to do what they cannot hope to do as Mr. Railton does it, and to neglect the solid qualities which they might acquire.

REMINISCENCES OF DÖLLINGER.

Ignaz von Döllinger. Erinnerungen, von Luise von Kobell. Mit einer Titelgravüre. Munich: Beck. 1891.

Conversations of Dr. Döllinger. Recorded by Louise von Kobell, and translated from the German by Katharine Gould. London: Bentley & Son. 1892.

MISS GOULD deserves the thanks of English and American readers for translating this entertaining memorial. Her version is very faithful and quite readable, although some of her sentences might be improved by a slight transposition of the words. Such awkward phrases as "his cloak had hitched in passing on a nail" are of too frequent occurrence.

The substance of the volume published by the authoress under her maiden name is the record of walks which she and her husband, the Bavarian State Councillor von Eisenhart, were wont to take with Dr. Döllinger every Friday in the extensive Munich park known as the English Garden. Frau von Eisenhart had written the life of her father, the well-known professor of mineralogy and Old Bavarian poet, Franz von Kobell, and on one occasion Döllinger expressed the very great satisfaction with which he had read the book, adding that, as he finished it, his pleasure was tinged with a certain melancholy at the thought that he could not have his career and character portrayed and his actions and achievements estimated by a biographer so sincere and so sympathetic. This passing remark encouraged her to continue with still greater care the notes she had already begun to make of these familiar talks, hoping that they might enable her to perform at some time and in a slight degree the service which her revered friend seemed to prize so highly.

The conversations were of a discursive sort *de omni scibili et quibusdam aliis*, embracing the whole range of known and unknown sciences; but, whatever topic was touched, Döllinger never failed to throw new light upon it. More than four-score years of assiduous and systematic study had made him preëminently a full man in the Baconian sense of the term, and the vast and varied knowledge which he had thus acquired was always at his command. The "Reminiscences" are arranged according to subjects, and follow the long and eventful course of Döllinger's intellectual development in a certain chronological order. Countess Montalembert once entreated him to tell her the whole story of blighted affection which had driven him to seek solace in the bosom of the Church. Döllinger assured her that, with the exception of a boyish passion for a beautiful girl, who obeyed the wishes of her father and wedded a richer suitor, he had had no affairs of the heart, but had chosen his profession solely from a strongly theological bent of mind. "What!" exclaimed the Countess, "it was a penchant for theology that led you to take holy orders, and not the fact that you had been crossed in love? Oh, I had imagined it much more romantic than that!" *Cherchez la femme!* seems to have been the first thought suggested to the French lady in witnessing the ordination of a priest. As a lad, Döllinger accompanied his pious mother regularly to church, where she often spent hours at her devotions. He sometimes questioned his father on theological points, but seldom received satisfactory answers. To such inquiries the distinguished anatomist, who never hesitated to gratify the child's curiosity about natural phenomena and scientific facts, usually replied: "I don't know," or "Nobody knows." It was an intense desire to find out these things, of which even learned men confessed their ignorance, that inspired him with the determination to study theology; religious feeling exercised no influence upon this decision.

Döllinger had a fine sense of humor and was a capital story-teller, always preluding the narration of a comical incident with a slight cough. Many years ago he visited the theological seminary in Paris and asked Dupanloup which was the most promising of the students. Dupanloup pointed to a youth who, he said, would be a doughty champion of the Church. This youth was Ernest Renan. The Prussian Oberconsistorialrath Strauss, a theologian noted for his severe orthodoxy and author of several religious works of a decidedly pietistic character, once stopped at a hotel in Munich. He registered his name and went to his room, when suddenly a lively chambermaid rushed in exclaiming: "Oh! what a pleasure to see you here, Herr Strauss; there is nothing in the world more beautiful than your waltzes!" Scarcely had the reverend gentleman rather coolly corrected this misapprehension when an enthusiastic youth appeared and cried out: "Oh! how happy I esteem myself in being permitted to greet the man who wrote the 'Life of Jesus.'" Again the high ecclesiastical dignitary of Berlin resented the identification and disclaimed all dogmatic complicity with the Tübingen critic, and began to think that between the votaresses of Terpsichore and the disciples of Pyrrho his reputation was at stake; as he remarked afterwards to a friend, "I have no reason to be proud of my popularity in Munich."

Characteristic is Döllinger's account of his reception by Pope Pius IX. in 1857. The uppermost thought in his mind during the audience was that he would never be caught in such a scrape again.

"The ceremonial in itself," he says, "was exceedingly displeasing to me. Every priest must kneel three times: first in the antechamber, then in the audience-room, and thirdly before the Pope, who holds out his foot in a white and gold embroidered slipper to be kissed. After this ceremony was ended, we rose and Pius IX. conversed with us in a rather commonplace way, telling us that the world must bow before the Holy See, then the welfare of mankind would be secured; that the Pope was the supreme authority, to whom everything must be subjected. He questioned us about one thing and another, and, without waiting for an answer, talked on in fluent but not very select French. He was a handsome man, and so impressed women that they fell on their knees before him as before God. He showed, in the expression of his face as we entered, a sort of cynical curiosity as to how the German pedant would go through the ceremonies. One had the feeling that this Pope could on occasion get off an excellent bon mot, but that he was incapable of rising intellectually to any independence of thought. And yet he often said he wished to undertake what no one else could perform—he wished to send new dogmas into the world. This he did by proclaiming the Virgin's immaculate conception and the Pope's infallibility."

Döllinger was a keen observer and an excellent judge of character, as regards both contemporary and historical personages; and in this respect his perceptions grew clearer and freer from the distortions of prejudice with advancing years. He admits that his estimate of Luther, formed more than forty years before, was hostile in spirit, one-sided, and unjust. "Now I should write about him differ-

ently." But if this early sketch "made me many enemies among Protestants, another book brought me into discredit with many Catholics, where I had not expected it. When my 'Papstfabeln' appeared, the publisher sent me a batch of nineteen criticisms, all but one bitter and malicious. Yet this work contained nothing new, but I proved whence the fables came and how they were disseminated by Rome, and that was my fault." Melanchthon, he said, "was a very able and amiable man, but his adversaries embittered his life to such a degree that he wrote in his diary: 'I am glad to die, since death delivers me from the rage of the theologians (*rabies theologorum*).'" When Luise von Kobell remarked that this had ceased nowadays, Döllinger laughed out: "Not ceased, my dear lady, but you hear nothing of it, and I don't trouble myself about it." "Calvin of Picardy was true to his convictions, but a hard and almost cruel man, without any sense for the beauty of nature around him." His name is the same as Chauvin, and his body of divinity is Chauvinism carried into theology. His system of belief is "cheerless and immoral in its workings." Döllinger cites Lord Byron as an example of its effects, and mentions an American who sought refuge from the horrors of Calvinistic teachings in the bosom of the Catholic Church.

Referring to the revocation of the Edict of Nantes and the persecution of the Huguenots, Döllinger observed that the person responsible for these acts was not Madame de Maintenon, but her confessor, Godet des Marais, Bishop of Chartres. "This dignitary had assured her that the Protestants would submit to the royal command without resistance, and Louis XIV. was so thoroughly convinced of his omnipotence that he and his obsequious adulators imagined that this change of religion could be as easily arranged as a gala-day at court." "Would it not have been better," suggested his interlocutrice, "if all France had remained peacefully and harmoniously Catholic?" "No," replied Döllinger, "for we perceive at a later period in a striking manner how injurious the suppression of the Protestant spirit and the Protestant clergy was for the whole cause of Christianity." In this connection he quotes the saying of Lord Stair, whom Madame de Maintenon asked why it was that the affairs of government were so badly managed in France under a king and so well managed in England under a queen." "For that very reason," replied the English ambassador, "for when a man reigns, the women rule him, and when a woman reigns, she is ruled by men."

As these "Reminiscences" consist almost exclusively of Döllinger's utterances, there is no lack of pregnant thoughts, and every page bristles with quotable things. Philip III. of Spain "was not so bad as his father, and that is the best that can be said of him." "The portrait of Isabella of Spain in the royal palace [at Munich] is finely painted; the Queen had to support (*tragen*) two evils: the Spanish costume and Philip IV." In order to understand the position and influence of the Pope in the hierarchy, "one must think of him as a torso without hands or feet, and for whom others act." Pius IX. promulgated the decrees of the General Congregation of the Jesuits as passively as the Queen of England signs the acts of Parliament. Voltaire, says Döllinger, was "one of my first literary friends; I read him when I was ten years old." He always retained a certain fondness for his writings, and tells a good story of how the French sceptic outwitted the Pope, to whom he sent a copy of his tragedy "Mahomet," with the expression of the hope that "the annihilation of Mohammedanism in the play would please the Holy Father." The Pope fell into the snare, and thanked the poet in the most cordial manner. This recognition of a work in which in fact all religions and founders of religions are scoffed at, rendered it impossible for the Index Congregation to condemn the book when its real character had been discovered.

We have no space for further citations. To those who remember Döllinger solely as a Catholic polemic and the most formidable lance in the lists of theological controversy, the volume will be a pleasant revelation. It is also typographically attractive and has an excellent index.

Man in Art: Studies in Religious and Historical Art, Portrait and Genre. By Philip Gilbert Hamerton. With forty-six plates in line-engraving, mezzotint, photogravure, hyalography, etching, and wood-engraving. Macmillan & Co. 1892.

In the epilogue to this volume Mr. Hamerton remarks "the curious differences in the availableness of artists and their works as subjects for literary treatment," which availableness "is independent of simple merit." "There is really nothing to be said" about some good pictures "except that they are well painted—a simple assertion that does not carry a writer far." Much the same difference exists in the availability of different books for the purposes of the reviewer, and Mr. Hamerton's are of those of which there is little to be said but that they are very good books. Mr. Hamerton writes with an imperturbable good sense, always seeing both sides of a question and usually taking the right side, never disdaining the simple and the known, and never indulging in paradox or the search for originality; always clear, fluent, and judicious, if never brilliant or very interesting. He seldom concludes anything, for conclusions are apt to be wrong; or says anything new, for novelties are possibly errors. He is much to be commended to general readers as a safe guide to the mysteries of art, who will make very clear to them the primary truths of criticism. The artist and the advanced student are likely to find his very inerrancy somewhat irritating.

We have said heretofore that Mr. Hamerton has probably been of more service in spreading just views of art than any other English writer, but it is equally true that the perusal of his pages is not an exhilarating exercise. He has, however, in his preface, expressed the conviction that only his personal friends will read the text of the present volume, and that "most people" will only "turn over the pages and look at the plates," and it is therefore as a book of plates that we will discuss it. In a book of plates relating to "Man in Art" there are two points to consider—the selection and the execution. In this case the selection is certainly curious. There are a number of plates after the antique, but not one is from an original of the first class. There is no plate illustrating Italian art of the period of the high Renaissance, none of Dutch work by any first-rate painter except Rembrandt (who stands outside the general current of his time and country), none of classic French art of any importance. Rustic *genre* is represented by Millet, and modern English art is adequately shown, though there is nothing of the English school of the eighteenth century. The desire for freshness may have had something to do with these omissions, but in that case why give us "The Gleaners"? Certainly the result is not altogether fortunate. Nor can the execution receive higher praise than the selection. The plates of Greek sculpture are all from drawings, and Mr. Hamerton defends this on the ground that a drawing, though less "authentic" than a photograph, has an added charm "due to the skill of the draughtsman." It may have (though even then it will hardly compensate for the loss of authenticity) when the draughtsman is an accomplished artist, but not when, as in this case, the drawings are indifferent work by "advanced students." The true reason for employing them, one suspects, must be that given for preferring etchings to pen-drawings, namely, that, even if inferior, "the etching is likely to be more *precious*—that is, to fetch a higher *price*, and to be esteemed according to the price that it will fetch."

We readily acquit Mr. Hamerton of "parsimony" in using several plates that had already appeared, notably that by Flameng after Gustave Moreau, which is one of the best things in the book. His fault seems rather to have been the desire to produce "the expensive illustrated volume" whether or no. A couple of reproductions of Rembrandt's etchings, a few line-engravings, and the photo-engravings of one sort or other, are almost all that are good. The reproductive etchings are, as usual, of little interest as etchings or as reproductions, and the mezzotints are much inferior to good photogravures. The book is very handsomely printed on a beautiful parchment-like paper, which is, however, too thin for comfort to the eyes, as the printing shows through the page. The cover is in white canvas with gold lettering.

The Life and Times of Bishop White. By Julius H. Ward. Dodd, Mead & Co. 1892.

This is the story of one Broad Churchman written by another. Nevertheless, the second Broad Churchman is still a Churchman, and he has an eye to what is comely and respectable in the history of the American Episcopal Church. He has no idea of having it said of his book, as some said of Dr. McConnell's 'History of the Episcopal Church' a year ago, "An enemy hath done this." And so the little things he would rather his ecclesiastical progenitors should not have said or done he passes over airily, often at the expense of vivid characterization. Neither are the *dramatis personæ* nor the *mise-en-scène* anything like so vivid as in Dr. McConnell's book, which will be fresh in the minds of many readers of Mr. Ward's. But those who have not read the former will be the more defrauded of their right to know the men and things of Bishop White's period in habit as they actually were. For example, what a waste of entertaining contrast between Bishop White and Bishop Seabury is the failure to say anything of the circumstance that while White was a thoroughgoing Philadelphia patriot, or rebel, Seabury was a Tory chaplain, and received British half-pay until his death. And nothing was more characteristic of White's ecclesiastical temper than his saying that "ecclesiastical bodies needed not to be over-righteous, or more so than civil bodies on such a point." But this is just the kind of thing which Mr. Ward's ideas of the way in which ecclesiastical biography and history should be written lead him to avoid.

It is certainly amusing that it was Dr. Seabury, who was ten times as good a Churchman as Dr. White, that had to put up with a left-

handed Scotch ordination to his bishopric. The wonder is that White could get his anywhere abroad, so radical were the changes that he suggested in the reorganization of the Church after the Revolution. Mr. Ward and Dr. McConnell are directly at variance in regard to the amount of his responsibility for the changes he proposed. Dr. McConnell says that White was the leading mind in formulating them. Mr. Ward thinks it was Dr. Smith of Maryland, who was elected Bishop with White and Provoost, but never went to England for his ordination, owing, perhaps, to his besetting sin, intemperance—a very common fault of the Episcopal clergy before the Revolution. What is certain is, that White prepared the recommendations and that they were in perfect keeping with the general tenor of his life. In their main lines they were in harmony with those of the National Government, then struggling towards its birth. The States were to be the units of the organization, the laity were to be admitted to representation, and the principle of State-rights was to be regarded. The proposed revision of the Prayer Book was extremely radical. The Athanasian and Nicene Creeds were both to be omitted and the Apostles' Creed curtailed. In short, Bishop White was a Churchman after Bishop Phillips Brooks's own heart: a little more radical then than Bishop Brooks is now. The Church once reorganized on lines somewhat less radical than those which he laid down, he took things very easily for the remainder of his life. He did not believe in sacrificing his domestic duties to episcopal journeys. He had never been confirmed himself and thought others could get along without confirmation as well as he. A sharper contrast could not exist than that between his episcopate and that of Asbury, the first Methodist bishop in America, whose indefatigable zeal met with its fit reward.

Of Bishop White's personality we get a most agreeable impression from Mr. Ward's pages. He knew much of men and books; in England he hobnobbed with Johnson and Goldsmith. His genial temper made him many friends and served the Episcopal Church an excellent turn. Without him it might have revived, but it is not easy to see how. When Priestley came to America in 1794, his relations with Bishop White were cordial. Mr. Ward writes of their correspondence "for several years after Dr. Priestley returned to England." He never returned to England. He remained in America until his death, February 6, 1804.

A Concordance to the Septuagint and the other Greek Versions of the Old Testament (including the Apocryphal books). By the late Edwin Hatch, M.A., D.D., and Henry A. Redpath, M.A., assisted by other scholars. Part I. A-ΒΩΡΙΘ. Oxford: Clarendon Press; New York: Macmillan. 1892. Large 4to, pp. vi., 232.

IN these last years England seems to be resuming her rôle of the seventeenth century in setting on foot vast enterprises of learning. At that time, thanks to Walton, Castle, Hody, and other scholars, she stood in the forefront of Biblical research, a position which she yielded not long after to Germany; entering on a path of political and commercial development that left her little time for Oriental science. But, with the rise of her Asiatic power and the increasing closeness of her intellectual relations with the Continent of Europe, she has returned with vigor to her old studies. A hundred years ago the Oxford Professor Kennicott published his monumental Hebrew Old Testament with various readings, and in the next generation appeared the rich collection of Greek readings by Holmes and Parsons. To come down to our own time, Lane's huge Arabic Lexicon is one of the greatest works of the sort ever carried out by a single man; it leaves, indeed, much to be desired in point of grammatical clearness, logical arrangement, and historical feeling, but it nevertheless furnishes a magnificent mass of material. We are similarly indebted to Payne-Smith's great Syriac Lexicon, which, with all its faults, is a notable addition to the resources of the student. Special attention has been paid to the Septuagint, in the history of which Humphrey Hody did such admirable work; Swete's edition, just completed, is a convenient presentation of the text, and a preparation for a really scientific edition. As is well known, Dr. Hatch had devoted himself for many years to the study of the Septuagint, especially, as in his 'Essays in Biblical Greek,' to the lexicographical side. It is a pity that he was unable to prepare a lexicon of the Greek versions of the Old Testament, the excellent book of Schleusner being quite inadequate to the present demands of students. Hatch's wide and accurate learning and fine historical sense would no doubt have given us a lexicon of eminent value.

A new concordance to the Septuagint was called for by the vast addition which has been made to the material during the last half-century. Not only have the old manuscripts been more carefully examined, but a number of new manuscripts, some of them very important, have been discovered and collated, and the versions made from the Septuagint have been more thoroughly studied. In fact, the science of Septuagintal text-criticism has come into existence. The undigested material of Holmes and Parsons cannot be used without careful scrutiny. What it is now attempted to do is to divide the Septuagint manuscripts into groups, and to fix the origin and the authority of the several groups. Three controlling recensions of the Greek text appear to have arisen, at Constantinople, Alexandria, and Cæsarea. Will it be possible to determine the forms of these three with something like accuracy, and thence to go back to the original type of the text? This is the inquiry which now demands the coöperation of all Biblical students—an extremely difficult investigation, in which little more than a beginning has been made. It is obvious that, until the text has been fixed, the final concordance cannot be made. It is obvious, also, that the practical value of a Septuagint concordance depends greatly on the accuracy of the Hebrew text of the Old Testament, one important point being what is the Hebrew equivalent of a given Septuagint word.

So far as regards the exhibition of the received text (that is, the Vatican, with a few variations), the new concordance is admirably done. The arrangement of the citations and of the Hebrew equivalents is convenient, the collection of citations is fuller and more accurate than that of Tromm, and the print is excellent. Altogether it reflects high credit on Dr. Hatch, the initiator of the undertaking, and on Mr. Redpath, who has undertaken to edit Hatch's material and to complete the work. When completed, it will make a volume of fifteen hundred or two thousand pages, and will be a most important help to the students of Hellenistic Greek and of Old Testament textual criticism. For the reason already mentioned, it cannot be regarded as the final concordance; but, inasmuch as the restoration of the true text of Septuagint is probably a thing of the remote future, it will be the handbook for a considerable time to come.

The work is less satisfactory on the Hebrew side. In many cases the Greek is not a translation of our Masoretic text, but of some other, and this fact must be constantly had in consideration in the preparation of a Septuagint concordance. Some modern editors have, indeed, been rash in the emendations which, following the Greek, they have introduced into the Hebrew; but, all allowances made for the freedom of the Alexandrian translation, there remain a number of passages in which the Greek represents a Hebrew text different from ours. In general the new concordance does not concern itself with this fact. In some places it states that the Hebrew equivalent of a given Greek word is doubtful, but it makes no attempt to fix the Hebrew equivalent in the considerable number of cases in which it may be determined with reasonable certainty. Perhaps it is too much to ask that this should be done in a work in which the mere collection and arrangement of citations involves such enormous labor. Yet, without some such sifting, the concordance will lose part of its value, and we venture to suggest to the learned and capable editor that this point be considered in future fasciculi. The labor of fixing the Hebrew equivalents of the Greek expressions would be lessened by the already numerous commentaries in which special attention is paid to textual criticism, such as those of Wellhausen on Samuel, Smend, Davidson and Cornill on Ezekiel, Cheyne on Isaiah, and many others. It is to be regretted, it may be remarked, that the Canterbury revisers did not show a little more freedom in handling the Hebrew text. They might thus have avoided not a few obscurities and absurdities.

The Great World's Farm: Some account of Nature's crops and how they are grown. By Selina Gaye. With a preface by G.S. Boulger, Professor of Botany and Geology in the City of London College. Macmillan. 1892. 8vo, pp. x, 365.

THIS book might be called a descripti n of the surface of the earth with special reference to vegetation, and to those animals, great or small, which affect vegetation in any way. It is written in an easy style, and is evidently the work of a person who has read very thoroughly the writings of Darwin and his followers, the travels of many scientific men, Marsh's 'Man and Nature,' and a host of other books. Beginning with some general observations, the book passes on to the nature and formation of soil; the action of heat, frost, water, air, etc., on the rocks; the use of lichens in forming soil, and the services to the soil of ants, worms, moles, and other burrowing animals. Then follow chapters on water, deserts, roots, food from the soil, insectivorous plants, leaves and their work, climate, blossom, and seed. Next is a chapter headed "The Golden Rule for Flowers," and in this and the next chapter, "Guests, Welcome and Unwelcome," there is a good account of the aid insects render to cross-fertilization, and with it, of course, some reference to those insects which manage to get at the honey of the blossom without paying for their dinner by transporting pollen. Two chapters treat of the various ways in which seeds are distributed; then come "Chances of Life," "Friends and Foes," "Nature's Militia," and

last of all "Man's Work on the Farm," or how man modifies the face of nature with respect to vegetation.

The whole book is interesting, and the several matters discussed are well arranged, so as to follow each other naturally. One could wish that the writer had given copious references to her many authorities, for here and there is a statement so unexpected that it would have been well to refer to the source whence it was taken. Now and then there is a slip, as, for instance, on page 224, where it is said that in "the kalmia, or American mountain-laurel, the stamens rise up from the petals on which they usually lie flat, and close round the insect, clasping it and impressing their pollen upon its body." In the mountain-laurel the stamens never can lie flat on the petals, for the petals are united in a basin-shaped body with ten pockets, in each one of which an anther is detained until liberated, commonly by an insect, which is thereupon dusted with pollen thrown out from two holes at the end of the stamens, in just the way that mischief-loving schoolboys throw shot from a quill tied to a piece of whalebone. Under the head of "Seed-Carriers," gray squirrels are very properly spoken of, and it is well said that "they bury their winter-store of nuts and acorns separately, one by one, about a couple of inches deep; and though they have such good memories as to be able to find them again, even when buried under a foot of snow, no doubt in many cases accidents have happened, and their stores have been left undisturbed, and would have excellent opportunities of growing. . . . They may well, therefore, have done a great deal of planting, though they would probably not carry their nuts far." But they do carry them far, as either Mr. Hamilton Gibson or Mr. Ernest Ingersoll could have told the writer, and it is just because they carry their nuts a long distance that a forest of hard wood so often follows a pine forest after it has been destroyed.

Among the many attempts to persuade people to learn something about plants, this work is one of the most pleasing, and perhaps its very avoidance of technical names and its omission of references to authors may have the effect of causing it to be all the more widely read.

BOOKS OF THE WEEK.

Aitchison, Sir Charles. Lord Lawrence. [Rulers of India.] Oxford: Clarendon Press; New York: Macmillan. 60 cents.
Briscoe, Miss Margaret S. Perchance to Dream, and Other Stories. Dodd, Mead & Co. $1.50.
Buxton, E. N. Short Stalks; or, Hunting Camps, North, South, East and West. London: T. Fisher Unwin; New York: Putnams. $6.
Crothers, Rev. S. McC. Members of One Body. Boston: G. H. Ellis. 75 cents.
Dale, Daley. Reuben Foreman, the Village Blacksmith. Robert Bonner's Sons. $1.
Ecob, Mrs. Helen G. The Well-Dressed Woman. Fowler & Wells. $1.
Gosse, Edmund. The Secret of Narcisse. Taft, Sons & Co. $1.
Hinckley, F. A. Afterglow. Boston: G. H. Ellis. 50 cents.
Holyoake, G. J. Sixty Years of an Agitator's Life. 2 vols. London: T. Fisher Unwin; New York: Putnams. $6.50.
Kennedy, W. S. John Greenleaf Whittier. Revised and enlarged ed. Derby & Miller.
Lavisse, Prof. Ernest. The Youth of Frederick the Great. Chicago: S. C. Griggs & Co. $2.
Minerva: Jahrbuch der gelehrten Welt. 1892—1893. Strassburg: Trübner; New York: Westermann.
Ogden, Antoinette. Christmas Stories from French and Spanish Writers. Chicago: A. C. McClurg & Co. $1.25.
Proctor, Ednah D. The Song of the Ancient People. Illustrated. Boston: Houghton, Mifflin & Co. $5.
Quevedo, Francisco de. Pablo de Segovia. Illustrated. London: T. Fisher Unwin; New York: Putnams. $20.
Radcliffe, F. P. D. The Noble Science of Fox-Hunting. London: J. C. Nimmo.
Rand, Rev. E. A. A Candle in the Sea; or, Winter at Seal's Head. Thomas Whittaker. $1.25.
Sunter, J. Pauline. All Around the Year. Boston: Lee & Shepard. 50 cents.
The Tragedy of Julius Cæsar. American Book Co. 20 cents.
Van Duzee, L. D. By the Atlantic: Later Poems. Boston: Lee & Shepard. $2.
Wood, J. S. A Daughter of Venice. Cassell. $1.25.

LATELY PUBLISHED:

Von Jagemann's Elements of German Syntax. By Prof. H. C. G. von Jagemann of Harvard University. 12mo. 157 pp. Teachers' price, 80 cents; postage 9 cents additional.

Presents the subject from the point of view of the English language instead of that of general descriptive grammar. It is based on the difficulties which the author's experience English pupils most often meet in translating English into German, or in expressing their own thoughts in the new idiom. While complete in itself and capable of being used with any selections, it is prepared especially as an introduction to

Von Jagemann's German Prose Composition. 12mo. 288 pp. Teachers' price, 90 cents, postage 7 cents additional.

Easy connected English prose, chiefly narrative and historical, presented in long enough portions to enable the pupil to acquire some momentum in translating, and supplemented by brief notes with references to the author's German Syntax, and full glossary. Unusual words are given at foot of page on which they occur; usual words in the vocabulary with special view to helping the student to master their ordinary applications.

HENRY HOLT & CO., N. Y.

HATCHARDS.

This is the favorite BOOKSTORE, and for 100 years the resort of the smartest people in London. It is visited and patronized by all who love books. London is the great market for books, and all the best as well as the cheapest editions can be had by writing to us. Special collections formed, and fuller information supplied than from any other house. Books both old and new, and relating to any subject, can readily be supplied at very moderate prices.

Agents for Clubs, Libraries, and all private Collectors.

187 Piccadilly, London W.

Letters of Credit. We buy and sell bills of exchange on and make Cable Transfers of money to Europe, Australia, and the West Indies; also make collections and issue Commercial and Travelers' Credits, available in all parts of the world.

IMPORTANT NEW WORK BY GEORGE BARNETT SMITH.

History of the English Parliament

Together with an account of the Parliaments of Scotland and Ireland. By GEORGE BARNETT SMITH, author of "The Prime Ministers of Queen Victoria," "The Life of the Right Hon. W. E. Gladstone, M.P.," etc., etc. ILLUSTRATED WITH FACSIMILES OF NUMEROUS VALUABLE HISTORICAL DOCUMENTS connected with constitutional history. In two volumes, 8vo, cloth, boxed, $6.00.

"There are no fewer than seventeen appendices, in the shape of 'Constitutional Addenda,' dealing with a great number of matters affecting Parliament and the Constitution. The work differs entirely from the many existing constitutional histories treating of the government of England at various periods. It is the first complete, consecutive record of the English Parliament as a legislative institution from the earliest times to the present day. In addition to the Parliamentary journals and official documents, all the constitutional writers of authority upon each epoch have been consulted in its preparation—a fact which will sufficiently testify to the magnitude of the undertaking."—*London Academy.*

A Famous Battery and Its Campaigns, 1861–'64.

By JAMES E. SMITH, Late Captain 4th Independent Battery, New York Volunteer Light Artillery.

A new book about a battery which distinguished itself in many hard-fought battles, and won glory and renown in the great Gettysburg conflict, where it held the crest of Devil's Den for three long hours against the flower of Lee's army. The history of this battery, from the Peninsula to Gettysburg, is the history of the war in the East, and it is told modestly but thrillingly by Capt. Smith, and substantiated by official reports of both Union and Confederate officers, as well as personal reminiscences of participants from other organizations.

12mo, cloth, 237 pages. Postpaid, $1.00.

The Nation.

NEW YORK, THURSDAY, DECEMBER 29, 1892.

The Week.

THE full vote for President in all the States shows totals for the various candidates as follows: Cleveland 5,567,990, Harrison 5,176,611, Weaver 1,025,060, Bidwell 258,347. Cleveland's plurality over Harrison is 391,379. The most striking feature of these figures is the small increase of the total vote in 1892 over that in 1888. Disregarding the scattering and nondescript ballots, the record during the last four Presidential contests shows these totals for the Republican, Democratic, Prohibition, and Greenback, Labor, or People's party, as it has been variously called:

1880	9,218,251
1884	10,052,706
1888	11,370,662
1892	12,028,008

It will be seen that there was a gain of 834,455 between 1880 and 1884, and 1,317,956 between 1884 and 1888, while the gain from 1888 to 1892 is only 657,346. The gain of 834,455 from 1880 to 1884 was less than normal, because in the latter year so many Republicans refused to support Blaine and did not go to the polls at all, the Republican vote actually falling off in more than one State—as in Massachusetts from 165,205 to 146,724, and in Connecticut from 67,071 to 65,923—while in New York the increase was the mere trifle of 6,461, instead of the 75,000 that was to have been expected from the growth of population; and in other States the Blaine candidacy was equally disastrous. As no such element entered into the contests of either 1880 or 1888, the total votes of those years furnish an excellent basis for estimating the natural increase. The gain in the eight years was 2,152,411, which shows clearly that, if men had voted as generally in 1892 as in 1888, the total this year should have been fully 1,250,000 larger than four years ago, whereas the increase is not much more than half as great.

The Democratic vote shows an absolute increase for Cleveland from 5,536,242 to 5,567,990, but this falls far short of representing his actual gain, as Cleveland voters of 1888 to the number of fully 250,000 this year supported the Weaver ticket in Kansas, Nebraska, Colorado, and other Western States. In those parts of the country where such complications did not exist, he gained largely, and it seems safe to estimate that, if the Weaver candidacy had been no more important elsewhere than it was in the older States, the Democratic gain would have been more than 500,000. The Weaver vote is rather larger than was generally expected, but it does not signify what it would have meant if it had really been exclusively a third-party vote, instead of being largely a fusion one, to which the Democrats contributed so greatly in States which could not otherwise have been kept from the Republicans. The Bidwell vote is a great disappointment to the Prohibitionists, showing an increase of only about a dozen thousand in the whole country, whereas they had counted upon a gain of fully a quarter of a million. Altogether, the full returns afford little satisfaction to any but the tariff-reformers. The Prohibition movement has evidently ceased to grow; the large vote for the People's party is really only one form of the protest against McKinleyism; while the tremendous loss of the McKinley party itself shows the absolute hopelessness of its cause.

The *Bulletin* of the National Association of Wool Manufacturers for December contains statistics of the wool clip of the United States for the present year. This showing, when compared with the votes cast at the recent election, is quite as remarkable as that of Mr. J. Q. Smith as to the separate wool-growing counties of Ohio. The largest wool-growing State is Texas (35,281,225 pounds), which also gave the largest majority of any State for Cleveland. The next largest is California (26,543,016 pounds), and this State for the first time since 1880 cast her electoral vote for a Democratic candidate for President. The third in the list is Ohio (22,340,435 pounds), and in this State the Republican majority has dwindled to almost nothing. There is no other State that produces as much as 20,000,000 pounds. Here we have fresh proof that the woolgrower as a political bugbear is played out. Yet the *Bulletin* takes great pains to speak him fair. Commenting on the recent election and the probable repeal of the duty on wool, it says, "Thou canst not say I did it"—the *Macbeth* in this case being the National Association of Wool Manufacturers, and the *Banquo* being Judge Lawrence of Ohio. No, dear innocent Thane of Cawdor, nobody shall accuse you of anything except cutting the throat of the American consumer of woollen goods.

What is the prospect of a repeal of the law which requires the buying of seven tons of pig silver, at a cost of $125,000 gold for each working day of the year? The Philadelphia *Ledger* publishes some recent observations of Senator Sherman on this subject, viz.:

"In relation to the repeal of the act of July 14, 1890, Senator Sherman said to me yesterday: 'I am not only willing, but very desirous, to stop the further purchase of silver bullion under the act of July 14, 1890, and will support any bill that will accomplish this object. The trouble is—first, that we have but sixty days in which to complete the necessary legislation, and it would be easy for a few Senators who oppose the modification of that act to prevent action by long debates; and second, it is believed that a majority of the Senate will, as they did last year, put on as an addition to any bill that is offered a provision for the free coinage of silver. This would be infinitely worse than the present law, and would, if passed, be vetoed by the President. I think if active efforts were made with Senators to oppose such an amendment, it might possibly be defeated; but if they vote as they did at the last session, the free-coinage provision would pass and the veto would necessarily extend to the entire bill."

The second difficulty which Mr. Sherman apprehends is one which must be met whenever the silver problem is grappled. If we wait until all the free-silver Senators have disappeared, we shall wait for ever.

Senator McPherson's resolution, which proposes to give the Secretary of the Treasury authority to suspend the purchase of silver bullion whenever he may think it advisable to do so, will have the effect to bring on a new discussion of that great question—the greatest, in our judgment, that now confronts the American people. The Treasury gold balance is running down rapidly, and our stock of the yellow metal is going away to countries where it is appreciated. There is a strong probability that India will take steps to reach the gold basis, all hope of international bimetallism having vanished with the close of the Brussels Conference. This will not be so difficult a task for India as it would be if she had a legal ratio between silver and gold different from the market ratio. She can adopt, for the settlement of past contracts, the market ratio of the day when the law goes into effect, say 26 to 1, or she can allow past contracts to be settled on the silver basis, and make gold the only legal tender for future ones, including dues to and from the Government. There is every probability that silver will continue to decline. If India adopts the gold standard, it may drop to 50 cents an ounce. It is nothing but pig metal now, and there is no more reason for our Government buying it than there would be for buying pig lead or pig iron. All that is necessary in our judgment to get rid of this baleful law is for all those who are opposed to it to make it their supreme business to fight against it till it is swept from the statute books. If all such persons will fight their own battles with the same spirit as the mine-owners fight theirs, the victory will not long be doubtful. The latter have shown what they think of the Brussels Conference by the most terrible assaults on Mr. Alfred de Rothschild. A Colorado paper, entitled the *Road*, publishes a cartoon representing this poor man as hanged on a telegraph pole by indignant miners or road agents, with an inscription saying: "The silver States of the West will hold a little International Monetary Conference of their own if some-

thing is not done soon to rectify the crime of 1873." This is the kind of talk that we should like to hear from the opponents of the Sherman Law and of all other measures for making pig metal legal tender.

It is already apparent that the defenders of American shipping are alarmed at their own action in consenting to an American register for the *City of Paris* and the *City of New York*. Senator Frye announces that no more foreign-built vessels will be allowed to sail under the American flag. Why not? If it was right in their case, and if exultation over the sight of the flag on those vessels is the purest patriotism, why should not the same privilege be extended to others under the same conditions? Senator Frye has put his hand to the plough, and cannot now turn back without admitting either that he basely betrayed American shipping in giving the privilege in a single case, or that he is in favor of the grossest partiality and favoritism in legislation. The truth probably is that he now sees, what we maintained at the time, that the concession made in favor of the Inman Line cannot in fairness be withheld from others, and so was the beginning of a movement which is destined to go on until it sweeps away all the absurdities of our navigation laws.

Our relations with Canada must be admitted to be seriously strained, but the strain is largely due to the immense amount of burlesque which they have had to carry. A few days ago our Secretary of State and the Canadian Finance Minister, Mr. Foster, were engaged in a daily journalistic duel at long range, denouncing and confuting each other in rival and answering interviews. This was presumably undiplomatic conduct, and certainly was highly absurd. Then came the startling discovery that Canada was violating the terms of the agreement between this country and Great Britain relative to armed vessels on the great lakes, and was building two men-of war, calling them revenue cutters so as to allay our suspicions and leave us unprepared to resist when she got ready to declare war. But she had not reckoned on the enterprise of the American press, which promptly saw through her sinister designs and denounced her in fitting terms. Then Gen. Miles came along declaring that the very building of these cutters was "a declaration of war," and intimating that the Administration would take up the challenge with proper spirit. Meanwhile, the size and formidableness of those Canadian vessels were growing daily, and the anxious dwellers on the American shore of the lakes were in daily expectation of hearing the boom of their terrible cannon. But a great calm has suddenly come, which is, perhaps, explained by the report of an "old shipowner" in Buffalo, "one of the few who have been allowed to inspect these vessels." He asserts that they are "much smaller than has been represented," are armed with "one small gun each," and that, wonderful as it may seem, Sir Julian Pauncefote was not lying when he assured our Government that they were "mere revenue cutters." Then he added: "Even if they were 350-ton vessels, as has been reported, what does that signify when it is known that within a month past there have been launched at Toledo two 2,500-ton vessels, intended for the lake trade, but purposely constructed so that in a very few hours' time they can be converted into formidable men-of war, capable of knocking these Canadian cruisers into a cocked hat?" This makes it look as if the "declaration of war" was on our side.

The *Tribune* reports President Harrison to have under advisement the offer of a lectureship on law in the Leland Stanford University, after the expiration of his term of office. We should say that he could be highly useful as a lecturer on law, especially on international law, and there would be peculiar appropriteness in his taking a chair in that department in a California institution. It would be easy for him to take his classes down to San Diego, to let them study on the spot those great principles of international law which, under his official direction, led to the seizure of the *Itata*, and afterwards to her serio-comic chase by the *Charleston*. It would be highly convenient and instructive, too, to lead his students to the very Federal court-room in the city where those principles were declared by a United States Judge to be no principles at all, but the arbitrary whims of a chauvinistic Administration, and the detention and chase of the *Itata* to have been illegal and outrageous. Mr. Harrison has referred to this decision in a message of his to Congress, and has said that if this is the law it is highly important to have it understood. Who so well fitted as he to make it understood, especially with all the advantages of local color and object-lessons that he would enjoy in a California university? It is a clear case of the office seeking the man.

An interesting sign of the growing faith in civil-service reform is found in the statement that the President has been urged to put under the classified civil service the men employed along the line of the Louisville and Portland Canal at the Ohio River Falls, the petitions having been signed by every steamboat, barge, passenger, freight, and tow-boat line, steamboat-owner or firm, and every coal-miner and shipper on the Ohio River from Pittsburgh to Paducah, including the Tennessee, Cumberland, and Kentucky River lines, and every commander of a vessel using the canal who could be found when they were circulated, and the request being based on the requirements of the public service in the operation of the canal for the benefit of the great fleets which use it. We regret to learn from the Indianapolis *Journal*, the President's home organ, that Mr. Harrison has declined to grant the request, "on the ground that he could not single out a few Government employees here and a few there and put them under the Civil-Service Act, but that whatever he did in that direction must relate to a class." But the pledge of the Republican party, in the platform upon which Mr. Harrison was elected, was that the reform system should be extended "to all the grades of the service to which it is applicable." It is perfectly obvious that the system is applicable to the body of employees here referred to, and it is a piece of unworthy quibbling for the President to refuse to apply it to them on the ground that they do not constitute "a class."

The Nicaragua Canal Bill reported by Senator Sherman on December 21 is of too great importance to be disposed of in the present short session of Congress, in the intervals between appropriation bills and other necessary legislation. Moreover, the incoming Administration, which must execute the law if it is passed, is entitled to have something to say about the details of a bill which pledges the credit of the Government to the extent of $100,000,000. We presume that the House of Representatives will see the propriety of giving Mr. Cleveland and his Cabinet a fair chance to consider a measure of such magnitude. If the bill should pass the Senate, it should be held back as long a time at least as that body has kept the bill repealing the duty on wool.

In the pardon of the Jersey City ballot-box stuffers it is, unfortunately, the expected that has happened. The Governor of the State was really the deciding power in the matter, and there has been no doubt for some time that it was a part of the game he is playing for Senatorial honors to set these polluters of the ballot-box free. The New Jersey Court of Pardons is composed of the Governor, the Chancellor, and the Lay Judges of the Court of Errors and Appeals. Chancellor McGill and Judge John Clement refused to consent to the pardons. Gov. Abbett and Judges A. H. Smith, J. W. Krueger, H. H. Brown, and G. Bogert voted to set the criminals free. The refusal of the Chancellor to vote for the pardons is enough of itself to stamp the report in favor of clemency as a mere excuse on the part of the judges who sign it for carrying out the Governor's mandate. We shall be surprised if this action of the pardoning officers does not arouse a feeling of indignation throughout New Jersey that the Legislature will not dare to ignore.

Gov. Flower's announcement that he is going to reappoint Judge Maynard, and

will pay no attention to any remonstrances, wipes out the favorable impression created by his conduct during the last few months, and apparently reveals him again as the mere tool of the Democratic Machine, ready at any moment to obey whatever command it lays upon him. The manner of the announcement was as offensive as its matter. The morning newspapers had reported the meeting of the Bar Association of this city the previous evening, at which resolutions were adopted by an almost unanimous vote declaring its opinion that Maynard's reappointment would be "eminently unfit," requesting the Governor to fill the place by the appointment of somebody else, and providing for the transmission of a copy of the resolutions to the Governor. Courtesy, not to say common decency, required that Mr. Flower should give this action of the Association some consideration, and it was in the worst possible taste, as well as morals, for him to retort so precipitately with the announcement of his purpose to reappoint Maynard. Attempts have been made and will now be repeated to excuse the Governor's original appointment by the claim that his action then met the approval of the members of the court, but this is a gross misrepresentation of the facts. The truth is that he announced his intention in the matter at a formal reception on New Year's Day when the judges had called to pay their respects, and when the occasion permitted only a bow of acknowledgment from the callers, which signified nothing. The plea that consistency requires the Governor to appoint Maynard again is the only refuge left him, and it will not avail, for if it means anything, it means that he must sink back again into that most humiliating position which he occupied during the first few months of his term as the mere dummy of the party machine.

The English Wesleyans have just had a discussion of "the higher criticism" of the Bible on their hands, in the shape of a charge of heresy brought against Prof. Davison of their denominational Handsworth College, at Birmingham. Certain papers of his on the methods and achievements of the new Biblical criticism were made the basis of an attack upon him, on the ground that they would "unsettle the minds" of ordinary readers of the Scriptures, and were especially dangerous as instruction given to theological students. The case was laid before the Committee on Theological Institutions, and their report completely sustains the professor. They assert that his views have no tendency to unsettle the minds of "careful students" of the Bible, but, on the contrary, "are well calculated to instruct those who have not had such advantages of study, and to reassure the faith of those who may have had their minds more or less disturbed by such adverse criticisms as are now current in many quarters." Liberality like this would clearly be out of the question in any Methodist body in this country, and is sufficiently striking even for England. English theological progress has been about a generation behind German, and American about the same distance behind English.

M. de Blowitz, Paris correspondent of the London *Times*, shows an increasing apprehension lest the republic should receive some detriment from the Panama Canal scandal. The danger, according to this discerning person, arises not from the corruption of people in high office and in the press, but from their exposure. The crafty Boulangists, the eager royalists, and all the enemies of the present form of government are pushing the investigation with fiendish energy, knowing well that the hour is coming when the barricades will rise in the streets. Meanwhile the Ministry are playing into the hands of their opponents. "A strong government," he says, "would never have submitted to the dictates of its worst enemies." The *Times* ought to recall M. de Blowitz and send in his place somebody like the youth who wrote to it from western Pennsylvania concerning the approaching downfall of England. The latter knew that there was one thing worse than exposed corruption, and that was the corruption that infects unseen till the whole edifice falls, as it did under the third Napoleon. Any Government can bear the exposure of corruption if it does not try to hide it or lie out of it. What it cannot bear is internal dry rot. There are some things worse than barricades in the streets.

The French are just now witnessing one of the well-known phenomena of public corruption when undergoing exposure. It is the defence made by the detected corruptionists, which consists in asserting, first, that they have always been highly patriotic; second, that the money they received from suspicious quarters was religiously expended for the public good; third, that they are attacked by enemies of the republic, who are simply enraged at failing to ruin it already, thanks to their own watchfulness and patriotism; and, finally, that their consciences do not reproach them for anything they have done. M. Rouvier was especially impressive on this last point. His conscience was perfectly clear, and, therefore, how could there be anything in the charges against him? All this is an old story with us. We have seen even a candidate for the Presidency assert that he had nothing to be ashamed of in letters proving his corruption, and his friends gravely arguing that, if *he* did not blush, there was no reason why they should. Another form of defence is the claim by the accused person that he has not lost a minute of sleep on account of the charges made against him. We shall doubtless see this brought forward by some of the public jobbers in France as a proof of innocence. Luckily for us, we have become pretty cynical about such matters, and do not any longer think that an inert conscience and a good digestion are necessarily incompatible with crime.

There seems some likelihood that M. Floquet may be obliged to resign his place as President of the Chamber of Deputies because he has admitted, in the Panama inquiry, that when he was in the Ministry he distributed the Government advertising to his political supporters in the press. But it is interesting to remember, as showing how we lead the nations, that this has been the practice of our Governments—State, municipal, and Federal—for many a day, and that, as appeared in the trial of Gray vs. Shepard, it is considered perfectly harmless, as long as the man who controls the advertising is not bribed by the periodicals to which he gives it. Another improving example for American journalists is to be found in the arrangements made for the Déroulède-Clémenceau duel. Who of us when about to engage in mortal combat with a man who had no newspaper, would agree not to issue an extra with the news of the duel in advance of the other journals—and carry out the agreement? Is there one of us, under such circumstances, who would not bargain that no reporter should be present on either side, and then conceal one of his own in the shrubbery or behind the fence, so as to get "a scoop" on his contemporaries? We trow not. In truth, the solemn arrangements made by Clémenceau for a fair start for all the newspapers, including *La Justice*, strike us as fatiguing in the extreme, "proceeding from the tea-custard and syllabub dilettanteism, the frivolous and desultory sentimentalism of epicenes."

The status of the Republican party in Spain was pretty well indicated by an incident which occurred in the Cortes on December 12. On that day the new Prime Minister, Sagasta, read the royal decree for the adjournment of the session, and the outspoken Republican Deputy from Barcelona, Señor Salmerón, seized the occasion to rise and hurrah for the Republic. His act made a great sensation, but the next day, when the presiding officer suggested that some form of rebuke or punishment should be applied to Salmerón for his revolutionary cry, the Premier opposed taking any step of that kind. He said that the offending Republican had already found sufficient punishment in the fact that not a single one of his friends had joined him in his revolutionary cheer. With this the incident was regarded as closed. It should certainly convey its own lessons to those ill-informed newspapers in this country which pictured the fall of the Conservative Ministry as due to a Republican rising in Madrid and in the Peninsula generally.

"PERSONALITIES."

THERE is no political hallucination in which political wrongdoers delight more, and by which they profit more, than the notion that bad administration can be exposed and corrected without being personal or mentioning names. For the purpose of securing good or amending bad legislation general denunciation of sin, while carefully avoiding all mention of particular sinners, may suffice. But when the political reformer comes to deal with administrative abuses, there is nothing for it but to name the person whose conduct has brought the abuse into notice. No administrative abuses are known, or can be known, except by ascertaining that somebody in office has done what he ought not to have done, or has left undone something which he ought to have done. Imperfections in rules and regulations, or in the bookkeeping, or in the mode of guarding funds, or in the working of particular legal powers or duties, are all brought to light, and have to be brought to light, by the acts of a certain person or persons; and no reform can be effected except by telling the world who did it and how he came to do it. It is in this way, and in this way only, that public opinion can be brought to bear on the question of remedy or prevention. For example, the other day in the Post-office a youth, intrusted with the custody of postage-stamps, stole $5,000 worth and disappeared, having previously evaded detection, when his effects were examined, by showing the edges of sheets of blank paper in his bundles of stamps, which he had adroitly inserted in lieu of sheets of stamps. This was a new and clever form of fraud, but it would be absurd to seek to provide a remedy simply by denouncing the stealing of stamps by Post office clerks as a serious offence, without mentioning the theft committed by Cadman.

Especially futile would have been the attempt to bring to light the defects of a Tammany State Quarantine without any mention of the shortcomings of Dr. Jenkins. It is Dr. Jenkins's administration of a Tammany State Quarantine last summer which has made known what these defects are. First and foremost among them is, in fact, Dr. Jenkins himself, because he illustrates the Tammany disregard of the statute which provides that the Health Officer shall be "a doctor of medicine of good standing, of at least ten years' experience in the practice of his profession, and practically familiar with quarantinable diseases." Dr. Jenkins had none of these qualifications, and his appointment and career last summer therefore proved two things of the highest importance—(1) the viciousness of the system which allows Tammany to select the Health Officer, and (2) the bad results which are likely to flow from failure to select in the manner prescribed by the statute.

Had the Advisory Committee of the Chamber of Commerce, therefore, confined themselves to a description of the horrors which they saw on Hoffmann's Island, to the confusion and indiscipline they found on board the *Stonington* and in other places, the busy public, which thought Jenkins was "keeping out the cholera" last summer, and did not particularly care how he did it, might have supposed that the state of things which the Committee described was a necessary concomitant of all quarantine, and no more capable of remedy than the loss of life through casualties and disease in time of war; that Dr. Jenkins had done his best, and that the Quarantine critics were simply "kickers," and it might then have gone about its business with a "houp là." But when, under a direct question from Mr. Orr, the Chairman of the Committee, the Advisory Committee declared their opinion that the "present Health Officer had not shown sufficient executive ability nor sufficient knowledge of sanitary science to warrant the belief that he can in future manage Quarantine affairs in a satisfactory and safe manner," they indicated in a few words both the nature of the abuse to be remedied and the nature of the remedy. They made clear to the public what the reform was which the occasion called for. They made their report a political document of high importance, instead of a description of an excursion down the Bay in cholera times by a party of scientists.

Somewhat the same thing may be said of the dealings of the Bar Association with Judge Maynard's case. How many essays on judicial corruption, how many descriptions of the Upright Judge, and of the qualifications for the judicial office, how many eloquent and moving addresses to the graduates of the law schools on commencement day on the noble part of the bar in the administration of justice, would it take to make the impression on the public mind which has been made by the Bar Association in singling out this one offender against all the traditions of judicial purity, and telling the public what the thing was and how the thing was done which makes his presence on the judicial bench a scandal and a continuing insult to the community? We do not hesitate to say that this action, like the impeachment of Barnard and the chasing of Cardozo from the bench, has done more for judicial purity than all the articles, sermons, speeches, of the last fifty years. In short, no work of reform can be done in our time without personality. The huge masses of busy, and indifferent, or ill-informed people who now rule the world, and most of whom are face to face every day with the problem of self-preservation in its sternest form, and scarce can find time to glance at the newspapers, can only with extreme difficulty and only on rare occasions be got to take an interest in *subjects*. In persons they take a great interest. Their politics are largely personal. They are more and more apt to embody their ideas, whether friendly or hostile, in a man or men. To rouse them about crime or abuse, you have to produce a criminal; to win them over to a plan of prevention, you must in their presence drive out the evil-doer, and show them on the spot the more excellent way. Nor is there anything to lament in this peculiarity of democracy. Nothing has done so much for human character as the spectacle of individual accountability. A community which expressed its morality wholly in righteous platitudes would not have long to live. The world cannot be saved by rhetoric.

THE MAYNARD CASE.

THERE is much indignation over Gov. Flower's blunt announcement that he will reappoint Judge Maynard to the vacancy left on the bench of the Court of Appeals by the election of Judge Andrews to the Chief Judgeship; the remonstrance of the Bar Association and the plain merits of the case to the contrary notwithstanding. It is of course very bad, and very disgraceful, not only to Gov. Flower himself, of whom better things have of late been expected, but to the whole community of which he is the chief executive officer. But any one who will look carefully into the conditions under which both the Judge and the Governor have learned all they know about politics, will be inclined to be somewhat indulgent towards them both.

Why is it that the Bar Association's terrible condemnation of Judge Maynard's conduct in the matter of the electoral count made no impression on either him or the Governor? We can recall nothing equal to it for severity in the history of either the bench or the bar. In any other civilized country it would have driven Judge Maynard into a retirement from which he would never have emerged, and would have drawn from an officer filling a place as high as Gov. Flower's a repudiation of all connection with him as indignant as words could make it. Why is it that the public decencies of Christendom have come to have no weight in the Executive Chamber at Albany?

The answer is, we think, to be found in the reasons given by some lawyers for opposing the action taken by the Bar Association on Tuesday week protesting against the appointment which it knew was coming. "If," they said, "you do this [that is, take any more notice of the offences of which the Committee convicted the Judge last March], it will have the air of persecution. You will excite sympathy for the Judge, and you will provoke the Governor into appointing him just to show his contempt for you." Now, there is in this objection the explanation of the protracted existence of fully half the corruption and abuses by which we are afflicted, and of the prosperity and audacity of far more than half the knaves who infest our public life. For out of it has grown a rule which we teach all our young men, and on which journalists usually act, which says: "You must never notice a political crime or scandal more than once, or

at most twice, except during a political canvass. If, after the rascal has got into the office which you tried to keep from him, or has escaped the prosecution with which you threatened him, and has successfully defied all efforts to make him surrender his booty, you keep denouncing him, or holding him up to public reprobation, or, in fact, take any steps calculated to make him uncomfortable in the possession of it, you will surely make him an object of public sympathy, and sympathy connotes esteem. You will relieve him of the odium his offences have justly brought upon him, and strengthen the hands of his apologists."

This rule falls in so well with the national good-nature that it has become almost imbedded in the national conscience as a rule of right. It now furnishes the entrenchment behind which nearly all the political knaves and corruptionists defy public opinion. When they are caught or exposed, they tell each other to keep still, make no defence, and in a few days the affair will blow over, and "the papers" will get tired of talking about it, and any attempt to reopen it will be reprobated. As a general rule, the policy is completely successful, even where the offence is a continuing one, as when the offender remains in the office he has disgraced or has unlawfully acquired. Everybody lets the matter drop, and if he commits no new offence in the office, his friends soon begin "to point with pride" to him, and demand a higher place for him or another term. Gov. Flower has actually furnished an entertaining illustration of this state of mind in his talk about Judge Maynard, for he justifies his reappointing him by alleging that he has behaved very well on the bench since last January. This is his sole answer to the charge that Mr. Maynard's conduct in December last showed his moral and mental unfitness for any public place of trust, in that he broke the law of the State and aided and abetted in a fraud on the voters.

No one can blame the rascals in politics for taking all the advantage they can of this public readiness to accept accomplished facts as moral settlements. This readiness is simply a milder form of the unwillingness of barbarians to punish any successful crime. "The man is dead," says the Calabrian peasant, "and what is the use of killing the poor murderer?" "He has got the place," says the kindly American; "why don't you let the poor fellow alone? Do you think your growling will make him resign?" Possibly not; but no thinking man will deny that every successful attempt to prostitute public places, like that in which Judge Maynard and Gov. Flower are now engaged, in the presence of a silent public and press and bar, makes future attempts of the same kind more probable and easier of accomplishment.

The system of one protest, and no more, against acts of political villany has, as we all see and know, utterly broken down. There is not a journalist in America whose experience has not told him that the only way of attracting the attention of the public to anything which does not immediately affect the interests of private individuals is by frequent iteration. Even far more diligent newspaper readers than the vast majority of people are, often see a thing set out fifty times in a newspaper before they rouse themselves sufficiently to find out what it is all about, like the man who came to the office of the *Tribune*, about 1860, to ask for the copy of the paper which had an article about slavery in it. Wendell Phillips made it a rule of the anti-slavery agitation never to forget or forgive a man who had ever ranged himself against human liberty, and he applied it with what was undoubtedly for his purpose wise ferocity. In the fight which the country is now waging against fraud and corruption in high places, the only remedy worth considering is remorseless pursuit of wrongdoers until they get out of public life. No man is obliged to stay in public life any more than, as has been said, to write bad sonnets. As long as wrongdoers can count on pardon and oblivion at an early date, any attack on them is useless. Apropos of the return of the Bar Association to the Maynard question, we should like to ask those who consider it either imprudent or useless, whether they have ever considered the part which the conduct of the older members of the bar in meeting cases like this one has in educating the younger generation in its duty to the community. What inference would the next generation draw from a history of the Maynard case in which it appeared that, after the conviction of the Judge of law-breaking and fraud, they had witnessed his second appointment a year later to a place in the court of last resort, in respectful silence? Would it not conclude that, in the opinion of a great profession, a corrupt judge had only to behave decently for one year to expiate all past offences and prove his fitness to dispense justice in a great community for any number of years to come? In good truth, a silent, quiescent bar, in the presence of great judicial wrongs, is one of the greatest curses that can afflict a free people.

BUSINESS ON SENTIMENTAL PRINCIPLES.

THE proceedings of a municipality are seldom of a character to arouse universal interest, but the London County Council appears likely to furnish in several respects an exception to the rule. The science of political economy, as is well known, is not at present much cultivated in England upon the lines followed with so great distinction by Ricardo and Mill and Cairnes. These eminent men regarded it as their province to determine the laws under which the production and distribution of wealth actually take place. The modern school of professed economists has found that these laws are repugnant to the nobler nature of man, and has denounced the science that embodies them as harsh and pitiless. According to this school, it is shocking to the moral sense to speak of the "labor market," or to allude to human exertion as if it were a commodity to be bought and sold. In their view political economy is only cultivated properly by those who are under the influence of philanthropical enthusiasm, and must be transfused with ethical principles. It is the science not of what is, but of what ought to be, in the industrial world, and it is the duty of economists to see to it that the industrial world reforms itself accordingly.

Opinions of this character being extensively prevalent at the time of the constitution of the new Council for the government of London, it is not surprising that many of its members should belong to what they style the Progressive party. It is the general aim of these members to embody in legislation and eventually to establish as institutions the theories of reformed society which they have conceived, or at least to go as far in this direction as the contradictory character of many of these theories will permit. What they are substantially agreed upon is, that large accumulations of wealth in the hands of individuals exist only through injustice to the poor, and must be corrected by the imposition of taxes and the employment of labor at high wages by the State or municipality. As Mr. Tom Mann observes, the resulting increase of the rates is exactly what is wanted. It will "open up an opportunity for investment, stimulate the healthy circulation of capital, and well repay the outlay."

The first step in this direction, to which we called attention at the time, was the decision that in contracts made by the Council, it should be covenanted by the contractor that he would pay the rate of wages fixed by the trade-unions. There were those who would have required contractors to employ only union laborers, but as in some trades the unions had comparatively few members, this was at the time impracticable, although its realization is hoped for in the near future. It is not surprising that with this provision the Council has met with difficulty in getting contractors to undertake its work, and the second step has accordingly now been taken. The Council is to organize a "works department" of its own, dispensing with contractors whenever it chooses, establishing its own plant, providing its own storage and workshops, and employing its own force of laborers. These laborers are to receive, as we understand the figures, about five shillings a week above the market rate, and steady employment is to be provided for them.

As a third step, which seems to follow necessarily from the preceding, but which requires legislative sanction, a direct tax

is to be levied upon landlords. An inheritance tax upon ground rents and values is demanded; but this is only an incident. The real reform is to be in the imposition of special rates upon the owners of land or rents, coupled with a provision making void all existing contracts whereby tenants have bound themselves to pay taxes and assessments. Two proposals for the accomplishment of this reform are before the Council, but the Progressive party condemns one of them as making it possible for the landlord to add the rate in some cases to the rent, and endorses the other as rendering this evasion impossible.

As no such proposal can become effective except by act of Parliament, it would seem that landlords might possess their lands yet a while in quiet, but the reply of one of the Ministry, Mr. Shaw-Lefevre, to a deputation of the unemployed is far from reassuring. The deputation urged that Government should undertake public works for the purpose of giving employment to idle hands, and Mr. Shaw-Lefevre told them that Government was really doing a good deal in that direction, and was about to do a good deal more in clearing the site of the old Millbank Prison. This work would be turned over to contractors, as Government had no staff for the purpose of carrying out such an operation itself, but there would be a clause in the contracts in accordance with the resolution of the House of Commons, that the contractors were to pay the men they employed "the current wages." To the request that the contractors be also required to limit the day's work to eight hours, Mr. Shaw-Lefevre discreetly replied that as the work would be completed during the winter months there would be a limitation of hours by nature. It is not inopportune to recall the fact that when the French Republic undertook the enterprise of providing work for the unemployed in 1848, there were at the beginning of March about 8,000 men supposed to be idle. But a rush took place from the provinces until there were on the 20th of June 115,000 men brigaded. The burden became intolerable, the public workshops were closed, the workmen rose in revolt, and the blood of 12,000 of their number was shed before the normal status of affairs was restored.

Some further steps remain to be taken before the plans of the Progressive party attain completeness. Of these some are already in contemplation, as, that no work should be given to concerns outside of London. Bids were recently received for the construction of a ferry-boat from both London and Glasgow builders, that of the Scotch firm, who were of admitted responsibility, being nearly £1,800 lower than that of the London firm, which was for some £17,575. The committee having the matter in charge reported in favor of the London firm, and Mr. John Burns had a third of the Council with him in his contention that London workmen ought to have a preference, and that they ought to be protected against outside competition. He should have had a majority, for nothing can be more certain than that if the rate of wages is to be artificially raised in London, shipbuilding and everything can be done cheaper elsewhere, while, unless immigration is stopped, there will be a rush of outsiders to enjoy the distribution of the spoils announced as about to take place there. The whole collectivist scheme will be shipwrecked unless effective barriers are raised about London to keep the rich people from getting out and the poor from getting in. This has been the weakness of protectionism in America, our wealthy manufacturers rushing off to Europe to spend their money, and the poor of Europe flocking to this country to compete for wages; and municipal collectivism is only protectionism writ small. In fact, Mr. Tom Mann has very honestly and consistently testified before the English Labor Commission that he is quite prepared to see the foreign trade of England ruined by the increase of wages and the shortening of working hours. He is willing to see Frenchmen, Germans, and Americans producing what they require for their own sustenance and his "own country doing the same and not more than that."

It is a startling experiment to commit the destinies of the greatest city in the world to such characters as this. It might be worth its cost were the experiment to be carried through, but this is scarcely to be expected. Were no other obstacle to arise, it would be vitiated by the starvation of the people of London, as that other classical experiment intended to demonstrate the possibility of living without food, provided the rations were gradually decreased, was frustrated by the unfortunate death of the cow just as she had been reduced to one straw a day.

THE PANAMA CORRUPTION FUND.

M. LEROY-BEAULIEU'S second article on the Panama crisis in Paris, in which he discusses more in detail the corrupt disposition made of the Company's funds, takes up the case of the press and that of members of the Chambers separately. He approves of advertising new enterprises extensively, provided it is done openly—that is, provided the advertisement is marked as such. But he intimates that most of the Panama Company's money which was spent on the press in France was spent on what we call "reading notices"—that is, on articles, apparently editorial, lauding the enterprise to the skies, and indulging in extravagant prophecies as to its success, which were, however, really contracted for as paid puffs. There is no abuse of the press more insidious than this, and when employed, as in this case, to enable speculators to capture the savings of the poor, it was more than usually base; one of the ostensible functions of the press being the protection of the poor against this very thing. For this, however, he has no remedy to offer. The purification of the press, or, as some call it, "the elevation of journalism," in democratic countries, the best observers acknowledge to be apparently in the hands of Providence solely. Human machinery for that purpose does not now exist and is not likely to exist. Only some great moral uplifting of the human race seems likely to make sure that nobody shall start or conduct a newspaper who is not animated by a high sense of responsibility to the public.

As regards the Legislature, M. Leroy-Beaulieu shows that the disease which has appeared among the lawmakers seems to have infected the whole community. The working-classes, who rage against the corruption of the bourgeoisie, are apparently just as bad as the others. He mentions in illustration of this three cases of loss of funds by trades unions (*syndicats*) through the frauds of their officers within the past year. Everybody who touches politics seems to be either corrupt or in great danger of corruption, and he intimates broadly, what political philosophers all over the world are beginning to believe, that corruption is the endemic disease of democracies. Not that aristocracies have not been corrupt, too, but their corruption was not so peculiarly pecuniary—that is, they sold themselves for other things as well as money, such as decorations and titles, and their numbers were always, from the nature of the case, small, so that a little money went a long way with them.

To the Radicals who say that, middle-class government (the government of the shopkeepers and lawyers and other professional men) having broken down, there is nothing for it but to try Socialism—that is, to hand over all industrial enterprises to "the State" or "the municipality"—M. Leroy-Beaulieu makes the answer which we have so often made in these columns to similar suggestions, that "the State" or "municipality" would be simply the same government we have now, with a very much larger number of officers. One of the strangest delusions of the "Collectivists," Bellyamites, and the like, is that there would turn up, for their use in the administration of their extremely complicated millennium, a new breed of functionaries of the ascetic kind, who would manage the public affairs and handle public funds simply for the glory of God and the public good, without thought of self; that when New York city, for instance, was running all the urban railways, and owning all the factories and meat-shops and bakeries and clothing stores, no Hill's or Crokers or Grants or Divvers or Walshes would be found among the managers of these enterprises, and that secret "pulls" and "divvies" would be unknown, and envy, hatred, and malice would play no part in the distribution of the goods or in the allotments of the task-work. The

truth is, that the tendency to multiply offices is as marked a feature of modern politics as the tendency to take bribes and steal public funds; and that under any scheme of Socialism yet propounded the number of public functionaries would be far greater than has ever yet been seen in any State, and they would be made of the same old stuff which has been for 1,800 years the despair of theologians. This would be true even of George's land scheme. The chances are that if the State was a universal landlord, the swarm who assessed the rents would put on political optimists the greatest strain they have ever undergone.

The remedy for all this—the one remedy, and that, at best, only a partial one—through legislation which M. Leroy-Beaulieu sees is, first, the taking away from the legislatures, as far as possible, the power of bestowing favors for financial or commercial purposes. No better illustration of the soundness of this position could be found than our own experience with the tariff—meaning thereby the power exercised for so many years by our Congress of raising prices by legislation on the application of individuals, for purposes of private gain. A more effective and insidious mode of corrupting politics was never invented. His second remedy—still only partial—is the vigorous restriction in the number of public offices; that is, in the amount of patronage in the hands of the Executive. As long as the Executive has much to bestow in the way of place and honors, men will seek admission to the Legislature simply to extort from it places and honors by "pressure," or "threats," or obstruction, or, in fact, by that combination of all sorts of hostile agencies which we call "war." The connection of this corruption with the whole Socialistic movement of the day — that is, the tendency to treat "the State," which is really a collection of rather inferior men, as a universal providence which is to supply everybody with money and comforts, and save him the necessity not only of being intelligent and shrewd, but even of being frugal and industrious—is not very remote and is very obvious.

WASHINGTON RELICS IN ENGLAND.

LONDON, December 13, 1892.

AMONG the papers of John Hall which came into my hands while writing the Life of Thomas Paine, is a letter to John Coltman, Leicester, England, May 16, 1788. Hall, a mechanical engineer, had emigrated to America, where he assisted Paine in making the model of his iron bridge. The letter, which I have printed in my Life of Paine (ii, p. 469), relates to an overcoat which Gen. Washington, during the Revolution, gave Paine, when that of the latter had been stolen. Hall had sent the overcoat to Mr. Coltman, and it occurred to me recently to inquire whether there was any such overcoat in the Town Museum at Leicester. To my astonishment, I was informed by the polite curator, Mr. Montague Browne, that, though they did not have such an overcoat, they did have a waistcoat of Gen. Washington's. There was no way in which Hall's words could be made to mean a waistcoat, and the latter, which indeed is a comparatively recent acquisition, has this label: "This Waistcoat was purchased by Mr. Mark Bowden of Devonport from an aged lady, the niece of an old gentleman who, with his wife, used to purchase Washington's clothes." The waistcoat was presented to the Museum by Mr. Bowden in 1881. It is before me as I write, but is not easy to describe. It is of white silk, or taffety, with light blue stripes (longitudinal), the alternate white and blue stripes being of equal width (about 1-20th of an inch). The front edges and the pocket flaps are elegantly embroidered with gold thread, the buttons being made of silk and exactly matching the taffety. The fineness of the front is in curious contrast with the coarse canvas of the back.

It was rather droll to find a waistcoat of Washington where I had sought his overcoat. Searches having failed to discover the latter, I had reached the conclusion that it had been lost among the Coltmans, or perhaps gone to pieces—for it was given to Paine when the army was near Princeton, or about 118 years ago. But Mr. Montague Browne investigated the records of the Museum, and found the following entry in the list of the contents of the Museum when it was handed over to the corporation of Leicester in 1849:

"A button with part of a Military Coat worn by General Washington at Bunker's Hill —Miss Coltman."

The relic has not been found. An official who has been connected with the Museum for forty years remembers nothing of it. The button may have on it some interesting device, and I still hope that it may be discovered. I am not enough of a relic-worshipper to care much for anything but the button, which would probably have some engraving. There are several other Washington relics that must be in England. Lady Russell tells me that there is at Swallowfield Park "a very nice stick" which belonged to Gen. Washington, and which came to her husband through Admiral Bergerette.

The Town Museum at Leicester possesses four original letters of Washington to Mrs. Macaulay Graham, who, with her husband, passed ten days at Mount Vernon in June, 1785. They are very neatly written, and the wrappers of two are preserved, bearing the usual seal (griffin crest); one of the seals is black. Two of the letters (November 16, 1787, and January 9, 1790) are in Sparks, but I have not seen in print those subjoined:

MOUNT VERNON, Jan'y 10th, 1786.

MADAM

I wish any expression would do justice to my feelings, that I might convey to you adequate ideas of my gratitude for those favourable sentiments with which the letter you did me the honour to write to me from New York is replete. The plaudits of a Lady, so celebrated as Mrs. Macaulay Graham, could not fail of making a deep impression on my sensibility; and my pride was more than a little flattered, by your approbation of my conduct through an arduous and painful contest.

During the time in which we supposed you to have been on your journey to New York, we participated the distresses which we were sure you must have experienced on account of the intemperature of the air, which exceeded the heats common in this country at the most inclement season; and though your letter was expressive of the great fatigue you had undergone, still we rejoiced that the journey was attended with no worse consequences.

I hope, and most sincerely wish, that this letter may find you happily restored to your friends in England, whose anxiety for your return must, I am persuaded have been great, —and that you will have experienced no inconvenience from your voyage to America.

Mrs. Washington who has a grateful sense of your favourable mention of her—and Fanny Bassett and Major Washington who, since we had the honour of your company, have joined their hands and fortunes, unite with me in respectful compliments to you—and in every good wish that can render you and Mr. Graham happy. The little folks enjoy perfect health.—The boy, whom you would readily have perceived was the pet of the family, affords promising hopes from maturer age.

With sentiments of great
respect and esteem
I have the honor to be
Madam,
Y^r most Obed't and very H^ble St
G° Washington.
Mrs. Macauley Graham.

PHILADELPHIA, Feby. 10th, 1791.

MADAM

At the same time that I acknowledge the receipt of your letter of June last, with which I have been honored, I must beg you to accept my best thanks for your treatise on Education which accompanied it.

The anxiety which you express for the welfare of this country demands a proper acknowledgment; and the political sentiments which are contained in your letter merit a more particular reply than the multifarious and important business in which I am constantly engaged (especially while Congress are in session) will permit me to make.—I must therefore, Madam, rely upon your goodness to receive this short letter as an acknowledgment of your polite attention, and beg you to be assured that my not entering at this time into the subject of your favor does not proceed from a want of that consideration with which I have the honor to be

Madam
Your most Obed^t H^ble Ser.
G° WASHINGTON.
Mrs. C. Macauley Graham.

The letters are interesting examples of Washington's courtly grace. The "Major Washington" mentioned in the first letter was George Augustine, the General's nephew, who married Martha Washington's niece. The "little folks" are the Custis children, the "pet of the family" being G. W. P. Custis.

MONCURE D. CONWAY.

THE MEMOIRS OF COUNT CHEVERNY.

I.

PARIS, December 8, 1892.

THE Life of Henri de Virieu, written from original documents by Count Costa de Beauregard, shows us the period of the French Revolution under its most terrible aspect; it leaves on the mind an impression of sadness which can hardly be forgotten. Virieu appears like one of the victims of fatality, born to suffer and to die. A very different impression is produced by the memoirs of the Comte de Cheverny. These memoirs, published by M. Robert de Crèvecœur, keep us nearly all the time in the years of the reigns of Louis XV. and Louis XVI. which preceded the Revolution—happy years, of which Talleyrand used to say, "Those who have not lived through them do not know what a pleasure it is to live." Cheverny's memoirs were not written from day to day; they were written, he says, "for myself and for my sole pleasure," in 1795, after the Terror. The author sought to distract himself; they are more anecdotical than historical. Cheverny does not pretend to be a prophet. Not only did he not see the Revolution coming, he does not understand it after it has come. He is thoroughly "ancien régime."

Jean Nicolas Dufort de Cheverny was born in 1731 in Paris. His family did not belong to the *noblesse d'épée*, but only to the *noblesse de robe*. His father, who was very wealthy, had bought the beautiful estate of Saint-

Leu-Taverny in the valley of Montmorency. When he came of age, his parents bought for him the office of "Introductor of Ambassadors." He was only twenty years old, and had to learn all the minutiæ of etiquette. This dignity brought him at times in contact with the sovereign. He made his début at Compiègne, where Louis XV. liked to hunt in the forest. A small item will give an idea of the ways of the Court: "Strangers who were presented could accompany the King in the hunt. The Introductor, at their request, concerted with the Premier (the first gentleman of the bedchamber), and there were always six horses ready for the strangers. This custom had been kept up since Louis XIV."

The first great function in which Cheverny took part was the presentation of Kaunitz, the new Ambassador from Austria. The account of it occupies many pages. I will, however, give but a single detail: in the long procession of gala carriages was the livery of Kaunitz, sixty silk-stockinged footmen in blue, with embroidery of silver and gold. After having seen the King and the Royal Family, Kaunitz asked to see Mme. de Pompadour, the favorite, and, it may be said, the real Queen of France. She had her apartment above the King's apartment in every royal palace; all the ambassadors visited her regularly, except the Papal Nuncio.

Cheverny became one of the members of the society of Mme. d'Épinay. The reader of her Memoirs and Letters knows the La Lives—de Bellegarde, d'Épinay, de la Briche. Two of these were, like Cheverny, introductors of ambassadors. The splendid château of La Chevrette was the centre of this gay society. Cheverny became one of the actors in its theatre. One day, when he was at Compiègne, the King announced to him the death of one of his colleagues, with the greatest indifference. "I have a hundred times asked myself why a king who was very sociable and polite, seemed so insensible to the death of those who lived round him. I have found but one solution: a king has continually a living picture round him; his interior service, his exterior service changes every three months; it is a magic lantern. Then, for every person who dies, he has a place to give and can make somebody happy."

Cheverny was not long in perceiving that society was cut up into coteries and sets. That it should be so now is not surprising; but you find this clannish feeling already in the society of the eighteenth century, which was homogeneous, and which had not yet gone through the ordeal of the Revolution. Society was never organized in France on the same principles as in England; there was always a tendency to the formation of small and exclusive groups. It is partly because people like to be more intimate in France, and partly because the national vanity is satisfied with the exclusiveness of a coterie. "When you have lived long and examined the manners of an immense city like Paris, in a tranquil period when the laws and the police are in vigor, such as the reign of Louis XV., all societies are coteries, beginning with the Court. Mme. de Pompadour had her coterie, notwithstanding the crowd of courtiers who surrounded her; the King had his own; so had the Duc de la Vallière, the Prince Soubise, the Marquis de Chauvelin, the Marquis de Livry, etc." The Queen's coterie met at Mme. de Luynes's, and was composed of what Cheverny calls the *sultanes Validés* of the Court. The Dauphiness and the Dauphin had their small set of intimates. The sisters of the King, Mesdames, led the dullest and most uniform life possible; they admitted but few ladies. The ministers, also, D'Argenson and Machault, had their coterie. The brother of Mme. de Pompadour, Poisson, who assumed the name of Marquis de Marigny and became a *cordon bleu* and a superintendent of the fine arts, had become a power, and had his coterie.

The King lived solely for hunting and shooting; he was out every day except Sunday in one of the royal forests. He was kindly, polite, but distant; he hardly ever spoke more than a few words, except about the hunt.

"Lansmat, his first *piqueur*, was the man whom he treated best, whether in his Cabinet or in the field. He never spoke to anybody except to him, or to the grooms who rode with him. One day, at Fontainebleau, I witnessed this *boutade* of Lansmat's: the run had been hard, two stags had been brought to bay; horses, dogs, men, were worn out, and we wisely rejoined the carriages. The King, with that voice which would have distinguished him in a hundred thousand, calls for Lansmat. 'Lansmat, are the dogs tired?' 'Yes, sire, rather tired.' 'Are the horses also?' 'I think so.' 'Never mind,' said the King, 'I will hunt day after to-morrow.' 'Yes, sire, I understand; but what grieves me,' said he, on rejoining his equipage, 'is that I always hear it asked if the horses and dogs are tired, and never the men.' This was said so that the King did not lose a word. The hunt took place as usual."

Cheverny does, however, defend Louis XV. against the imputation of absolute heartlessness. It has become legendary that when Mme. Pompadour died, the King watched the funeral pass by the windows of the palace at Versailles, and that, noticing the rain fall in torrents, he merely said: "La Marquise a mauvais temps!" Cheverny was with the King at the time; he tells us that the King saw the funeral go by from a balcony; he remained silent, but great tears were falling from his eyes, and when the procession was gone, he said, with a deep sigh: "These are the only services which I can render her!"

Cheverny gives us many details concerning his own liaison with a married lady, Mme. B. (we have only the initial of her name). This passion came to an end when he married a cousin of his; he became a good and faithful husband. His household in the Rue d'Anjou may be cited as the type of a good establishment in the eighteenth century. "My household," he says, "was composed of a *Suisse*, a *maître d'hôtel*, a *femme de charge*, a maid, a cook, a second cook, and two domestics for myself. My wife had two domestics for herself. I had six horses—two for my wife, four for myself—two coachmen, a postillion, three stable-horses, and a stableman."

The account of the intrigues which followed the attempt made by Damiens to assassinate Louis XV. has an historical interest. Louis XV. seems to have been much more frightened than hurt; he was surrounded by his family and was almost ready to dismiss Mme. de Pompadour. She contrived to reassure the King, to persuade him (what was true) that Damiens was a mere madman, and not the instrument of a party. After a short visit to her, Louis XV. dressed as usual, and the day after he began his usual life of hunting and of suppers in the *petits appartements*. "The pious cabal was disappointed; the Marquise became stronger than ever." Machault and D'Argenson were exiled from court.

Cheverny became very ill in 1757 and was threatened with consumption; the doctors sent him to the South; the account of his journey has no great interest. We find him again at his post with the Court in 1758. When M. de Stainville was made Minister in the place of M. de Bernis, the first day that he entered the Council-room he took, by the King's order, the first place; the other ministers seemed astonished. "Sire," said Stainville, "these gentlemen——" "They have nothing to say about it; I make you Duke and Peer." From this time, Stainville was called Duc de Choiseul. A great intimacy sprang up between him and Mme. de Pompadour. Choiseul was as magnificent in his ministry as he had been in his embassies. No minister ever carried his official style of living to such a pitch. "At that time people dined at two o'clock precisely, and all the foreigners who had been presented, all the courtiers, were admitted to his table. His great table had thirty-five covers, and there was a second one all ready. A servant counted the people who came in, and as soon as the number exceeded thirty-five the second table was spread. His silver, which was extremely abundant, was superb." The court became very brilliant during his ministry; balls, suppers, theatrical representations became the order of the day. The favor of Choiseul was supreme; his sister, the Comtesse de Choiseul, Canoness of Remiremont (an abbey of noble ladies, to enter which it was necessary to prove so many quarters of nobility without a flaw, and which the Princesses of Bourbon could not enter), never rose for anybody, not even for Ambassadors. "If a door was open, you heard her say with a firm voice, 'Ambassador of Spain, shut that door,'" and he shut it respectfully. Choiseul married his sister to the Duc de Gramont. He was greatly attached to her, and she became the real mistress of his house, as his own wife was very timid and complacent. The nephew of the Minister, the Duc de Lauzun, made his début at Court, and his name was soon in everybody's mouth. He became the friend and companion of the Duc de Chartres.

Cheverny's life was less agitated than that of Lauzun and his boon companions. He had among his friends some literary men—Sedaine, for instance—even an actor, the famous singer Jolyotte; he saw the members of the diplomatic corps, with whom his functions brought him in contact; his wife received every day; she had a supper in her own house once a week, and supped out three times a week. Cheverny hunted in the forest of Senart regularly with the Prince of Conti's equipage. At every page of his memoirs, you cannot help being struck by the sociability of the French in the eighteenth century; people seemed to live only for each other. There are no general or philosophical remarks; not a word of politics except where politics affects the status of his friends. Life was, so to speak, theatrical, and every actor tried to look his best and to play the most amusing part.

Correspondence.

THE MASSACHUSETTS AMENDMENT.

To the Editor of The Nation:

Sir: The large vote in opposition to the Constitutional Amendment in Massachusetts may not be such a "mystery" as you suppose on p. 465. Probably many of the 68,045 who voted against it did so, as I certainly did, for the reason that it seemed to them not undesirable that the Governor of the State should have more at stake in its welfare than the mere payment of a poll-tax implies.

Yours truly,
William S. Appleton.

Boston, December 22, 1892.

To the Editor of The Nation:

Sir: I think it is admitted that persons familiar with the "Yes" and "No" at the foot of the ballot, supposed they were voting on the liquor question. I have found several such.

S.

Boston, December 24, 1892.

LORD LOFTUS'S 'DIPLOMATIC REMINISCENCES.'

To the Editor of The Nation:

Sir: After reading the review which appeared in a recent number of the *Nation* of Lord Augustus Loftus's 'Diplomatic Reminiscences,' I took up the book and chanced to light upon a sin of omission committed in the third chapter of the first volume. In the author's roster of the diplomatic body stationed at Berlin in 1837, no mention is made of the United States representatives. This oversight would not be notable if the list did not contain names of no more importance, and, in some cases, of far less importance, than those of the diplomatists accredited from Washington. Of course Lord Loftus gives precedence to the envoys of the great European Powers; but when he remembers the Dutch General "who fought at Waterloo"; the Neapolitan Baron who was "very agreeable, with some humor and wit and of course devoted to the cause of absolutism"; the Sardinian Count who, with his wife, "dispensed their hospitalities with grace and cordiality"; and the Swedish Minister who "was distinguished on all Oriental subjects" — one cannot help asking how he forgot our own Minister, Henry Wheaton. For, even before being sent to Berlin, Mr. Wheaton had been the American representative at the Danish Court, and had published twelve volumes of Supreme Court Reports and two of his able works on international law.

And as Lord Loftus also speaks of several of the Secretaries of Legation, it is, further, somewhat surprising that he passes over in silence the then Secretary of the United States Legation, Theodore S. Fay, especially as Mr. Fay had published three or four volumes of fiction before he arrived in Berlin, and was the associate and friend of George P. Morris and N. P. Willis, and so must have been congenial to Lord Loftus, who was "fond of reading and of literature," as he himself tells us two or three times.

When this matter was pointed out to Lord Loftus, he replied by letter as follows:

"I am glad that you have called my attention to my omission in not mentioning the name of Mr. Wheaton, the representative of the United States at Berlin in 1837. It was certainly not done intentionally, but by inadvertence. We were on intimate terms of friendship, and I had the greatest regard and admiration for him, as well as for his kind and amiable family. It is not necessary for me to mention his high order of abilities. The world is fully cognizant of them through his valuable work on international law, which is the guiding element of modern diplomacy; and his name will be handed down to future generations with those of his renowned predecessors, Grotius, Puffendorf, and Vattel.

"I knew Mr. Fay for some years at Berlin. He was an estimable colleague and much liked. He was also a man of letters, and if I mistake not, wrote a very pretty novel on the subject of duelling."

Theodore Stanton.

Paris, December 8, 1892.

Notes.

Prof. J. K. Hosmer, Librarian of the Public Library at Minneapolis, is engaged upon a Life of Thomas Hutchinson, Governor of Massachusetts Bay and historian of the colony, whose Diary and Letters have been published by a descendant and are essential to any proper study of the Revolution. Prof. Hosmer, already known as the biographer of Sir Harry Vane, has examined all the Hutchinson MSS. available in this country, together with much other unpublished matter pertinent to the Governor and his time.

Fords, Howard & Hulbert announce 'Bible Studies,' being readings in the early books of the Old Testament, with familiar comment, given by Henry Ward Beecher in his Sunday evening services in 1878–'79.

About five years ago there was begun in Calcutta a translation of the greatest Indian epic, the 'Mahâbhârata.' Since then the work has gone steadily forward, the publication being in monthly parts, and is now approaching completion. The favor with which it has been received has doubtless had something to do with a recent similar undertaking. The first three numbers of an English translation of 'Charaka-Samhitâ,' the most ancient known Indian work on medicine, are now ready for distribution to subscribers. Aside from its general value as a contribution to our knowledge of the state of India while it was as yet almost unknown to Europeans, the work cannot fail to excite the interest of physicians and students. The translation is issued in monthly parts, and will probably be completed within four years. The price of subscription in the United States is £3, which may be sent in one remittance or in four instalments to the publisher and translator, Abinash Chandra Kaviratna, No. 200 Cornwallis Street, Calcutta.

A real want of the library is satisfied by Mr. Charles G. Crump's 'Poems, Dialogues in Verse, and Epigrams by Walter Savage Landor,' in two handsome volumes (London: J. M. Dent & Co.; New York: Macmillan). The verse of Landor is voluminous, and is not now accessible in a complete state. The present edition, though it contains a large quantity of his work, is a selection, and furnishes, of course, the best of it, both dramatic and lyric. It is significant of the neglect of Landor that here is to be found, for the first time since the original appearance of the poem in 1802, a part of "The Phocæans." An introduction is given by the editor, and there is the usual amount of bibliographical and other notes. In default of a complete edition, the present serves as a practical equivalent.

Howell's 'Epistolæ Ho-Elianæ,' or 'Familiar Letters,' which holds an exceptional place in the regard of literary men, has at last found a competent editor in Joseph Jacobs, who publishes the work in two elegant volumes (London: David Nutt), and annotates it with such a body of notes as can be gathered only by the labor of years. The introduction is one of those exhaustive monographs that are final, and leaves to the future only the possible correction of obscure details. The editor leaves the authenticity of the letters "still half in shadow," but thinks that it can fairly be accepted till disproved. In his efforts to explain allusions and identify persons he has been successful, but a few of these have refused to yield even to such careful and minute inquiry. Of the letters themselves it is superfluous to speak, as they are so well known favorites for the recreation of the leisurely reader and have been praised by the lovers of entertainment, notably by Thackeray, in a way to attract all to whose tastes they would naturally appeal. The present edition displaces all others as the standard form of this classic.

John Selden's 'Table Talk' (Oxford: Clarendon Press; New York: Macmillan) has received similar editorial care from the hands of Mr. Samuel Harvey Reynolds. His introduction and notes show the same exacting standard of exhaustive treatment, and the text, moreover, has been revised and brought to as much perfection as is possible. The editor has used in correction of the old text the two Harleian and the Sloane MSS., and has followed especially the Harleian MS. 1315. He gives notice of all textual alterations of importance based on such sources, and also of other changes which he has felt at liberty to make in correction of obvious errors. The edition is thus, if not one that establishes the text beyond doubt, a scholarly and faithful one, and laboriously done, and must be consulted as the highest authority in respect to the work of Selden.

The "Cambridge Shakespeare" (Macmillan), of the successive issues of which we have taken occasion to speak with especial recommendation on the ground of its cheapness as a great standard edition, nears its completion with the eighth volume, containing "Lear," "Othello," "Antony and Cleopatra," and "Cymbeline." The public are to be congratulated on such an opportunity to purchase at a reasonable rate so excellent an edition of the greatest and most fruitful of English books.

Several works bearing on Lord Chesterfield, which have appeared in a brief time, seem to show a vitality in his literary reputation that is on the whole surprising. The late edition by Dr. John Bradshaw, 'The Letters of Philip Dormer Stanhope, Earl of Chesterfield, with the Characters, edited with Introduction, Notes, and Index,' in three bulky volumes (Scribners), professes to give a few new letters, and promises more to come from the Newcastle correspondence. Some of the earlier letters are omitted on the score of their lack of interest, and all have been "edited" in respect to phrase with a view to their being read in mixed company, though why these letters should be supposed likely to be used for such entertainment passes comprehension. The edition is thus neither complete nor accurate, nor is it up to the mark of excellence in other ways; and as other editions, with which it would not suffer comparison on the scholarly side, are in the market, there seems no good reason for its existence.

'The Diary and Letters of Madame D'Arblay (Frances Burney)' (Frederick Warne & Co.) is edited, with notes and Macaulay's essay, by Mr. W. C. Ward, in three handy volumes. The edition is not complete, but contains a selection from the full work, and is meant as a popular abridgment, giving the more entertaining passages. It would have been more frank, to say the least, to have stated the fact that it is a selection upon the title-page, as the unliterary purchaser might easily be deceived as to just what he is buying.

Mr. George Saintsbury issues in the "Pocket Library" a welcome selection of 'Elizabethan and Jacobean Pamphlets' (Macmillan). He includes one each by Lodge, Lyly, Breton, Greene, Harvey, Nash, and Dekker. Greene's "Groat's Worth of Wit" is especially welcome, because of its bearing on Shakspere and the desirability of having it within reach of college students, under the newer methods of literature-teaching here; and Lodge's "Reply to Gosson" and Dekker's "Gull's Hornbook" are also likely to be used, each in its own way. The publication, which is cheap and convenient, confers an obligation on those students who are out of the reach of the older

and rare reprints, and illustrates for them an important phase of Elizabethan literature and life.

Mr. Nathan Haskell Dole edits a small popular volume of the 'Selected Poems of Robert Burns,' with a biographical sketch and notes (T. Y. Crowell). The number of poems included is large, in proportion to the size of the book, and the selections could not go far wrong; the notes are in the main of dates, places, and persons, and the biography is of the scissory kind. A few illustrations are given, but the volume will not be sought for their sake.

'The Best Letters of Percy B. Shelley, edited with an introduction by Shirley Carter Hughson' (Chicago: A. C. McClurg & Co.), is a collection of 119 letters of the poet, and, notwithstanding the title, professes to include practically all his correspondence. As Shelley's letters are scattered through many publications, it is not surprising that some, and those of the "best," should have escaped notice; but the collection is a fairly adequate one, and enables the public to obtain in a convenient and cheap form the best of Shelley's prose, which is to be found in these familiar letters to his friends. They are, indeed, among the most delightful letters of the century.

If school-books could help criticism, there would be every reason to expect a renaissance of the art, for there has been an unusual amount of republication of books on the principles of criticism in the last two years. 'Wordsworth's Prefaces and Essays on Poetry, with Letter to Lady Beaumont (1798–1845), edited with Introduction and Notes by A. J. George' (Boston: D. C. Heath & Co.), is the latest of these little reprints, and is well edited, with a survey of illustrative passages from other authors. Of the writers so cited we observe that out of thirty-four, not all eminent, only three are American. Prof. Albert S. Cook's 'Art of Poetry: the Poetical Treatises of Horace, Vida, and Boileau, with the translations by Howes, Pitt, and Soame' (Boston: Ginn & Co.) is an attempt of the same sort at the inculcation of critical precept. The introduction and notes are serviceable, and the volume will be found a convenient text-book for use or reference in colleges where the subject is taught.

'Six Centuries of English Poetry, from Tennyson to Chaucer: Typical Selections from the Great Poets, by James Baldwin' (Silver, Burdett & Co.), is a text-book that has a curious effect of progressing backwards like a crab as one turns its pages. The inversion of the title is justified by the contents. It is somewhat startling, but may be significant, that Byron is omitted from the list of the *dii majores*, which consists for our century of Tennyson, Wordsworth, Coleridge, Shelley, and Keats. Notes that can only be described as pedagogic are given in abundance, and the references are largely to English critics of the second or a lower class. The sort of teaching suggested by the book is an advance on the old methods, but illustrates the breaking up of conservatism rather than the coming of the new education.

The 'Browning Year-Book' (E. P. Dutton & Co.) is a handy volume of its kind, with quotations for each day of the year, which are to be read as on a calendar. The obvious criticism is that, while one may tear off the leaf of the calendar day by day and be saluted with a verse for a moment, it is not to be expected that one will take up a book and read a line without anticipating time and reading on. The volume amounts to no more than a disjointed collection of disjointed thoughts.

The holiday edition of Page's popular story, 'Marse Chan' (Scribners), with the illustrations of Smedley, is a beautifully printed and attractive volume, in which the refined and finished workmanship of the artist is as noticeable, and the harmony of his designs with the general temper of the text as praiseworthy, as is the literary merit of the familiar tale which is illustrated. The separate publication of the story in such a shape is one sign more that 'Marse Chan' will go into the catalogue of our most successful and characteristic American short stories, which live by their own right.

The topography of literature is an interesting subject, and occasionally it affords a good book, a narrative of literary pilgrimages or a description of the landscapes of poets; but seldom does it happen that the geography of genius is so elaborately set forth, and so pleasantly, with a touch of antiquarianism and of literary worship, and especially with the feeling of local attachment, as in Mr. J. A. Erskine Stuart's 'The Literary Shrines of Yorkshire: the Literary Pilgrim in the Dales' (Longmans). Yorkshire has had a long and notable connection with literature in England, and has found in Mr. Stuart a chronicler of the best sort. The volume is, of course, illustrated with portraits, views, and sketches, to bring the country and its people before the eye, and the text goes from watershed to watershed with the disposition to take each village at its historic and intellectual best, as is right; and one of the results is that impression of the wealth of the past in England which is commonly felt in respect to history, but less in respect to literature. A list of subscribers at the end gives an old-fashioned quality to the volume which is in complete harmony with its subject, its manner, and its cuts.

Edinburgh has had chroniclers of all sorts in plenty, but the city holds its personal charm, and Mr. Masson's last bulky volume, 'Edinburgh: Sketches and Memories' (London: Adam & Charles Black; New York: Macmillan), gathers up what he has written of it through many years pleasantly to the reader. Its literary history is briefly reviewed in the last paper, and its prospect of a library for all Scotland there dwelt on is a sign that it may have a future as well as a past. Sir Walter Scott and Carlyle, Dr. John Brown, Queen Mary, Dundas are the names that are most prominent on the pages; and, lacking a local history, one may survey Edinburgh life in these successive essays as a continuous story, with a strong sense of its significance as well as of its picturesqueness.

Mr. Austin Dobson has collected, under the title 'Eighteenth Century Vignettes' (Dodd, Mead & Co.), a number of brief sketches of men and things of the last century, which he contributed to the *Christian Union*, and has added a few from other places of publication. They are light as thistledown, and as graceful in their sailing down the air of fame; but their appearances or disappearances are not matters of moment. The dozen portraits are an ornament to the prettily bound book.

The amount of gossip in a century is generally believed to be large, and that which gets into books is not inconsiderable; but the quantity of it may be better suspected if one takes up the two great volumes which appear entitled 'Gossip of the Century: Personal and Traditional Memories—Social, Literary, Artistic, (Macmillan). The work, which is ponderous in everything but thought, is a rambling encyclopædia of memoirs, biographies, and cognate books on courts and professions and everybody who was nobody, all arranged with agreeable variety and vivacity. The historic and literary portions are tolerably familiar to readers, but the mass of matter upon music, dancing, acting, painting, and sculpture is treasure-trove for those who have interest in the contemporary history of these arts. Personality is naturally a leading interest, and anecdotes are the pabulum of arrested oblivion in this case. Cuts, some of them with the value of curiosity, are sprinkled over the pages, and an index makes accessible what inquisitiveness will like to dip into, but only senility has time to read.

'Calidore, and Miscellanea' (London: J. M. Dent & Co.; New York: Macmillan) is the ninth volume in Dr. Garnett's popular edition of Peacock's novels, and brings the series pleasantly to an end. "The Four Ages of Poetry," interesting as having given occasion for Shelley's 'Defence,' is one of the miscellaneous pieces included, and "Horæ Dramaticæ" gives an example of Peacock's scholarship. Sir Edward Strachey contributes a short paper of reminiscences of Peacock as he appeared to his schoolboy eyes and was traditionally known by family anecdote, written with admirable feeling and wholly honorable to Peacock's kindlier side.

Dr. Francis E. Abbot's 'Way Out of Agnosticism' has been translated, from the second edition, into German by Dr. Hermann Schönfeld of the Columbian University at Washington, and published in Berlin under the title, 'Der Weg aus dem Agnosticismus; oder die Philosophie der freien Religion.'

'The Memorial Volume on the Centennial of Washington's Inauguration' published by the Messrs. Appleton finds, as well it may, a steady demand. The remainder of the thousand copies once disposed of, the plates will be destroyed. The volume is rich in historic narrative and in portraiture.

Parts 8 and 9 of the great Atlas to accompany the official records of the Union and Confederate armies, in course of publication by the War Department, comprise maps of the scene of operations in the Gulf, along the Mississippi, by Vicksburg, at Gettysburg (one after a clever horseback reconnaissance), before Petersburg, at Chancellorsville and Fredericksburg, at Harper's Ferry, at Winchester, in Charleston harbor, etc. These maps, sketches, memoranda, profiles, etc., form an invaluable body of evidence for the student of the civil war.

The *School Review*, edited by President Schurman of Cornell, will appear next month, and will be devoted entirely to the field of secondary education. An "outlook article" is promised for each month, and this survey of notable occurrences will be followed by original articles, signed reviews of current educational literature, and summaries of articles in foreign periodicals. The department of reviews will be watched with interest, since it is apt to be the weak point in educational journals. Dr. Frank Thilly, Ithaca, N. Y., is the managing editor and publisher.

The quarterly publication of the Massachusetts Institute of Technology, known as the *Technology Quarterly*, has heretofore had no official relation to that great school. It is now to be adopted by the Society of Arts and to contain the Proceedings of that body, and will be used to foster the interest of the alumni in their alma mater.

Worthington's Illustrated Magazine and Literary Treasury is a new candidate for public favor, which has been founded in Hartford,

Conn. It has nothing individual as yet in its conception.

There is nothing better about *Vogue*, the "new weekly illustrated society journal of fashion" and ceremonial than its typographical good looks. It belongs in the same family with *Life*. It is published at No. 61 Union Place, New York.

The December number of the Brooklyn *Packer Alumna* is entitled to the credit of calling attention, in its book reviews, to a certain G. E. Lessing—presumably a German—who, it seems, has produced an unusually clever treatise upon the limits of painting and poetry, under the title of "Laocoon." "By illustrations from ancient art and literature," says the reviewer, "by quotations from classic and modern critics, Mr. Lessing illustrates the realms of poetry and art, where they unite and where diverge, and with his keen insight make [probably a mere slip for *makes*] both art and literature of greater value to the reader." It seems that Mr. Lessing's work has before this been introduced to English readers, for the well-informed reviewer speaks of the present as "this new English translation." Mr. Lessing is evidently a writer of genuine promise, who is destined to make his way and to be heard from again.

At the first meeting of the French Academy in the present month, it was decided that the three chairs then vacant should be filled by an election on February 2. Since then another seat has become empty. At present only the following candidates have announced themselves: M. Berthelot, for the chair of Renan; M. Thureau-Dangin, for that of Camille Rousset; MM. Henri de Bornier, de la Villeherve, and Gilbert-Augustin Thierry, for that of Marmier. Zola is a candidate for all three of the chairs, and has, one would think, a likelihood of obtaining one of them. The French mind is not so dull as to miss the amusing side of the spectacle which the Academy presents with the author of 'Madame Chrysanthème' inside it, while the author of the 'Débâcle' is excluded.

—While the *American Meteorological Journal* for December embraces articles of undoubted value upon electrical storms, automatic rain gauges, and sunshine recorders, investigation of thunder-storms, and the remarkable aurora of last July, one short letter from Mr. W. T. Blythe, an observer of the U. S. Weather Bureau, contains more of merely popular interest than all these scientific articles together. During last August Mr. Blythe made careful observations of the temperature of the sea-water at Atlantic City, with the result that the direction of the wind appears to be a most important factor in the varying heat and cold of the water. For instance, on August 12, the wind had been blowing southwest for forty-eight hours, during which the temperature of both air and water rose continually. A change to the west and northwest caused a fall of nearly ten degrees in the water-temperature, while the warmth of the air remained almost the same. Mr. Blythe think it quite possible, from a series of observations during successive years, to predict very accurately the bathing conditions for twenty-four or even forty-eight hours in advance. The fact that the daily newspapers published the data regularly, and many of the principal hotels and bath-houses called for them daily, and kept them posted in bulletin form for the information of their patrons; and also that each of the two commercial and two railroad telegraph companies called for and distributed the data free to principal points on their lines throughout Pennsylvania and New Jersey, seems to be sufficient evidence that the information was sought after by the public. Another correspondent of the *Journal*, in a following communication, calls attention to the peculiar instinct for foretelling weather-conditions possessed by certain animals. Snails, for instance, are not often seen abroad except before rain, when certain species are noticed to present an unusual yellowish appearance (which becomes bluish after the rain), and some of them, in anticipation of moisture, expose certain indentations to collect it. Spiders sometimes make changes in their web before a storm, apparently to protect it from damage. It would seem that further investigation along these suggestive, if humble, lines may not be beneath the notice of the weather forecaster.

—*Polybiblion* records a contribution to the Homeric question which is too good to be left buried among its Notes. The Abbé Fourrière has attempted to demonstrate that Homer is a plagiarist, that he copied or travestied the Bible. *Polybiblion* called the Abbé's parallelisms "mere superficial and valueless coincidences." The Abbé, replying in the *Revue d'Exégèse Mythologique*, complained that his reviewer had not quoted any examples. He had better have kept silent; for the four which *Polybiblion* then quoted could not be surpassed for absurdity and inconclusiveness even by Ignatius Donnelly and Mrs. Pott:

Song of Solomon, iii, 1. By night on my bed I sought him whom my soul loveth; I sought him *and found him not.*	*Iliad*, 6:369. So spake the plumed Hector, and withdrew, And reached his pleasant palace, *but found not* White-armed Andromache within.
iii, 2. My beloved *is gone down into his garden.*	381. For she *Was in the tower.*
Kings vii, 28. And the work of the bases was on this manner. They had *borders*, and the borders were between the ledges. 29. . . . . There were lions, oxen, *and cherubim.*	11:34. On its disk Were twenty *bosses* of white tin, and one Of tawny bronze just in the midst, where glared *A Gorgon's head* with angry eyes.
Joel, ii, 8. And the Lord shall *utter his voice.*	11:10. *Loud was the voice*, and terrible, in which she [Strife] shouted from her station to the Greeks.

—The third volume to appear in the International Theological Library is 'Apologetics,' by Prof. A. B. Bruce (Scribner). It is pitched in a moderate key throughout, and departs so far from both the methods and results of the traditional works of its class, which smite the unbeliever hip and thigh, that it will doubtless draw more than one protest against *istis defensoribus* from those who would see Agag hewed into smaller pieces. Prof. Bruce fairly warns off in his preface "dogmatic believers" who would have their faith triumphantly defended at all possible points of assault, as also "dogmatic unbelievers," whom he refuses to attempt to convince or confound, preferring to address himself to "men whose sympathies are with Christianity, but whose faith is stifled or weakened by anti-Christian prejudices of varied nature and origin." This aim determines the tone and method of the book. There is no fresh threshing out of the philosophical difficulties which underlie all theological difficulties, there is no discussion of inspiration, prophecy, or the canon, there is no running amuck with modern science, but a patient and scholarly presentation of Christianity under aspects best fitted to commend it to "ingenuous and truth-loving minds." The ordinary theistic arguments are passed in review, only to bring up with the comment: "It would seem as if the way of wisdom were to abstain from all attempts at proving the divine existence, and, assuming as a datum *that* God is, to restrict our inquiries to *what* He is" (p. 158). In the chapters which relate to the Scriptures, the point of view is that of one frankly accepting the main results of modern Biblical criticism. The philosophical and scientific difficulties connected with the miraculous are expressly waived as a question which "cannot be gone into here," and the frank confession is made that "miracles cannot be offered as evidences of Christianity now with the confidence" of "a past age." Prof. Bruce has brought sound learning and conscientiousness to his task, and has shown how, at least in his own case, a devout and manly faith is consistent with the abandonment of much that the vast majority of Christian apologists would still call essential to Christianity.

—A handful of theological books of an apologetic tenor must be yet more briefly dismissed. Canon Driver's 'Sermons on Subjects Connected with the Old Testament' (London: Methuen) is intended to show how criticism may be made to subserve devotional ends. It seems to us, however, that the scholar gets the better of the preacher, and that the pious exhortations tacked on his discussions show as manifest a cleavage as used to appear between the body and the epilogue of the Bridgewater Treatises. Sermons, or, as he calls them, "lectures," Mr. Gore also brings in his 'The Mission of the Church' (Scribner). We do not see that he accomplishes much more than, on the one hand, to assert that the duty of the time is "to be more true to our own principles, and to teach with more positive plainness what the Church commissions us to teach," and, on the other, to say he is "thankful the Church of England did not commit herself," as many of her articles are "studiedly vague." From Macmillan we have the latest volumes of Prof. Ryle. 'The Canon of the Old Testament' is perhaps sufficiently characterized by saying that it was quoted by Prof. Briggs in his defence against charges of heresy as in agreement with his well-known positions. 'The Early Narratives of Genesis' is a discussion of the first eleven chapters of Genesis from the standpoint of the new criticism, and particularly of comparative religion. The Hulsean Professor of Divinity seems almost afraid of his own conclusions, and this gives his pages an air of apology in the ordinary sense of the word. In 'Creation of the Bible,' by Myron Adams (Houghton, Mifflin & Co.), we have an untechnical and rather tiresome setting forth of the later views of the nature and history of the literature of the Bible. One judgment of the author's ought to win general assent: "There is no entirely good reason why we should be more stupid about the Bible than about any other book."

—Of recent books setting forth in popular form the results of Hexateuch analysis, the most readable is 'The Documents of the Hexateuch' (London: D. Nutt; New York: G. P. Putnam's Sons), by Mr. W. E. Addis of Balliol College, Oxford. The number of such works now being published is proof of the general interest in the subject. Kautzsch and Socin in Germany, and Bacon and Bissell in this country (the former with friendly, the latter with hostile intent), have made the constitution of Genesis accessible to the lay public. Mr. Addis undertakes what had not been attempted before, to give the text of each of the great constituent parts of the Hexateuch. The present volume (Part i. of the whole work) contains the "oldest book of Hebrew history," the picturesque and vivid prophetic narrative in which are found those sto-

ries that have made the Hexateuch a religious classic. It is itself composite, being made up, according to the received view, out of two documents which, from the divine names they use, are termed the Yahwistic and the Elohistic; the first of these is here printed in ordinary type, the second in italics. We thus have a clear and agreeable page, with sufficient distinction of the documents for the general reader. In the Introduction, Mr. Addis gives a short history of the criticism of the Hexateuch, and in foot-notes explains and supports his translations and divisions. He follows the majority of critics in assigning the prophetic history (commonly marked J E) to the eighth century B. C. This may be accepted for the greater part of the Hexateuch, but there are strong grounds for putting the prophetic element in Gen. ii.—xi. later. Apart from this and other questions of special criticism, Mr. Addis's book will be welcomed by those who wish to see the form in which the old history was known and stated in the times of Amos and Isaiah, before the priestly additions (Gen. i. and other chapters) were incorporated into the text.

—Our Scotch friends have already read us a lesson in the treatment of women by their three great Universities of St. Andrews, Edinburgh, and Glasgow; and now they come forward to show us what they can accomplish in the way of pounds, shillings, and pence when they set their shoulders to the wheel in behalf of a popular cause. On the 22d of November a grand bazaar for the benefit of the endowment fund of Queen Margaret College (whose incorporation with the University of Glasgow was some time ago mentioned in these columns) was opened in St. Andrews Halls, Glasgow. Although the bazaar occupied not one but a succession of halls, the largest in Glasgow, the throng of visitors had, by the fourth evening, become so dense that it was necessary to close the doors about half an hour after opening, and to keep them closed for the rest of the evening. Immense quantities of goods of all sorts—work, curiosities, books, and pictures—were contributed by students, past and present, and by the best known people of Glasgow and the West of Scotland. The Queen was the patron, the Marchioness of Lorne the president, while the list of the seventy and odd vice-patrons looks like nothing so much as a page out of Burke's 'Peerage,' so profusely are titles strewn up and down it. The bazaar was opened on the first day by the Lord Provost of Glasgow; on the second, by Lady Alice Shaw Stewart; on the third, by the Principal of the University; on the fourth, by Mrs. Elder, the munificent donor of the buildings of Queen Margaret College; and on the fifth and last day, by the M. P. for the University. To come to the main question, the sum taken in during these five days and evenings reached the magnificent figure of £12,000, with a plus sign to be added. From this sum about £1,500 will have to be deducted for expenses. There will remain, however, when all is told, over £10,000, which the organizers of the bazaar, who have been at work for about a year and a half, will have the enviable pleasure of handing over to the University Court—the body that had so memorably taken the lead in generosity by incorporating Queen Margaret College while the precise figure of her endowment was still trembling in the balance.

—A correspondent writes us from London:

"The Independent Theatre Society of London has at length taken the first step toward the fulfilment of the object for which it was established. It has produced an original drama by an Englishman—or, in this case it would be more correct to say, by an Irishman. 'Widowers' Houses,' by Mr. George Bernard Shaw, was the play given at the second performance of the Society's second season, on December 9, at the little Royalty Theatre in Soho. But this first experiment makes one wonder if henceforth the Society will not do better—artistically at least—by continuing to devote itself to English adaptations of French masterpieces, or even the revival of old English tragedies and comedies. Mr. Shaw certainly is not the young dramatic genius for whom all England has been waiting, but who has been forced hitherto by prejudiced Philistine managers to hide his light. That the author of the 'Quintessence of Ibsenism' should have studied the methods of Ibsen is but natural. It is unfortunate, however, that he limited his study to the preaching proclivities of the master, rather than to his unquestionable dramatic ability. 'Widowers' Houses' is a lesson in economics, an essay on Socialism—it would serve admirably as a lecture at a Fabian or Trafalgar Square Meeting; it is anything but a play. Mr. Shaw's intention, as he explained it in a speech after the performance, was to give a picture of English middle-class life in all its ugliness and sordidness. But if in this he is thought to have succeeded, his 'didactic' comedy, as he calls it, is simply another proof that in art, dramatic or otherwise, something more than a 'human document' is needed; the play, in the manner of Ibsen, is all talk and no action. Mr. Shaw is a very clever man, and the dialogue is relieved by touches of humor and whimsical absurdities which go far to relieve its tediousness, and to place it on a much higher literary plane than the work of a Henry Arthur Jones, for example. Moreover, the plot and characters not making such large demands upon the players as the 'Duchess of Malfi,' given at the first performance, the piece was fairly well rendered, and has brought conspicuously before the public one actor, Mr. James Welch, of more than ordinary talent, who, it is certain, will be heard of again as a comedian. The first night's performance was received with mingled feelings. The artistic element in the audience was bored; the socialistic element was enchanted. But with opposition so strong, and with labor organs praising his drama with fulsome flattery as a great social factor, there is every chance of Mr. Shaw's becoming an English Ibsen."

—The question of the origin and the mode of formation of the perfume of flowers has long been earnestly debated amongst botanists without ever being satisfactorily solved. In a paper lately read before the Académie des Sciences, M. Ménard, a young French student of botany, set forth the results of his investigation of the subject, which appear to be more than usually happy. By minute microscopic study of the constituent parts of flowers, he has made out that the essential oils which give off perfume have for their chosen seat the inner surface of the calyx and the corolla. On the outer surface they are rarely found, while, on the other hand, colored pigments, and the tannin which serves to form them, abound. Following out the development of flowers, M. Ménard finds in the chlorophyll, the green coloring matter contained in leaf cells, the source of all these products. It is first transformed into glucosides, substances analogous to tannin. On the outer surface of the flower, where these glucosides are exposed to light and air, they serve as materials for the production of pigments and tannin; on the inner side, protected in the bud, they are transformed into essential oils, which are strongly oxydized at the moment of bloom, and thus disengage their perfume. The fragrance is fine in proportion as the essential oil is pure; that is to say, in proportion as it is free from secondary products derived from the chlorophyll. This explains why white flowers are generally fragrant, while green ones are odorless, and those of the composite family, rich in tannin, are often disagreeable.

—It is a pleasure to notice that the method of exact philological research which has distinguished the work of German literary historians in nearly every domain save that of nineteenth-century literature is beginning to make itself felt in this branch of study also. Seuffert's careful analysis of the 'Nordseebilder,' Elster's admirable Heine edition, Koch's Lenau studies, Litzmann's 'Zeitschrift für Theatergeschichte,' are unmistakable symptoms of a turning of the tide in this direction. And a recent Freiburg doctor's dissertation on Michael Beer, which lies before us, goes to show that even the minor lights of modern literature are now dealt with at German universities in the same spirit of patient and impartial investigation as the ancient or mediæval classics. The author, Dr. Gustav Manz, a pupil of Hermann Paul and Max Koch, promises us, as a continuation of the present thesis, a comprehensive biography of Beer. What he gives here is in the main an analysis of his first dramas, above all of the "Paria." Michael Beer, a brother of the composer Meyerbeer, has left no lasting impression on German literature. He was a man of noble instincts and versatile talents, but he lacked originality. In form as well as in substance he was an imitator of the great eighteenth-century classics. Heine said of him, "He will be immortal as long as he lives"; and although this bitter judgment was dictated by personal jealousy of Beer's extraordinary outward success as a playwright, it is in the main correct. Nevertheless, Beer's career is far from being without interest. No one represents better than he the literary culture and cosmopolitan freedom which, during the first quarter of this century, emanated from the Jewish circles of the Prussian capital; and, with the exception of Heine and Auerbach, no Jewish writer has been received more readily and sympathetically by the German public than he. His "Paria," which during the twenties was one of the favorite plays of the German stage, stands midway between Lessing's "Nathan" and Gutzkow's "Uriel Acosta." Like the former, it preaches the gospel of humanity and toleration; like the latter, it presents a harrowing picture of the evils of caste and prejudice; and if it is inferior to either in dramatic force, it certainly will remain a remarkable document in the history of intellectual emancipation. It is to be hoped that Dr. Manz will make good his promise and give us an authentic account of the poet's life.

WRIGHT'S MAN AND THE GLACIAL PERIOD.

Man and the Glacial Period. By G. Frederick Wright. [International Scientific Series.] D. Appleton & Co.

THE present volume has much in common with the author's 'Ice Age in North America.' Its scope is stated to be the question of "man's entire relation to the glacial period in Europe as well as in America," and its professed purpose is to give "a clear view of the present state of progress in one department of the inquiries concerning man's antiquity." The earlier chapters are intended to supply the geological information necessary to an appreciation of the evidence bearing on man's relation to the ice epoch. The first contribution to this end is a series of definitions which, unfortunately, are largely incorrect or incomplete. A glacier is defined to be "a mass of ice so situated and of such size as to have motion in itself" (p. 2). The definition of *névé* is embodied in the following: "Upon ascending

a glacier far enough, one reaches a motionless part corresponding to the lake out of which a river often flows. Technically, this motionless part is called the *névé*" (p. 3). The one definition is inadequate, as short definitions are almost sure to be, while the other is altogether wrong. *Névé* and *motion* stand in no necessary relation to each other. In point of fact, *névé* is not a "motionless part," but moves along with the rest of a glacier. To this "motionless" *névé* is ascribed the function of generating the impulse which sets the glacier in motion. How a motionless body is to generate motion, we do not comprehend.

To a proper understanding of the relation of human relics to the formations of glacial age an accurate knowledge of glacial formations, and a detailed as well as a general conception of glacial history, are indispensable. The chapter to which we turn for this information contains many details concerning the work done by our author in Pennsylvania many years since, while he was the late Prof. Lewis's assistant. These details, some of which have no bearing on the theme announced in the preface, can hardly do more than confuse the lay reader, while they add nothing to the knowledge of the expert. The minute definition of the position of the terminal moraine in Pennsylvania is followed by the definition of the position of the outer limit of drift in Ohio and the States further west, without clear indication that the one line is not the continuation of the other. The westward continuation of the moraine of Pennsylvania is found to lie a considerable distance north of the outer limit of glacial drift. This fact is full of meaning for the theme Prof. Wright discusses, but of its significance we find nothing, and the non-scientific reader will hardly be able to apprehend the true relation of things. Prof. Wright has long held that when the ice of the glacial period reached and crossed the Ohio River near Cincinnati, it constituted a dam behind which the waters of the Ohio accumulated, forming a lake. At first thought such an hypothesis seems altogether credible. But critical examination has shown that the two main lines of evidence relied upon by the advocates of the ice-dam hypothesis have been misinterpreted. It has been clearly pointed out on the one hand that the terraces of the upper branches of the Ohio could not have been produced by the supposed lake, even if it existed. It has been shown on the other hand that the silts supposed to have been deposited in the conjectured lake *above* the alleged dam, are continuous with deposits at similar levels *below* the dam. It follows that if the ice dam were responsible for the waters which deposited the silt, it must have had the remarkable ability of ponding the waters of the Ohio below as well as above itself. The published evidence on this latter point bearing against the author's conclusion is not considered.

Were the evidence of glacial man all that Prof. Wright believes it to be, one of the geological questions which most vitally affect its interpretation is the question of one versus multiple ice-epochs. When glacial studies began to be actively prosecuted in America, less than a score of years ago, the chapter of geological history with which they dealt was considered so remarkable that all effort was directed toward proving or disproving the reality of continental glaciation. We believe it was not until the general fact of continental glaciation had been measurably demonstrated that the question of more than one epoch of glaciation was seriously considered. It then became evident to the leaders in this field of geology that certain phenomena suggested two glaciations instead of one. Thus arose the hypothesis that, after one protracted advance of the ice, there followed a genial interval, during which the ice receded far to the north, and that subsequently it re-advanced, overriding and burying or destroying the evidences of its first incursion and retreat. So soon as this possibility was clearly conceived it gave new impetus to observation, with the result that the belief in two glaciations has come to be general. There are still dissenters from the doctrine of two glaciations, just as there were for a long time, and indeed as there are still, dissenters from the idea of even one. But the set has been steadily toward the acceptance of the doctrine of recurring glaciations. In 1891 the notion was distinctly announced in America that our drift phenomena may require the recognition of more than two glacial epochs, and already this suggestion finds favor among some of our leaders in glaciology, both here and abroad. In the face of this condition of opinion in Europe and America, we have a book, purporting to set forth the "present state of progress," which advocates the ideas that were generally held by glacialists in the days of the infancy of glacial geology. It is true that Prof. Wright nominally considers the arguments on which the current doctrine of two or more glacial epochs is based, and finds them insufficient; but his consideration is neither impartial nor adequate.

The second part of the treatise deals with man's relation to the glacial formations, and the author's conclusion that man was contemporaneous with the ice of the glacial epoch is given without qualification, although the whole tendency of recent critical investigation has been to raise very serious doubts concerning the sufficiency of the supposed proofs of this proposition. It is not the integrity of the earlier investigators that is questioned, but their conclusions. Many so-called palæolithic implements have been found in the glacial gravels of the Delaware River at Trenton, and a few in glacial gravels in several other localities. Later researches, especially those carried on by Holmes, have shown that objects which are the exact counterparts of these so-called palæolithic implements are to be found in great abundance about the sites of the workshops of modern Indians in many localities in various parts of the country. The occurrence of these objects of human workmanship in glacial gravels which have never been disturbed, if such be the fact, is another question. If their form can be accounted for without invoking palæolithic man, can their occurrence in gravels of glacial age be explained without supposing man to have existed in the glacial period? This is a geological, rather than an archæological question. By the uprooting of trees and the filling of the excavations thus made, by the movement of gravels on talus slopes, and by the filling of artificial excavations, surface objects may become embedded more or less deeply in gravels of any age. Has this been the history of the objects found in the glacial gravels of America? So far as the Babbitt finds of Little Falls, Minn., are concerned, the answer seems to be affirmative; but evidence that the Trenton objects may be similarly explained is not so conclusive, though we believe no competent geologist has ever observed them in glacial gravels which were demonstrably undisturbed. It is altogether possible, nay, it is altogether probable, that man existed upon the earth in the last glacial epoch. It is altogether possible that he saw the ice of the earlier glacial epochs, or even that the earliest ice sheet did not find the race in its infancy. We are not arguing against the existence of glacial man, but we hold, in common with many geologists and archæologists, that sufficient evidence is not yet forthcoming to demonstrate his contemporaneity with the ice period in America, or any part of it.

When Prof. Wright does not ignore other American glacialists, his recognition of them is not always flattering. Striking cases in point are found on pp. 109 and 307. On the former page, Chamberlin is quoted as "maintaining" that, during the interglacial epoch, the ice "wholly disappeared from the glaciated area to the north." Prof. Chamberlin's printed words are: "How far to the north this retreat carried the margin [of the ice] has not yet been ascertained; but . . . it is thought to be quite safe to believe that it withdrew entirely from our territory, if not from the Canadian highland ('Geology of Wisconsin,' i., 271). On the second page noted, the same author is again misquoted, in the good company of Prof. Comstock, as "maintaining" that during the glacial period the earth's axis "was somewhere in the region of Greenland." Chamberlin and Comstock have done no more than suggest the possibility of axial shifting, and of consequent change of latitudes, as a cause of glaciation in regions which now enjoy immunity from ice, and urge the importance of the fullest investigation along this line. Prof. Wright is in error in claiming as his own the discovery of glacial deposits in Kentucky (p. 212). These deposits were described in the Indiana geological reports years before Prof. Wright's work in that region, by both Messrs. Warder and Sutton; in earlier publications of his own, reference is made to these predecessors.

MEMORIALS OF COUNT VON ROON.

Denkwürdigkeiten aus dem Leben des General-Feld-Marschalls Kriegsministers Grafen von Roon. 2 vols., 8vo, pp. xvi., 502, xii, 764. Breslau: Eduard Trewendt; New York: B. Westermann & Co. 1892.

THESE stout volumes are compiled and edited with a considerable degree of literary skill by Count Waldemar von Roon, the eldest son of the famous War Minister, and are, in great part, a reprint of a series of articles which appeared in the *Deutsche Revue* during the past three years. The author, who, with uncommon self-effacement, does not print his name on the title-page, disclaims, in his preface, the design of producing a full biography of his father, and pretends to furnish nothing more than materials for such a work, limiting his scope still further by including only such matters as had not previously appeared in print. Nevertheless his book gives the reader a vivid impression of one of the chief actors in the most stirring scenes of German history, and serves to demonstrate once more with what genius the Emperor William I. selected his great servants and coadjutors. Among these Field-Marshal Von Roon deserves the third place, immediately next to Bismarck and Moltke, and is especially entitled to the credit of having materially contributed to bringing the two latter into the positions where their respective abilities could tell with their full weight. It was in part due to his repeated suggestions that Bismarck was brought into the Cabinet, and again due to his intervention that Moltke, as chief of staff, was brought into continuous personal communication with

the sovereign instead of having to use the War Minister as a medium. In thus voluntarily limiting his own prerogatives in favor of one who might, in one sense, have seemed a rival, Roon gave one of many proofs of his elevated sense of duty and of his sincere devotion to his king and his country. Perhaps the most interesting trait in the character of William I. is this very devotion with which he inspired his most distinguished adherents, and which he was never tired of acknowledging and rewarding.

His relations with Roon were especially intimate, and dated back before the troubled times of 1848, when, as Prince of Prussia, he was the most hated man in the kingdom. It was in November of that year that he offered to Roon the position of military tutor to Prince Frederick William, then just entering on his eighteenth year and later known as Frederick III. After the remarkable successes of 1866 and 1870, William I. never neglected an opportunity of expressing in public and in private his great obligations to Roon for his services in so organizing the Prussian armies as to render them an instrument of the highest precision. He repeatedly declared that it was due to the preparatory work of Roon, continued for years, that the German armies were so rapidly and uniformly victorious. After awarding full praise to the statesmanship of Bismarck and to the generalship of Moltke, a very considerable share of honor will always remain for the highly intelligent organizing ability of Roon, and for the persistence and energy with which, amid discouragements and difficulties, he kept steadily in view the designs which he finally accomplished.

Aside, however, from his public services, which are a matter of history, Albert von Roon is a striking and interesting figure. In him were personified many of the best traits of the German character, and one can readily imagine that Carlyle would have delighted in making him one of his heroes. His bearing was stern and the reverse of conciliatory; when he declined the place of tutor to Prince Frederick William, he gave as one of his reasons that he was ill-adapted for the atmosphere of a court. His private life was unexceptionable in its purity, and his letters, published in the work before us, show him to have been an affectionate husband and father. The smoothness of his domestic relations was in some contrast with the varied matrimonial adventures of his father, who, at the age of twenty-three, married his first wife, a rich woman ten years his senior, who, in order to marry him, had got herself divorced from her first husband. She died in childbed, and two years after his first marriage he married the daughter of a wealthy Frankfort merchant, but was divorced from her at the end of a year; at the age of twenty-eight he eloped with his third wife, a young widow whose family soon became reconciled to the match and bought the young couple an estate. This marriage, however, was not a happy one, which is not surprising, as the husband was dissipated and extravagant, and seems to have answered the typical description of the reckless and good-looking Prussian lieutenant.

The only surviving child of this marriage was Albert von Roon, born April 30, 1803. As a child he was left very much to himself, having no brothers or sisters, and being only eight years old at the death of his father, who had long been an invalid, while his mother was, by reason of a nervous disorder, incapacitated from managing the household. He was nearly twelve years old when he was first sent to school through the intervention of a cousin, and a year later he entered a military school. The property of his parents had by this time dwindled away to nearly nothing, and he was to a great extent dependent on the charity of relatives who were themselves none too well off, but who made up in good will what they lacked in wealth. The consciousness that he had neither money nor influential connections to push his fortunes, and that his advancement in life depended on his own exertions, stimulated him to diligence in his studies, and, having passed a satisfactory examination, he was appointed second lieutenant in January, 1821.

He did not, however, like many of his colleagues, consider his education complete, but prepared himself for admission to the general military school in Berlin, a sort of high-school or college for such officers as were ambitious to go beyond the ordinary curriculum. He attended its courses from 1824 to 1827, and in 1828 he was appointed instructor of the corps of cadets at Berlin. Like Moltke, he had been a distinguished pupil of Carl Ritter, the great geographer, and, also like Moltke, he had literary talents and instincts. Having been requested by his superiors to prepare a geographical hand-book for military schools, he published, in 1832, a work on the principles of geography, and two years later an abridgment treating of the elements. Both books came into general use and revolutionized the old method of instruction, reaching a sale of 50,000 copies. He also published two other works on similar subjects, but addressed to a more limited public. In 1832 he was relieved from his duties as teacher, and allowed to rejoin his regiment, having been promoted First Lieutenant. It was his chief ambition to join the General Staff, and he at last entered it in 1836, with the rank of Captain, at the comparatively early age of thirty-three. The staff then consisted of only forty-five officers. In the same year he married a cousin who was fifteen years his junior, and with whom he led a harmonious and happy life for forty-two years. Until he had passed his sixtieth year, his household was always conducted on a modest scale, as he had no income but his salary; but he managed to educate a large family, all of his sons entering the army and serving with distinction. One of them was killed at Sedan.

He continued his literary activity, and in 1843 became tutor to Prince Frederick Carl, going with him to Bonn, where the Prince attended the University, and accompanying him on two vacation journeys to Italy. When the revolution of 1848 broke out, Roon had already achieved a distinguished position in the army by his abilities and his character, and had, as above mentioned, attracted the attention of the Prince of Prussia, who was always deeply interested in military affairs. By temperament as well as in consequence of his official position, Roon was a conservative of the straitest sect, and a warm admirer of Prince William. In June, 1849, he took an important part in subduing the insurrection in the Palatinate, and it was his personal experience in the field that opened his eyes to the defective organization of the army and the urgent necessity of introducing thorough-going reforms. During the Crimean War, when Gen. Bonin was dismissed from the Ministry of War on account of his antipathy to Russia, Roon was already mentioned as a suitable man for the position; but as he was still only a colonel, his appointment at that time would have been contrary to established military etiquette.

The first beginnings of army reorganization may be said to date from a memorial on the subject prepared by Roon at the request of the Prince of Prussia in the summer of 1858, a few months before the latter assumed the Regency. Gen. Bonin, who had come back to the Ministry of War, was not favorable to the scheme, and resigned the place to make room for Roon, who was appointed in December, 1859, to the position, which he held for fourteen years. The letters of the Prince Regent printed in the work before us show that Sybel's account of the transaction is not entirely accurate. Roon was at that time (at the age of fifty-six) the youngest lieutenant-general in the army, and the only Conservative in a Liberal Ministry. He did not, however, enter the Cabinet as a politician, but solely as an expert and as the confidant of the Regent. When he had been in office a little over two months, on February 10, 1860, he made his first appearance in the Prussian House of Delegates with two bills for army reorganization which gave the signal for violent and bitter struggles with the Liberal majority that were waged without intermission until they were terminated by the victories of July, 1866. For more than two years Roon bore the brunt of the fight single-handed, and it was a great relief to him when, in September, 1862, he succeeded in having Bismarck appointed President of the Ministry, and could confine himself to the technical and professional branch of his duties, leaving the political and diplomatic worries to his capable colleague. From that time until his retirement from public life, in 1873, he faithfully seconded the policy of Bismarck, and they remained good friends, in spite of the great irritability of the Chancellor, who, as is well known, was a chronic sufferer from indigestion brought on by his irregular and reckless mode of life. On more than one occasion Roon had to mediate between Bismarck and the King.

It would be interesting, if space served, to follow Roon's official career in detail. His memoirs correct Sybel on one or two minor points besides the one already mentioned. They also seem to show that as late as June 7, 1870, Bismarck had no expectation of war with France during that summer, as in a letter of that date to Roon he speaks of having just taken a furlough of six weeks.

RHODES'S HISTORY OF THE UNITED STATES.

History of the United States, from the Compromise of 1850. By James Ford Rhodes. Vols. I. and II.: 1850-1860. 8vo, pp. 506, 541. Harper & Bros.

THE list of American authors who have made the writing of history their profession is an honorable one, and many educated Americans would give it preëminence in the catalogue of our literary men. Prescott, Bancroft, Motley, Parkman, and Henry Adams make, of themselves, a list in which it would be a "decoration" to be enrolled, and their brilliant success has proved that young men of easy fortune are capable of a life-long devotion to the most laborious of pursuits. Happily it is also true that the pursuit is a fascinating one, the appetite for it growing by what it feeds on; so that the years of seclusion and study which must precede any valuable results are not years of task-work, cheered only by the hope of recognition. They are, perhaps, those of most thorough enjoyment, for broad and deep investigation proves to be its own reward; the growing acquaintance with another time and

its generation of men and women combining the pleasures of travel and of society within the four walls of the investigator's own library.

Mr. Rhodes is a candidate for historical honors, and these two handsome volumes contain the first fruits of labors in which he has been wholly absorbed for a series of years already considerable. His plan is an ambitious one, for he proposes to give us the history of our country from 1850 to 1885; a period covering the whole course of events from the end of the Mexican War to the close of the era of "war issues" by the first election of President Cleveland. A whole library of books has been published dealing with particular parts and individual characters of this period. We have monographs political and military, biographical and autobiographical, Nationalist and Confederate, Republican and Democratic. To grasp the whole with firmness, to seize the dominant influences, to comprehend the true progress of humanity and of thought, to reach the real significance of events and the true motives of action, to recognize the new forces that are developed and the relations of the America of 1885 to that of 1850, is a task compared with which the writing of any of the special works alluded to is mere child's play. Mr. Rhodes will have the encouragement of sympathetic good wishes from educated men and women, who will follow the execution of his great plan with sincere and hopeful interest.

In his opening volumes we naturally look for the keynote of the composition as a whole. We desire to learn his standpoint, and to compare with our own his canons of judgment in regard to men and events. His own personal and intellectual history counts for much, in this part of our inquiry, and what we know of it throws useful light upon his treatment of the ten years which preceded the civil war.

Mr. Rhodes is a member of a family of business men of Cleveland, Ohio, where his father was for many years a marked character and a prominent citizen, largely interested in the railway development of the West and a successful captain of industry. He was in intimate personal relations with his kinsman, Stephen A. Douglas, and a devoted friend and political supporter of Douglas in his public career. He was one of the faithful band who advocated Douglas's nomination to the Presidency at the Charleston Convention in 1860, and who nominated him at Baltimore when the ultra Southern men had seceded from the Convention. Our author knew Douglas as a child knows an honored and intimate guest in his father's house, and more or less of hero-worship entered into his boyish recollections of that dashing politician. His college life in New York and some years then spent in study in Paris and in Berlin developed robust intellectual qualities which in early manhood took a decided bent toward historical study. Too young himself, during the civil war, to have other sentiments and opinions than those he may be said to have inherited, he became as he grew to manhood a consistent and earnest supporter of the national cause against that of the Secessionists. The Douglas Democrats were generally known as War Democrats, and their zeal against the Southern Confederacy was sharpened by their personal attachment to a leader who, as they thought, had been politically destroyed by the South when he might, by its support, have carried the country through its crisis without war.

In such influences and surroundings Mr. Rhodes grew up, and we may safely guess that his own remembrances of Douglas gave added zest to his study of the causes which led to the great rebellion, and that a wish to picture his father's friend in his relations to the pregnant events of the decade before the outbreak was potent in his resolution to devote himself to a work which has grown upon his hands. At least, we should hazard little in saying that such considerations led him to place the beginning of his history at 1850 rather than 1860, when the purpose of writing a history of the war period and its results became fixed.

Von Holst's well-known work ends with the inauguration of Mr. Lincoln, and it would be impossible to avoid some comparison between his final volumes and these opening ones of Mr. Rhodes, since they cover the same period. The general conclusions are not materially different. Both adopt the anti-slavery view and are earnest supporters of the national side. The German historian seems to us, however, to have a stronger grasp of the great truth that the slavery question was the essence of the constitutional history of the country from the beginning of the century, and had to work itself out by the inevitable laws of political evolution. Mr. Rhodes speaks of the periods of quiet which came from time to time, as if the agitation had ceased and a permanent acquiescence could be reckoned upon if the successive compromises had not been disturbed. He does not seem to recognize with sufficient clearness the fact that there was a constant current of public opinion, growing, at the North, into a swelling tide of opposition to slavery, while a counter current at the South was carrying the people of the slave-holding States toward the logical demand for the recognition of the doctrine of chattel property in slaves everywhere in the Territories of the United States.

The difference between the historians seems to be due, in the main, to their different personal education in early life, which has in some degree modified their views of the earlier stages of the great discussion. We think that view the juster which looks at the anti-slavery movement as a ceaseless and continuous one, in which the onward movement of the tide is never stayed, though there may seem to be a backward flow between the surges which still sweep farther up the shore, one after another. The steady advance of public opinion is proved by the force and height of these successive waves. We had occasion to say, in noticing Von Holst's last volume, that newspapers are not conclusive evidence on this point. The proofs of the progress of opinion are often wanting or obscure, until some new occasion calls them out; and nothing is more common than to find the so-called organs of public opinion the most astonished at the results of an election or of some other outward expression of a growing popular will. There is a degree of danger, therefore, that a historian shall too confidently assume that his materials are complete, and that what he does not find in current contemporaneous publications is non-existent. There is abundant room for the exercise of inductive sagacity in drawing conclusions from the evidence, however full the record and the testimony may seem to be.

An application for this may be found in Mr. Rhodes's treatment of Mr. Webster's celebrated speech on March 7, 1850, which is commonly regarded as his political suicide. The Massachusetts statesman then separated himself from the anti-slavery Whigs, and gave the full weight of his influence to Mr. Clay's compromise measures, including the Fugitive Slave Bill and the opening of Utah and New Mexico to slavery. In regard to the latter point, Mr. Webster based his conduct on the force of the "law of nature," which he said would forbid slavery to take root in those Territories. Mr. Rhodes thinks he was right in this, and that he saw more clearly than his detractors. Of course, the burning questions at the time were whether Mr. Webster was not abandoning the more earnest anti-slavery ground which he, as well as his constituents, had before occupied, and whether he was not doing this to secure Southern support in a Presidential nomination. But, quite apart from this, the event showed that he was not wise, but mistaken. The natural barrier to the spread of slavery found in climate or physical features of the country was in fact inefficient in the middle belt of our States and Territories. Slavery was kept out of Indiana and Illinois only by the Ordinance of 1787. Utah and part of what was then New Mexico were in the latitude of Missouri, which was wholly north of the compromise line of 36 degrees 30 minutes north latitude. The struggle for Kansas was in the same belt.

But the question whether slavery would ultimately hold a Territory was but a part, and the smaller part, of the controversy. If it could enter the Territory at all, it had the effect of a pestilence upon free labor, making it avoid the region as one infected. Immigrants would not go to a new country where their future contained so great a hazard. The result of organized immigration into Kansas was the exception that proved the rule, for it was the extraordinary organization that gave the free settlers courage.

Nor does Mr. Webster's wisdom appear greater if we consider what would have been the results of an opposite course. Suppose he had defeated the Compromise by casting his lot with the anti-slavery Whigs. California would not have been admitted to the Union at that session of Congress; but with the marvellous rush of immigration, stimulated by the "gold-fever," who can believe that it could have been kept out longer than a single year? This at least is certain: the pretended repeal of the Missouri Compromise would never have been attempted, the Kansas-Nebraska bills of Douglas would never have been passed, the civil war in Kansas would have been averted, John Brown might have remained on his farm in North Elba, and secession must have found some other pretext. Such a Pandora's box did Mr. Webster's speech prove to be!

The apology for Webster was necessary to consistency, for Mr. Rhodes defends Douglas when the latter also applied the "law of nature" to the slavery question in Kansas. He, however, does not justify the introduction of the Kansas-Nebraska Bill, nor the repeal of the Missouri Compromise. He takes a more favorable view of Mr. Douglas's possible sincerity than is commonly taken, and, connecting the "squatter-sovereignty" doctrine with that of the "natural law" against slavery found in the physical characteristics of the Territory, he gives almost unqualified praise to Mr. Douglas's course after he broke with Buchanan and opposed admission under the Lecompton Constitution.

The picture of Mr. Douglas is a striking one, and, even making fair allowance for the predilection to which we have adverted, it may be accepted as one that is on the whole reasonable and just. The question of his motives and ambitions may be waived, and we may be glad to see in him genial and attractive traits of character which might well draw to him the devoted attachment of friends. We get also

clearer views of his mental processes in the great contest of 1860, and can respect his far-sightedness in maintaining the form of doctrine on which he finally planted himself, as being the only one he could defend, short of surrendering at discretion to the logic with which Mr. Lincoln had belabored him in the famous debate of 1858. He saw that the ultra-Southern position was destructive of the Democratic party as it had been of the Whig, and that unless a new Democracy could be successful under his banner of Popular Sovereignty, defeat was inevitable. He was personally indifferent to slavery as an institution, not caring, as he said, whether it was voted up or down, and so put himself on the wrong side of an issue in which the Northern conscience was following Mr. Lincoln, who saw in the moral wrong of slavery a reason why it should ultimately be extinguished and should, at least, be kept from spreading. With the opening of the war the Douglas party became earnest supporters of the Lincoln Administration for a time; and, in the American willingness, in politics, to let bygones be bygones, men did not inquire of Seward or Chase, of Wade or Chandler, whether they had been in the old Democratic or the old Whig party.

Mr. Rhodes has expressly reserved for future treatment several topics which belong to the physical development or the financial history of the country. He has given us two examples of his treatment of special topics, from which we may form some judgment of his force and his methods. In a long chapter on Slavery he has taken up the system in itself, in its effects upon the master and his family, upon the slave and his posterity, and upon the community in which the system is tolerated. He has given the arraignment by its enemies, the apologies of those who tolerated it, and the arguments of its ultra advocates. It would be hard to find a more judicial summing up of the case, and we doubt whether a fairer view of the whole subject can be met with in so moderate a space. The bibliography of this chapter alone is very extensive, and the author may take satisfaction in having done an excellent piece of work for which all students will thank him.

He has also devoted the greater part of a chapter to the yellow-fever epidemic in New Orleans in 1853, in which a dramatic contrast is drawn between the careless gayety of creole life in the preceding winter and the horrible scenes of panic when the epidemic reached its height in the late summer. In both parts of the contrast there are suggestions of models studied in the French school of realism, though keeping within the limits imposed by English and American taste. The chapter is a very powerful one, but the reader has a little the feeling that it is not altogether within the scale of proportions required by general history. It is strictly local, with no general treatment of the subject of the epidemic, with hardly a reference to its spread or its characteristics in other cities and places. One cannot help thinking that it is an insertion, having a very loose connection with the current story, from which its high coloring makes it stand out all the more noticeably. This sense of disproportion grows when we find that the Japan expedition under Commodore Perry is dismissed in a footnote.

In such a work it is, no doubt, one of the greatest embarrassments of an author to fix this proportion of parts, to decide when to expand, when to condense, what to omit and what to include. Art is proverbially long, and the most artistic literary sense must be trained by feeling its way to a satisfactory arrangement of figures and of perspective on the historical canvas. When an author's *magnum opus* is his only work, we have no right to complain if we sometimes detect tentative efforts in it, and a less sure grasp of the whole than we may fairly look for as he goes on. We are confident that Mr. Rhodes will not take it amiss if we say that the first of these volumes would be none the worse for a literary revision, and that the second shows a simpler and more masculine style, an easier and more assured flow of narrative, and greater freedom from mannerisms and habitual expressions. The mere dash of the pen through a phrase or a word, now and then, would silence nearly every criticism in this respect. His style, at its best, is direct and strong, giving the matter preëminence, and thinking comparatively little of form. This certainly is the solid way to build such a work, though it still leaves room for reasonable care in removing obscurities or infelicities of expression, and giving such thought to make the style agreeable as may consist with the rule that the art should conceal itself.

Our duty would be quite incompletely done if we should omit to recognize the evidences of very wide research and most conscientious labor to be found on nearly every page of these volumes. The extent to which newspaper files have been studied is remarkable. Mr. Rhodes has not been content to follow one or two leading papers of each political party, but has delved right and left among the journals of the North and the South, the East and the West, the organs and the independent presses, and has brought to light much fresh and significant matter. The general literature of his subject he seems to have classified carefully and to have well in hand, so that his views, whether we agree with them or no, are so widely based upon the study of contemporary material that no one can treat them lightly or challenge them without reflection. It is already certain that if he shall live to complete his task, we shall have a noteworthy and valuable addition to our solid literature. It may not be absolutely free from predilection and bias, but the unquestionable honesty of his purpose and the thoroughness of his method will give as nearly judicial results as we may fairly expect from any one who has lived in contact with the events which he narrates.

NADAILLAC'S PREHISTORIC MANNERS

Manners and Monuments of Prehistoric Peoples. By the Marquis de Nadaillac. Translated by Nancy Bell (N. D'Anvers). G. P. Putnam's Sons. 1892. 412 pp., 8vo, 113 illus.

PREVIOUS publications by the Marquis de Nadaillac, 'Les Premiers Hommes' and 'L'Amérique Préhistorique,' have been welcomed as successful endeavors to popularize the main results reached by the modern science of prehistoric archæology. The latter work was translated into English some years since by the lady who has undertaken a similar charge for the present volume, and has been published in this country. In the work before us, the author has attempted to present within moderate dimensions a vivid picture of "the life and times" of early man, condensed from his larger studies spoken of above. This difficult task, we think, has been accomplished better than it has ever been done before. We regret, however, that we cannot speak as favorably of the translator's share in the volume in hand. On the contrary, we feel constrained to characterize it as marked by such carelessness and ignorance, both of the language and of the subject-matter of the original, as to require its thorough revision, which the beautiful mechanical execution of the book warrants. This is certainly a grave charge to bring, but we think the instances that have fallen under our eye in the course of our examination fully justify it, and some of these we shall proceed to place before our readers.

A prefatory note states that "the author and translator have carefully brought down to date the original edition," etc. This, however, we can scarcely credit, as we find that no attempt has been made to correct errors pointed out by Cartailhac, in the *Matériaux*, so long ago as June, 1888. We do not feel warranted, however, in fixing upon the author the responsibility for blunders not to be found in the original.

M. Gaston Paris appears (p. 4) disguised under the appellation of M. Gaston. We read on p. 7 that, "during the early portion of the eighteenth century, a pointed black flint, *evidently the head of a spear* [the italics are ours], was found in London with the tooth of an elephant. It was described in *the newspapers of the day*." The author is not guilty of asserting that this classic first discovered palæolithic implement was "evidently the head of a spear," which could not possibly be true, as is proved by its magnitude and weight, but only that it was *taillé en pointe de lance*, shaped in form like a spear-head; while instead of "newspapers" he speaks of *les ouvrages du temps*, by which he intends Hearne's edition of Leland's 'Collectanea,' a ponderous antiquarian treatise in six volumes. We are informed that the Etruscans wore flint arrow-heads on their "collars" (p. 17) instead of their "necklaces" (*colliers*); and, possibly by a confusion of "barrows" with "burrows," *barrows enfouis sous un talus* is rendered "barrows hollowed out of the cliff," for "covered by a slope of detritus" (p. 30). On p. 66 a harpoon is said to be made of *whalebone*, as the translation of *de l'os d'un cétace*, bone of a cetacean.

Herodotus's familiar story about certain ancient Lake-Dwellers who were in the habit of lowering baskets into the water and drawing them up filled with fish, is credited to the "Poeni (Carthaginians)," instead of the Pæonians, in Macedonia (p. 67). Certain anchors, made out of large stones, are said to have been discovered in "crossing a basin of the Bay of Penbouet"; the author's statement is *creusant*, excavating (p. 78). A great deal is told about "the celebrated Lake Station of Solutré" (p. 85), which is still further disguised in the index as "Solutré Cave." This famous open-air station is not far from Mâcon, and there is no lake nearer to it than Geneva. When it is stated that "4,000 flints were picked up there in one dwelling alone" (p. 232), this can only be true of the station as a whole. The author is made to speak of "the bolas flung by the ancient Gauls" (p. 88), while what he actually does is to conjecture that possibly certain rounded stones may have been used by the ancient Gauls for the same purpose for which *bolas* are used by the inhabitants of the pampas of South America.

We read on p. 90 that "to all appearance the most ancient bows *of historic times* greatly resemble these two prehistoric examples." By the addition of the words "of historic times" the author's meaning is completely changed. He is arguing that no bows belonging to the palæolithic period are known,

but that probably they resembled the two known prehistoric examples, which belong to the neolithic period. We must beg leave, by the way, to record our disagreement with this opinion of M. de Nadaillac, as we do not think that palæolithic man had advanced sufficiently to have invented so complex a weapon as the bow and arrow. On p. 92 "a bevelled arrow-shaft," made of reindeer antler, is spoken of instead of "arrow-head"; *une pointe de trait en bois de renne taillée en biseau; sculptée sur os* (p. 123) is translated "engraved in wood"; and Arian is put for Aryan (p. 161).

Great confusion of thought is shown in the following paragraph (p. 172): "Countless centuries have passed away since the close of the palæolithic epoch. The burghs, nurhags, and castellieri show the progress of civilization, and at the same time prove that this progress extended throughout Europe, and that at a time *not so very far removed from our own*. The close resemblance between *buildings of different dates* enables us to speak with certainty of the connection between the races which succeeded each other in Europe." Such a *non sequitur* as this must not be charged upon the author. His conclusion is that there was a certain progress which spread throughout Europe at dates evidently not far apart, and that it is the resemblance between the different buildings, enumerated above, which enables us to speak with certainty of the connection between the races which succeeded each other in Europe.

We are told (p. 221) that "the most ancient Gallic coins date from about three centuries before our era, and the earliest British from a century *earlier* than that," instead of "later," *postérieures;* that some of the Breton menhirs are "surrounded" by "crosses" (p. 222), instead of "surmounted," *surmontent;* and *pierre branlante*, "rocking-stone," is translated "leaning pillar" (p. 223).

There are some amusing mistakes made in the account given of different kinds of arrow-heads (p. 233); some are said to be triangular, others again "cutting transversely," which is intended to be the translation of *pointes de flèche à tranchant transversal*, arrow-heads with transverse edges, or chisel-headed arrows; "some with, some without feathers," instead of "barbs," *ailerons*.

We are told (p. 248) about certain jade objects found in Nicaragua and about "the marks they retain of having been rubbed up," which is the translation given of *les retouches qu'ils portent*, the marks of secondary chipping they show. On a skull figured at p. 249 a wound is to be seen, and it is stated in regard to it that there "are marks of an attempt at healing. According to Dr. Hamy, many of the bones found in the Sordes Cave have very curious wounds." The author is speaking of the healing-process, *réparation*, to be seen upon numerous bones, and says that those in the Sordes Cave display very singular instances of it—*offrent des cas très curieux*. An arrow-head is said to have been "flung with such a sure hand that it has been driven *ten inches* deep into the bony tissue." One would suppose that common sense would have made impossible such a version of *vingt-cinq millimètres*, one inch (p. 252). *Des crânes percées d'un trou circulaire* (p. 255) is translated "pierced with circular tools"; *traumatisme* (p. 277) is called a "cerebral disease"; and *des lames minces et allongées* is rendered into "long, thin slices," instead of "slender blades."

By the careless omission of the words "and the Ring" (p. 291), the well-known ancient fortification in the Vosges Mountains from which Cooper's novel, 'The Heidenmauer,' derives its name, is called "the Heidenmauer of Saint Odila near Hermanskiel, between the Moselle and the Rhine." Thus both its geographical situation and its identity are disguised, as there are several "Heathenwalls" in Central Europe. Finally, Schliemann is spoken of (p. 342) as "the great Danish antiquary": the celebrated proto-Etruscan city of Marzabotto, which was at first supposed to be only a cemetery, is transmuted into Manzabotta (p. 356); Thayngen Cave is said in the index to be in Belgium, instead of in Switzerland, and we are told (p. 393) about "the scarcity of human remains in palæolithic caves and mounds," though it passes our comprehension to know what can be meant by a "palæolithic mound."

We had noted many more "errors and omissions" of the translator, but we spare our readers' patience. If space had permitted, we should have liked to say a few words about some disputed topics in prehistoric archæology, in which we differ from the position assumed by the author, but we will confine ourselves to a single observation. The author is arguing that pottery was known in palæolithic times, contrary to the more generally received opinion that it was the invention of neolithic man, and he says in a note (p. 100), "But what is the value of categorical assertions of this kind [*i.e.*, about the absence of palæolithic pottery in England] in presence of the fragments of pottery found at different levels in Kent's Hole?" Now, if this statement were correct, it might be regarded as settling the question, for never were investigations conducted more carefully and more scientifically than were those carried on for fourteen years by Mr. Pengelly on behalf of the British Association. This is what he says in his report made to that body in 1873, p. 213: "The men of the Black Mould had a great variety of bone instruments; they used spindle-whorls, and made pottery, and smelted and compounded metals. The older men of the Cave Earth made few bone tools; they used needles, and probably stitched skins together; but they had neither spindle-whorls, nor pottery, nor metals." There could not be a plainer assertion than this of the absence of pottery from the more ancient deposits in Kent's Hole.

We should find, however, very little fault with his general treatment of the subject by the author, and we could confidently recommend the book as the most comprehensive one in the English language treating of the earliest periods of man's existence, if proper corrections are made in the translation, as we have suggested.

The Naturalist in La Plata. By W. H. Hudson, C.M.Z.S. New York: Appletons; London: Chapman & Hall. 1892. 8vo, pp. 388. Illustrated.

THAT Mr. Hudson is a master of the art of description, a close observer, and capable of doing very good thinking, is well set forth by this volume. It is rarely the case that a writer on natural history so nearly produces in the minds of his readers the impression that they have seen and heard and felt with him. He has a fascinating style, clear, simple, and well-adapted to all classes of those interested in popular science. Besides its attractiveness for present reading there is much in the book that will last.

The matter relates to the peculiar life and conditions of "La Pampa," the low and comparatively level region east of the foothills of the Andes in the southern portion of South America—subjects which heretofore have been somewhat neglected. Treating of his playground, of his playfellows in boyhood, and of his comrades in later life, the author writes with love and sympathy engendered by years of familiarity. What he has brought out by his thinking is no less interesting than the purely descriptive portions, though in places observations insufficiently varied or numerous render it liable to criticism.

The work is an extensive and diversified series of glimpses at natural phenomena, some of which pertain to insects—spiders, dragon-flies, mosquitoes, bees, wasps, light-bearers, and parasites; some to the birds—rheas, humming-birds, jacanas, wood-hewers, and screamers; some to mammals—mice, coypus, armadillos, vizcachas, huanacos, pumas, and gauchos, and a few to reptiles. The more complete and thorough studies are "the biography of the vizcacha" (the "prairie dog" of the far south), and the history of the "wood-hewer" family of birds, the Dendrocolaptidæ. Nature's treatment of excessive increase is exemplified in "a wave of life," an inordinate abundance of mice that induced rapid multiplication and gathering of their enemies—augmented even by insectivores changing diet for the time—all again reduced to lowest numbers by a season of drought. Certain records must await further observations before definite conclusions can be drawn. Such a case is that of "the wrestler frog," which grasped and squeezed the author's fingers before attempting to escape, then profited by the surprise of its would-be captor. From the account it would seem as if this was the usual habit, yet it may have been in the breeding season, when, as is known, the males of different species are prone to grasp moving objects near them—some having been taken tightly clasping the heads or backs of fishes. At this time the arms of such males become stronger and much enlarged, and each breast, and the inside of the first finger, of some species is provided with tubercular horn-covered spines to aid in holding. A similar reception is to be accorded the story of the huanaco's return to a special dying place, when sorely stricken. In North America there are numerous "boneyards" among the foothills on which similar legends might be founded, but they are simply sheltered places in which the herds seek protection from storm and cold, where winter after winter has added to the accumulation of the skeletons of starved and frozen.

One of the heaviest blows yet dealt the theory of sexual selection occurs in the chapter on "Music and Dancing in Nature." Peculiar antics and songs of birds, solitary or in company, in the air or on the earth, the dances of the ypecaha rails, the wing displays of the jacanas, the ludicrous dance of a pair of spur-winged lapwings with a visitor from a neighboring pair, the ecstasies of the mocking-bird, the soarings and concerts of the crested screamers—all, with many others similarly vociferous and novel, are attributed to periodical fits of gladness, to joyous impulses such as induce extravagant actions in man himself. The conclusion is quite reasonable and likely to prevail, even though it may not apply to some of the vagaries of courtship.

In "The Strange Instincts of Cattle" there is an explanation which apparently is somewhat farther fetched: the killing of the disabled comrade by the herd is attributed to "a blunder in the helping instinct"; the herd, ex-

cited by cries and blood, rushes together not to kill, but to rescue. "In such circumstances the excitement must be discharged, the instinct obeyed; and, in the absence of any other object of attack, the illusion is produced and it discharges itself on the struggling companion." Now it is true, among other animals as well as cattle, that often, possibly most often, the victim, whether in a trap or in the field, is itself responsible for the attack upon it; for when wounded, in pain and enraged, it attacks any that come near it, and in consequence suffers the penalty. It hardly seems necessary to suppose the existence of an illusion; an attack is resented, and, being at a disadvantage, the attacking party gets killed. There is some resemblance between the mêlées of the cattle and those of the birds. An ypecaha rail raises a cry, and straightway a dozen or twenty others rush to the spot and engage in a tremendous screaming concert, dashing about with flapping wings as if crazed. A member of the herd begins to bellow and show signs of strong excitement, often without apparent cause; at once the entire herd rushes toward him, bellowing and plunging about as if suddenly maddened. The disturbance of the birds ends in peace. The clumsy cattle, in their reckless fervor, strike and wound one another until what began as an emotional outbreak of another character ends in fighting and possibly in slaughter; yet these latter were but accidental consequences of an excited condition of the herd.

The book may be safely and heartily recommended as one of the most original, thoughtful, and delightful books on popular natural history. Special attention of the proof-reader for future editions is needed in various portions of the text.

In Arctic Seas: the Voyage of the *Kite* with the Peary Expedition. By Robert N. Keely, jr., M.D., and G. G. Davis, M.D. Philadelphia: Rufus C. Hartranft. 1892. Pp. viii, 524, 8vo. Illustrated.

THIS work is divided into two parts, of which the first comprises the narrative of the expedition sent in 1891 to convey Lieut. Peary and his party to the Northwestern Coast of Greenland, while the second contains an account of the second voyage of the same vessel in 1892, when she was sent to bring the party home again. The latter also includes a transcript of the log of the *Kite* during the relief expedition, and correspondence relating to the fate of Verhoeff, the mineralogist of the party, who disappeared a few days before the return of the expedition, and is supposed to have lost his life by falling into a crevasse in one of the glaciers during an imprudent excursion undertaken without a companion. The description of Lieut. Peary's journey over the inland ice, and its results, occupies but twenty pages; while the meteorological and other scientific records do not appear at all, indicating that the explorer has reserved for himself a detailed account of his remarkable journey and the observations taken during the winter at McCormick Bay, to be published later. A sketch-map of Greenland shows the general direction and termination of the journey over the ice from the winter quarters to a large fiord on the northeastern shore of Greenland, about one hundred and twenty miles south and east from Lockwood's furthest on the north shore.

A discussion of the journey and its bearing on the future of arctic exploration is better deferred until the publication of full details, but it may be said that the records show that exploration over the inland ice with a small and suitably equipped party is less difficult than had been anticipated, and offers the prospect that much more may be done in Greenland in this way than might hitherto have been hoped for. The party seems to have been composed of congenial spirits, and the wintering passed more pleasantly and with less hardship than is usual in such cases. Even the hazardous experiment of including a lady in the party bore no evil fruits, though under conceivable circumstances it might have proved most unfortunate. It is certainly to be hoped that no future expedition will risk adding to the ordinary perils and anxieties of arctic work the knowledge that failure in either of several ways will certainly bring disaster upon a woman. The devoted self-sacrifice of the sex has been put to the proof too often to need any such test as this, and it is much to be feared that a repetition of it will add a new chapter to the annals of suffering which we may well be spared.

The remaining five hundred pages of the book contain a cheerful and entertaining account of the experiences of the party on the *Kite* during her two voyages, but nothing more. There is no addition to knowledge in it, or anything of serious importance. The illustrations are numerous and (except the portraits) foggy, or, occasionally, scratchy. The work terminates with a list of the persons invited to the reception given to the Lieutenant and his party after their return. It is attractively printed and bound, but contains no index.

The Acts and Resolves, Public and Private, of the Province of the Massachusetts Bay, etc. Vol. VII., being Volume II. of the Appendix, containing Resolves, etc. 1692–1702. Boston. 1892. 8vo, pp. 851.

IN this volume 372 pages are given to the Resolves, 374 pages to the editorial notes by Abner C. Goodell, jr., and 100 pages to the indexes. It is well known that, in five immense volumes, Mr. Goodell has already published for the Commonwealth the Public Laws for the Provincial period. He has now begun the issue of two remaining classes of laws—Private Laws; and Resolves, Orders, Addresses, etc. Volume vi. is to commence the series of Private Acts, and, though already in type, it is preceded by this seventh volume.

As to these Resolves, no particular enumeration is necessary. Of necessity they relate to special matters, mostly of temporary importance, and are to be considered as of antiquarian value, rather than as contributions to jurisprudence. Happy is the community whose records of such matters is ample; thrice happy the community which possesses an antiquary able and willing to gather up and suitably edit such a collection. On turning over Mr. Goodell's notes, the first impression is one of wonder at their extent. These 374 pages measure each 8 inches by 6, with 80 lines to the page, in small type. There are about 1,200 words to a page. Compare this with Parkman's last work—730 pages, with an average of not over 300 words to a page—and it will be seen that Mr. Goodell's notes cover nearly double the bulk. This comparison, of course, is made merely to show the amount of literary work covered by the phrase "with historical and explanatory notes." As to the quality of these notes much might be said, but the best description perhaps is that they are exhaustive of the subject. Mr. Goodell's wonderful industry and memory combine to enable him to bring into each note all that pertains to it and is to be found in the archives. To the local historian and the genealogist these pages will be most welcome.

It is impossible to overrate the value of the work already performed by Mr. Goodell. No other State has yet equalled Massachusetts in this department, and, in fact, men fit for such work are very rare. It not only requires that the editor shall be competent to take a high rank as an historian, but that he shall be willing to sacrifice his literary aspirations for the purpose of furnishing the materials to be used hereafter by others. It is at best a thankless task; its burden is increased when the work has to be annually criticised by a committee of a legislature whose approval or sufferance is indispensable for the necessary annual appropriation. The public will never know the difficulties which marked the issue of the earlier volumes of this series; but it is to be hoped that no more crude and impatient criticism will be allowed utterance.

Beauty of Form and Grace of Vesture. By Frances Mary Steele and Elizabeth Livingston Steele Adams. Dodd, Mead & Co.

THIS book, as the title indicates, is occupied less with hygienic dress reform than with æsthetic personal adornment. The most natural place in the world to find it would be the table of a drawing-room palely decorated in blue green or green blue, relieved by peacock feathers, Whistler etchings, and old delf. Admirably in keeping with such surroundings would be the ornaments, costumes, attitudes, and expressions of face it plans and advises. After looking through its pages one feels much as one has felt on coming from the Grosvenor Gallery into the common light of Bond Street. Ugly as are the crudities of shop-windows and the conventional fashions of women, they are yet a relief from the strained intensity of the limply draped ladies who pose in all manner of art colors and art fabrics. A sad self-consciousness such as theirs would, one is tempted to believe, be the fate of maid or matron who should pore too persistently upon the intricate directions here given for the attainment of beauty of form and feature.

Nor does it seem likely that the woman in healthy revolt against tight stays, high heels, and similar abominations of toilet, will here find the needed practical aid. Pleasing suggestions and charming generalities there are in abundance; but to those who are still in the toils of conventionality the subtle doctrines of æstheticism in dress cannot be imparted without a temporary descent from artistic declamation to plain and commonplace demonstration—demonstration so plain that even the novice in curves and folds and lines may ponder thereon and not grow confused. It is a pity, too, that a volume with a mission in one of the minor arts should not hold up a high standard of excellence in another, by illustrations better executed than those which are so profusely used and for the most part indifferently carried out.

A Famous Battery and Its Campaigns, 1861–'64.

By JAMES E. SMITH, Late Captain 4th Independent Battery, New York Volunteer Light Artillery.

A new book about a battery which distinguished itself in many hard-fought battles, and won glory and honor in the great Gettysburg conflict, where it held the extreme left of the army. The history of this battery, from its first engagement to Gettysburg, is the history of the war in the East, and it is told modestly but thrillingly by one who knows, and substantiated by official reports of both Union and Confederate officers, as well as personal reminiscences of participants from other organizations.

GEORG EBERS'S NEW ROMANCE

A Thorny Path.

(Per Aspera.)

By GEORG EBERS, author of "Uarda," "An Egyptian Princess," etc. Two volumes, 16mo. Cloth, $1.50.

This is a singularly strong and impressive story of life in Alexandria, Egypt, in the third century A. D. With the power which comes from mastery of the subject and vividness of expression the author pictures life in the old Egyptian city among the natives, the early Christians, and the Romans. The cruel Emperor Caracalla, who spent some time in Alexandria, plays a prominent part in the book, and there are brilliant descriptions of the games and gladiatorial combats of the arena. These graphic sketches are interspersed in a romance which will be found to hold the reader's interest throughout.

Appletons' General Guide to the United S[illegible].

With numerous Maps and Illustrati[illegible]w edition, revised to date. 12mo. [illegible] morocco, with tuck, $2.50.

Part I, separately, NEW ENGLAND AND M[illegible]DLE STATES AND CANADA, cloth, $1.25. Pa[illegible] II. SOUTHERN AND WESTERN STATES, cloth, $1.25.

During the past year the editor of *Appletons' General Guide* has made a trip over the entire United States. The information gathered by him has been incorporated in the present edition, which comprises several new features and many new illustrations.

For sale by all booksellers; or will be sent by mail on receipt of price by the publishers,

J. B. Lippincott Co.

Chambers's Encyclopædia.

Vol. IX. Just Issued. A Complete Dictionary of Art, Science, History, Literature, Fable, Mythology, Biography, Geography, etc. Published under the auspices of W. & R. Chambers, Edinburgh, and J. B. Lippincott Company, Philadelphia. An entirely new edition. Vol. X., which completes the work, to be published early in the fall. Price, per vol.: Cloth, $3.00; cloth, uncut, $3.00; sheep, $4.00; half morocco, $4.50.

Among the more important copyrighted American articles in Vol. IX. are San Francisco, St. Louis, St. Paul, Scandinavian Mythology, Sir Walter Scott, Sewage, Sewing Machine, Shakers, Shakespeare, Shelley, P. H. Sheridan, Sherman, Shipbuilding, Silk, Silver, Slang, Soda, South Carolina, Spain, Sugar, Spiritualism, etc. The maps of the volume include Russia, Scotland, South Australia, Spain, and South Carolina.

"For all practical purposes, we regard this encyclopædia as one of the best in existence. It does not contain any very long articles, but it has something on nearly every subject which one would desire to look for in a work of this character. Every volume contains nearly a thousand pages, many of which contain specially-prepared articles on leading American topics. For persons who wish to gain information quickly on the largest number of subjects, Chambers's work is incomparably the best."—*Public Ledger.*

Photography: Its History, Processes, Apparatus, and Materials. Comprising working details of all the more important methods. By A. BROTHERS, F.R.A.S.. With plates by many of the processes described, and illustrations in the text. 8vo, cloth, $5.00.

In the preparation of this important work the author's aim has been to produce a handbook for the use of students of photography, which should both give the results of practical experience and include—as far as possible within a modern compass—information gathered from many sources, and not readily accessible. The newer methods have not only been dealt with in sufficient detail, but special attention has been given to the processes in use prior to the introduction of the gelatino-bromide method. The numerous plates illustrate the methods described, and make the work distinctly more serviceable to students.

In Starry Realms. A new work on Astronomy. By ROBERT S. BALL, author of 'Story of the Heavens,' etc. Containing ten full-page Illustrations, with others in the text. 8vo, 380 pages, cloth, $2.50.

The object of the book is to give the general reader some sketches of specially interesting matters relating to the different heavenly bodies. The opening chapters are devoted to the more important relations of the sun to the earth, in which the author illustrates the different functions which the sun has to perform, and points out how it is he is enabled to send down his benefits upon the dwellers upon this earth with a profuseness that shows no sign of exhaustion. The moon's history, and the phenomena attendant upon the lunar world, the planets, the meteors, the stars—all are ably considered, together with various scientific problems of the highest interest and importance. The illustrations are a valuable feature of the work.

FICTION.

A Daughter's Heart. By Mrs. H. LOVETT CAMERON. The latest issue in Lippincott's Series of Select Novels. 12mo, paper, 50 cents; cloth, 75 cents.

"A pure and sweet story of domestic life in an English country family. Little Hester Sesan is the most lovable heroine who has blossomed forth in that rôle during the summer. She may be considered the chief rosebud among the *débutantes* in fiction."—*The Times*

Lady Patty. By the "Duchess." In Lippincott's Series of Select Novels. 12mo, paper, 50 cents; cloth, 75 cents.

"'The Duchess' has well deserved the title of being one of the most fascinating novelists of the day. The stories written by her are the airiest, lightest, and brightest imaginable, full of wit, spirit, and gayety, but contain nevertheless, touches of the most exquisite pathos. There is something good in all of them."—*London Academy.*

A Mystery of New Orleans. A Romance of the Day. By WILLIAM H. HOLCOMBE, M.D., author of 'In Both Worlds,' 'Condensed Thoughts,' etc. American Novel Series. 12mo, paper, 50 cents, cloth, $1.00.

For sale by all Booksellers, or will be sent by the Publishers, postpaid, on receipt of the price.

NEW PUBLICATIONS.

"There is no Free Trade teaching by example at all to be compared with it."—Chicago Times.

The Free Trade Struggle in England.

By GENERAL M. M. TRUMBULL. Second edition, revised and enlarged. Cloth, 75 cents; paper, 25 cents.

A timely book on the tariff question, of which Mr. Edward Atkinson says, in an article entitled "Common Sense Applied to the Tariff Question" (Pop. Sci. Mo., Aug., 1890):

"Those who choose to discriminate between the leaders of the two parties of the present time may read the perversion of English history by James G. Blaine, in the North American Review; and the true picture which is given by Gen. M. M. Trumbull.

"It would be well worth while for any one who has been misled by the common errors about the influences which brought Great Britain to reverse her policy in 1842, to read up the economic history of that period. All the facts are given by the radical Miss Martineau in her History of Fifty Years' Peace; by the Tory Sir Stafford Northcote, in his Twenty Years' Financial Policy, explaining the changes which Peel brought about; by the economist John Noble's Fiscal Legislation in Great Britain; or in Carlyle's Past and Present. The best summary is to be found in the little book published in Chicago in 1884, by Gen. M. M. Trumbull, entitled The American Lesson of the Free-Trade Struggle in England. In this book will be found the whole record of the condition of England from 1838 to 1846. This history ought to be read by every man who desires to make up his mind how to act in this country at the present time. The logic of events is the same. We are repeating history."

Darwin and After Darwin.

An Exposition of the Darwinian Theory and a Discussion of Post-Darwinian Questions. By GEORGE JOHN ROMANES, M.A., LL.D., F.R.S.

"The good books which come to us from Chicago grow continuously more numerous in proportion to the sum total of our American literary output. It is interesting to know that Chicago publishers have in hand Mr. Romanes's very important book in exposition of the Darwinian theory. The first volume, now in hand, deals in a philosophical way with all that we now know, thanks to the discoveries of Darwin and his fellow-workers, of the systematic science of natural history. Mr. Romanes gives us, in a manner not too technical or difficult for the intelligent reader who has never previously read a line about Darwinism or natural history, an account of the classification of animal life and of the history and development of species, the geographical distribution of animals, the theory of natural selection, and the other main branches of Darwinian belief. It is a brilliantly written and, of course, a very scholarly and valuable work."—*Review of Reviews.*

The Lost Manuscript.

A Novel. By GUSTAV FREYTAG. A New Edition in one volume, 953 pp., cloth, $1.00. The same in two volumes, cloth, $4.00.

"It is superfluous to do more than call attention to this great novel of the great German novelist, the greatest perhaps of all his works that have made him famous not only in the Fatherland, but in all lands. The marvel of this book is its cheapness, considering its size, and the neatness and substantialness of its binding. It opens also readily to the hand and lies open, making it easy to handle while reading."—*Christian Weekly, New York.*

Homilies of Science.

By Dr. PAUL CARUS. 317 pp. Cloth, gilt top, $1.50, postpaid.

"These brief essays, chiefly upon religious thought and practical ethics, first appeared as editorials in *The Open Court*, a remarkably strong and original Chicago publication devoted to advanced thought. While these essays are opposed to some of the teachings of dogmatic Christianity, they are full of the spirit of the highest Christian morality, and are not in any true sense antagonistic to religious faith. They are constructive rather than destructive."—*Review of Reviews.*

VOL. LV—NO. 1411. THURSDAY, JULY 14, 1892. PRICE 10 CENTS.

NOW READY FOR SUBSCRIBERS ONLY.

THE MASTERS OF WOOD ENGRAVING.

By W. J. LINTON.

Two Hundred and Twenty-nine Pages of Text, with nearly Two Hundred Cuts interspersed, mostly on India Paper, and Forty-eight unbacked page Subjects.

The Edition is limited to 500 Copies on special paper, folio, 16¼ by 12 inches, signed and numbered, at $50 net.

100 Copies, Large Paper, folio, 29 by 15 inches, signed and numbered, at $100 net. Certain Plates (too large for the whole to be printed in the Smaller Edition) are here given in their entirety, and in addition is given Dürer's 'Triumphal Car of Maximilian,' measuring 7 feet 4 inches, with a height of 18 inches.

ATHENÆUM.

"A magnificent volume, admirable for printing, binding, and typography, and most admirable for illustrations, from both ancient and modern examples, printed with great skill and care, and immensely superior to those generally used in books of the sort and somewhat boldly called facsimiles. Not a page without interest and extreme pleasure and profit."

PORTFOLIO.

"The history of the art by an expert of experts. If any one be competent to teach the true merits of wood-engraving it is Mr. W. J. Linton. Well filled with letterpress. Mr. Linton has absolute knowledge of his subject."

ENGLISH ILLUSTRATED MAGAZINE.

"Mr. Linton's crowning achievement as a historian of wood-engraving. The most luxurious thing of its kind that has yet been produced. Unquestionably the one authoritative treatise by the greatest living master."

MACMILLAN & Co.'s NEW BOOKS.

NOW READY: A NEW NOVEL

BY RUDYARD KIPLING AND WOLCOTT BALESTIER.

THE NAULAHKA.

A Story of West and East. With Rhymed Chapter Headings. 12mo, cloth, gilt, $1.50.

"The book is full of wonderful and unique charm. The fierceness and the fascination of the life of India, the splendors, the mysteries, the passions of the Orient, are depicted with a power and a skill which disarm criticism."—*Boston Courier.*

By RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS. 12mo, cloth, $1.25.

*** 'Ballads and Barrack-Room Ballads,' Mr. Kipling's new volume of verse, in addition to the poems contained in 'Barrack-Room Ballads,' also includes a number of ballads now published for the first time and not included in any other collection of Mr. Kipling's Poems. 'Ballads and Barrack-Room Ballads' is issued only with the imprint of Macmillan & Co.

PLAIN TALES FROM THE HILLS. New Edition. 12mo, cloth, $1.00.

LIFE'S HANDICAP. STORIES OF MINE OWN PEOPLE. 12mo, cloth, $1.00.

NEW BOOKS BY MR. WILLIAM WINTER.

SHADOWS OF THE STAGE.

By WILLIAM WINTER. Uniform with the new edition of 'Shakespeare's England.' 18mo, cloth, 75 cents.

BY THE SAME AUTHOR.

GRAY DAYS AND GOLD.

New and Revised Edition. 18mo, cloth, gilt, 75 cents.

"This book, which is intended as a companion to 'Shakespeare's England,' relates to the gray days of an American wanderer in the British Islands, and to the gold of thought and fancy that can be found there. Mr. Winter's graceful and meditative style in his English sketches has recommended his earlier volume upon (Shakespeare's) England to many readers, who will not need urging to make the acquaintance of this companion book, in which the traveller guides us through the quiet and romantic scenery of the mother country with a mingled affection and sentiment of which we have had no example since Irving's day."—*The Nation.*

SHAKESPEARE'S ENGLAND A New and Revised Edition. 18mo, cloth, gilt, 75 cents.

WANDERERS. 18mo, cloth, 75 cents.

*** Also now ready a new edition, on large paper, limited to two hundred and fifty copies, of the works of Mr. William Winter. The volumes are printed on laid paper, with ample margins. Price, $2.00 each.

MACMILLAN'S DOLLAR NOVELS.

Uniformly bound in cloth, price $1.00 each.

THE THREE FATES.

THE SHORT CUT

To a Complete Knowledge of what is being said on all . . . . . THE GREAT TOPICS OF THE DAY

—IS TO TAKE—

PUBLIC OPINION,

the only journal which gives one an opportunity to read the **ablest articles** on the **uppermost topics of the hour,** impartially selected from the representative press of the entire country.

4,000 PAPERS IN 1.

Such a journal during the **PRESIDENTIAL CAMPAIGN** is invaluable to any one who desires to be well informed, and is not satisfied with the often biased articles of his local paper. **$1.00 will give you "Public Opinion" until after Election.** Why not keep up with the procession, when it costs so little and is such a satisfaction?

ERASTUS WIMAN says: "I spend an evening everyweek over PUBLIC OPINION with a profit I get nowhere else."
F. B. THURBER says: "I consider PUBLIC OPINION a necessity to busy men."

IF YOUR NEWSDEALER DON'T KEEP IT, SEND FOR SAMPLE COPY.

$1.00 for the entire Campaign.

REMIT TO **THE PUBLIC OPINION CO., Washington, D. C.**

THE

Idylwild Series of Paper Books.

BOOKS BY AMERICAN WRITERS.

A Modern Quixote. A Story of Southern Life. By S. C. MCCAY.

The Wife of Two Husbands. By the author of 'Hazel Kirke.'

A Mountain Hero. By J. W. GALLY. Equal to any of Bret Harte's.

Rose Geranium. A Tragedy. Daring, audacious, and thoroughly unconventional.

Kady. A Colorado Romance. By PATIENCE STAPLETON. The most thoroughly Western novel ever written.

Under the Maples. By WALTER N. HINMAN. A charming story of Eastern village life.

Babe Murphy. A Story of Western Life. By PATIENCE STAPLETON. Breathes the pure, free, and exhilarating atmosphere of the mountains.

An Unwedded Wife. By GENEVIEVE KIRKE. A marvellous production by a young American writer.

Peck's Bad Boy and His Pa. First and only complete edition.

French Translations.

Stronger than Death. Adapted from the French of Emile Richebourg, by Alexina Loranger.

The Perfume of the Violet. Translated from the French of Dubut De La Forest, by Frank Howard Howe.

The Prima Donna of the Slums. A story of intrigue in the days of the third Napoleon. Adapted from the French by Stanley McKenna.

Stories from the French: "Father Merlier's Mill," by Emile Zola; "The Return," by Guy de Maupassant; "The Three Low Masses," by Alphonse Daudet; "The Chassepot," by Jean Richepin; "Little Corn Flower," by Camille Lemmonier; "Uncle Fedia," by Eugene Melchior de Voglie. Translated by W. H. Scudder.

The Revenge of Circe. From the French of Xavier de Montepin. By Alexina Loranger.

The Story of Manon Lescaut and of the Chevalier Des Grieux. Translated from the French of L'Abbé Prevost, by Arthur W. Gundry. With over 200 illustrations.

HATCHARDS.

This is the favorite BOOKSTORE, and for 100 years the resort of the smartest people in London. It is visited and patronized by all who love books. London is the great market for books, and all the best as well as the cheapest editions can be had by writing to us. Special collections formed, and fuller information supplied than from any other house. Books both old and new, and relating to any subject, can readily be supplied at very moderate prices.

Agents for Clubs, Libraries, and all private Collectors.

187 PICCADILLY, LONDON W.

G. P. Putnam's Sons,

27 and 29 West 23d St., New York,

HAVE NOW READY:

Cynthia Wakeham's Money. A Romance. By ANNA KATHARINE GREEN, author of 'The Leavenworth Case,' 'Hand and Ring,' etc., etc. With frontispiece. Paper, 50 cents; cloth, $1.00.

This new story is one of the best that Miss Green has written.

Primitive Man in Ohio. By WARREN K. MOOREHEAD, Fellow of the American Association for the Advancement of Science. 8vo. Fully illustrated. $3.00.

This book, which is a companion work to Nadaillac's 'Prehistoric America,' is the result of the observations of the author and his collaborators in Ohio during a number of years; their deductions are made from the testimony of the burial-places, village sites, and fortifications marking various epochs in primeval man's existence. It is a comprehensive statement of their discoveries related without ornamentations.

Paganism in Christianity. By ABRAM HERBERT LEWIS, D.D., author of 'Biblical Teachings Concerning the Sabbath and Sunday,' etc., etc. 12mo, gilt top, $1.75.

Temperament, Disease, and HEALTH. By Commander F. E. CHADWICK, U. S. Navy. 12mo, 75 cents.

Modern Punctuation. By W. B. DICKSON. A Book for Stenographers, Typewriter Operators, and Business Men. With hints to letter-writers, one hundred suggestions to typewriter operators, list of common abbreviations with definitions, and a complete vocabulary of business and technical terms, with spaces for writing in the shorthand equivalents. 75 cents.

*** Notes on New Books, Vol. II., No. II., now ready.

AN EXPERIENCED AMERICAN Correspondent, many years connected with a leading London daily as war correspondent, special on various missions in the Levant, and for the last eight years stationed in Italy with residence at Rome, wishes to furnish a weekly letter of 2,000 to 3,000 words on politics, art, society, archæology, and travel, for a leading American paper or syndicate. He is perfectly familiar with French and Italian literature and Italian and Oriental politics; has resided in Turkey and Greece. Terms, $20 per thousand words, with moderate expenses if required to go on special missions of short duration, he retaining his position on his London journal, the service of which does not require all of his time. Address X., *Nation* office, New York, to the editor of which paper X. refers. No engagement on trial for less than six months will be taken. The proposed correspondence would be anonymous, in type-writing.

LIBRARIAN.—A POSITION IN A Library, or to arrange and catalog a private library, wanted by a student of the Library School who has had some experience.

A. R. V. H., the *Nation*.

Educational.

The Nation

VOL. LV—NO. 1413. THURSDAY, JULY 28, 1892. PRICE 10 CENTS.

D. APPLETON & CO.'S NEW BOOKS.

An Englishman in Paris.

NOTES AND RECOLLECTIONS. In Two Volumes, 12mo. Cloth, $4.50.

This work gives an intimate and most entertaining series of pictures of life in Paris during the reigns of Louis Philippe and Louis Napoleon. It contains personal reminiscences of the old Latin Quarter, the Revolution of 1848, the *coup d'état*, society, art, and letters during the Third Empire, the siege of Paris, and the reign of the Commune. The author enjoyed the acquaintance of most of the celebrities of this time; and he describes Balzac, Alfred de Musset, Sue, the elder Dumas, Taglioni, Flaubert, Auber, Fé ician David, Delacroix, Horace Vernet, Decamps, Guizot, Thiers, and many others, whose appearance in these pages is the occasion for fresh and interesting anecdotes. This work may well be described as a volume of inner history written from an exceptionally favorable point of view.

"A delightful book about Paris of the immediate past, one of the liveli e t it has been our good fortune to read. The author is a Englishman, who lived in the French capital off and on c continuously for a period which we have rou hly estimated at forty years. . . . For private reasons he will not give us his name, though he assures us that if it were known, it would inspire the reader with confidence. Nobody wants his name, if he will tell us his story so. What he has written, in its fascinating anecdotes, is its own sufficient recommendation. It is all well-informed gossip about famous men, women and events, from cover to cover."—*London Daily News.*

The Naturalist in La Plata.

By C. H. HUDSON, C.M.Z.S., joint author of 'Argentine Ornithology.' With 27 Illustrations. 8vo. 388 pages. Cloth, $4.00.

"Mr. Hudson is not only a clever naturalist, but he possesses the rare gift of interesting his reade s in whatever attracts h.m, and of being dissatisfied with mere observati n unless it enables him to ph lo opulize as well. With his acid accounts of bird, beast, and insect no one will fail to be delighted."—*London Academ .*

". . . It would be easy to multiply extracts from this most interesting book. But it is one to buy and read, for matter and style are alike excellent."—*London Spe tator.*

The Historical Reference Book,

Comprising a Chronological Table of Universal History, a Chronological Dictionary of Universal History, a Biographical Dictionary. With Geographical Notes. For the use of Students, Teachers, and Readers. By LOUIS HEILPRIN. Third edition, revised and brought down to 1892. Crown 8vo. Half leather, $3.00.

"A small library in itself."—*Chicago Dial.*

"An invaluable book of reference, use ul alike to the student and the general reader. The a rangement could scarcely be better or more convenient."—*New York Herald.*

"We miss hardly anything that we should consider desirable, and we have not been able o to detect a single mistake or misprint."—*New York Nation.*

The Principles of Ethics.

Vol. I. By HERBERT SPENCER. Including (Part I.) "The Data of Ethics"; (Part II.) "The Inductions of Ethics"; (Part III.) "The Ethics of Individual Life." 12mo. Cloth, $2.00.

The first part of this volume was published separately some years ago. The author having finished the second and third parts, all are now issued in one book under the above title changed from "The Principles of Morality" previously used. The binding is uniform with the various other volumes included in the author's system of "Synthetic Philosophy."

For convenience of those who have already purchased Part I., Parts II. and III. are bound together in a separate volume. Price, $1.25.

Essays upon some Controverted Questions,

By THOMAS H. HUXLEY, F.R.S., author of 'Man's Place in Nature,' 'Lay Sermons,' etc. 12mo. Cloth, $2.00.

In this volume Prof. Huxley has brought together a number of his more important recent essays, and has added certain new matter. Among the topics discussed are "Mr. Gladstone and Genesis," "The Evolution of Theology," "Science and Pseudo-Science," "Agnosticism," and "The Rise and Progress of Palæontology."

Ethan Allen.

THE ROBIN HOOD OF VERMONT. By HENRY HALL. 12mo. Cloth, $1.00.

The aim of the author has been to d s personality, and to throw some new ligh character of one who has been often viole sailed. Allen's own letters have been freely dr upon. The mass of material which has been examined has included matter not utilized before, and the result is an impartial and careful picture of Allen's associations and habits of thought and action, which, it is believed, cannot be neglected by Americans interested in the history of their own country.

The Hope of the Gospel.

By GEORGE MACDONALD, author of 'Unspoken Sermons,' 'Robert Falconer,' etc. 12mo. Cloth, $1.25.

In this volume Dr. MacDonald, writing in a simple, graphic, interesting way, deals with various modern phases of religious belief. He discusses sin and its penalty, the reward of obedience, and the relations of men to their Creato r and to each other. At a time when there is so much inquiry and unrest among thinking people, the frank discussions and strong arguments of this book will be es pecially pertinent and helpful.

Footsteps of Fate.

By LOUIS COUPERUS, author of 'Eline Vere,' Translated from the Dutch by Clara Bell. With an Introduction by Edmond Gosse. Holland Fiction Series. 12mo. Cloth, $1.00.

"'Eline Vere' is most careful in its details of description, most picturesque in its coloring."—*Boston Post.*

"'Eline Vere' is a vivacious and skilful performance, giving an evidently faithful picture of society, and evincing the art of a true story-teller."—*Philadelphia Telegraph.*

"La Bella" and Others.

By EGERTON CASTLE, author of 'Consequences.' No. 95, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"The stories will be welcomed with a sense of refreshing pungency by readers who have been cloyed by a too long successio i of insipid sweetness and familiar incident."—*London Athenæum.*

"The author is gifted with a lively fancy, and the clever plots he has devised gain greatly in interest, thanks to the unfamiliar surroundings in which the action for the most part takes place."—*London Literary World.*

"December Roses."

By Mrs. CAMPBELL-PRAED, joint author of 'The Right Honourable.' No. 96, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"'The Right Honourable' is an enj yable and superior English novel. Mrs. Campbell-Praed's labor in the way of romance and sentiment is admirably done."—*Independent.*

"Several of the personages in 'The Right Honourable' are worthy of Trollope at his best."—*Literary World.*

Jean de Kerdren.

By the author of 'Colette' and 'Straight On.' No. 97, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"The love-story of the two young persons is told with the utmost simpl c ty and freshness, and with an inte sity of interest with which mere li erary skill seems to have little to do. It gives throughout the impression of a f ithful re dering of reality. . . . The core of the story is sound and swe t, and will determine the impression for all healthy readers, to whom we cordially recommend it."—*New York Times.*

A Little Norsk; or, Ol' Pap's Flaxen.

By HAMLIN GARLAND, author of 'Main Traveled Roads,' etc. Appletons' Summer Series. 16mo, With novel, specially designed cover and ornamented edges, 50 cents.

American fiction can show nothing better th nd's w rk."—*Chicago Times.*

"R with humanity, his p erception of the subt ing of Nature, his power to bring his people b re you as if you had grown up in their co rgards—these are his own."—*Mrs. Louise Chandler Moulton.*

A Tale of Twenty-five Hours.

By BRANDER MATTHEWS and GEORGE H. JESSOP. Appletons' Summer Series. 16mo. With novel, specially designed cover and ornamented edges. 50 cents.

An ingenious and entertaining novelette by two clever and well-known story-writers.

Appletons' Canadian Guide-Book.

In Two Parts. Each, 12mo, flexible cloth, $1.25.

PART I., EASTERN CANADA AND NEWFOUNDLAND. Contains Full Descriptions of Routes, Points of Interest, Summer Resorts, Fishing Places, etc. With an Appendix, giving Fishing and Game Laws, and Official Lists of Trout and Salmon Rivers and their Lessees. By CHARLES G. D. ROBERTS.

PART II., WESTERN CANADA—I. E., FROM OTTAWA AND MONTREAL TO THE PACIFIC OCEAN, including the region along the Great Lakes; Manitoba; the Valley of the Saskatchewan; the Canadian Rocky Mountains; the Canadian National Park; British Columbia; Vancouver's Island, etc. By ERNEST INGERSOLL.

It is safe to say that no two volumes dealing with Canada present so much helpful and entertaining information, in so convenient a form. Each contains numerous Maps and Illustrations.

Appletons' General Guide to the United States.

With numerous Maps and Illustrations. New edition, revised to date. 12mo. Flexible morocco, with tuck, $2.50. PART I., separately, NEW ENGLAND AND MIDDLE STATES AND CANADA, cloth, $1.25. PART II., SOUTHERN AND WESTERN STATES, cloth, $1.25.

Appletons' Hand-Book of American Summer Resorts.

With Maps, Illustrations, Table of Railroad Fares, etc. New edition, revised to date. 50 cents.

☞ *Send for the current number of Appletons' Monthly Bulletin, containing announcements of important new and forthcoming books.*

MACMILLAN & Co.'s NEW BOOKS.

NOW READY: A NEW NOVEL

BY RUDYARD KIPLING AND WOLCOTT BALESTIER.

THE NAULAHKA.

A Story of West and East. With Rhymed Chapter Headings. 12mo, cloth, gilt, $1.50.

"The book is full of wonderful and unique charm. The fierceness and the fascination of the life of India, the splendors, the mysteries, the passions of the Orient, are depicted with a power and a skill which disarm criticism."—*Boston Courier.*

By RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS. 12mo, cloth, $1.25.

*** 'Ballads and Barrack-Room Ballads,' Mr. Kipling's new volume of verse, in addition to the poems contained in 'Barrack-Room Ballads,' also includes a number of ballads now published for the first time and not included in any other collection of Mr. Kipling's Poems. 'Ballads and Barrack-Room Ballads' is issued only with the imprint of Macmillan & Co.

PLAIN TALES FROM THE HILLS. New Edition. 12mo, cloth, $1.00.
LIFE'S HANDICAP. STORIES OF MINE OWN PEOPLE. 12mo, cloth, $1.00.

*** Also now ready, a new edition on large paper, limited to two hundred and fifty copies, of the works of Mr. William Winter. The volumes are printed on laid paper, with ample margins. Four volumes in box, $8.00.

A New Edition, uniform with Mr. Winter's Works.

A TRIP TO ENGLAND.

By GOLDWIN SMITH, D.C.L. 18mo, cloth, gilt, 75 cents.

"A Notable Novel." 12mo, cloth. $1.50.

CALMIRE.

12mo, cloth. $1.50.

"It is a powerful piece of fiction; the greatest novel, in many respects, that has appeared within the present decade. Read this book. For in it you will find about all that can possibly be said against Christianity, in a popular way and without subtile indirection or cunning reserve. Moreover, as a mere love story, this novel has that charm of blended romance and realism, that captivating verisimilitude, and that nameless power to haunt one with its shame-tinged sorrow and happiness which testify unmistakably of genius."—*Independent, N. Y.*

A NEW ILLUSTRATED EDITION OF THE

NOVELS OF JANE AUSTEN.

In Ten Volumes.

SUGGESTIONS
FOR
SUMMER READING.

Entirely New and Cheap Edition of

The Wide, Wide World. By ELIZABETH WETHERELL.

Printed from new plates, and illustrated by eight full-page pictures and thirty engravings in the text from drawings by Frederick Dielman. 12mo. Cloth, attractively bound, $1.00. *Paper Edition.* Thirty illustrations in text, 50 cents.

"One of the most popular novels ever published in this country is 'The Wide, Wide World,' the first venture of Susan Warner, who, in her modesty and doubt as to how it would be received, attached to it the *nom de plume* of Elizabeth Wetherell. But the gifted lady awoke one morning, as it were, to find her first novel famous. It took like wildfire, and everybody read it and talked about it, and the critics were almost unanimous in its praise. The story was richly worthy of all its fame, and to this day it has maintained a remarkable hold on the reading public."—*Boston Home Journal.*

Lippincott's Series of Select Novels.

12mo. Paper, 50 cents; cloth, 75 cents.

A DAUGHTER'S HEART. By Mrs. H. LOVETT CAMERON. *The Latest Issue.*

LADY PATTY. By "THE DUCHESS."

OLD DACRES' DARLING. By ANNIE THOMAS.

A COVENANT WITH THE DEAD. By CLARA LEMORE.

CORINTHIA MARAZION. By CECIL GRIFFITH.

ONLY HUMAN; OR, JUSTICE. By JOHN STRANGE WINTER.

THE NEW MISTRESS. By GEORGE MANVILLE FENN. Etc., etc.

His Great Self. By MARION HARLAND, author of 'Alone,' 'True as Steel,' etc. 12mo. Cloth, $1.25.

The *London Saturday Review* says of this book: " . . . The plot is excellently handled, and the author has given us a vivid impression of the life and pursuits of a community of aristocratic Virginians. Not a few of the lesser characters are admirably touched in, and its several solid qualities give Miss Harland's story a place apart from the numberless machines of tedium which nowadays are labelled novels."

Military Novels by Capt. Chas. King, U. S. A.

THE COLONEL'S CHRISTMAS DINNER. 12mo. Cloth, $1.25.

CAPTAIN BLAKE. With Illustrations. 12mo, Cloth, $1.25.

THE COLONEL'S DAUGHTER. With Illustrations. 12mo. Cloth, $1.25.

MARION'S FAITH. With Illustrations. 12mo. Cloth, $1.25.

STARLIGHT RANCH, and Other Stories. 12mo. Cloth, $1.00.

KITTY'S CONQUEST. 12mo. Cloth, $1.00.

LARAMIE; OR, THE QUEEN OF BEDLAM. 12mo. Cloth, $1.00.

THE DESERTER, and FROM THE RANKS. 12mo. Cloth, $1.00.

TWO SOLDIERS, and DUNRAVEN'S RANCH. 12mo. Cloth, $1.00.

Mrs. A. L. Wister's Translations from the German.

COUNTESS ERIKA'S APPRENTICESHIP. By Ossip Schubin. $1.25.

"O THOU, MY AUSTRIA!" By Ossip Schubin. $1.25.

ERLACH COURT. By Ossip Schubin. $1.25.

THE ALPINE FAY. By E. Werner. $1.25.

THE OWL'S NEST. By E. Marlitt. $1.25.

PICKED UP IN THE STREETS. By H. Schobert. $1.25.

A complete list of Mrs. Wister's Translations sent on application. New Illustrated Catalogue of Fiction mailed free to any address.

*** *For Sale by all Booksellers, or will be sent by the Publishers, free of expense, on receipt of the price.*

WE HAND YOU A FRESH SCALP!

If your hair is gone, or is falling out, or is thin and dry, or you have dandruff, or an itching or sore scalp, send $1.00 for a bottle of

CAPILLIFORM.

A well-known official of the Pennsylvania Railroad writes: "For several years I had a distressing eczema in my scalp. Every time I scratched it the sores came off, always bringing more or less hair with them. I became bald in patches, and my hair lost its strength. I tried all remedies in vain until CAPILLIFORM appeared. The very first application stopped all the itching, and in one week I was cured. My scalp is now perfectly pure and clean, and my hair has grown in again very nicely. I now use it regularly, and would not be without it."

CAPILLIFORM is an Infallible Hair Restorer and Delightful Toilet Dressing. It is fragrant, soothing, and quickly efficacious. A Summer Girl says: "I would not go to the resorts without it."

MACMILLAN & Co.'s NEW BOOKS.

NOW READY: A NEW NOVEL

BY RUDYARD KIPLING AND WOLCOTT BALESTIER.

THE NAULAHKA.

A Story of West and East. With Rhymed Chapter Headings. 12mo, cloth, gilt, $1.50.

"The book is full of wonderful and unique charm. The fierceness and the fascination of the life of India, the splendors, the mysteries, the passions of the Orient, are depicted with a power and a skill which disarm criticism."—*Boston Courier.*

By RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS. 12mo, cloth, $1.25.

*** 'Ballads and Barrack-Room Ballads,' Mr. Kipling's new volume of verse, in addition to the poems contained in 'Barrack-Room Ballads,' also includes a number of ballads now published for the first time and not included in any other collection of Mr. Kipling's Poems. 'Ballads and Barrack-Room Ballads' is issued only with the imprint of Macmillan & Co.

PLAIN TALES FROM THE HILLS. New Edition. 12mo, cloth, $1.00.
LIFE'S HANDICAP. STORIES OF MINE OWN PEOPLE. 12mo, cloth, $1.00.

NEW BOOKS BY MR. WILLIAM WINTER.

GRAY DAYS AND GOLD. New and Revised Edition. 18mo, cloth, gilt, 75 cents.

SHADOWS OF THE STAGE. 18mo, cloth, 75 cents.

SHAKESPEARE'S ENGLAND. A New and Revised Edition. 18mo, cloth, gilt, 75 cents.

*** Also now ready a new edition, on large paper, limited to two hundred and fifty copies, of the works of Mr. William Winter. The volumes are printed on laid paper, with ample margins. 4 vols. in box, $8.00.

A New Edition, uniform with Mr. Winter's Works.

A TRIP TO ENGLAND.

By GOLDWIN SMITH, D.C.L. 18mo, cloth, gilt, 75 cents.

"A Notable Novel." 12mo, cloth. $1.50.

CALMIRE.

"It is a powerful piece of fiction; the greatest novel, in many respects, that has appeared within the present decade. . . . This novel has that charm of blended romance and realism, that captivating verisimilitude, and that nameless power to haunt one with its shame-tinged sorrow and happiness which testify unmistakably of genius."—*Independent, N. Y.*

A NEW ILLUSTRATED EDITION OF THE

NOVELS OF JANE AUSTEN.

In Ten Volumes.

Edited by R. BRIMLEY JOHNSON. With Illustrations by WILLIAM CUBIT COOKE, and Ornaments by F. C. TILNEY. Vols. 1 and 2, SENSE AND SENSIBILITY, *now ready.* 16mo, cloth gilt, gilt top, $1.00 each volume.

*** Also a limited Edition on Large Paper, $3.00 each volume.

New Edition, with Mrs. Humphry Ward's Open Letter to Her Publisher. 12mo, cloth, $1.00.

THE HISTORY OF DAVID GRIEVE.

By MRS. HUMPHRY WARD, author of 'Robert Elsmere,' etc., etc. Fourth edition. In one volume, 12mo, cloth, gilt, $1.00. Also the Library Edition, printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

"Mrs. Ward, with her 'Robert Elsmere' and 'David Grieve,' has established with extraordinary rapidity an enduring reputation as one who has expressed what is deepest and most real in the thought of the time. . . . They are dramas of the time vitalized by the hopes, fears, doubts, and despairing struggles after higher ideals which are swaying the minds of men and women of this generation."—*New York Tribune.*

F. M. CRAWFORD'S NOVELS. NEW UNIFORM EDITION. $1.00 EACH.

WITH THE IMMORTALS. 12mo, cloth, $1.00.

THE THREE FATES. 12mo, cloth, $1.00.

THE NOVELS OF CHARLES DICKENS.

NEW EDITION. ILLUSTRATED. 12mo, $1.00 each.

These are in all cases accurate reprints of the texts of the first editions, and accompanied by *all* the original illustrations. There is prefixed in each volume a short introduction written by Mr. Charles Dickens, the novelist's eldest son, giving a history of the writing and publication of each book, together with other details, biographical and bibliographical, likely to be of interest to the reader.

THE OLD CURIOSITY SHOP. Now Ready.

MARTIN CHUZZLEWIT.

OLIVER TWIST. 12mo, cloth, $1.00.

An Educational Directory.

I. THE NATION has a larger circulation than any literary-political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration.

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

WE HAND YOU A FRESH SCALP!

If your hair is gone, or is failing out, or is thin and dry, or you have dandruff, or an itching or sore scalp, send $1.00 for a bottle of

CAPILLIFORM.

A well-known official of the Pennsylvania Railroad writes: "For several years I had a distressing eczema in my scalp. Every time I scratched it the sores came off, always bringing more or less hair with them. I became bald in patches, and my hair lost its strength. I tried all remedies in vain until CAPILLIFORM appeared. The very first application stopped all the itching, and in one week I was cured. My scalp is now perfectly pure and clean, and my hair has grown in again very nicely. I now use it regularly, and would not be without it."

CAPILLIFORM is an Infallible Hair Restorer and Delightful Toilet Dressing. It is fragrant, soothing, and quickly efficacious. A Summer Girl says: "I would not go to the resorts without it."

AN EXPERIENCED AMERICAN Correspondent, many years connected with a leading London daily as war correspondent, special on various missions in the Levant, and for the last eight years stationed in Italy with residence at Rome, wishes to furnish a weekly letter of 2,000 to 3,000 words on politics, art, society, archæology, and travel, for a leading American paper or syndicate. He is perfectly familiar with French and Italian literature and Italian and Oriental politics; has resided in Turkey and Greece. Terms, $20 per thousand words, with moderate expenses if required to go on special missions of short duration, he retaining his position on his London journal, the service of which does not require all of his time. Address X., *Nation* office, New York, to the editor of which paper X. refers. No engagement on trial for less than six months will be taken. The proposed correspondence would be anonymous, in type-writing.

NEW YORK.

D. Appleton & Co.'s Publications.

CROSS CURRENTS.

By MARY ANGELA DICKENS. No. 99, Town and Country Library. 12mo, paper, 50 cents; cloth, $1.00.

"There have been few better judges of fiction than Charles Dickens, and had he lived to read his granddaughter's first novel the veteran writer would have found pleasure in the thought that after he was gone, the name of Dickens would still be honorably associated with imaginative literature. 'Cross Currents' is not only an excellent novel, but it is distinguished by a kind of excellence which is exceedingly rare in the work of a beginner. . . . Every page of 'Cross Currents' inspires one with a desire to meet its author again."—*London Spectator.*

"A new novel of original power and great promise."—*Scotsman.*

"Its equality of excellence is as uncommon as it is delightful."—*London Academy.*

"Decidedly above the average of contemporary romances. . . . We turn the last page with regret."—*London Telegraph.*

ETELKA'S VOW.

By DOROTHEA GERARD, author of "A Queen of Curds and Cream," "Orthodox," etc., and joint author of "A Sensitive Plant." No. 98, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"We heartily commend 'A Queen of Curds and Cream' for its naturalness, and for the skill with which the various characters are portrayed."—*Boston Saturday Evening Gazette.*

"'A Queen of Curds and Cream' is a singularly original, interesting, and powerful novel, which cannot fail to add to the author's already well-established reputation."—*London Figaro.*

CAPT'N DAVY'S HONEYMOON.

A MANX YARN. By HALL CAINE, author of "The Deemster," "The Scape-Goat," etc. 12mo. Cloth, $1.00.

"If proof were needed of the [illegible] Mr. Hall Caine's latest story, 'The Scape-Goat,' has taken of the novel-reading public, it might be found in the rush for the cheap edition of that work. No fewer than 6,000 copies were taken up by the trade before publication. An earlier novel, 'The Deemster,' has run through a dozen editions."—*London Literary World.*

APPLETONS' SUMMER SERIES.

Each, 16mo, tastefully bound in special design, 50 cents.

[*Educational continued on page v.*]

G. P. PUTNAM'S SONS,

27 and 29 West 23d Street, New York.

RECENT AND IMPORTANT PUBLICATIONS:

The Life of Thomas Paine. With a History of his Literary, Political, and Religious Career in America, France, and England. By MONCURE DANIEL CONWAY, author of 'Omitted Chapters of History Disclosed in the Life and Papers of Edmund Randolph,' etc. To which is added a sketch of Paine by William Cobbett, hitherto unpublished. 2 vols., 8vo, illustrated, $5.00.

"Mr. Conway has perhaps the best intellectual equipment of any of the men who are free enough from the ancient prejudice against Paine to do such work thorough justice, and he has undoubtedly done it. The biography is scholarly, painstaking, and accurate, and while it is undoubtedly in some respects a labor of love—or rather of justice, as Mr. Conway conceives it—there is no indication anywhere that the author has been blinded by his zeal or exalted his hero unduly because of partisanship. It is just such a work as an unbiassed man capable of apprehending the full meaning and value of Paine's work, and anxious at the same time to rescue his name from unmerited obloquy, would do; and the intelligent, fair-minded people of America, for whom Mr Conway has evidently written, are under obligation to him for doing it."—*Detroit Free Press.*

"Let us heartily thank Mr. Conway for this thoroughly excellent piece of work. . . . Scrupulously honorable and chivalrously generous himself, he could not see in silence the selfish frauds of others, and of course he made enemies by their exposure. However widely we may differ from him in his dogmatic conclusions, it seems to us impossible to doubt that he was a noble-hearted man. He was treated with a base ingratitude that nothing but reckless intolerance could explain, excepting, also, that even still the services of mind and pen seem far less valuable to the vulgar crowd than gunpowder and steel. However, Paine's Life is now for the first time before us. We congratulate Mr. Conway on the accomplishment of so laborious a task, a work well done and well worth doing."—*The Churchman.*

History of Greece. By EVELYN ABBOTT, M.A., LL.D., Fellow of Balliol College, Oxford, author of 'Pericles and the Golden Age of Athens.' Part II. From the Beginning of the Ionian Revolt to the Thirty Years' Peace, 500–445 B. C. 8vo, $2.25.

The author expects to complete his work in four volumes, but each volume will cover a distinct period of history, and will be complete in itself.

"It is the work of a painstaking scholar and an acute writer, who evidently enriches his page with the fruits of broad, conscientious study. . . . The style of the book is easy for the reader, its arrangement luci , its references to authorities ample."—*Chicago Standard.*

A fresh impression of Volume I. has also been issued.

New Chapters in Greek History. Historical Results of Recent Excavations in Greece and Asia Minor. By PERCY GARDNER, M.A., Litt.D., Lincoln and Merton, Professor of Classical Archæology and Art, Oxford. With Illustrations. 8vo, $5.00.

"Mr. Gardner's moderation of statement throughout is admirable. Perhaps the principal fault readers will find with the book is that the essays are all too short."—*Tribune.*

Paganism in Christianity. By ABRAM HERBERT LEWIS, D.D., author of 'Biblical Teachings Concerning the Sabbath and Sunday,' etc., etc. 12mo, gilt top, $1.75.

"The author's style is graceful, and despite the somewhat weighty title selected for his book, it is most interesting for its historical as well as its religious information."—*Baltimore Leader.*

Materialism and the Modern Physiology OF THE NERVOUS SYSTEM. By WILLIAM H. THOMSON, M D., Prof. of Materia Medica and Diseases of the Nervous System in University Medical College, New York. 12mo, with five Illustrations, 75 cents.

"While the treatise is essentially scientific, the argument is made perfectly intelligible to non-professors, and there is in it withal a great deal of poetical ideality."—*New York World.*

BOOKS FOR VOTERS.

Who Pays Your Taxes? A Consideration of the Question of Taxation. By DAVID A. WELLS, JULIEN T. DAVIES, THOMAS G. SHEARMAN, JOSEPH DANA MILLER, BOLTON HALL, and others. Edited by BOLTON HALL, and issued on behalf of the New York Tax-Reform Association. (Questions of the Day Series, No. 71.) With frontispiece, $1.25.

The Tariff History of the United States. By F. W. TAUSSIG. New Edition, revised, enlarged, and brought down to date. (Questions of the Day Series, No. 47.) 8vo, $1.25.

The Economy of High Wages. An inquiry into the comparative methods and the cost of production in competing industries in America and in Europe. By J. SCHOENHOF, late U. S. Consul and Special Commissioner Department of State, U. S. A., for Inquiry into the Economy of Production and Technical Education in Europe, author of 'Destructive Influence of the Tariff,' etc., etc. With a Preface by the Hon. THOMAS F. BAYARD, late Secretary of State, U. S. A. (Nearly Ready.) $1.50.

Taxation and Work. By EDWARD ATKINSON, author of 'The Industrial Progress of the Nation,' etc. 12mo, $1.25.

The Question of Silver. By LOUIS R. EHRICH of Colorado. (No. 70 in the Questions of the Day Series.) $1.00.

"The author has incorporated much valuable historical information in the essay on silver and a subsequent reply to his critics, and all who wish to study the subject will do well to possess the work, which will prove highly rewarding to the reader."—*Commercial Advertiser, New York.*

Notes on New Books, Vol. II., No. 2, Prospectuses of the Story of the Nations and Heroes Series, and Catalogue of Works in Political and Economic Science sent on application.

HATCHARDS.

This is the favorite BOOKSTORE, and for 100 years the resort of the smartest people in London. It is visited and patronized by all who love books. London is the great market for books, and all the best as well as the cheapest editions can be had by writing to us. Special collections formed, and fuller information supplied than from any other house. Books both old and new, and relating to any subject, can readily be supplied at very moderate prices.

Agents for Clubs, Libraries, and all private Collectors.

187 PICCADILLY, LONDON W.

WE HAND YOU A FRESH SCALP!

If your hair is gone, or is falling out, or is thin and dry, or you have dandruff, or an itching or sore scalp, send $1.00 for a bottle of

CAPILLIFORM.

A well-known official of the Pennsylvania Railroad writes: "For several years I had a distressing eczema in my scalp. Every time I scratched it the sores came off, always bringing more or less hair with them. I became bald in patches, and my hair lost its strength. I tried all remedies in vain until CAPILLIFORM appeared. The very first application stopped all the itching, and in one week I was cured. My scalp is now perfectly pure and clean, and my hair has grown in again very nicely. I now use it regularly, and would not be without it."

CAPILLIFORM is an Infallible Hair Restorer and Delightful Toilet Dressing. It is fragrant, soothing, and quickly efficacious. A Summer Girl says: "I would not go to the resorts without it."

MACMILLAN & COMPANY'S
NEW EDUCATIONAL BOOKS.

NOW READY. THIRD EDITION. 5 volumes. $20.00.

THE DIALOGUES OF PLATO.

Translated into English, with Analysis and Introductions, by B. JOWETT, M.A. Third Edition. Five volumes. Revised and Corrected Throughout, and to a lage extent rewritten. 8vo, gilt top, $20.00.

By using the faithful transcript of the Master of Balliol, the modern reader grasps the secret of Plato's thought, with much of his stateliness and simplicity—characteristic qualities of the writer. The first edition of JOWETT'S Plato appeared in 1871, since which time new issues have been published at intervals, with enlarged introductions to the Dialogues: Essays have been introduced, innumerable alterations have been made in the text, and a marginal analysis has been added to the text of each Dialogue. The essays are on subjects connected with the myths of Plato, psychology, popular institutions, and Greek literature; they constitute a valuable contribution to our knowledge.

"Should find a place in any library worthy of the name, however narrow may be its range."—*Public Ledger, Philadelphia.*

PRINCIPLES OF ELEMENTARY ALGEBRA.

By NATHAN F. DUPUIS, M.A., FR.S., Professor of Mathematics in Queen's College, Kingston, Canada. *Just Ready.*

INTRODUCTORY MODERN GEOMETRY OF THE POINT, RAY, AND CIRCLE.

By WILLIAM B. SMITH, Ph.D., Professor of Mathematics in Missouri State University, Columbia, Mo. *Just Ready.*

THE ELEMENTS OF GRAPHICAL STATICS.

A Text-Book for Students of Engineering. By LEANDER M. HOSKINS, C.E., M.S., Professor of Theoretical and Applied Mechanics, University of Wisconsin, Madison, Wis. *Just Ready.*

MACMILLAN'S SHORTER LATIN COURSE.

By A. M. COOK, M.A. A Book for Beginners in Latin, with Exercises of Gradually Increasing Difficulty, and Easy Passages for Translation.

AMERICAN EDITION.

Revised, and Adapted to American Schools by JAMES C. EGBERT, Ph.D., Instructor of Latin in Columbia College. 18mo, 40 cents. *Just Ready.*

CÆSAR.—THE INVASION OF BRITAIN.

Selections from Books IV. and V. of "The Gallic War," adapted for the Use of Beginners. With Notes, Vocabulary, and Exercises. 18mo, 40 cents.

By W. WELCH, M.A., and C. G. DUFFIELD, M.A. Revised, with References to American Grammars, by S. G. ASHMORE, L.H.D., Professor of Latin, Union College, Schenectady, N. Y.

CÆSAR.—THE HELVETIAN WAR.

Being Selections from Book I. of "The Gallic War." Adapted for Beginners. With Exercises.

By W. WELCH, M.A., and C. G. DUFFIELD, M.A. American Edition, with references to American grammars, edited by S. G. ASHMORE, L.H.D., Professor of Latin, Union College, Schenectady, N. Y. 18mo, 40 cents.

ARITHMETIC FOR SCHOOLS.

Third Edition. Revised by Rev. J. B. LOCK, Fellow and Bursar of Gonville and Caius College, Cambridge, formerly Master at Eton. Adapted to American Schools by Prof. CHARLOTTE A. SCOTT, Bryn Mawr College, Pa. 70 cents.

The Academy says: "'Arithmetic for Schools,' by the Rev. J. B. Lock, is one of those works of which we have before noticed excellent examples, written by men who have acquired their power of presenting mathematical subjects in a clear light to boys by actual teaching in schools. Of all the works which our author has now written, we are inclined to think this the best."

THE APPLICATIONS OF ELLIPTIC FUNCTIONS.

By ALFRED GEORGE GREENHILL, M.A., F.R.S., Professor of Mathematics in the Artillery College, Woolwich. 8vo, $3.00.

A French Eton.

Or, Middle Class Education and the State. To which is added Schools and Universities in France. Being part of a Volume on Schools and Universities, published in 1868. By MATTHEW ARNOLD. 12mo, $1.75.

Sunshine.

By AMY JOHNSON, LL.A., formerly Head Mistress of the Royal Academy, Inverness. With numerous Illustrations. *Nature Story Books.* 12mo, $1.75.

The first of a series of books intended to present some leading scientific principles in such a form as to arouse the interest of children. As far as possible Miss Johnson has drawn her illustrations from common things, and has devised her experiments to suit the simplest apparatus.

Side Lights Upon Bible History.

By Mrs. SIDNEY BUXTON. With Illustrations. 16mo, $1.50.

Neohellenica.

An Introduction to Modern Greek in the form of Dialogues containing Specimens of the Language from the Third Century B. C. to the Present Day. By Professor MICHAEL CONSTANTINDES. Translated into English in collaboration with Major-General H. T. ROGERS, R.E. $1.90.

By J. K. BLUNTSCHLI, late Professor of Political Sciences in the University of Heidelberg. Second edition. 12mo, $3.00.

Specimens of Old French—IX., XV. Centuries.

By PAGET TOYNBEE, M.A., Balliol College, Oxford. 12mo, cloth, $4.00.

"The help given to young students is enormous."—*Guardian.*

The Principal Speeches of the Statesmen and Orators of the French Revolution, 1789-1795.

Edited, with Introductions, Notes, Appendices, and Indices, by H. MORSE STEPHENS. Two Vols., 12mo, $5.25.

*** *Macmillan & Co respectfully call the attention of teachers and others interested in Education to their separate Catalogues of Books in the following departments of study:*

Greek Language and Literature, Latin Language and Literature, German Language and Literature, French Language and Literature, English Language and Literature, Mathematics, and Science.

These separate Catalogues, if applicants will specify which they require, will be sent free by mail to any address.

MACMILLAN & Co., 112 Fourth Avenue, New York.

To School Principals and Instructors

SUPPLEMENTARY READING.

30 cents each.

Messrs. HARPER & BROTHERS beg leave to announce the publication, under the title of HARPER'S SCHOOL CLASSICS, of the following volumes designed for use as Supplementary Reading: AMERICAN LITERATURE, ENGLISH LITERATURE—Romance Period; ENGLISH LITERATURE—Classical Period; ENGLISH LITERATURE—Modern Period; GERMAN LITERATURE, SPANISH LITERATURE, SIR ROGER DE COVERLEY, by Addison; THE TASK, by Cowper; THE LIFE, TIMES, AND CHARACTER OF OLIVER CROMWELL, by Knatchbull-Hugessen, and the following Essays by Lord Macaulay: ADDISON, HAMPTON-BURLEIGH, LORD CLIVE, MACHIAVELLI, WALPOLE, and WILLIAM PITT.

These books are of a very convenient shape and size for class use. They are bound in cloth in uniform style and printed in clear type on good paper. All teachers interested in getting good matter for their classes are invited to acquaint themselves with this series. The price of the above books is **30 cents per copy,** but special rates will be made for their introduction into schools. A sample copy of any one of the numbers will be forwarded, postpaid, on receipt of twenty cents, to any teacher who may desire to examine it with a view to class use. Other numbers of the series are in press and will appear shortly.

MORAL PHILOSOPHY.

(Nearly Ready.)

Messrs. HARPER & BROTHERS beg leave to announce the immediate publication of THE PRINCIPLES OF ETHICS, by BORDEN P. BOWNE, Professor of Philosophy in Boston University, designed as a text book for schools and colleges. It is hardly too much to say that we have in this work an ideal text-book of Moral Philosophy, bearing the impress upon its pages of the fine scholar and the true metaphysician. The author has bestowed the same care in its preparation as upon his INTRODUCTION TO PSYCHOLOGICAL THEORY, his METAPHYSICS, and his PHILOSOPHY OF THEISM, three books which are widely and favorably known, and which have won for their author a place among metaphysicians of the highest rank. The publishers invite correspondence from teachers of Ethics in colleges and high-schools with reference to the introduction of this book into their classes, and they will be pleased to give all further information in regard to it that may be desired.

FOUNDATIONS OF RHETORIC.

(Nearly Ready.)

FOUNDATIONS OF RHETORIC is the title of a book which Professor A. S. HILL, of Harvard College author of the PRINCIPLES OF RHETORIC, is now preparing. The author's aim in this work is to help young students to master those simple principles underlying all good writing, and which may properly be called the foundations of rhetoric. His book, besides being a practical working-book for the schoolroom, is original in plan, and abounds with examples and illustrations of the most helpful kind. It is believed that this book will go a great way towards solving the question, which so often arises in the teacher's mind, of how best to teach young students the proper uses of words both in writing and speaking. It is expected to appear early in September, and full particulars of it will be forwarded on request.

ENGLISH WORDS.

Cloth, 84 cents.

ENGLISH WORDS, by Professor CHARLES F. JOHNSON of Trinity College, Hartford, Conn., is a book which has met with a cordial reception everywhere. The writer has aimed at making Etymology suggestive and interesting, and at presenting the elements of the subject in such a form as to stimulate further investigation, and lead to a more correct and literary use of words. He has expressed himself in so happy and entertaining a manner that his book is as charming as a good story. "One glances at a page," says Professor LYON of Bristol, Tenn., "reads on and on, completes the book, and is irresistibly filled with a desire to know more. The mere perusal of such a work by the student must have the most beneficial effect."

SHAKESPEARE.

Cloth, 56 cts.; Paper, 40 cts.

No edition of SHAKESPEARE so well answers the needs of the class-room as that prepared by Dr. WM. J. ROLFE, of Cambridge, Mass. Dr. ROLFE is not only a conscientious but a brilliant worker, and has a wide reputation as a Shakesperean scholar of great ability. His edition is the only illustrated school edition published in this or any other country, and no teacher can fail to appreciate the rare discrimination shown in the preparation of the author's Notes and Introductions to Shakespeare's Plays. The series is complete in forty volumes.

ENGLISH CLASSICS.

Cloth, 56 cents; Paper, 40 cents.

In the series of ENGLISH CLASSICS, prepared by Dr. WM J. ROLFE, and published with notes and illustrations, teachers will find aids to their work which are rarely equalled. "His rare abilities as a teacher," says the *Louisville Courier-Journal*, "enable him to prepare Classics like these in the best manner for school use." "He has done his work in a manner that comes as near to perfection as man can approach," says the *Boston Traveller*. "He knows his subject so well that he is competent to instruct all in it." BROWNING'S BLOT IN THE SCUTCHEON, and SELECT POEMS, SELECT POEMS OF OLIVER GOLDSMITH, SELECT POEMS OF THOMAS GRAY, THE MINOR POEMS OF JOHN MILTON, THE LAYS OF ANCIENT ROME, AND SELECT POEMS OF WILLIAM WORDSWORTH are contained in this series.

SELECT ENGLISH.

Cloth, 36 cents and 50 cents.

Under the title of SELECT ENGLISH FOR SUPPLEMENTARY READING will be found LAMB'S TALES FROM SHAKESPEARE, two volumes, TALES FROM ENGLISH HISTORY, TALES FROM SCOTTISH HISTORY, SCOTT'S TALES OF CHIVALRY and FAIRY TALES FOR BOYS AND GIRLS. These books are all published with notes and illustrations in uniform style and binding.

A handsome illustrated Bulletin of Text-Books for Schools and Colleges will be forwarded to the address of any teacher who may ask for it. Send for Educational Catalogue.

HARPER & BROTHERS, Franklin Square, New York.

The author expects to complete his work in four volumes, but each volume will cover a distinct period of history, and will be complete in itself.

American Literature, 1607-1885. By CHARLES F. RICHARDSON, Professor of Literature in Dartmouth College. Part I. The Development of American Thought. Part II. American Poetry and Fiction. Popular Edition. Two volumes in one. Octavo, cloth, gilt top, $3.50.

*** *Special terms to teachers for examination and introduction. Notes on New Books Vol. II., No. 2, and educational lists and prospectus of the Heroes and Story of the Nations Series, German and French Classics, etc., sent on application.*

G. P. PUTNAM'S SONS,
NEW YORK AND LONDON.

The Historical Reference Book.

Comprising a Chronological Table of Universal History, a Chronological Dictionary of Universal History, a Biographical Dictionary. With Geographical Notes. For the use of Students, Teachers, and Readers. By LOUIS HEILPRIN. Third Edition, revised and brought down to 1892. Crown 8vo. Half leather, $3.00.

"Quite the most compact, convenient, accurate, and authoritative work of the kind in the language. . . . Should find a place in every family library, as well as at the elbow of every scholar and writer."—*The Nation.*

"The best single-volume work of its kind."—*New York Herald.*

A Chronological Table of Universal History.

Extending from the Earliest Times to the Year 1892. For the Use of Students, Teachers, and Readers. By LOUIS HEILPRIN. 12mo, 200 pages. Cloth, $1.25.

This is one of the three sections comprised in 'The Historical Reference-Book,' bound separately for convenience of those who may not require the entire volume. Its arrangement is chronological, each paragraph giving, in briefest practicable form, an outline of the principal events of the year designated in the margin.

IN BRASS AND BRONZE

54 South Fifth Ave. near Bleecker St.

NEW YORK

READING, 'RITING AND 'RITHMETIC are primary and essential. Refinement, Culture and Polish come later from Travel, Association with the best thoughts of gifted minds.

In the STEDMAN-HUTCHINSON "LIBRARY OF AMERICAN LITERATURE" you can travel through every State in the Union, associate companionably with educated men and women, and acquaint yourself with the best thoughts of twelve hundred talented authors.

In this age, when a short-hand method of reading is necessary, and when breadth of information and a critical judgment, which can only be secured by comparing the writings of a great many authors on various subjects, are so essential, "The Library of American Literature" is to every citizen not a luxury, but a necessity. It compresses a whole book-store into a few volumes, and yet does not mutilate or alter a single sentence in any selection given.

The variety, value and arrangement of the material are such as to cause these volumes to be used perhaps more than any other volumes that could be placed in a library. It is a purely American work, containing the finest productions of American authors from 1607 to 1890. In its elegant volumes are 6,200 pages, nearly 3,000 selections—prose and poetry, 160 steel and wood portraits. This work is highly endorsed by such men as A. R. Spofford, Librarian of Congress; John Fiske, Librarian of Harvard University; John G. Whittier, the Quaker poet; Noah Porter, ex-President of Yale University; Moses Coit Tyler, Professor of Cornell University, and all the leading educators without exception. The complete work covers the entire field of American literature in a manner satisfactory to every American home. Every member of your family will enjoy "The Library of American Literature."

SOLD ONLY BY SUBSCRIPTION. Teachers will find it profitable and pleasant to solicit subscriptions. For full description address

The Compendious Manual

OF

Qualitative Chemical Analysis

Of C. W. ELIOT and F. H. STORER.

As revised by W. R. Nichols. Sixteenth Edition, newly revised by W. B. LINDSAY, A.B., B.S., Professor of Chemistry in Dickinson College.

Preface to the Sixteenth Edition.

"This edition has been carefully revised with the coöperation of Prof. F. H. Storer. The alterations and additions are such as an experience of several years' use of the book has suggested, and it is hoped they will add to its utility. W. B. LINDSAY.

"Dickinson College, Carlisle, Penn., Nov., 1891."

The "Phonetic" Series

OF HAND-BOOKS TO THE STUDY OF LANGUAGES

No. 1. Colloquial French for Travellers and Students.

Handy sized 16mo; tastefully bound in cloth, 75 cents.

This is the first volume of a series of hand-books which has two aims—one to give a careful analysis, for students, of the sounds employed in speaking various languages, as compared with English, with an explanation of the differences in easily understood terms; and the other to be thoroughly useful phrase-books for travellers.

No. 2. Colloquial German for Travellers and Students.

Uniform with 'Colloquial French.' 75 cents.

JUST PUBLISHED:

No. 3. Colloquial Italian for Travellers and Students.

Uniform with 'Colloquial French' and 'Colloquial German.' Cloth, 75 cents.

TARIFF REFORM:

THE PARAMOUNT ISSUE.

SPEECHES AND WRITINGS ON THE QUESTIONS INVOLVED IN THE PRESIDENTIAL CONTEST OF 1892.

By WILLIAM M. SPRINGER, Chairman of the Committee on Ways and Means of the House of Representatives, Fifty-second Congress. With Portraits of the author and others.

This book is endorsed by Hon. Adlai E. Stevenson, Hon. Calvin S. Brice, and Hon. John G. Carlisle. Unquestionably the paramount issue of the campaign is the tariff. Upon this issue the line dividing the political parties is more clearly marked than any other. No statesman in the United States has given the subject more earnest thought than Mr. Springer, who has been actively engaged in the study of this question since 1868. The volume is a masterly presentation of the facts and arguments likely to prove most effective in the Presidential campaign.

Cloth, library style, $1.50; Paper, $1.00.

A PARTICULARLY TIMELY BOOK.

MOONBLIGHT,

AND

SIX FEET OF ROMANCE.

By DAN BEARD. Illustrated by the author.

Never were the relations between capital and labor more strained than at present. 'Moonblight,' as a story, is powerful and fascinating.

Cloth, 8vo, $1.00.

A NEEDED REFERENCE WORK FOR EVERY LIBRARY.

THE NEW

CHAMBERS'S ENCYCLOPÆDIA.

NEW TYPE. NEW SUBJECTS. NEW ILLUSTRATIONS. NEW MAPS.

A DICTIONARY OF UNIVERSAL KNOWLEDGE.

To be completed in ten volumes. Price per volume: Cloth, $3.00; Sheep, $4.00; Half Morocco, $4.50.

Vols. I., II., III., IV., V., VI., VII., VIII., and IX. Ready.

Vol. X. Ready in December.

This great work has been reëdited, reset in clear, distinct type, and beautified with new illustrations and maps. The old articles have been rewritten so as to incorporate the latest information, and thousands of new ones introduced upon the subjects of Art, Science, Literature, History, Biography, etc. The number of American articles has been greatly increased, so that the present is more distinctly American than former editions. The articles in every department are based upon the latest researches and investigations, and the census statistics are those of 1890-91. When completed it will be at least fifteen years later than any other Encyclopædia extant.

For particulars, specimen pages, etc., address

J. B. LIPPINCOTT COMPANY, Publishers,

715 and 717 Market Street, Philadelphia.

INDEX OMNIUM.

By T. E. SHIELDS.

A REFERENCE BOOK designed for the use of STUDENTS AND PROFESSIONAL MEN, on a plan intended to save time and facilitate access to knowledge acquired by reading and study.

☞ No title can completely convey to the reader an idea of the value of this book. By a simple and ingenious method of indexing, the results of wide reading and study can be recorded and made available for future use. Todd's 'Index Rerum' and other books have attempted this, but the outlay of time and labor has been so great that few persons have ever persevered in their use. By an insignificant outlay of labor the student can secure any item of knowledge he may wish to preserve. If properly used it will prove to be a key that will unlock the secrets of every library.

One vol., quarto, about 400 pages, made from the best ledger paper and bound in substantial half leather binding and cloth sides, net, $4.50. Specimen pages and descriptive sheet sent on application. Will be sent by mail or express, paid, to any address on receipt of the price.

N. B.—WE WILL ESTEEM THE MENTION OF THIS PAPER A FAVOR.

WE HAND YOU A FRESH SCALP!

If your hair is gone, or is falling out, or is thin and dry, or you have dandruff, or an itching or sore scalp, send $1.00 for a bottle of

CAPILLIFORM.

A well-known official of the Pennsylvania Railroad writes: "For several years I had a distressing eczema in my scalp. Every time I scratched it the sores came off, always bringing more or less hair with them. I became bald in patches, and my hair lost its strength. I tried all remedies in vain until CAPILLIFORM appeared. The very first application stopped all the itching, and in one week I was cured. My scalp is now perfectly pure and clean, and my hair has grown in again very nicely. I now use it regularly, and would not be without it."

CAPILLIFORM is an Infallible Hair Restorer and Delightful Toilet Dressing. It is fragrant, soothing, and quickly efficacious. A Summer Girl says: "I would not go to the resorts without it."

SCHERMERHORN'S TEACHERS' Agency. Oldest and best known in the U. S. Established 1855. 3 East 14th St., N. Y.

N. E. BUREAU OF EDUCATION

Reasons why this Bureau has gained and deserves the confidence and patronage of so large a constituency of teachers and school officers all over the nation.

(1.) *Because it is the oldest Teachers' Agency in New England, having been established in* 1875.

(2.) *Because its Manager for the last eleven years is a professional educator, and has become familiar with the condition and wants of every grade of schools and the necessary qualifications of teachers.*

(3.) *Because the number of our candidates is large, and embraces many of the ablest teachers, male and female, in the profession.*

(4.) *Because all applications for teachers receive prompt and careful attention.*

(5.) *Because our pledge for fair dealing and devotion to the interests of our patrons has been redeemed.*

No charge to school officers. Forms and Circulars sent FREE. Register now for the autumn vacancies; for winter and spring as well, as the demand is constant. Apply to

HIRAM ORCUTT, Manager,
3 Somerset St., Boston.

AN AGENCY is valuable in proportion to its influence. If it merely hears of vacancies and THAT is something, but if it tells you about them and is asked to recommend a teacher and recommends you, that is more. Ours RECOMMENDS
C. W. BARDEEN, Syracuse, N. Y.

Educational.

The Columbian University,

WASHINGTON, D. C.

Professors and Instructors who contemplate changing Text-Books are cordially invited to consider the following books published by Harper & Brothers.

Ancient Literature. *Cloth, $1 20.* To facilitate and popularize the study of General Literature by furnishing a complete and carefully condensed text-book on the subject was the aim of Prof. JOHN D. QUACKENBOS in the preparation of his **Illustrated History of Oriental and Classical Literature.** An examination of this work will show it to be all that could be desired as a manual of instruction.

Anglo-Saxon. The following Anglo Saxon studies, by Dr. FRANCIS A. MARCH of Lafayette College, are offered for the consideration of instructors in that subject: **A Comparative Grammar of the Anglo-Saxon Language,** in which its forms are illustrated by those of the Sanscrit, Greek, Latin, Gothic, Old Saxon, Old Friesic, Old Norse, and Old High German. Price $1 80.—**An Anglo-Saxon Reader** with Philological Notes: a Brief Grammar and a Vocabulary. Price $1 10.—**A Method of Philological Study of the English Language.** Price 55 cents.

Astronomy. The Sixth edition of Dr. SIMON NEWCOMB's **Popular Astronomy,** places that book in the front rank of class-books. The historic and philosophic sides of the subject have been treated with greater fulness than is usual in works of this character, while the purely technical side has been proportionately condensed. Price $1 30.—**Recreations in Astronomy,** with Directions for Practical Experiments in Telescopic Work, by HENRY WHITE WARREN, is an original and interesting text-book. Price $1 25.

Bible Study. Of the books published in this branch of study the attention of professors and instructors is invited to **Smith's Old Testament** and **New Testament History,** published at $1 25 each, and **Smith's Smaller Scripture History,** at 60 cents. The SMALLER SCRIPTURE HISTORY is perhaps more widely used than any other text-book on that subject. **Thayer's Greek-English Lexicon of the New Testament,** price $6 50; **Westcott & Hort's Greek-English Testament,** price $3 50; and **Westcott & Hort's Greek New Testament,** Student's Edition, price $1 00, are all standard works, and are largely used by Bible students.

English Words. *Cloth, 84 cents.* **English Words,** by Prof. CHARLES F. JOHNSON of Trinity College, Hartford, Conn., is a book which aims at making Etymology suggestive and interesting, and at presenting the elements of the subject in such a form as to stimulate further investigation and lead to a more correct and literary use of words. The author has expressed himself in so happy and entertaining a manner that his book is as charming as a good story.

English Classics. *Cloth, 56 cents; Paper, 40 cents.* In the series of ENGLISH CLASSICS, prepared by Dr. WM. J ROLFE and published with notes and illustrations, teachers will find aids to their work which are rarely equalled. "His rare abilities as a teacher," says the *Louisville Courier-Journal,* "enable him to prepare Classics like these in the best manner for school use." "He has done his work in a manner that comes as near to perfection as man can approach," says the *Boston Traveller.* **Browning's Blot in the 'Scutcheon** and **Select Poems of Oliver Goldsmith, Select Poems of Thomas Gray, The Minor Poems of John Milton, The Lays of Ancient Rome,** and **Select Poems of William Wordsworth** are contained in this series.

Shakespeare. *Cloth, 56 cents; Paper, 40 cents.* No edition of **Shakespeare** so well answers the needs of the class room as that prepared by Dr. WM. J. ROLFE of Cambridge, Mass. Dr. ROLFE is not only a conscientious but a brilliant worker, and has a wide reputation as a Shakespearian scholar of great ability. His edition is the only illustrated school edition published in this or any other country, and no teacher can fail to appreciate the rare discrimination shown in the preparation of the author's Notes and Introductions to Shakespeare's Plays. The series is complete in forty volumes.

Rhetoric. The **Principles of Rhetoric and their Application,** with an Appendix Presenting General Rules for Punctuation, by Prof. Adams Sherman Hill of Harvard University, is a text-book deserving of the highest praise. The author treats the subject from the standpoint of a scholar and teacher, and has consequently made a representative class-book. Price 80 cents. Four other good books, namely, **De Mille's Rhetoric, Haven's Rhetoric, Boyd's Rhetoric,** and **Whately's Rhetoric,** are offered, each of which treats the subject in an original and characteristic manner.

Greek. Under the editorial supervision of Dr. Henry Drisler of Columbia College, the following texts have been issued: **The Olympic and Pythian Odes of Pindar.** With Critical and Explanatory Notes. By Dr. Gildersleeve.—**The Antigone of Sophocles.** With Introduction, Notes, and Appendix. By Prof. Milton W. Humphreys of the University of Virginia.—**Sicilian Expedition of Thucydides.** With Introduction and Notes. By Prof. W. A. Lamberton of Lehigh University.—**Books VI. and VII. of Herodotus.** With Introduction and Notes. By Dr. A. C. Merriam of Columbia College.—**The Protagoras of Plato.** With Introduction and Notes. By Dr. E. G. Sihler.—**The Iliad of Homer.** With Introduction and Notes. By Dr. W. S. Tyler of Amherst College.—**The Phæacians of Homer.** With Introduction and Notes. By Dr. A. C. Merriam of Columbia College.—**Stories from Herodotus and the Seventh Book of the History.** With Notes. By Dr. Robert P. Keep of Norwich Academy.

Latin. Under the editorial supervision of Dr. Henry Drisler of Columbia College, the following texts have been issued: **The Satires of Persius.** Edited by Dr. Gildersleeve of the University of Virginia.—**Three Plays of Plautus.** With Notes. By Prof. C. S. Harrington of Wesleyan University.—**The Captives of Plautus.** Edited by Dr. John Proudfit of Rutgers College.—**The Andria and Heauton Timorumenos of Terence.** With Notes. By Dr. Andrew F. West of Princeton College. **Cato Major and Laelius of Cicero.** With Introduction and Commentary, and the **Offices of Cicero.** With Introductory Essay and Commentary. By Prof. Austin Stickney, formerly of Trinity College.—**The Moral Essays of Seneca.** Edited with Notes. By Drs. John F. Hurst and Henry C. Whiting.

History. The **Student's Series of Histories,** containing twenty-five volumes, is widely and favorably known among schools. Each volume is acknowledged to be the best summary in our language of the particular branch of knowledge to which it belongs. Three volumes of the series are devoted to **Ancient History,** two to **Church History,** one to **Mediæval History,** four to the **History of England,** one to **France,** one to **Modern History,** one to **Germany,** four to **Greece,** one to **Persia,** and five to **Rome.** Full information of the entire series will be forwarded on request. For preparatory work the **Smaller Histories** are particularly suitable.

International Law. *Price $2 00.* **The Outlines of International Law,** with an Account of its Origin and Sources and of its Historical Development, by George B. Davis, U.S.A., Assistant Professor at the U. S. Military Academy, West Point, is a work sufficiently elementary in character to be within the reach of students who may desire to gain some knowledge of the general principles of this subject.

Mythology. *Price 60 cents.* **A Mythology of Greece and Rome,** Illustrated, with Special Reference to its Use in Art, is a translation from the German of Prof. O. Seemann. The book, in a moderate compass, gives a clear and readable account of the legends of Mythology, and makes an admirable class book for secondary schools.

Psychology. An excellent text-book on **Psychology,** by Dr. John Dewey of the University of Michigan, is offered to professors and instructors interested in this subject. Price $1 25.—**An Introduction to Psychological Theory,** and **Metaphysics: a Study in first Principles,** by Prof. Borden P. Bowne of Boston University, bear the impress of a fine scholar and a true metaphysician. They will well repay an examination.

Zoology. *Price $1 80.* The late Dr. James Orton's work on **Comparative Zoology** is a manual of instruction *par excellence.* Its merits have been recognized, as its extensive use in the class-room shows. The established facts and principles of Zoology are clearly brought out, and it is believed that the arrangement of the work will especially commend itself to a teacher.

A handsome illustrated Bulletin of Text-Books for Schools and Colleges will be forwarded on request.

HARPER & BROTHERS, Publishers, New York.

NEW AND FORTHCOMING BOOKS.

Books of which the prices are given are ready.

Goodwin's Greek Grammar. Revision of 1892. By W. W. GOODWIN, Professor of Greek in Harvard University. Price, by mail, postpaid, $1.65.

Vol. X. Ready in December.

Specimen Pages mailed free to any address.

This great work has been reëdited, reset in clear, distinct type, and beautified with new illustrations and maps. The old articles have been rewritten so as to incorporate the latest information, and thousands of new ones introduced upon the subjects of Art, Science, Literature, History, Biography, etc. The number of American articles has been greatly increased, so that the present is more distinctly American than former editions. The articles in every department are based upon the latest researches and investigations, and the census statistics are those of 1890–91. When completed it will be at least fifteen years later than any other Encyclopædia extant.

Worcester's Dictionary

Is the standard authority on all questions of Orthography, Pronunciation, and Definition, and is so recognized by the colleges of the country, by the principal newspapers and periodicals, and by such leaders of American thought as Phillips Brooks, Edward Everett Hale, George Bancroft, Oliver Wendell Holmes, Irving, Marsh, Agassiz, Henry, etc. Leading book publishers recognize Worcester as the highest authority, and millions of school-books are issued every year with this great work as the standard.

Sample pages and prices upon application.

Lippincott's Pronouncing Biographical Dictionary.

Containing Complete and Concise Biographical Sketches of the Eminent Persons of all Ages and Countries. By J. THOMAS, M.D., LL.D. 1 vol., imperial 8vo, 2,550 pages. Sheep, $12; half morocco, $15; half Russia, $15.

"It is a treasure-house of information; a textbook of necessity, embracing many subjects besides biography. Members of the C. L. S. C. should include it in the formation or building up of a standard library."—*J. H. Vincent, Chancellor Chautauqua University.*

OLMSTED'S COLLEGE PHILOSOPHY.

FOURTH REVISION. BY SHELDON.

An Introduction to Natural Philosophy. Designed as a Text-Book in Physics for the Use of Students in College. By DENISON OLMSTED, LL.D., revised by E. S. SNELL, LL.D., and R. G. KIMBALL, Ph.D. *Fourth Revised Edition*, by SAMUEL SHELDON, Ph.D. (Würzburg), Professor of Physics and Electrical Engineering, Polytechnic Institute of Brooklyn. 8vo, pp. xiii., 466. Price, for introduction, $2.50; by mail, $2.75. Copies for examination mailed to Professors upon receipt of Two Dollars.

It is now nine years since Olmsted's Natural Philosophy was last revised. In this time many changes have been made in the technical nomenclature of Physics, many improvements in the methods of presentation of complicated portions of the science have been published by experienced educators, and, above all, the whole subject of Electricity and Magnetism has outgrown its former apparel. For the present revision the whole book has been carefully gone over, the requisite changes made, and several chapters entirely rewritten.

Many new engravings from drawings made expressly for this edition have been inserted.

The experience of those who have used this Revision since its publication in the autumn of 1891 is proof of its value as a text-book in Physics adapted to the requirements of a college course. As now presented it is believed to contain all that is necessary for this department of a liberal education.

From **Prof. W. H. Hartshorn**, Bates College.
Lewiston, Me., May 31, 1892.
I have been using Sheldon's Revision during the past year, and am much pleased with it.

From **Prof. L. A. Johnson**, Trinity University.
Tehuacana, Tex., July 3, 1892.
The Physics has been adopted as the text-book in the college course. It suits us better than anything else we have seen.

From **Prof. Geo. G. Hitchcock**, Washington Ag'l College.
Pullman, W., July 21, 1892.
I am greatly pleased with it and glad that it maintains its high standard of excellence. I shall introduce it soon.

From **Prof. B. P. Gaillard**, No. Ga. Ag'l College.
Dahlonega, Ga., June 17, 1892.
I adopted it and used it as a text-book in my Junior Class. I am very much pleased with it. It suits my purpose better than any other book on that subject I am acquainted with.

From **Prof. M. J. Elrod**, Illinois Wesleyan University.
Bloomington, Ill., Jan. 13, 1892.
I thank you for it, and think I shall be able to plan my work so as to use it next year.

From **Prof. W. S. Ryland**, Bethel College.
Russellville, Ky., May 28, 1892.
I am using it as a text-book for my Senior Class. All things considered it is the best for my use I know of.

From **Prof. L. C. Haynes**, Greenville and Tusculum College.
Tusculum, Tenn., June 10, 1892.
We used Sheldon's Olmsted with our class last year, and with great satisfaction to both teacher and class. The work of revision has been well done. Electricity and Magnetism, the part rewritten by Prof. Sheldon, deserves special mention.

From **Prof. J. S. Dawson**, Georgetown College.
West Washington, D. C., May 28, 1892.
I have examined the new edition and have proposed to the President and Directors of the College to use it.

From **Prof. J. H. Montgomery**, Allegheny College.
Meadville, Pa., April 11, 1892.
I have received the copy which you sent me, and think I will introduce it next year into my classes.

From **Prof. J. T. Lovewell**, Washburn College.
Topeka, Kans., Feb. 20, 1892.
I am so well pleased with it that I shall probably introduce it into my next class.

From **Prof. J. P. Looney**, Portland University.
Portland, Ore., Feb. 13, 1892.
I have examined it thoroughly. I feel safe in saying it is the best work on the subject I have seen. I shall use it in the University.

From **Prof. W. W. Hamilton**, Bethel College.
McKenzie, Tenn., Jan. 16, 1892.
I like it so that I expect to put it in our own course.

From **Prof. C. E. Barr**, Albion College. Albion, Mich., Jan. 13, 1892.
The book is now, to my mind, the most desirable in its general method of treatment of any before the public.

From **Prof. W. W. Hooper**, U. S. Grant University.
Chattanooga, Tenn., Jan. 9, 1892.
The copy of Sheldon's Revision was duly received and examined. I formed a class in it last fall and am well pleased with the work.

From **Prof. J. C. Adair**, Tarkio College. Tarkio, Mo., Dec. 29, 1891.
I think it an admirable work. If we can arrange so as to have an introductory course I will use it in my higher class work.

From **Prof. Peter Engel**, St. John's University.
Collegeville, Minn., Nov. 27, 1891.
I have always considered Olmsted's Philosophy an excellent text-book for students sufficiently advanced in mathematics, and think this edition in several respects superior to the former ones.

From **Prof. Isaac S. Hopkins**, Ga. School of Technology.
Atlanta, Ga., Nov. 25, 1891.
I think enough of Olmsted's Philosophy to use it with my classes. For clearness of statement, method of treatment, discretion of selection in the mass of material I know nothing equal to it as a college text-book.

From **Prof. A. W. Kelley**, Battle Creek College.
Battle Creek, Mich., Nov. 16, 1891.
I have received the copy and am well pleased with it. We will order the New Edition before we take up the work again.

From **Prof. Charles Fairman**, Shurtleff College.
Upper Alton, Ill., Oct. 30, 1891.
I find the alterations very greatly increase the value of the work for educational purposes. I shall probably use Sheldon's Revision as a text-book next year.

From **Prof. J. A. Bauman**, Muhlenberg College.
Allentown, Pa., Oct. 30, 1891.
I at once introduced it and am using it now. For my purposes the old edition was the best book I knew of, and as the Revision has brought it up to date its merits are very greatly increased.

From **Prof. D. M. Martin**, Hillsdale College. Hillsdale, Mich., Oct. 29, 1891.
I am using Sheldon's Revision and like it much. I know of no work that would take its place.

From **Prof. B. S. Winchester**, Whitman College.
Walla Walla, Wash., Oct. 31, 1891.
We are using Dr. Sheldon's Revision and are much pleased with it.

From **Prof. F. Sanford**, Leland Stanford, Jr., University.
Menlo Park, Cal., Oct. 29, 1891.
I regard it as a very great improvement on the former editions. The parts which have been rewritten by Dr. Sheldon are especially good. I have recommended the book to my classes.

From **Prof. F. W. Martin**, Fort Worth University.
Fort Worth, Tex., Oct. 30, 1891.
I am pleased with Sheldon's Olmsted and expect to use it.

From **Prof. J. T. Coleman**, S. C. Military Academy.
Charleston, S. C., Oct. 31, 1891.
Olmsted's College Philosophy, edited by Sheldon, is, in my opinion, a representative college text-book. It is enough for the student to learn, and, when supplemented by active practice in the Laboratory, will be an ideal course.

From **Prof. W. J. Brown**, U. S. Grant University.
Athens, Tenn., Oct. 26, 1891.
We have decided to use it in our college classes.

From **Prof. J. B. Fox**, Newberry College. Newberry, S. C., Oct. 27, 1891.
I have been pleased with an examination of the book. I will probably introduce it next year.

From **Prof. J. E. Lehman**, Lebanon Valley College.
Annville, Pa., Oct. 3, 1891.
I have a class in the subject and we are all enjoying the work.

From **Prof. J. A. Moore**, Southern University, Greensboro, Ala., Oct. 16, 1891.
I am much pleased with it. I will use it after this year with my classes in mechanics.

From **Prof. W. E. Henderson**, College of Emporia.
Emporia, Kans., Sept. 19, 1891.
I am very much pleased with it. I think very strongly of introducing it in my classes here next year.

From **Prof. S. W. Stratton**, University of Illinois.
Champaign, Ill., Aug. 31, 1891.
I have decided to introduce the Fourth Revision into our University.

From **Prof. M. L. Lipscomb**, University of the State of Missouri.
Columbia, Mo., Nov. 23, 1891.
I have been using Sheldon's Revision in my Freshman Class for twelve weeks, and am delighted with it. It is just the book I have been in need of for a long time. I heartily commend it as a work of high grade on general physics.

From **Prof. G. H. Colton**, Hiram College. Hiram Ohio, Nov. 7, 1891.
I find that the Revision has been careful and thorough. The result is a most excellent college text-book. The clearness and conciseness of the original work have not been sacrificed, while the matter added and the rewritten paragraphs have placed the work fully abreast of the times.

From **Prof. A. A. Bennett**, Iowa College, Ames, Iowa, Nov. 14, 1891.
The Revision is a great improvement over the preceding edition, and brings it up to the present condition of the science. In my opinion it is the best college text-book, taking into account its limits, that is published.

From **Prof. G. W. Shaw**, State Agricultural College,
Corvallis, Oregon, Nov. 16, 1891.
After a critical examination of the book I am satisfied of its superior excellence. For the grade of work for which it is designed I do not know of its equal for the class-room.

From **Prof. R. O. Graham**, Illinois Wesleyan University.
Bloomington, Ill., Oct. 26, 1891.
I am much pleased with the changes made. This work I always use in my college classes, and I decidedly prefer it to any other for advanced pupils. Being brought down to date by the present revision, I believe it has no superior among texts on physics.

From **Prof. L. O. Cochran**, Upper Iowa University.
Fayette, Iowa, Nov. 2, 1891.
I am quite well pleased with the new revision. In a general presentation of the topics without too much elaboration, it is the best work in my judgment that I have seen.

From **Prof. A. G. B. Wilson**, Lenox College.
Hopkinton, Iowa, Oct. 31, 1891.
Dr. Sheldon's Revision has added to the old edition all that was necessary to make it the most suitable book that I can find for class use.

SUPLÉE'S TRENCH on WORDS

From the latest English Edition. With an exhaustive Analysis, Additional Words for Illustration, and Questions for Examination. By Prof. Supée. 1 vol. net $1. *For examination, 75c., postpaid.*

These questions were prepared not only to call forth the facts stated by the author, but also to follow up lines of thought suggested by him. To each lecture a list of words has been added, illustrating its various topics, and intended to encourage original research on the part of the pupil. *The new arrangement of the text, analysis, and questions cannot fail to be of great assistance.*

INTRODUCTION to the STUDY

of Philosophy. By J. W. Stuckenberg, D.D., Member of the Philosophical Society of Berlin. Crown 8vo, cloth, $2. *For examination, $1.35.)*

"*This work must command the respect of all schools of thought. It is not a philosophy nor a psychology, nor a book to defend a particular system of metaphysics. It is simply what it purports to be, an introduction to the subject. In this respect it supplies for teachers and students alike a much-felt want. The problems and relations of philosophy are clearly analyzed and set out before the student, so that he may gain some familiarity with its questions, without having to plod through too many original systems or their history.*"—N. Y. Nation.

Unabridged Student's Hallam.

FOR USE IN COLLEGES AND SCHOOLS.

THE MIDDLE AGES. A View of the State of Europe during the Middle Ages. Revised and corrected edition. Complete in 2 vols., cr. 8vo, $2.00.

CONSTITUTIONAL HISTORY OF ENGLAND, from the Accession of Henry VIII. to the Death of George II. Including Mr. Hallam's Supplemental Volume of Revision up to 1846.—Indispensable to students.) Complete in 2 vols., cr. 8vo, $2.50.

INTRODUCTION TO THE LITERATURE OF EUROPE in the 15th, 16th, and 17th Centuries. Revised and corrected edition. Complete in 2 vols., $2.50.

MAY'S CONSTITUTIONAL HISTORY OF ENGLAND, since the accession of George III., 1760 to 1871. By T. Erskine May. 2 vols., cr. 8vo, price $2.00.

This is substantially a continuation of Hallam's great work, tracing the progress and development of the British Constitution during an entire century.

Special prices offered for use as text-books.

New and Cheaper Edition (Uniform with 'May's History.')

DEMOCRACY IN EUROPE.

A HISTORY. By Sir Thomas Erskine May. 2 vols., crown 8vo, cloth. *Price reduced to $2.00.*

"Those of our readers who will recall Mr. Erskine May's Constitutional History of England since the Accession of George the Third,' need not be told that he has executed a 'History of Democracy in Europe' with great skill, painstaking accuracy, and erudition, and yet he is earnest and vigorous, and his book, once taken up, will not be laid down again until the greater part of its contents is mastered."—*N. Y. Evening Post.*

STUDIES IN LITERATURE AND STYLE.

By Prof. T. W. Hunt of Princeton College. 12mo, cloth, $1.25; *for examination, 75 cents, postpaid.*

It is the aim of these studies to state and illustrate the fundamental types of style, with primary reference to the needs of English literary students. The discussion is both philosophical and practical, developed in scholarly and yet popular form.

REPRESENTATIVE ENGLISH

Prose and Prose Writers. By T. W. Hunt. 12mo, 640 pages; full index. Net $1.20. *Examination copies sent postpaid for 90 cts.*

Opening with a careful discussion of the leading historical periods of English prose, it proceeds to the examination of its various literary forms, and, as a natural and final division of the subject, presents a critical study of representative English authors as exponents of English prose style, in subject-matter, as in method, it is thoughtful and logical, while the English in which it is expressed is clear, vigorous, and tasteful.

THE PRINCIPLES OF WRIT-

ten Discourse. By T. W. Hunt, Professor of Rhetoric and English Language, Princeton College. 12mo, $1. Sent, for examination, 75c., postpaid.

This work gives a full and philosophic discussion of the subject with particular reference to collegiate needs.

A New Edition, with a Complete Analysis in Twenty Pages, of

THE STRUCTURE OF ENG-

lish Prose. A Manual of Composition and Rhetoric. By Prof. J. G. R. McElroy of the University of Pennsylvania. 12mo, $1.20. (Examination copies 90 cts., postpaid.)

"*Though theory is by no means lost sight of, the aim of the author is eminently practical, thus adapting his work for use in both College and advanced classes in High Schools and Academies.*"

By H PANMURE GORDON. With sixty original illustrations by Irving Montagu.

Terse and epigrammatic, these flying leaves of a shrewd traveller's observations of this country will be read with interest and amusement.

"Hearty admiration, sincere deference, and earnest sympathy. These conditions meet, we observe with satisfaction, in Mr. H. Panmure Gordon, and we do not hesitate to bespeak a multitude of readers for his book."—*N. Y. Sun.*

"Mr. Gordon appears to have had a fairly good time in America, and to have judged us with good temper."—*The N. Y. Times.*

Three entertaining works selected from the CHANDOS CLASSICS.

The Diary and Letters of Madame

D'ARBLAY (FRANCES BURNEY). With Notes by W. C WARD, and prefaced by LORD MACAULAY'S Essay With Portraits. In 3 vols., smooth dark blue linen boards, price, $2 25 per set; or, in "Roxburgh" style, cloth, gilt tops, price $3.00 per set, boxed.

*** The Diary of the author of "Evelina" contains most sprightly and entertaining anecdotes of fashionable and Court Society of the Reign of George III., as well as the literary circles of the latter portion of the eighteenth century, Dr. Johnson, Mrs. Thrale, etc., etc.

Evelyn's (John) Diary. Diary and

Correspondence of John Evelyn, Esq., F.R.S., from 1641 to 1705–6. With Memoir. Edited by William Bray, Esq. Forming a most amusing and graphic picture of the time of Charles I. to King William. 1 vol., 12mo, bound in smooth blue linen boards, white title label, price 75 cents; or in half Roxburgh style, cloth, gilt top, $1.00.

The Diary of Samuel Pepys, Esq.,

F.R.S. From 1659 to 1669. With Correspondence and Memoir. Edited by Richard Lord Braybrooke. 1 vol., bound in two styles uniform with the above, 75 cents or $1.00.

This invaluable picture of the times, translated from the original cypher, gives us a minute panorama of one of the most interesting and eventful decades in English History.

*** THE CHANDOS CLASSICS now consist of over 130 volumes, containing the best literature of all times, are all uniform in style and size and retail at 75 cents per volume in smooth, blue linen boards, white title labels; or, in "Roxburgh" style cloth, gilt tops, price One Dollar per volume.

Many volumes in THE CHANDOS CLASSICS *are in use as advanced or Supplementary Readers, or for English Literature Classes in High Schools, Private Schools, and Colleges. Ask your bookseller, or send us a postal card for a detailed list of the series.*

By the author of 'Life and Teachings of John Ruskin.'

Popular Studies of the Nineteenth

CENTURY POETS. By J. MARSHALL MATHER. In 12mo, cloth, $1.00.

Simple studies on Wordsworth, Shelley, Coleridge, Byron, Hood, Tennyson, and Browning, tending to create a wider interest in the poet and his works.

"In 'Popular Studies of the Nineteenth Century Poets,' J. Marshall Mather presents the critical essay in its most enticing form. . . . This, allied to a clear and graceful style, renders the book a delight, not only to the class of workingmen for whom it was originally written, but also to all lovers of good, forceful English."—*Curr nt Literature (July).*

Beware of Substitutes and Imitations.

WE HAND YOU A FRESH SCALP!

If your hair is gone, or is falling out, or is thin and dry, or you have dandruff, or an itching or sore scalp, send $1.00 for a bottle of

CAPILLIFORM.

A well-known official of the Pennsylvania Railroad writes: "For several years I had a distressing eczema in my scalp. Every time I scratched it the sores came off, always bringing more or less hair with them. I became bald in patches, and my hair lost its strength. I tried all remedies in vain until CAPILLIFORM appeared. The very first application stopped all the itching, and in one week I was cured. My scalp is now perfectly pure and clean, and my hair has grown in again very nicely. I now use it regularly, and would not be without it."

CAPILLIFORM is an Infallible Hair Restorer and Delightful Toilet Dressing. It is fragrant, soothing, and quickly efficacious. A Summer Girl says: "I would not go to the resorts without it."

Back Numbers of "The Nation."

In response to frequent inquiries from subscribers:

An incomplete set of THE NATION has little or no market value. Partial sets, bound and unbound, are always obtainable (usually lacking the earliest volumes), and do not command high rates. The bindings generally count for nothing, owing to great diversity of styles. Volume I. has readily brought $10 and upward when complete, bound or unbound, but will bring very little in proportion if a single number is missing. Volumes II. and III. are also scarce, but not so high-priced as the first.

Complete sets, both bound and unbound, have sold for $100, with tolerably quick bidders, and have an increasing value year by year.

Single numbers not more than a year old can usually be supplied by the publishers at 10 cents each. For numbers more than a year old purchasers are referred to Mr. J. W. Christopher, 47 Dey St., Mr. A. S. Clark, 34 Park Row, H. Williams, 195 West Tenth Street, New York; or A. H. Roffe & Co., Boston, Mass.

The publishers no longer undertake to buy or sell numbers or volumes more than a year old, and can only recommend sellers or purchasers to negotiate with a dealer or to advertise in THE NATION.

[Publication was begun July 1, 1865, Vol. I. comprising the last half year. Two volumes per year have since been issued, Vol. LV. comprising the last half-year of 1892.]

The Historical Reference Book.

Comprising a Chronological Table of Universal History, a Chronological Dictionary of Universal History, a Biographical Dictionary. With Geographical Notes. For the use of Students, Teachers, and Readers. By LOUIS HEILPRIN. Third Edition, revised and brought down to 1892. Crown 8vo. Half leather, $3.00.

"Quite the most compact, convenient, accurate, and authoritative work of the kind in the language. It is a happy combination of history, biography, and geography, and should find a place in every family library, as well as at the elbow of every scholar and writer. . . . The typography remains ideally good for such a manual."—*New York Evening Post.*

"A most useful reference work, compiled with the extreme accuracy characteristic of its author."—*Christian Union.*

A Chronological Table of Universal History.

Extending from the Earliest Times to the Year 1892. For the Use of Students, Teachers, and Readers. By LOUIS HEILPRIN. 12mo, 200 pages. Cloth, $1.25.

This is one of the three sections comprised in 'The Historical Reference-Book,' bound separately for convenience of those who may not require the entire volume. Its arrangement is chronological, each paragraph giving, in briefest practicable form, an outline of the principal events of the year designated in the margin.

INDEX OMNIUM.

By T. E. SHIELDS.

A REFERENCE BOOK designed for the use of STUDENTS AND PROFESSIONAL MEN, on a plan intended to save time and facilitate access to knowledge acquired by reading and study.

☞ No title can completely convey to the reader an idea of the value of this book. By a simple and ingenious method of indexing, the results of wide reading and study can be recorded and made available for future use. Todd's 'Index Rerum' and other books have attempted this, but the outlay of time and labor has been so great that few persons have ever persevered in their use. By an insignificant outlay of labor the student can secure any item of knowledge he may wish to preserve. If properly used it will prove to be a key that will unlock the secrets of every library.

One vol., quarto, about 400 pages, made from the best ledger paper and bound in substantial half leather binding and cloth sides, net, $4.50. Specimen pages and descriptive sheet sent on application. Will be sent by mail or express, paid, to any address on receipt of the price.

READING, 'RITING AND 'RITHMETIC are primary and essential. Refinement, Culture and Polish come later from Travel, Association with the Educated, and Acquaintance with the best thoughts of gifted minds.

In the STEDMAN-HUTCHINSON "LIBRARY OF AMERICAN LITERATURE" you can travel through every State in the Union, associate constantly with educated men and women, and acquaint yourself with the best thoughts of twelve hundred talented authors.

In this age, when a short-hand method of reading is necessary, and when breadth of information and a critical judgment, which can only be secured by comparing the writings of a great many authors on various subjects, are so essential, "The Library of American Literature" is to every citizen not a luxury, but a necessity. It compresses a whole book-store into a few volumes, and yet does not mutilate or alter a single sentence in any selection given.

The variety, value and arrangement of the material are such as to cause these volumes to be used perhaps more than any other volumes that could be placed in a library. It is a purely American work, containing the finest productions of American authors from 1607 to 1890. In its eleven elegant volumes are 6,200 pages, nearly 3,000 selections—prose and poetry, 160 steel and wood portraits. This work is highly endorsed by such men as A. R. Spofford, Librarian of Congress; John Fiske, Librarian of Harvard University; John G. Whittier, the Quaker poet; Noah Porter, ex-President of Yale University; Moses Coit Tyler, President of Cornell University, and all the leading educators without exception. The complete work covers the entire field of American literature in a manner satisfactory to every American home. Every member of your family will enjoy 'The Library of American Literature.'

Pratt Portraits.

Sketched in a New England Suburb. By ANNA FULLER. Second edition. 16mo, $1.00.

"Abounding in humor of a quaint and refreshing quality, crisp and palatable from its unforced originality, there are also hidden springs of pathos which contribute to the beauty of the author's work."—*Rochester Herald.*

"It is just the book for an hour's leisure, but, more than that, it is a book to read over and over again, either through and through or with here a dip and there another, and one well worthy of a favorite place in the home library."—*N. Y. Standard.*

"That exquisite spirit of New England humor and pathos which has baffled the pen of many a fluent writer has been happily seized and imprisoned in these delightful sketches. They are something rare, of an almost unknown quality, in the presentation of the quaint old women, the middle-aged men, and the blithe young girls which make up its character. . . . The leaves of this pretty book are in no danger of being left uncut, nor the pages left unthumbed."—*Boston Transcript.*

PUBLISHER OF THE NATION,
208 Broadway, New York City.

The Critic of Arguments.

By MR. CHAS. S. PEIRCE.

On September 1st *The Open Court* will begin the publication of a series of articles by MR. CHARLES S. PEIRCE, to be entitled 'The Critic of Arguments." (The word *critic* here means an art, like *logic*.) This series will be devoted to a critical and historical discussion of the methods of reasoning. Mr. Charles S. Peirce is one of the most distinguished scholars and mathematicians of which America boasts. But especially in the department of Modern Logic has his work contributed, perhaps more than that of any other living investigator, to the permanent advancement of science. The results of his thought are, however, for the most part locked up in the proceedings and reports of learned societies, and now for the first time, in *The Open Court*, are they to be presented in a less rigid and technical form, and made accessible to all who place a value on right thinking. Every philosophical student should avail himself of the opportunity to study this masterly series of logical papers.

The Open Court: A Weekly Journal of Philosophy and Science. Yearly, $2.00; single copies, 5 cents.

The Free Trade Struggle in England.

By GENERAL M. M. TRUMBULL. Second edition, revised and enlarged. Cloth, 75 cents; paper, 25 cents.

"It would be well worth while for any one who has been misled by the common errors about the influences which brought Great Britain to reverse her policy in 1842, to read up the economic history of that period. All the facts are given by the radical Miss Martineau in her History of Fifty Years' Peace; by the Tory Sir Stafford Northcote, in his Twenty Years' Financial Policy, explaining the changes which Peel brought about; by the economist John Noble's Fiscal Legislation in Great Britain; or in Carlyle's Past and Present. The best summary is to be found in the little book published in Chicago in 1884, by Gen M. M. Trumbull, entitled the American Lesson of the Free-Trade Struggle in England. In this book will be found the whole record of the condition of England from 1838 to 1846. This history ought to be read by every man who desires to make up his mind how to act in this country at the present time. The logic of events is the same. We are repeating history."—ME. EDWARD ATKINSON in *Pop. Sci. Mo.* (Aug., 1890).

THE OPEN COURT PUBLISHING CO.,
173½ LA SALLE ST., CHICAGO, ILLS.

A Useful Book for Teachers, Containing much more valuable matter than its title indicates.

THE

Compounding of English Words:

When and Why Joining or Separation is Preferable.

By F. HORACE TEALL. 12mo. 223 Pages. Price, $1.25.

W. J. ROLFE, *the Shakespearean scholar*, writes: "It is almost faultless as a discussion of the subject."

THE SCHOOL JOURNAL of May 21 says: "The results reached by him will be of great interest and value to teachers."

It is the ONLY book in which its subject is fully treated, and it is absolutely commended to selection of the *best* forms from actual usage, based upon *analogy.*

Highly commended by the press in all sections of the country. Circular with testimonials sent on application to the publisher.

For sale by all Booksellers, or sent postpaid on receipt of price by the publisher.

Charles L. Webster & Co.'s
NEW BOOKS.

TARIFF REFORM:
THE PARAMOUNT ISSUE.

SPEECHES AND WRITINGS ON THE QUESTIONS INVOLVED IN THE PRESIDENTIAL CONTEST OF 1892.

By WILLIAM M. SPRINGER, Chairman of the Committee on Ways and Means of the House of Representatives, Fifty-second Congress. With Portraits of the author and others.

Cloth, library style, $1.50; Paper, $1.00.

This book is endorsed by Hon. Adlai E. Stevenson, Hon. Calvin S. Brice, and Hon. John G. Carlisle. Unquestionably the paramount issue of the campaign is the tariff. Upon this issue the line dividing the political parties is more clearly marked than any other. No statesman in the United States has given the subject more earnest thought than Mr. Springer, who has been actively engaged in the study of this question since 1868. The volume is a masterly presentation of the facts and arguments likely to prove most effective in the Presidential campaign.

The Speech of Monkeys.

By R. L. GARNER. Small 8vo, with frontispiece, cloth, $1.00.

Mr. Garner's articles, published in the leading periodicals and journals touching upon this subject, have been widely read and favorably commented upon by scientific men both here and abroad. The field he enters is absolutely a new one, and he has received such encouragement from scientific and literary sources that he has determined to pursue his researches in the heart of the Tropics, the native home of the great apes.

Adventures of a Fair Rebel

A ROMANCE OF THE CIVIL WAR. By MATT CRIM. With a Frontispiece by DAN BEARD. 8vo, $1.00; in paper, 50 cents.

In Beaver Cove and Elsewhere.

By MATT CRIM. Illustrated by E. W. KEMBLE. Cloth, 8vo, $1.00; paper, 50 cents.

Moonblight and Six Feet of Romance.

By DAN BEARD. Illustrated by the author. Cloth, 8vo, $1.00.

Life of Jane Welsh Carlyle

By MRS. ALEXANDER IRELAND. Vellum, cloth (half bound), 8vo, $1.75.

A remarkable biography of a wonderful woman, written and compiled by one in thorough sympathy with her subject, from material made public for the first time. The powerful side-light it throws upon the life and character of Thomas Carlyle will make the volume indispensable to all who venerate the genius, or are interested in the personality, of the Sage of Chelsea.

Flower of the Vine: Romantic Ballads and Sospiri di Roma.

By WILLIAM SHARP, author of "A Fellowe and His Wife" (with Miss Howard), "Life and Letters of Joseph Severn," etc. With an introduction by THOMAS A. JANVIER, and a portrait of the author. Tastefully bound with appropriate decorative design, cloth, 8vo, $1.50.

Sent prepaid on receipt of price.

GEORGE A. PERRY, A.M., Head Master.

[*Educational continued on page 192.*]

MACMILLAN & Co.'s NEW BOOKS.

NOW READY. TWO VOLUMES, LARGE 8vo, $10.50.

WITH NEARLY 120 ILLUSTRATIONS.

Gossip of the Century.

Personal and Traditional Memories. Social, Literary, Artistic, etc. By the Author of 'Flemish Interiors,' 'De Omnibus Rebus,' etc. Two Vols., large 8vo, Cloth, gilt top, $10.50.

"History owes most of what little truth it contains to the gossip of diarists and annotators, as well as to the intimate confidences of friendly correspondence, and notwithstanding the necessarily trifling details of these private effusions, and the *banalités* with which they often abound, the sidelights of such records have become invaluable to the groping student of past times and of departed humanity; nor can we possess too many such chronicles, the value of each being proportioned to the subject which it treats. Trifles cease to be trifles when Boswell is relating them of Johnson; besides, experience shows that while one observer collects one class of information, another applies himself to another."—*From the Preface.*

Uniform with Bryce's American Commonwealth and Jephson's Platform. 2 Vols., 12mo.

VOL. I. NOW READY. 12mo, cloth, $3.00.

HISTORY OF THE NEW WORLD CALLED AMERICA.

By EDWARD JOHN PAYNE, Fellow of University College, Oxford.

"The following are the problems to which the writer's attention has been more immediately directed: To restore, if possible, the true features of the advanced communities of the New World, to analyze their social structure and economy, to measure by some definite standard the degree of progress they had attained, and to trace their history so far as it can be recovered, distinguishing what can fairly be accepted as fact from what can be shown with reasonable certainty to be fabulous."—*From the Preface.*

NOW READY. THIRD EDITION. 5 Vols., $20.00.

THE DIALOGUES OF PLATO.

Translated into English. With Analysis and Introductions. By B. JOWETT, M.A., Master of Balliol College, Regius Professor of Greek in the University of Oxford. Third Edition. 5 vols., Revised and Corrected throughout, and to a large extent rewritten. 8vo, gilt top, $20.00.

"Here Plato talks in all his grave and playful amplitude. Here we feel his grace, his humor, his dramatic power, his fondness for the mere act of utterance, his combination of passionate Hellenism and cosmopolitanism, his luminous insight into common things, his world-scorning moralities, his suggestion everywhere of meanings deeper than he cares to express. All this Prof. Jowett has rendered. No other English translation from the Greek, except our English Bible, has brought over so fully the riches of its original."—*The Nation.*

PUBLIC FINANCE.

By C. F. BASTABLE, LL.D., Professor of Political Economy in the University of Dublin. 8vo, $4.00.

"Is likely to be a standard work. Its literary merit, its divisions and general scope, its comprehensiveness and avoidance of undue regard to the controversies which are only of to-day, are but the secondary though essential features of such a work. The higher qualities of a philosophical and practical method of treatment, and a transparent willingness to adjust the balance of evidence are not wanting. It will be welcomed by students of political science everywhere, and not a few men more or less prominent in political or municipal life will find instruction and warning in its pages."—*Scotsman.*

THE LIFE AND LETTERS of CHARLES SAMUEL KEENE of "Punch."

By GEORGE SOMERS LAYARD. *With Portraits and over 80 Illustrations. Bound in buckram, gilt top. Royal 8vo, $8.00.*

"Among the documents for the study of future days of middle-class and of humble English life, none will be more weighty than the vivid sketches of this great humorist."—*Sir Frederick Leighton, P.R.A.*

"An altogether charming memoir, and one of the most delightful in its class, which, by the way, is not a large one.

"In carefully reproduced examples of the artist's work, the volume surpasses almost anything of its kind we have seen."—*Independent.*

"Admirable reading from beginning to end, and it affords an attractive insight into London art life and the artistic element in London society. . . . The volume, a noble example of bookmaking, appeals directly to all readers of refined artistic taste."—*Saturday Evening Gazette, Boston.*

New Edition, with Mrs. Humphry Ward's Open Letter to Her Publisher. 12mo, cloth, $1.00.

THE HISTORY OF DAVID GRIEVE.

By MRS. HUMPHRY WARD, author of 'Robert Elsmere,' etc., etc. Fourth edition. In one volume, 12mo, cloth, gilt, $1.00. Also the Library Edition, printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

"Mrs. Ward, with her 'Robert Elsmere' and 'David Grieve,' has established with extraordinary rapidity an enduring reputation as one who has expressed what is deepest and most real in the thought of the time. . . . They are dramas of the time vitalized by the hopes, fears, doubts, and despairing struggles after higher ideals which are swaying the minds of men and women of this generation."—*New York Tribune.*

Second Edition, Revised and Augmented.

Elementary Text-Book of Entomology.

By W. F. KIRBY, F.L.S., F.E.S., Assistant in Zoological Department British Museum (Natural History), South Kensington, etc., etc. With 87 Plates, containing over 650 figures. Small 4to, $3.00.

Side Lights Upon Bible History.

By Mrs. SIDNEY BUXTON. With Illustrations. 16mo, $1.50.

A Companion to the Iliad for English Readers.

By WALTER LEAF, Litt.D. 12mo, $1.60.

The Theory of the State.

By J. K. BLUNTSCHLI, late Professor of Political Sciences in the University of Heidelberg. Second edition. 12mo, $3.00.

Sunshine.

By AMY JOHNSON, LL.A., formerly Head Mistress of the Royal Academy, Inverness. With numerous Illustrations. *Nature Story Books.* 12mo, $1.75.

The first of a series of books intended to present some leading scientific principles in such a form as to arouse the interest of children. As far as possible Miss Johnson has drawn her illustrations from common things, and has devised her experiments to suit the simplest apparatus.

The Naulahka.

A Tale of West and East. By RUDYARD KIPLING and WOLCOTT BALESTIER. With Rhymed Chapter Headings by Rudyard Kipling. Cloth extra, $1.50.

"You cannot help being interested in 'The Naulahka' from the beginning; nor do you stop until the end. It is a story which moves; it has incident, color, go."—*Boston Times.*

"When Wolcott Balestier, with his breezy treatment of Western life, and Rudyard Kipling, with his inimitably vigorous and individual handling of Indian subjects, combine to produce a 'tale of West and East,' the result could not fail to be intensely interesting and absorbing. 'The Naulahka' is not to be compared to anything else, for there is nothing in literature just like it. . . .

"The plot is highly dramatic, and not for an instant does the interest flag, for the reader is hurried breathlessly from one unheard-of situation to another, and he is held in suspense to the very last page of the book. It is a brilliant romance, and displays marvellous imaginative qualities."—*Public Opinion, Washington.*

MACMILLAN & Co., 112 Fourth Avenue, New York.

Educational.

UNIVERSITY LAW SCHOOL. The Thirty-fourth Year begins Oct. 1, 1892. Confers LL.B.; also (for graduate course) LL.M. AUSTIN ABBOTT, LL.D., Dean and Senior Professor. For Catalogue, showing reorganized Faculty, address

WE HAND YOU A FRESH SCALP!
If your hair is gone, or is falling out, or is thin and dry, or you have dandruff, or an itching or sore scalp, send $1.00 for a bottle of
CAPILLIFORM.
A well-known official of the Pennsylvania Railroad writes: "For several years I had a distressing eczema in my scalp. Every time I scratched it the sores came off, always bringing more or less hair with them. I became bald in patches, and my hair lost its strength. I tried all remedies in vain until CAPILLIFORM appeared. The very first application stopped all the itching, and in one week I was cured. My scalp is now perfectly pure and clean, and my hair has grown in again very nicely. I now use it regularly, and would not be without it."
CAPILLIFORM is an Infallible Hair Restorer and Delightful Toilet Dressing. It is fragrant, soothing, and quickly efficacious. A Summer Girl says: "I would not go to the resorts without it."

School Trustees,
Principals,
Teachers,

And others interested, are invited to consider the advantages offered by the *Nation* as an advertising medium. School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

The *Nation*, in its special field of political and literary criticism, is unlike any other periodical, American or foreign. At least 10,000 copies are circulated weekly, but these figures do not accurately represent the number of its readers. It is taken by reading-clubs and literary associations in a large number of places, and may be found on file in every library of importance in the country. There are probably few weekly periodicals whose columns offer so favorable an opportunity for reaching an audience interested in educational matters.

Advertising rates, 15 cents a line each insertion, with the following discounts: 5 per cent. on 4 insertions, 10 per cent. on 8 insertions, 12½ per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 208 Broadway, N. Y.

The Nation

VOL. LV—NO. 1420. THURSDAY, SEPTEMBER 15, 1892. PRICE 10 CENTS.

D. APPLETON & CO.'S NEW BOOKS.

Pictures from Roman Life and Story.

By Prof. A. J. CHURCH, author of "Stories from Homer," "Stories from Virgil," etc. Illustrated. 12mo. Cloth, $1.50.

In the picturesque and graphic manner which distinguishes his work, Prof. Church has drawn a series of vivid pictures of the lives and times of the Roman emperors. He brings up before the reader Horace and Mæcenas and Seneca, and other contemporaries of the doomed line of Cæsars, as well as the triumphs and tragedies and frantic excesses of the emperors themselves. He is never didactic, but always readable, and his book is an admirable example of history presented intelligently and judiciously in popular form.

"In the main, an anecdotic History of the twelve Cæsars, compiled from Tacitus, Suetonius, Pliny, and Martial. The principal episodes of the first century are told with some fullness, and descriptions of manners are introduced at suitable places. . . . Mr. Church has a remarkable command of the literature of the period, and has used it with his customary grace and deftness."—*London Athenæum.*

NEW EDITION OF

Fragments of Science.

By JOHN TYNDALL, F.R.S., author of "Sound," "Heat as a Mode of Motion," "New Fragments," etc. New revised and enlarged edition. 2 vols. 12mo. Cloth, $4.00.

The first edition of Professor Tyndall's "Fragments of Science" was published some twenty years ago as a single volume, which was made up of a score or more of his detached essays, addresses, and reviews. The book was afterwards revised, some of the papers recast, and from time to time new ones added until, the size of the work becoming somewhat unwieldy, the present two-volume edition was decided upon. This contains fifteen additional papers, and represents the author's latest changes and revisions. The volumes are uniform with "New Fragments," recently issued, and the three together include all the occasional writings which their author has decided to preserve in permanent form.

The Historical Reference Book.

Comprising a Chronological Table of Universal History, a Chronological Dictionary of Universal History, a Biographical Dictionary. With Geographical Notes. For the use of Students, Teachers, and Readers. By LOUIS HEILPRIN. Third edition, revised. Crown 8vo. Half leather, $3.00.

"Quite the most compact, convenient, accurate, and authoritative work of the kind in the language. It is a happy combination of history, biography, and geography, and should find a place in every family library, as well as at the elbow of every scholar and writer. . . . The typography remains ideally good for such a manual."—*New York Evening Post.*

"An invaluable book of reference, useful alike to the student and the general reader. The arrangement could scarcely be better or more convenient."—*New York Herald.*

A

Chronological Table of Universal History.

Extending from the Earliest Times to the Year 1892. For the Use of Students, Teachers, and Readers. By LOUIS HEILPRIN. 12mo, 200 pages. Cloth, $1.25.

This is one of the three sections comprised in 'The Historical Reference-Book,' bound separately for convenience of those who may not require the entire volume. Its arrangement is chronological, each paragraph giving, in briefest practicable form, an outline of the principal events of the year designated in the margin.

Capt'n Davy's Honeymoon.

A MANX YARN. By HALL CAINE, author of "The Deemster," "The Scape Goat, etc. 12mo. Cloth, $1.00.

"A new departure by this author. Unlike his previous works, this little tale is almost wholly humorous, with, however, a current of pathos underneath. It is not always that an author can succeed equally well in tragedy and in comedy, but it looks as though Mr. Hall Caine would be one of the exceptions."—*London Literary World.*

"Constructed with great ingenuity. The story is full of delight."—*Boston Advertiser.*

"A rollicking story of Manx life, well told. . . . Mr. Caine has really written no book superior in character-drawing and dramatic force to this little comedy."—*Boston Beacon.*

His Life's Magnet.

By THEODORA ELMSLIE, author of 'The Little Lady of Lavender," "A Queen of Roses," etc. No. 100, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"An exceptionally interesting story, told with marked force and skill. The plot is not only cleverly constructed and elaborated, but it has an element of freshness that is as pleasing as it is welcome. The style is animated, the humor is discreet, and the pathos is grateful and true. In the closing chapters the book reaches a high point of dramatic intensity."—*Boston Saturday Evening Gazette.*

A new novel by the author of "Stephen Ellicott's Daughter."

Passing the Love of Women.

By Mrs. J. H. NEEDELL, author of "Stephen Ellicott's Daughter," "The Story of Philip M[illegible]" etc. No. 101, Town and Country Library. 12mo. Paper, 5[illegible] cloth, $1.00.

"The elevation of Mrs. Needell['s] [illegible]er power in the development of character, and her skill in the manag[illegible]d evolution of her plots, make her books thoroughly worth reading."—*[illegible]n News and Courier.*

Of "Stephen Ellicott's Daughter" Hou[illegible] GLADSTONE says: "I am desirous to bear my humble testimony to the g[illegible]ty and high aim of the work." Archdeacon FARRAR says: "I find it e[illegible]gly interesting, and like its high tone." The London *Spectator* says: "Fro[illegible] first to last an exceptionally strong and beautiful story."

Mr. Fortner's Marital Claims,

AND OTHER STORIES. By RICHARD MALCOLM JOHNSTON, author of "Dukesborough Tales," "Widow Guthrie," etc. Appletons' Summer Series. 16mo. With novel, specially designed cover and ornamented edges, 50 cents.

"Mr. Johnston is one of the best living chroniclers of Southern rural life and character."—*Charleston News and Courier.*

People at Pisgah.

By EDWIN W. SANBORN. Appletons' Summer Series. 16mo. With novel, specially designed cover and ornamented edges, 50 cents.

A story full of the charm of the unexpected, certain to promote good spirits, and preëminently adapted to the requirements of summer readers.

NEW EDITION. NEARLY READY.

An Englishman in Paris.

NOTES AND RECOLLECTIONS. In Two Volumes, 12mo. Cloth, $4.50

This work gives an intimate and most entertaining series of pictures of life in Paris during the reigns of Louis Philippe and Louis Napoleon. It contains personal reminiscences of the old Latin Quarter, the Revolution of 1848, the *coup d'état*, society, art, and letters during the Third Empire, the siege of Paris, and the reign of the Commune. The author enjoyed the acquaintance of most of the celebrities of this time; and he describes Balzac, Alfred de Musset, Sue, the elder Dumas, Tagliori, Flaubert, Aubert, Félicien David, Delacroix, Horace Vernet, Decamps, Guizot, Thiers, and many others, whose appearance in these pages is the occasion for fresh and interesting anecdotes. This work may well be described as a volume of inner history written from an exceptionally favorable point of view.

". . . . All questions of casuistry aside, the taste of civilized men for personal details about each other is unquestionable. . . . For this reason alone, independently of its literary merits, 'An Englishman in Paris' will be read all the world over with intense interest. . . . With this opportunity for knowing men, women, and affairs, shrewd insight, an analytical turn, an entire self-command, supplemented by an easy, fluent, unpretentious style of telling things, it is not to be wondered at that the work is one of the most interesting which have come from the press in a long time."—*Chicago Times.*

"We have rarely happened upon more fascinating volumes than these Recollections. . . . One good story leads on to another; one personality brings up reminiscences of another, and we are hurried along in a rattle of gayety. . . . We have heard many suggestions hazarded as to the anonymous author of these memoirs. There are not above three or four Englishmen with whom it would be possible to identify him. We doubted still until after the middle of the second volume we came upon two or three passages which strike us as being conclusive circumstantial evidence. . . . We shall not seek to strip the mask from the anonymous."—*London Times.*

For sale by all booksellers, or will be sent by mail on receipt of price by the publishers,

Charles Scribner's Sons'

NEW PUBLICATIONS.

Dr. J. G. Holland's Two Poems

BITTER SWEET and KATHRINA.

Cameo Edition. Each with an etched frontispiece. 16mo, gilt top, $1.25; half calf, $2.75; half levant, $3.50.

In this series there have already appeared Mr. Mitchell's "Reveries of a Bachelor" and "Dream Life," Mr. Cable's "Old Creole Days," and Mr. Page's "In Ole Virginia." The publishers have now ready Dr. Holland's two most noted poems, and they believe that these popular works, in their new and attractive dress, will appeal to a still larger circle of readers.

South Sea Idyls.

By Prof. CHARLES WARREN STODDARD. *Revised Edition from new plates.* 12mo, $1.50.

In an Introductory Note, Mr. Howells characterizes these sketches as "the lightest, sweetest, wildest, freshest things that ever were written about the life of that summer ocean."

The End of a Rainbow.

An American Story. By ROSSITER JOHNSON. Illustrated. 12mo, $1.50.

The hero of this book for young readers fails to find the crock of gold at the end of the rainbow, but does find the solid gold of priceless experience. His search leads him and his companions into many curious adventures.

Among the Lawmakers.

By EDMUND ALTON. Illustrated. *New and Cheaper Edition.* Square 8vo, $1.50.

"The reader, old or young, who begins the book will be certain to read it through."—*Boston Journal.*

Silhouettes of American Life.

By REBECCA HARDING DAVIS. 12mo, paper, 50 cents; cloth, $1.00.

"Charming outlines of life in different parts of the States. Mrs Davis has keen insight and sympathetic touch. She is a true artist."—*Boston Times.*

Stevenson's Book on Samoa.

A Footnote to History: Eight Years of Trouble in Samoa. By R. L. STEVENSON. 12mo, $1.50.

"It has superior value. His presentation of facts has the merit of lucidity, animation, correct local coloring, and picturesqueness."—*Christian Intelligencer.*

The Wrecker.

By R. L. STEVENSON and LLOYD OSBOURNE. *Eighth Thousand.* With 12 full-page Illustrations. 12mo, $1.25.

"Much the most enticing romance at present before the world."—*Andrew Lang.*

"The book is in the fullest sense a delightful one."—*London Spectator.*

The Bull Calf and Other Tales

By A. B. FROST. *Sixth Thousand.* Oblong 12mo, $1.00.

"The laughter it contains is irresistible."—*N. Y. World.*

"It consists of ten stories told in pictures. It overflows with mirthful entertainment."—*Boston Sat. Eve. Gazette.*

The Reflections of a Married Man.

By ROBERT GRANT. *Fourteenth Thousand.* 12mo, cloth, $1.00; paper, 50 cents.

"A capital little book, which should easily strike up literary comradeship with 'The Reveries of a Bachelor.'"—*Boston Transcript.*

"The humor is delightful throughout."—*Brooklyn Times.*

HATCHARDS.

This is the favorite BOOKSTORE, and for 100 years the resort of the smartest people in London. It is visited and patronized by all who love books. London is the great market for books, and all the best as well as the cheapest editions can be had by writing to us. Special collections formed, and fuller information supplied than from any other house. Books both old and new, and relating to any subject, can readily be supplied at very moderate prices.

Agents for Clubs, Libraries, and all private Collectors.

187 PICCADILLY, LONDON W.

G. P. Putnam's Sons,

NEW YORK AND LONDON,

HAVE NOW READY:

The Initials. A Story of Modern Life.

By the Baroness TAUTPHŒUS. Hildegarde Edition. Two volumes, uniform with the Exmoor Edition of 'Lorna Doone.' 16mo, cloth extra, $2.50.

It is forty years since the clever Welshwoman who married the Baron Tautphœus, the Chancellor of Bavaria, presented to the public this quaintly fascinating story, but it has never lost its hold upon those circles of the reading public which are able to appreciate refined humor, literary charm, and vivid characterizations. The admirable pictures of South German life are as true to-day as they were in 1850, while the fortunes of the charming heroine, Hildegarde, and of her manly though provoking British lover possess a perennial interest. The book is well deserving of the attractive library form that has now been given to it.

The Tariff History of the United STATES.

By F. W. TAUSSIG. New edition, revised, enlarged, and brought down to date. (Questions of the Day Series, No. 47.) 8vo, $1.25.

The Economy of High Wages.

An inquiry into the comparative methods and the cost of production in competing industries in America and in Europe. By J. SCHOENHOF, late U. S. Consul and Special Commissioner Department of State, U. S. A., for Inquiry into the Economy of Production and Technical Education in Europe, author of 'Destructive Influence of the Tariff,' etc., etc. With a Preface by the Hon. THOMAS F. BAYARD, late Secretary of State, U. S. A. $1.50.

Cynthia Wakeham's Money. A Romance.

By ANNA KATHARINE GREEN, author of 'The Leavenworth Case,' 'Hand and Ring,' etc., etc. With frontispiece. Third Edition. Paper, 50 cents; cloth, $1.00.

This new story is one of the best that Miss Green has written.

"Anna Katharine Green is a delightful change from the average latter-part-of-the-nineteenth-century novelist, and there is certainly plenty of amusement in being tangled thoroughly in one of her plots. We feel a pleasing certainty that at the proper and suitable time she will completely disentangle us."—*N. Y. World.*

"It is interesting, the author having a talent for working her details up to a very successful climax."—*N. Y. Critic.*

The Merrimack River, Hellenics, AND OTHER POEMS.

By BENJAMIN W. BALL. With an Introduction by FREDERICK F. AYER. 8vo, gilt top, $2.00.

JUST READY.

German Lessons. By CHARLES HARRIS, Oberlin College.

This book is intended to give such knowledge of forms as will adequately prepare the student to read ordinary German. It is expected to lead up to the advanced grammar on the one hand and to the study of prose composition on the other. As soon as possible the pupil is brought face to face with the language itself. 178 pages. Cloth, 60 cents. Liberal terms for introduction.

D. C. HEATH & CO., Publishers, Boston, New York, and Chicago.

MATTHEW ARNOLD IN THE 'NINETEENTH CENTURY."

"The New York NATION—a newspaper which I read regularly and with profit, a newspaper which is the best, so far as my experience goes, of all American newspapers, and one of the best newspapers anywhere."

THE NATION,

an independent weekly journal, was established in 1865. Its contributors include the most prominent names in literature, science, and art, both in this country and abroad. It is emphatically found in the homes of people of culture and refinement. No intelligent American, desirous of keeping abreast of the best political and literary thought of the day, can afford to be without it. Subscription price, $3.00 a year, postpaid.

WE HAND YOU A FRESH SCALP!

If your hair is gone, or is falling out, or is thin and dry, or you have dandruff, or an itching or sore scalp, send $1.00 for a bottle of

CAPILLIFORM.

A well-known official of the Pennsylvania Railroad writes: "For several years I had a distressing eczema in my scalp. Every time I scratched it the sores came off, always bringing more or less hair with them. I became bald in patches, and my hair lost its strength. I tried all remedies in vain until CAPILLIFORM appeared. The very first application stopped all the itching, and in one week I was cured. My scalp is now perfectly pure and clean, and my hair has grown in again very nicely. I now use it regularly, and would not be without it."

CAPILLIFORM is an infallible Hair Restorer and Delightful Toilet Dressing. It is fragrant, soothing, and quickly efficacious. A Summer Girl says: "I would not go to the resorts without it."

Back Numbers of "The Nation."

In response to frequent inquiries from subscribers:

An incomplete set of THE NATION has little or no market value. Partial sets, bound and unbound, are always obtainable (usually lacking the earliest volumes), and do not command high rates. The bindings generally count for nothing, owing to great diversity of styles. Volume I. has readily brought $10 and upward when complete, bound or unbound, but will bring very little in proportion if a single number is missing. Volumes II. and III. are also scarce, but not so high-priced as the first.

Complete sets, both bound and unbound, have sold for $100, with tolerably quick bidders, and have an increasing value year by year.

Single numbers not more than a year old can usually be supplied by the publishers at 10 cents each. For numbers more than a year old purchasers are referred to Mr. J. W. Christopher, 47 Dey St., Mr. A. S. Clark, 34 Park Row, H. Williams, 195 West Tenth Street, New York; or A. H. Roffe & Co., Boston, Mass.

The publishers no longer undertake to buy or sell numbers or volumes more than a year old, and can only recommend sellers or purchasers to negotiate with a dealer or to advertise in THE NATION.

[Publication was begun July 1, 1865, Vol. I. comprising the last half year. Two volumes per year have since been issued, Vol. LV. comprising the last half-year of 1892.]

MACMILLAN & Co.'s NEW BOOKS.

Uniform with Bryce's American Commonwealth and Jephson's Platform. 2 Volumes, 12mo.

VOL. I. NOW READY. 12mo, cloth, $3.00.

HISTORY OF THE
NEW WORLD CALLED AMERICA.

By EDWARD JOHN PAYNE, Fellow of University College, Oxford.

"Leads the student in a novel direction. . . . The elucidation of the subject surpasses in thoroughness and clearness anything of the kind we have ever read before."—*N. Y. Times.*

NOW READY. Two Volumes, large 8vo, $10.50. With nearly 120 Illustrations.

GOSSIP OF THE CENTURY.

Personal and Traditional Memories. Social, Literary, Artistic, etc. By the author of 'Flemish Interiors,' 'De Omnibus Rebus,' etc. Two volumes, large 8vo, cloth, gilt top, $10.50.

"The entertainment offered by these two volumes is endless, and every page is racy of the times they celebrate."—*Chicago Tribune.*

"These sumptuous volumes. . . . It is better conceived and better written than nine-tenths of its class. Its chapters are well arranged."—*Athenæum.*

THE LIFE AND LETTERS of CHARLES SAMUEL KEENE of "Punch."

By GEORGE SOMERS LAYARD. *With Portraits and over 80 Illustrations. Bound in buckram, gilt top. Royal 8vo, $8.00.*

"Among the documents for the study of future days of middle-class and of humble English life, none will be more weighty than the vivid sketches of this great humorist."—*Sir Frederick Leighton, P.R.A.*

'An altogether charming memoir, and one of the most delightful in its class, which, by the way, is not a large one.

"In carefully reproduced examples of the artist's work, the volume surpasses almost anything of its kind we have seen."—*Independent.*

"PERHAPS THE GREATEST NOVEL OF DISCUSSION EVER WRITTEN."

CALMIRE.

Second Edition, Revised. 12mo, $1.50.

"Of the ability of the work, of its learning, its audacity, its subtle dialectics, and its literary charm there can be no question. It woos and delights even where it does not convince."—*Philadelphia Bulletin.*

THE NOVELS OF CHARLES DICKENS.

NEW EDITION. ILLUSTRATED. 12mo, $1.00 each.

These are in all cases accurate reprints of the texts of the first editions, and accompanied by *all* the original illustrations. There is prefixed in each volume a short introduction written by Mr. Charles Dickens, the novelist's eldest son, giving a history of the writing and publication of each book, together with other details, biographical and bibliographical, likely to be of interest to the reader.

NOW READY:

BARNABY RUDGE.	MARTIN CHUZZLEWIT.	NICHOLAS NICKLEBY.
OLIVER TWIST.	PICKWICK PAPERS.	THE OLD CURIOSITY SHOP.

THE NAULAHKA.

A Tale of West and East. By RUDYARD KIPLING and WOLCOTT BALESTIER. With Rhymed Chapter Headings by Rudyard Kipling. Cloth extra, $1.50.

"The book is full of wonderful and unique charm. The fierceness and the fascination of the life of India, the splendors, the mysteries, the passions of the Orient, are depicted with a power and a skill which disarm criticism."—*Boston Courier.*

NEW EDITION, with Mrs. Humphry Ward's Open Letter to Her Publisher. 12mo, cloth, $1.00.

THE HISTORY OF DAVID GRIEVE.

By MRS. HUMPHRY WARD, author of 'Robert Elsmere,' etc., etc. Fourth edition. In one volume, 12mo, cloth, gilt, $1.00. Also the Library Edition, printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

"Mrs. Ward, with her 'Robert Elsmere' and 'David Grieve,' has established with extraordinary rapidity an enduring reputation as one who has expressed what is deepest and most real in the thought of the time. . . . They are dramas of the time vitalized by the hopes, fears, doubts, and despairing struggles after higher ideals which are swaying the minds of men and women of this generation."—*New York Tribune.*

Just Published. A New Work by Canon Bernard. 12mo, $1.50.

The Central Teaching of Christ.

Being a Study and Exposition of St. John, Chapters XIII. to XVII. inclusive. By T. D. BERNARD, Canon of Wells. 12mo, $1.50.

History of the Christian Church

A. D. 1–600. By the late Dr. WILHELM MOELLER, Professor Ordinarius of Church History in the University of Kiel. Translated from the German by Andrew Rutherfurd, B.D. 8vo, $3.75.

New Edition. 8vo, $2.75.

The Law and Custom of the Constitution.

Part I. Parliament. By Sir WILLIAM R. ANSON, Bart, D.C.L. Second edition, 8vo, $2.75.

The Theory of the State.

By J. K. BLUNTSCHLI, late Professor of Political Sciences in the University of Heidelberg. Second edition. 12mo, $3.00.

The Case Against Bimetallism.

By ROBERT GIFFEN. 12mo, $2.00.

A Companion to the Iliad for English Readers.

By WALTER LEAF, Litt.D. 12mo, $1.60.

Side Lights Upon Bible History.

By Mrs. SIDNEY BUXTON. With Illustrations. 16mo, $1.50.

Now Ready. Third Edition. 5 Vols., $20.00.

The Dialogues of Plato.

Translated into English. With Analysis and Introductions. By B. JOWETT, M.A., Master of Balliol College, Regius Professor of Greek in the University of Oxford. Third Edition. 5 vols., Revised and Corrected throughout, and to a large extent rewritten. 8vo, gilt top, $20.00.

"Here Plato talks in all his grave and playful amplitude. Here we feel his grace, his humor, his dramatic power, his fondness for the mere act of utterance, his combination of passionate Hellenism and cosmopolitanism, his luminous insight into common things, his world-scorning moralities, his suggestion everywhere of meanings deeper than he cares to express. All this Prof. Jowett has rendered. No other English translation from the Greek, except our English Bible, has brought over so fully the riches of its original."—*The Nation.*

Macmillan & Co.'s New Complete Catalogue, including the works issued by the Oxford Clarendon Press, Cambridge University Press, Messrs. George Bell & Sons, London, and Bohn's Libraries, will be sent free by mail to any address on application.

Houghton, Mifflin & Co.'s New Books.

The Eve of the French Revolution.

By EDWARD J. LOWELL. 8vo, $2.00.

Mr. Lowell gives an admirably clear and comprehensive view of one of the most important and engrossing periods of modern history.

Songs of Sunrise Lands

By CLINTON SCOLLARD. 16mo, gilt top, $1.00.

A tasteful volume of poems suggested by a journey in Egypt, Syria, and Greece, and suffused with the color of the Orient.

Sold by Booksellers. Sent, postpaid, by

Houghton, Mifflin & Co., Boston,

11 East Seventeenth Street, New York.

Economic History Since 1763.

Selections illustrating Economic History since the Seven Years' War. Compiled by BENJAMIN RAND, Ph.D. Second edition, revised and enlarged. 8vo, pp. 567, $3.00.

"Dr. Rand enables any student of the wonderful industrial changes of the last 127 years to derive from the very best authorities a thoroughly trustworthy outline of the economic and financial development."—*The Literary World.*

Charles Scribner's Sons'

NEW PUBLICATIONS.

Spanish Cities:

With Glimpses of Gibraltar and Tangiers. By CHARLES A. STODDARD, D.D. With 18 full-page illustrations. 12mo, $1.50.

Dr. Stoddard's "Across Russia" was one of the most popular volumes of travel published last fall. This year he describes the Spanish cathedrals and palaces, and their art treasures, the charmingly varied scenery of town and country, the characteristic street life, the national sports and fêtes, etc., enriching this narrative with a pleasant flavor of personal incident and adventure.

Christian Ethics.

By NEWMAN SMYTH, D.D., New Haven. International Theological Library. Crown 8vo, $2.50 *net.*

Dr. Smyth's volume aims to give a scientific and complete account of the ethics of the Christian consciousness and life. It fills a gap in English ethical literature, and is a worthy successor of Prof. Driver's "Literature of the Old Testament," the remarkably successful initial volume in this new Library.

The Duchess of Berry

and the Court of Louis XVIII. From the French of IMBERT DE SAINT-AMAND. With Portrait. 12mo, $1.25.

A new volume in the "Famous Women of the French Court" series, the first of three relating the career of the fascinating Duchess of Berry, the central figure of the Court of the Restoration from her marriage to her exile.

Dr. J. G. Holland's Two Poems.

BITTER SWEET and KATHRINA.

Cameo Edition. Each with an etched frontispiece. 16mo, gilt top, $1.25; half calf, $2.75; half levant, $3.50.

In this series there have already appeared Mr. Mitchell's "Reveries of a Bachelor" and "Dream Life," Mr. Cable's "Old Creole Days," and Mr. Page's "In Ole Virginia."

"These favorite poems shine with renewed lustre in their new dress."—*Phila. Telegraph.*

South Sea Idyls.

By Prof. CHARLES WARREN STODDARD. *Revised Edition from new plates.* 12mo, $1.50.

Mr. Howells characterizes these sketches as "the lightest, sweetest, wildest, freshest things that ever were written about the life of that summer ocean."

NEW JUVENILES.

THE CLOCKS OF RONDAINE,

And Other Stories. By FRANK R. STOCKTON. With 24 Illustrations by BLASHFIELD, ROGERS, BEARD, and others. Square 8vo, $1.50.

There are seven stories in the volume, in each of which some quaint conceit is elaborated in Mr. Stockton's inimitable style. The illustrations are numerous and beautiful.

KENT HAMPDEN.

A Story of a Boy. By REBECCA HARDING DAVIS. Illustrated by RUFUS F. ZOGBAUM. 12mo, $1.00.

An entertaining story of life in Virginia seventy years ago. Its types are racy, its spirit is American throughout, and its scenes are very real.

NEW STORIES BY G. A HENTY.

Each, crown 8vo, fully and beautifully illustrated, $1.50.

CONDEMNED AS A NIHILIST. A Story of Escape from Siberia.

IN GREEK WATERS. A Story of the Grecian War of Independence.

BERIC THE BRITON. A Story of the Roman Invasion.

"Probably the most popular writer of boys' books in England to-day is G. A. Henty."—*Boston Transcript.*

THE THIRSTY SWORD.

A Story of the Norse Invasion of Scotland (1626–65). By ROBERT LEIGHTON. Illustrated. Crown 8vo, $1.50.

THE END OF A RAINBOW.

By ROSSITER JOHNSON. Illustrated. 12mo, $1.50.

AMONG THE LAWMAKERS.

By EDMUND ALTON. Illustrated. *New and Cheaper Edition.* Square 8vo, $1.50.

*** *Sold by all booksellers, or sent, postpaid, by*

G. P. Putnam's Sons,

NEW YORK AND LONDON,

PUBLISH NEXT WEEK:

A French Ambassador at the COURT OF CHARLES II., LE COMTE DE COMINGES. From his unpublished correspondence. Edited by J. J. JUSSERAND, author of "English Wayfaring Life in the 14th Century." With 10 illustrations, 5 being photogravures. Limited letter-press edition. 8vo, cloth, $3.50.

When Mr. Pepys went home he secretly confided to his note-book his impressions of what he had seen in the day. Not less secretly did foreign ambassadors in England write to their Kings from day to day of English manners, court festivities, the British Parliament and Navy, city banquets, matters of etiquette, and, sometimes, of treaty negotiations. Both secrets now lie open; Mr. Pepys's MSS. have long been deciphered; ambassadors' correspondence now begins to be printed. In M. Jusserand's work will be found the more curious parts of the official despatches and private letters of the Comte de Cominges and his fellow-ambassadors at the English Court during the first part of the reign of Charles II. The work is embellished with portraits of all the ambassadors, viz.: Comte d'Estrades, Comte de Cominges, Marquis de Ruvigny, Duc de Verneuil, Honoré Courtin, besides Hugues de Lionne, the French Foreign Minister, the whole being taken from contemporary originals by Nanteuil and other famous engravers.

"M. Jusserand has chosen a topic peculiarly fitted to his genius, and treated it with all the advantage to be derived on the one hand from his wide knowledge of English literature and English social life, and, on the other, from his diplomatic experience and his freedom of access to the archives of the French Foreign Office. . . . It is needless to say that M. Jusserand makes admirable use of the materials thus furnished to his hand. . . . We get a new and vivid picture of his life at the Court of Charles II. . . . There is not a dull page in the book."—*London Times.*

Notes for the Nile. together with a Metrical Rendering of the Hymns of Ancient Egypt, and of the Precepts of the Ptah-Hotep (the oldest book in the world).

By Hardwicke D. Rawnsley. 12mo, $1.50.

The Coming of the Friars and OTHER MEDIÆVAL SKETCHES. New and cheaper edition. 12mo, flexible cloth, $1.25.

"A pleasant and erudite guide to some of the by-ways of English history."—*Scotsman.*

"One finds a good deal of curious information as to the customs and ways of that far-away time."—*Boston Transcript.*

Taxation and Work. By EDWARD ATKINSON, author of "The Industrial Progress of the Nation," etc. 12mo, $1.25.

The Farmers' Tariff Manual. By D. STRANGE. (Questions of the Day Series, No. 72.) 8vo, $1.25.

RECENTLY ISSUED:

The Economy of High Wages. An inquiry into the comparative methods and the cost of production in competing industries in America and in Europe. By J. SCHOENHOF, author of 'Destructive Influence of the Tariff,' etc., etc. With a Preface by the Hon. THOMAS F. BAYARD, late Secretary of State, U. S. A. $1.50.

"It is a very instructive treatise, enabling the reader to estimate how much truthfulness he may expect from the advocates of protection, and also informing him as to the actual condition of European and American artisans. Mr. Schoenhof's book is one of the means of education and enlightenment of which the American workingman should not neglect to avail himself. The political economist will perceive its value at a glance, and the legislator will study it with attention."—*Boston Herald.*

Who Pays Your Taxes? A CONSIDERATION OF THE QUESTION OF TAXATION. By DAVID A. WELLS, JULIEN T. DAVIES, THOMAS G. SHEARMAN, JOSEPH DANA MILLER, BOLTON HALL, and others. Edited by BOLTON HALL; and issued on behalf of the New York Tax-Reform Association. (Questions of the Day Series, No. 71.) With frontispiece, $1.25.

"The book abounds in statistics, and a very complete biography of the subject makes it of great value to the student. . . . A history of the movement for reform and the position of the universities and the press upon the question adds to the interest of the book. It is a very valuable addition to the 'Questions of the Day' series, and comes in very good time."—*Commercial Gazette, Cincinnati.*

VALUABLE WORKS
ON
Literature and Philosophy.

The Development of English Literature and Language.

By Prof. A. H. Welsh, A.M. Two volumes. 8vo, 1,100 pages. Price, $4.00. Twelfth Thousand now selling.

No work on English Literature ever issued from the American press has received such unqualified and almost universal commendation.

"This is a work of great ability and importance: it is a work to be trusted as a guide, to be accepted for its comprehensive views, and to be turned to for its inspiring conception of what English literature is in itself, and as an interpretation of the national life."—*Unitarian Review, Boston.*

A Digest of English and American Literature.

By Prof. Alfred H. Welsh, A.M. Large 12mo, 384 pages. Price, $1.50.

"We do not know of any other volume from which an intelligent reader can so quickly get a combined and comprehensive view of English literature and history from the time of the Roman invasion down to the present half-century."—*New York Herald.*

Hindu Literature:

OR, THE ANCIENT BOOKS OF INDIA. By Elizabeth A. Reed, member of the Philosophical Society of Great Britain. 1 vol., 12mo. Cloth, price $2.00.

"The work is preëminently adapted by its trustworthy character, its judicious selection of what is essential and attractive, and by its readable form, to enlist the sympathetic interest of the educated classes."—*Dr. Rost of the Indian Office, London, in Arnold's Literary List.*

Scandinavian Literature.

From the most ancient times to the present. By Frederick Winkel Horn and Prof. R. B. Anderson. With a bibliography of the important books in the English Language relating to the Scandinavian countries, by Thorvald Solberg. 8vo, 520 pages. $3.00.

"This is a work of great interest to scholars and literary men, likewise a most important and valuable contribution to literary history. Between its covers is comprehended the whole field of Scandinavian literature, including that of the nineteenth century."—*Publishers' Circular, London, England.*

Manual of Classical Literature.

Comprising Biographical and Critical Notices of the principal Greek and Roman authors, with illustrative extracts for popular reading. By Charles Morris. 420 pages. $1.50.

"The book presents a more complete survey of classical literature than can elsewhere be found in the same compass."—*Scotsman, Edinburgh, Scotland.*

Poetry and Philosophy of Goethe.

Edited by Marion V. Dudley. 12mo Price, $1.50.

"We are tempted to say that for an introduction to a sane comprehension of what is best in Goethe, the beginner in the study of world literature could hardly do better than to master the larger part of the contents of this book."—*The Literary World.*

A Study of Greek Philosophy.

By Ellen M. Mitchell. 1 vol., cloth. $1.25.

"I find it very satisfactory. It is a book that will do much to bring near to thoughtful minds the real fruits of Greek reflection on the great themes of nature and mind. It shows on every page evidence of scholarship in the best lines, and of real insight into the questions discussed. It adds a valuable book to the list of reference books for college study of philosophy."—*Dr. W. T. Harris, U. S. Commissioner of Education.*

The World Energy

AND ITS SELF-CONSERVATION. By William M. Bryant, author of 'Philosophy of Art,' etc. 16mo, cloth. Price, $1.50.

"It will be generally conceded that the work is one of the most able contributions to mental philosophy. No deep thinker can read it without great profit, and it ought to have a wide circulation in intelligent quarters."—*The Independent, New York.*

All of our publications are for sale by The Baker & Taylor Co., 740 Broadway, New York: Thompson, Brown & Co., Boston; The J. B. Lippincott Co., Philadelphia, or will be sent, postpaid, on receipt of price by the Publishers,

S. C. GRIGGS & CO.
262 and 264 Wabash Ave., Chicago

"Indispensable to educators and librarians, to authors and publishers, to booksellers and book-buyers, and to the intelligent reading public in general."

THE DIAL.

A SEMI-MONTHLY JOURNAL

OF LITERARY CRITICISM, DISCUSSION, AND INFORMATION.

When The Dial was established in May, 1880, it was the intention of the editor and publishers to make of it a critical review of the first rank, which should occupy in this country a field somewhat similar to that occupied in England by such papers as *The Athenæum* and *The Academy*. The success of The Dial in its attempt was instant and pronounced. During the twelve years of its publication it has received cordial commendation from the most diverse sources, American and English, and has won for itself a permanent place in the regard of the intellectually disposed portion of the public.

Encouraged by these successes, and feeling the necessity for more frequent issue and enlarged scope, in order to keep abreast of the ever increasing stream of literary production, it has been decided to issue The Dial hereafter as a semi-monthly, instead of a monthly publication. Having thus at its command twice as much space as formerly, it will be enabled both to give a more adequate treatment than heretofore to current publications, and to extend its scope by the inclusion of new, and not strictly critical, departments. The new sub-title of The Dial states its purposes as accurately as such narrow limits allow. It is "a semi-monthly journal of literary criticism, discussion, and information." Discussion of matters of current literary interest, both by editors and contributors, will hereafter be one of its prominent features, and the paper will assume a distinct voice upon questions of general intellectual concern. The lives and works of writers recently deceased will receive careful attention. A special feature of each issue will be the leading review, descriptive and extractive rather than critical, of the most important book of the fortnight, provided it lend itself to such treatment. As a journal of literary comment and information, The Dial will give the latest news about books, their writers and publishers, and other subjects of allied interest. Its regular bibliographical features will be retained, and new departments will be added from time to time as the broadening field of intellectual activity shall seem to make them desirable.

While The Dial's field is thus coextensive with the field of culture, the critical review will continue to be the principal means of its appeal to the reader. As heretofore these reviews will be the work of competent specialists, and the longer ones will bear the authority of their authors' signatures. The list of contributors includes the names of many scholars of the highest eminence, representing the universities, the professions, and the ranks of private scholarship. This list is being constantly recruited, and is one of which a journal may well be proud. The Dial stands preëminently for objective and scientific criticism; it believes in the existence of critical canons, and endeavors to discover and adhere to them. On the other hand, it endeavors to avoid that miscalled criticism of the subjective sort which displays the mood of the critic rather than the character of the work that he is handling. Yet, as the constituency of such a journal demands that the specialist reviewer shall not be too technical in his criticism, and shall combine scientific accuracy on the one hand with a readable and generally interesting treatment of his theme upon the other, this sort of treatment will continue to be, as it always has been, the prevailing note of criticism.

The Dial is in no sense provincial; neither local nor Western, it is nothing less than American. Yet the growth and prosperity of such a journal in the interior of the country is not without its significance. The rapid development of Chicago in other than material directions is a phenomenon which, although recent, is rapidly forcing itself upon the attention of the country. Chicago is in the centre of the great book-buying and book-reading section of the country, and as a point of distribution it has already gained the importance that it is certain to have before long as a point of publication also; its public collections of books are in a fair way to rival those of any other city, and its new university is about to give a marked impetus to the interests of culture. In view of these facts, it is at least not inappropriate that the name of Chicago should stand upon the title-page of The Dial.

THE DIAL is published on the 1st and 16th of each month. Terms of Subscription, *$2.00 a year in advance, postage prepaid in the United States, Canada, and Mexico; in other countries comprised in the Postal Union, 50 cents a year for extra postage must be added. Unless otherwise ordered, subscriptions will begin with the current number.* Remittances *should be by check, or by express or postal order, payable to THE DIAL.* Special Rates to Clubs *and for subscriptions with other publications will be sent on application, and* Sample Copy *on receipt of 10 cents.* Advertising Rates *furnished on application.*

Three months Trial Subscription (six numbers), **for Fifty Cents.**

First Steps in Philosophy.

(Physical and Ethical.)

By WILLIAM MACKINTIRE SALTER.

"An unpretentious but serviceable and thorough volume on the physical and ethical sides of philosophical truth. The writer, Mr. W. M. Salter, is an ethical teacher in Philadelphia, and also the author of a bright volume entitled 'Ethical Religion.' This volume presents an examination into two fundamental conceptions, matter and duty. It is the fruit of the author's own thinking, and is in some respects an outline of his ethical teaching. The work is valuable because it indicates the tendencies of the thinking of one of the clearest-headed ethical teachers and writers in the country. . . . No student of moral philosophy can afford to ignore it."—*Boston Herald.*

The Southern Empire.

By OLIVER T. MORTON. 16mo, $1.25.

This volume contains three thoughtful and vigorous essays: *The Southern Empire*, a study of the probable effect on the Western World of a successful result of the Southern rebellion; *Oxford*, a sketch of the rise of one of the Universities of the Middle Ages; and *Some Popular Objections to Civil Service Reform*, a timely paper of excellent breadth and spirit.

Sold by Booksellers. Sent, postpaid, by

Houghton, Mifflin & Co., Boston,
11 East Seventeenth Street, New York.

CHARLES L. WEBSTER & CO.
Have just published in their
FICTION, FACT, AND FANCY SERIES:

Paddles and Politics Down the Danube.

By POULTNEY BIGELOW. Companion volume to 'The German Emperor.'

"That a book of European travel written at this late day should have something new to say, that it should be at once interesting, exciting, and informing, will not be readily admitted. Nevertheless, all this can be said truthfully of Poultney Bigelow's 'Paddles and Politics Down the Danube.' . . . The readers of this book will be filled with enthusiasm about the Danube."—*Philadelphia Inquirer.*

"He has given a lively description of a canoe-voyage down an historic river, and of the quaint and picturesque phases of civilization along its banks."—*Boston Advertiser.*

Writings of Christopher Columbus.

Edited, with an Introduction, by PAUL LEICESTER FORD. With portrait frontispiece.

Mr. Ford has for the first time collected in one handy volume those letters and other documents written by Christopher Columbus, which describe his experiences in the discovery and occupation of the New World. Besides his letters to Ferdinand and Isabella and to various friends, the volume includes the Deed of Entail, Will, and so-called "Privileges" of Columbus. An excellent opportunity is thus presented for studying the beginnings of America from original sources.

Autobiographia: or, The Story of a Life.

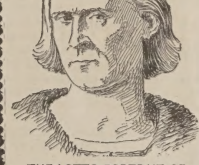
By WALT WHITMAN. With view of Whitman's home at Camden.

These selections from the bulk of the poet's prose writings have been made by Arthur Stedman, and are so arranged as to give a consecutive account of Mr. Whitman's career in the latter's own picturesque language. The 'Autobiographia' is published as a companion volume to 'Selected Poems,' and, like that book, was authorized by the poet shortly before his death.

Stamped cloth, with gilt titles, each, 75 cents.

Mailed, postpaid, on receipt of price.

CHARLES L. WEBSTER & CO.,
67 Fifth Avenue, New York City.



THE LOTTO PORTRAIT OF COLUMBUS.
Drawn from the engraved frontispiece of the October CENTURY.

This portrait is the basis of the model for the souvenir coin, authorized by the U. S. Government and to be issued by the World's Fair Commission.

Ready Saturday, October 1st.

The October Century

Contains a vigorous and timely article on

"Money in Practical Politics,"

How campaign funds are raised, how votes are bought, the work of campaign managers, etc., with many anecdotes of political "tricks" played in recent elections.

The same number contains richly illustrated articles on "What I Saw of the Paris Commune" by the famous war correspondent, Archibald Forbes; "Picturesque Plant Life of California," etc.; an account of the recently discovered Lotto portrait of Columbus; three complete stories, including "For Bravery on the Field of Battle," by Thomas Bailey Aldrich; and further contributions by Edmund Clarence Stedman, Mary E. Wilkins, Edgar Fawcett, Mary Hallock Foote, E. J. Glave, and others. Price, 35 cents.

OUR NEW BOOKS

Northanger Abbey.

By JANE AUSTEN. With Frontispiece by E. H Garrett. One volume, 16mo, half ruby morocco, gilt top, uniform with the previous volumes. $1.25.

Persuasion.

By JANE AUSTEN. With Frontispiece by E. H. Garrett. One volume, 16mo, half ruby morocco, gilt top, uniform with the previous volumes. $1.25.

EDITION DE LUXE.

On laid paper, medium 8vo, russet cloth, limited to 250 copies, at $2.00 per volume. In complete sets only.

"We allude with special touch of affection to Anne Eliot. 'Persuasion,' which was written during the last two years of Miss Austen's life, when the refining touch of Eternity was already upon her, has always seemed to us the most perfect of her novels."—*Preface to "Letters" of Jane Austen.*

Our edition of Jane Austen is completed by the publication of NORTHANGER ABBEY and PERSUASION. It is the most complete, uniform edition ever published, either in England or America. Twelve volumes, in library style, half ruby morocco, gilt top, $15.00.

Jean Ingelow's Complete Poetical Works.

With a new portrait from a recent photograph, and an engraving of her former home in Boston, England. Two volumes, 12mo, cloth, $3.00; half calf or half morocco, $7.00.

This is the only edition published in America with the author's sanction, and contains one-third more than any other edition, English or American.

The Captain of the Kittiewink.

A CAPE ANN STORY FOR BOYS. By HERBERT D. WARD, author of 'The New Senior at Andover.' Illustrated. Square 16mo, cloth. $1.25.

A story of two boys, a dog, and a skipper. A nautical knowledge is not necessary.

Under the Water-Oaks,

A SOUTHERN STORY FOR YOUNG PEOPLE. By MARIAN BREWSTER. Illustrated. Square 16mo, cloth. $1.25.

An untried field for this class of fiction—the water-oaks of Florida.

SCHERMERHORN'S TEACHERS' Agency. Oldest and best known in the U. S. Established 1855. 3 East 14th St., N. Y.

AN AGENCY is valuable in proportion to its influence. If it merely hears of vacancies and THAT is something, but if it tells you about them and is asked to recommend a teacher and recommends you, that is more. Ours RECOMMENDS
C. W. BARDEEN, Syracuse, N. Y.

Two Scholarships for Women.

The Harvard University Examinations for women will be held in New York on June 27, 29, and 30, and July 1st, 1893. Two scholarships, one of $300 and one of $200, are offered in connection with these examinations.
For information apply to the Secretary, No. 32 East 33d Street.

School Trustees, Principals, Teachers,

And others interested, are invited to consider the advantages offered by the *Nation* as an advertising medium. School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages

The *Nation*, in its special field of political and literary criticism, is unlike any other periodical, American or foreign. At least 10,000 copies are circulated weekly, but these figures do not accurately represent the number of its readers. It is taken by reading-clubs and literary associations in a large number of places, and may be found on file in every library of importance in the country. There are probably few weekly periodicals whose columns offer so favorable an opportunity for reaching an audience interested in educational matters.

Advertising rates, 15 cents a line each insertion, with the following discounts: 5 per cent. on 4 insertions, 10 per cent. on 8 insertions, 12½ per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

"PERHAPS THE GREATEST NOVEL OF DISCUSSION EVER WRITTEN."

CALMIRE.

Second Edition, Revised. 12mo, $1.50.

"Of the ability of the work, of its learning, its audacity, its subtle dialectics, and its literary charm there can be no question. It woos and delights even where it does not convince."—*Philadelphia Bulletin.*

"Through Muriel one may get nearer the heart of a well-bred and well-educated young American, with the hot blood and impetuousness of an athlete, than in any recent fiction. A remarkably fine story, which is dramatically conceived and solved sensibly."—*New York Life.*

A NEW ILLUSTRATED EDITION OF THE

NOVELS OF JANE AUSTEN.

In Ten Volumes.

Edited by R. BRIMLEY JOHNSON. With Illustrations by WILLIAM CUBIT COOKE, and Ornaments by F. C. TILNEY.

NOW READY:

Vols. 5 and 6. MANSFIELD PARK.

Vols. 1 and 2. SENSE AND SENSIBILITY. | Vols. 3 and 4. PRIDE AND PREJUDICE.

16mo, cloth, gilt top, $1.00 each. Also a limited Edition on Large Paper, $3.00 each volume.

THE NOVELS OF CHARLES DICKENS.

NEW EDITION. ILLUSTRATED. 12mo, $1.00 each.

These are in all cases accurate reprints of the texts of the first editions, and accompanied by *all* the original illustrations. There is prefixed in each volume a short introduction written by Mr. Charles Dickens, the novelist's eldest son, giving a history of the writing and publication of each book, together with other details, biographical and bibliographical, likely to be of interest to the reader.

NOW READY:

BARNABY RUDGE. MARTIN CHUZZLEWIT. NICHOLAS NICKLEBY.
OLIVER TWIST. PICKWICK PAPERS. THE OLD CURIOSITY SHOP.

THE LIFE AND LETTERS of CHARLES SAMUEL KEENE of "Punch."

By GEORGE SOMERS LAYARD. *With Portraits and over 80 Illustrations. Bound in buckram, gilt top. Royal 8vo, $8.00.*

"Among the documents for the study of future days of middle-class and of humble English life, none will be more weighty than the vivid sketches of this great humorist."—*Sir Frederick Leighton, P.R.A.*

'An altogether charming memoir, and one of the most delightful in its class, which, by the way, is not a large one.

"In carefully reproduced examples of the artist's work, the volume surpasses almost anything of its kind we have seen."—*Independent.*

NOW READY. Third Edition. 5 Vols., $20.00.

THE DIALOGUES OF PLATO.

Translated into English. With Analysis and Introductions. By B. JOWETT, M.A., Master of Balliol College, Regius Professor of Greek in the University of Oxford. Third Edition. 5 vols. Revised and Corrected throughout, and to a large extent rewritten. 8vo, gilt top, $20.00.

"Here Plato talks in all his grave and playful amplitude. Here we feel his grace, his humor, his dramatic power, his fondness for the mere act of utterance, his combination of passionate Hellenism and cosmopolitanism, his luminous insight into common things, his world scorning moralities, his suggestion everywhere of meanings deeper than he cares to express. All this Prof. Jowett has rendered. No other English translation from the Greek, except our English Bible, has brought over so fully the riches of its original."—*The Nation.*

The Genesis and Growth of Religion.

Being a Course of Lectures delivered before the Theological Seminary, Princeton, N. J. By the Rev. S. H. KELLOGG, D.D., Toronto, Canada, author of 'The Light of Asia and the Light of the World,' 'A Grammar of the Hindi Language and Dialects,' etc. 12mo, cloth.

A Want Supplied.

The WEEKLY BULLETIN is a guide in the vast field of periodical literature, an indispensable tool for scientific and literary men, for artists, inventors, mechanics, physicians, lawyers, and cultivated persons generally.

Of the making of reading matter in the periodical press—daily, weekly, monthly, quarterly, etc.—there is no end. No one can possibly examine even the smallest fraction of the quantity furnished; yet there is valuable and important matter in each of the periodicals published.

The BULLETIN is an index to all periodicals; it tells its reader what they contain, and describes the in a way to enable him to judge he is interested in any portion of t contents.

PUBLIC LIBRARY 1st FLOOR

People interested in reform subjects or discussions—social, political, ethical, or literary—will find the BULLETIN extremely useful. Everything contributed to these discussions is impartially mentioned, and, when needful, briefly described.

Here are our departments: Literature, Art, Science, Applied Science, Industry, Sociology, Ethics, Psychology, Philosophy, History, Poetry, Fiction, Anthropology and Archæology, Men and Manners, Politics, Political Economy, Law, Biography, Medicine, Hygiene, Gardening, Agriculture, Adventure, Music and Drama, Religion, Education, Travel, Description of Places, and Miscellany.

Besides these permanent divisions, the BULLETIN has a separate department for "Questions of the Day"; just at present the Presidential campaign and World's Fair are the subjects therein catalogued.

The BULLETIN catalogues no less than 1,400 different articles each week. The facsimile herewith furnished shows the method pursued.

Publishers, librarians, editors, journalists, professors, teachers, clergymen, lawyers, have endorsed and welcomed the BULLETIN. It is the capstone of journalism.

How to Secure Articles Catalogued in THE BULLETIN.

Order by number, and send the money to J. MORRISON-FULLER, 5 Somerset Street, Boston, Mass.

One article, ... 10 cents.
One article marked *, ... 20 cents.
One article marked †, ... 30 cents.

Or use his coupons for convenience in mailing, ten cents each, NINE DOLLARS PER HUNDRED. One or a dozen of these can be enclosed in envelope, and return mail will bring your weekly "magazine"—selected from hundreds—to your table.

Sample copies sent free. Apply at once.

The Nation.

Journal of Morphology. Vol. VI., No. 1.

GINN & COMPANY, PUBLISHERS,

Boston, New York, Chicago.

THE CHOLERA SCARE is over. If the public could be brought to realize the safety from the attacks of this disease that there is in Homœopathy the scare would never occur again. From official reports, covering over a million cases, we learn that the death-rate of the "regular," or Allopathic practice in this disease has been (and from present reports is) 54.8 per cent. of the cases treated. The same reports show that the death-rate in cholera under Homœopathic treatment was 8.5 per cent. Under the proper Homœopathic prophylactic treatment, the danger of contracting the disease is almost nil. We publish a little book, SAFETY IN CHOLERA TIMES (50 cents, by mail 54 cents), that gives the treatment of the disease and the preventive treatment. It is worth the money in the peace of mind it affords. BOERICKE & TAFEL, Homœopathic Publishers and Pharmacists, 1011 Arch Street, Philadelphia, Pa.

Common Words Difficult to Spell.
A practical spelling-book containing 3,500 words that experience has shown are most frequently misspelled. Dictation Exercises from Lowell, Hawthorne, Emerson, Irving, Addison, etc. Cordially endorsed by superintendents and teachers. Specimen copy, postpaid, 24 cents. JAMES H. PENNIMAN, 4322 Sansom Street, Philadelphia, Pa.

The Southern Empire.

By OLIVER T. MORTON. 16mo, $1.25.

This volume contains three thoughtful and vigorous essays: *The Southern Empire*, a study of the probable effect on the Western World of a successful result of the Southern rebellion; *Oxford*, a sketch of the rise of one of the Universities of the Middle Ages; and *Some Popular Objections to Civil Service Reform*, a timely paper of excellent breadth and spirit.

School Trustees,
Principals,
Teachers,

And others interested, are invited to consider the advantages offered by the *Nation* as an advertising medium. School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages

The *Nation*, in its special field of political and literary criticism, is unlike any other periodical, American or foreign. At least 10,000 copies are circulated weekly, but these figures do not accurately represent the number of its readers. It is taken by reading-clubs and literary associations in a large number of places, and may be found on file in every library of importance in the country. There are probably few weekly periodicals whose columns offer so favorable an opportunity for reaching an audience interested in educational matters.

Advertising rates, 15 cents a line each insertion, with the following discounts: 5 per cent. on 4 insertions, 10 per cent. on 8 insertions, 12½ per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 208 Broadway, N. Y.

Whatever Periodical

You take next year, if you are interested in literary culture or in the concerns of current literature, you will want also **THE DIAL**—a Semi-Monthly Journal of Literary Criticism, Discussion, and Information, now recognized as *the best* of its class in America. "Seriousness, care, and a right instinct in letters make THE DIAL the best review we have," says a recent critic. "Fair, fearless, and scholarly, it wields a mighty sword," says another. Therefore

Whatever Periodical

You take next year, take THE DIAL also. The regular subscription price is $2.00. But you can get it for half that amount by remembering that

Whatever Periodical

You intend subscribing for, if you will send your cash order through us, with one dollar additional, we will mail you THE DIAL one year for the extra dollar. This is for new subscribers, of course.

A sample copy of the paper, with prospectus, will be sent to any address for ten cents. Address

Charles Scribner's Sons

NEW PUBLICATIONS.

NEW ILLUSTRATED EDITION.

Marse Chan.

A Tale of Old Virginia. By THOMAS NELSON PAGE. Illustrated by W. T. SMEDLEY. Square 12mo, $1.50.

No story published in the last decade is more worthy of holiday embellishment than this masterpiece of Mr. Page's. Mr. Smedley's illustrations embody the author's ideals with a sympathetic insight into Southern character and with a delicacy of touch and refinement of feeling in the highest degree artistic.

MRS. BURNETT'S NEW BOOK.

Giovanni and the Other.

Children Who Have Made Stories. Handsomely Bound, with 9 Full-Page Illustrations by Reginald B. Birch. Uniform with "Little Lord Fauntleroy." Square 8vo, $1.50.

A personal interest attaches to the twelve stories in this book, as they relate to Mrs. Burnett's sons and to other little people whom she has known. They have the same magic charm which distinguished "Little Lord Fauntleroy," and disclose the beauty of child life with Mrs. Burnett's characteristic sympathy, pathos, and humor. Mr. Birch's illustrations portray the little heroes and heroines with charming grace.

Songs about Life, Love, and Death.

By ANNIE REEVE ALDRICH. 12mo, $1.25.

A collection of the later poems of Miss Aldrich, arranged by herself just previous to her recent death, and representing the ripest and best work from her talented pen.

Cyclopedia of Painters and Paintings.

Edited by J. D. CHAMPLIN, Jr. Critical Editor, C. C. PERKINS. *Popular Edition.* 2,000 illustrations. 4to, 4 vols., $20.00.

"No art book of the exhaustiveness of this monumental work has been attempted in this country, and this ambitious undertaking should be appreciated by those who stand in need of a comprehensive, well-arranged, and well-edited book of reference."—*N. Y. Tribune.*

Poems of Rod and Gun.

By ERNEST MCGAFFEY. With Illustrations by HERBERT E. BUTLER. Square 8vo, $1.75.

The pleasures of shooting and fishing, the delights of outdoor life, and the varied phases of nature as they appeal to the sportsman are celebrated by Mr. McGaffey in graceful and spirited verse. His text is happily supplemented by Mr. Butler's handsome illustrations.

Spanish Cities:

With Glimpses of Gibraltar and Tangiers. By CHARLES A. STODDARD, D D. With 18 full-page illustrations. 12mo, $1.50.

"Dr. Stoddard has mastered the art of writing books of travel. He fulfils the ideal of a delightful companion whose conversation has informing qualities without being tedious, and whose style has sparkle and flavor without froth."—*N. Y. Tribune.*

South Sea Idyls.

By CHARLES WARREN STODDARD. *Revised Edition from new plates.* 12mo, $1.50.

In an Introductory Note, Mr. Howells characterizes these sketches as "the lightest, sweetest, wildest, freshest things that ever were written about the life of that summer ocean."

*** *Sold by all booksellers, or sent, postpaid, by*

CHARLES SCRIBNER'S SONS,

Little, Brown & Co.'s

NEW BOOKS.

A New Illustrated Edition of Parkman's 'Oregon Trail.'

The Oregon Trail.

Sketches of Prairie and Rocky Mountain Life. By FRANCIS PARKMAN. With 77 pictures of Indian life by the celebrated artist, FREDERIC REMINGTON. 8vo, decorated covers, $4.00.

This ever popular book for young and old describes a journey among the Indian Camps and the Rockies by the eminent historian in 1847. Its vivid descriptions of a condition of country and of Indian life now passed away are made still more fascinating by Mr. Remington's striking pictures of Indian settlements, camps, implements, buffalo hunts, trappers, etc.

A New Book for Girls by Nora Perry.

A Rosebud Garden of Girls.

By NORA PERRY, author of 'Another Flock of Girls,' 'Lyrics and Legends,' etc. With 14 illustrations by F. C. GORDON. 12mo, cloth, extra, $1.50.

The Caxton Novels.

Comprising 'The Caxtons,' 'My Novel,' and 'What Will He Do with It?' 9 vols., 12mo, cloth, $13.50.

The size and general style of this new edition of Bulwer, to be complete in 40 volumes, is uniform with the publishers' edition of Dumas, so great a favorite with lovers of good books. The volumes are of handy size, yet possess clear and legible type and ample margins. The type used is new throughout, having been cut especially for this issue, which will be without question the favorite edition of this famous novelist. *Send for full Prospectus of Little, Brown & Co.'s new Library Edition.*

Parkman's Half Century of Conflict.

With 3 maps. 2 vols., 8vo, cloth, $5.00.

This new work by Francis Parkman completes his remarkable series of historical narratives, making the whole form a continuous history of the efforts of France to occupy and control the American continent. No historian of the century has received higher praise than Mr. Parkman. The complete set of his writings embraces 12 vols., 8vo, at $2.50 each.

LITTLE, BROWN & CO.,

254 Washington Street, Boston.

The Nation

VOL. LV—NO. 1425. THURSDAY, OCTOBER 20, 1892. PRICE 10 CENTS.

THE

POPULAR SCIENCE MONTHLY

FOR NOVEMBER.

Eurasia. By Sara Jeannette Duncan. A study of life among the mixed race of India, in the author's most delightful vein.

The Natural or Scientific Method in Education. (Illustrated.) By Wesley Mills, M.D. Based upon what has been discovered as to how the brain receives and assimilates impressions.

The Scientific Societies of Italy. By W. C. Cahall, M.D. A history of the organizations for scientific discovery in the land of Columbus and Galileo.

The Problems of Comparative Psychology. By Dr. Joseph Jastrow. Tells what things are being most earnestly studied to-day in the field of mental science.

OTHER ARTICLES ON

Economical Trees (illustrated); Posture and its Indications (illustrated); The Synthesis of Living Beings; The Latest Arithmetical Prodigy; Modern Nervousness and its Cure; The First German Paper-maker (illustrated); Color in Flowering Plants; Are Business Profits too Large? Reasoning Animals; Sketch of H. W. Bates (with Portrait).

50 cents a number; $5.00 a year.

D. APPLETON & CO.,

NEW YORK.

D. Appleton & Co.'s New Books.

The Story of Columbus.

By Elizabeth Eggleston Seelye; edited by Dr. Edward Eggleston. With 100 Illustrations by Allegra Eggleston. 12mo. Cloth, $1.75.

This book is the result of most extensive investigations, which have been carefully verified by the eminent historian and novelist, Dr. Eggleston. It is not too much to say that the whole world has been drawn upon for material by the author and the artist. The fruits of these investigations are presented in a popular, readable, always entertaining form. While the book contains all the results of modern inquiry offered in the bulkiest biographies, the story is here condensed and material selected with a view to an always interesting narrative. To a considerable extent the plan of both text and illustrations is like that of Eggleston's Household History of the United States. It is hardly necessary to say more regarding the fitness of this volume for a place in every American private, public, and school library.

Man and the Glacial Period

By G. Frederick Wright, D.D., LL.D., Professor in Oberlin College, author of "The Ice Age in North America," "Logic of Christian Evidences," etc. No. 69, International Scientific Series. With numerous Illustrations. 12mo. Cloth, $1.75.

Of Prof. Wright's "Ice Age in North America," the *Independent* says: "The author has seen with his own eyes the most important phenomena of the Ice Age of this continent from Maine to Alaska. In the work itself, elementary description is combined with a broad, scientific, and philosophic method, without abandoning for a moment the purely scientific character. Prof. Wright has contrived to give the whole a philosophical direction which lends interest and inspiration to it."

The Moral Instruction of Children.

By Felix Adler. A new volume in the International Education Series. 12mo. Cloth, $1.50.

This book contains the lectures delivered by Dr. Adler in the School of Applied Ethics, during its first session in 1891, at Plymouth, Mass. A few of the lectures have been condensed, but most of them are published substantially as delivered. Moral education is everywhere acknowledged to be the most important part of all education, and the publishers are glad to offer a book so full of helpful suggestions to teachers and parents.

God's Fool.

By Maarten Maartens, author of "The Sin of Joost Avelingh." 12mo. Cloth, $1.50.

"In the opinion of competent critics, 'God's Fool,' the new novel by Maarten Maartens, represents the finest development thus far of the author's powers, and its appearance in book form will enlist general attention. There can be no question regarding the high appreciation of Maarten Maartens's work by American and English readers."

ILLUSTRATED EDITION OF

An Attic Philosopher in Paris.

Or, A Peep at the World from a Garret. Being the Journal of a Happy Man. By Émile Souvestre. 8vo. Cloth, $1.50.

The great popularity of "An Attic Philosopher in Paris," by Emile Souvestre, has led the publishers to prepare this fine illustrated edition, uniform with the illustrated edition of "Colette." For this volume a large number of full-page and vignette illustrations have been made by the French artist Jean Claude, the illustrator of "Colette." A rich binding has been specially designed, and this volume, considering the fine literary quality of the text and the daintiness of the book's appearance, will, it is believed, prove one of the most popular of the autumn books.

Public Library 1892

Man and the State.

STUDIES IN APPLIED SOCIOLOGY. A Series of Seven Lectures and Discussions before the Brooklyn Ethical Association. Uniform with "Evolution in Science and Art." 12mo. Cloth, $2.00.

"The series containing these interesting studies is a valuable and efficient medium for the popularization of modern sociological thought."—*Public Opinion.*

"All are by men of unquestioned ability, whether one accepts their views or not, and form in their mass a series of able articles on economic science, a subject which has grown into popularity as of high importance, affecting every class of the community."—*N. Y. Commercial Advertiser.*

Admiral Farragut.

By Captain A. T. Mahan, U. S. N., author of "The Gulf and Inland Waters," etc. With Portrait and Maps. 12mo. Cloth, $1.25.

This is the first book in "The Great Commander Series," edited by Gen. James Grant Wilson. It represents an effort to satisfy a popular demand for a series of convenient, readable, popular, but authoritative biographies of illustrious American leaders on land and sea. The second volume will be "General Taylor," by Major-General O. O. Howard, U. S. A. Other volumes will follow shortly. Each will present a steel-plate portrait of the subject as a frontispiece, and will contain several maps.

Latest Issues in Appletons' Town and Country Library.

In Old St. Stephen's. By Jeanie Drake. 12mo. Paper, 50 cents; cloth, $1.00.

The Berkeleys and Their Neighbors. By Mollie Elliot Seawell, author of "Throckmorton," "Maid Marian, and other Stories," "Little Jarvis," etc. 12mo. Paper, 50 cents; cloth, $1.00.

Mona Maclean, Medical Student. By Graham Travers. 12mo. Paper, 50 cents; cloth, $1.00.

MACMILLAN & Co.'s NEW BOOKS.

A NEW VOLUME OF POEMS BY THE LATE LORD TENNYSON

ENTITLED

THE DEATH OF ŒNONE, AKBAR'S DREAM AND OTHER POEMS.

Uniform with 'The Foresters. Robin Hood and Maid Marian.' 16mo, cloth. *Next week.*

THE FORESTERS.

ROBIN HOOD AND MAID MARIAN. By ALFRED LORD TENNYSON. 16mo, cloth, $1.25.

"Lord Tennyson has touched the myth and tradition of Robin Hood with the magic wand of his genius and made them glow with the fire and semblance of reality."—*N. Y. Sun.*

"From beginning to end in the blank verse of the dialogues as well as in the song there are gems that every lover of the laureate will soon have by heart. There are, too, many fine descriptions of wood life. Sherwood is made real to us. Tennyson has done nothing more nearly approaching Shakespeare than the 'Foresters.'"—*Chicago Herald.*

NEW POPULAR EDITION COMPLETE IN ONE VOLUME.

THE WORKS OF ALFRED LORD TENNYSON.

Author's Edition. Complete in 1 vol. With Steel Portrait. 12mo, 842 pp., cloth, $1.75. Bound in half calf, $3.50. Half morocco, $4. Full polished morocco, $6.

History of the New World Called America.

By EDWARD JOHN PAYNE, Fellow of University College, Oxford.

Vol. I. 12mo. Cloth, $3.00.

"This work will remain one of the most important, if not the most important, on the history of the New World yet published. . . . It will delight all those who take an interest in the origins of history and of civilization; it cannot be neglected by any student of American history. It is eminently a book worth reading."—*Academy.*

"Leads the student in a novel direction. . . . The elucidation of the subject surpasses in thoroughness and clearness anything of the kind we have ever read before."—*N. Y. Times.*

"He has produced a volume of extraordinary interest, not more remarkable for its learning and force than for the extreme freshness of the point of view."—*N. Y. Times (second notice).*

MACMILLAN & Co., 112 Fourth Avenue, New York.

Three Superb Editions.

Messrs. Lovell, Coryell & Company take pleasure in announcing the early publication of the following beautiful editions of BARRIE'S greatest literary achievement, "The Little Minister," and ANNA BOWMAN DODD'S fascinating volume on the old historic province of Normandy, entitled "In and Out of Three Normandy Inns."

EDITION DE LUXE.

THE LITTLE MINISTER.

By JAMES MATTHEW BARRIE. In Two Volumes, Royal 8vo, $12.00 net.

Large paper, limited to 260 copies, signed and numbered. Printed on Van Gelder's hand-made Holland paper, especially imported for this edition, embellished with exquisite initial letters in blue and red, and illustrated with nine superb etchings and an etched frontispiece portrait of the author, printed on Imperial Japanese paper. A duplicate set of etchings, printed before letter and in bistre, are inserted in each set.

Nos. 1 to 5 are printed entirely on Imperial Japanese paper, with three sets of etchings on vellum, in three colors.

KIRRIEMUIR EDITION.

THE LITTLE MINISTER.

By JAMES MATTHEW BARRIE. In Two Volumes, post 8vo, gilt top, $6.00.

This beautiful edition, which has received its name from the birthplace of the famous novelist, has been carefully printed from new plates on laid paper, made especially for the work. The volumes are tastefully bound in vellum and gold, and contain nine superb etchings and a frontispiece portrait of the author, all of which are printed on Van Gelder's hand-made Holland paper.

HOLIDAY EDITION.

THREE NORMANDY INNS.

By ANNA BOWMAN DODD. In One Volume, 8vo, Full Gilt, $5.00. *Strictly limited to five hundred copies.*

"An enticing volume."—*Boston Literary World.*

"It is rarely that so thoroughly delightful a bit of travel and study is encountered."—*New York Tribune.*

This is an exquisite setting for a most charming volume. The text of the edition is printed in blue-black ink on extra heavy super-finished paper, while the twenty-four full-page illustrations by C. S. Reinhart and other artists are printed separately on Imperial Japanese paper, in six different tints. The superb binding of vellum and gold is preserved by a red slip-cover in the Roman style. Altogether, this edition is one that will commend itself to the judgment of those who are lovers of the beautiful in the art of bookmaking.

ALEXANDER DUMAS' WORKS.

COUNT OF MONTE CRISTO.

Two volumes, crown, 8vo, cloth, $2.00; half crushed levant, gilt top, $5.00; half calf, gilt top, $5.00.

This edition is printed from entirely new plates, in large type, on fine paper, and is handsomely bound. Each volume contains a characteristic frontispiece.

COUNT OF MONTE CRISTO.

Four volumes, fully illustrated, crown 8vo, cloth, gilt top, $4.00, half levant, gilt top, $10.00; half calf, gilt top, $10.00.

A superb edition, printed from entirely new plates, made from new type and well leaded, presenting a very handsome page. The illustrations, which are profuse, are from the famous French edition. An unique design is used in the binding.

***Send for descriptive circulars of above fine editions. New and complete catalogue may be obtained by addressing*

PUBLISH THIS WEEK:

The Story of Ancient Sicily.

Phœnician, Greek, and Roman. By E. A. FREEMAN. (No. 34 in the Story of the Nations Series.) Large 12mo, fully illustrated, cloth, $1.50; half leather, gilt top, $1.75.

This volume possesses an unique interest, in that the sheets had been passed for the press by Mr. Freeman just before his last journey—a journey to Spain. The narrative is brought down to the Roman dominion, and the last part of the book, which deals with Sicily as a Roman province, covers a period which is not considered in Mr. Freeman's monumental History of Sicily.

The Customs and Monuments

OF PREHISTORIC PEOPLES. By the MARQUIS DE NADAILLAC, author of "Prehistoric America," etc. Translated, with the permission of the author, by Nancy Bell (N. D'Anvers). Fully illustrated, 8vo, $3.00.

Notes by a Naturalist.

An Account of observations made during the voyage of H. M. S. "Challenger" round the world in the years 1872-76, under command of Capt. Sir G. S. Nares and Capt. F. T. Thomson. By H. N. MOSELEY, M.A., F.R.S., late Fellow of Exeter College, Oxford. New and revised edition, with map, portrait, and woodcuts, and a brief memoir of the author. Buckram, uncut, 8vo, $2.50.

A Manual of Physics.

Being an Introduction to the Study of Physical Science. Designed for the use of university students. By WILLIAM PEDDIE, D.Sc., F.R.S.E., Assistant to the Professor of Natural Philosophy in the University of Edinburgh. With numerous figures, $2.50.

Complete Guide to the World's

TWENTY-NINE METAL MONETARY SYSTEMS. Also to the Foreign and Colonial Exchanges of Gold, Silver, and Inconvertible Paper on the Unit of Weight System; with Aids to the Construction of the Science of Money. By JOHN HENRY NORMAN, Member of the London Chamber of Commerce. $2.25.

The Documents of the Hexateuch.

Translated and arranged in chronological order with introduction and notes. By W. E. ADDIS, M.A., of Balliol College, Oxford. Part I. The Oldest Book of Hebrew History. 8vo, uncut edges, $3.00.

Indigestion. A manual of the

diagnosis and modern treatment of the different varieties of Dyspepsia. By GEORGE HERSCHELL, M.D. Cloth, $1.50.

Prayer-Meeting Theology. A

Dialogue. By E. J. MORRIS, author of "Prejudiced Inquiries." 12mo, $1.25.

*** Notes on New Books, Volume II., No. III., and Prospectus of the Story of the Nations Series sent on application.

These covers will fit all volumes from XXXIII. to LV., *i. e.*, since the increase in size to 24 pages each issue. (For the earlier volumes we cannot furnish covers.) Address

THE NATION, BOX 794, New York.

Houghton, Mifflin & Co.'s New Books.

The Nature and Elements of Poetry.

By EDMUND CLARENCE STEDMAN, author of "Victorian Poets," "Poets of America," etc. With a Topical Analysis in the margin, and a full Analytical Index. Bound in a new and attractive style; also uniform with Mr. Stedman's other books. Crown 8vo, $1.50.

Mr. Stedman has brought to this work his maturest thought, and has given to it his utmost grace of style, so that in treatment and manner it is eminently worthy of its great theme.

David Alden's Daughter, and Other Stories of Colonial Times.

By JANE G. AUSTIN, author of "Standish of Standish," "Betty Alden," "A Nameless Nobleman," "Dr. Le Baron and His Daughters," etc. 16mo, $1.25.

A book of excellent stories, each representing some noteworthy character or incident or aspect of the Colonial times which Mrs. Austin understands and describes so well.

At the Beautiful Gate, and Other Songs of Faith.

By LUCY LARCOM. 16mo, $1.00. Full flexible morocco, $3.00.

The very essence of faith, hope, and love pervades these poems, and will render them peculiarly welcome and helpful.

Land of the Lingering Snow.

HANDSOME NEW ILLUSTRATED BOOKS.

Marse Chan. *New Illustrated Edition.*

By THOMAS NELSON PAGE. Illustrated by W. T. SMEDLEY. Square 12mo, $1.50.

Mr. Smedley's illustrations embody the author's ideals with a sympathy, a delicacy of touch, and a refinement of feeling in the highest degree artistic. In this handsome dress, Mr. Page's sweet and tender story will delight readers anew.

CHILDREN OF THE POOR. By JACOB A. RIIS. Illustrated. Square 12mo, $2 50.

A companion and supplement to Mr. Riis's well-known 'How the Other Half Lives,' and, like that work, the result of close personal observation of the social condition of the poor. It is illustrated from photographs by the author.

SPANISH CITIES. With Glimpses of Gibraltar and Tangier. By C. A. STODDARD, D.D. Illustrated. 12mo, $1.50.

"He has mastered the art of writing books of travel. He fulfils the ideal of a delightful companion whose conversation has informing qualities without being tedious and whose style has sparkle without froth."—*N. Y. Tribune.*

The Life of Michel Angelo Buonarroti.

By JOHN ADDINGTON SYMONDS. With Appendices and 50 Illustrations. Large 8vo, 2 vols., $12.50.

Mr. Symonds is recognized as the highest authority on the Renaissance, and his new book is the ripest fruit of prolonged study. It has been eagerly awaited both by scholars and the public, and will take high rank in biographical literature as a portrait of the man and as a picture of his times.

POEMS OF GUN AND ROD. By ERNEST MCGAFFEY. Illustrated by HERBERT E. BUTLER. Sq. 8vo, $1.75.

The pleasures of shooting and fishing, the delights of outdoor life, and the varied phases of nature as they appeal to the sportsman, are celebrated by Mr. McGaffey in graceful and spirited verse. His text is happily supplemented by handsome illustrations.

AFLOAT AND ASHORE ON THE MEDITERRANEAN. By LEE MERIWETHER. Fully illustrated. 12mo, $1.50.

An unconventional journey, full of novel and out-of-the-way episodes and humorous incidents. The illustrations from the author's kodak are a feature of the book.

Cyclopedia of Painters and Paintings.

Edited by J. D. CHAMPLIN, Jr. Critical Editor, C. C. PERKINS. *Popular Edition.* 2,000 illustrations. 4to, 4 vols., $20.00, *net.*

"No art book of the exhaustiveness of this monumental work has been attempted in this country, and it should be appreciated by those who need a comprehensive, well-arranged, and well-edited book of reference."—*N. Y. Tribune.*

CARRIAGES.

The early evidences indicate that the AUTUMN FASHIONS IN CARRIAGES for Private Driving comprise few departures, but those quite essential to critical tastes and students of comfort.

The popular pleasant day drives will demand the CABRIOLET, VICTORIA, and SPYDER, which are now constructed so ample and deep, with such complete protection for cool mornings and evenings, that comfort is insured. For evening and more formal uses, the BROUGHAM in its series, and the DEMI-COACH for larger families, together with the STATION ROCKAWAY for general convenience, will be paramount.

Our CABRIOLETS and VICTORIAS, as well as our BELMONT SPYDER, have been received with the highest commendations, and those, together with our BROUGHAMS, EXTENSION BROUGHAMS, DEMI-COACHES, and other designs for Autumn, including the BOSTON STATION ROCKAWAY, especially intended for use in connection with either of these for less formal needs, are the productions of the best skilled labor employed by the day, and embrace superior qualities of construction, together with many new features of excellence. Commands in anticipation will be executed to meet individual preferences.

Bright's Disease and Kidney Complaints give way to BUFFALO LITHIA WATER.

Do you need a magazine for the children?

JOHN G. WHITTIER *wrote: "It is little to say of ST. NICHOLAS that it is the best child's periodical in the world."*

Try the November "ST. NICHOLAS."

It begins a new volume and contains

First chapters of a new serial story for girls, "Polly Oliver's Problem," by Kate Douglas Wiggin, author of "Timothy's Quest," etc. Illustrated.

First chapters of a new serial story for boys, "The White Cave," by W. O. Stoddard. A story of life in Australia. Illustrated.

An exquisite three-page poem by John G. Whittier,—describing the visit of a party of young girls to the poet's home.

"A Young Marsh-hawk," an out-of-door paper by John Burroughs. Illustrated.

"Uncle Jack's Great Run," by Tudor Jenks. Illustrated.

"Inanimate Things Animated." The first of a new series of funny pictures.

"The Siren," a sea-story by Henry Bacon. Illustrated.

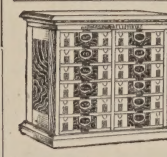
"Winter at the Zoo." With eighteen illustrations of animals.

"From Reveille to Taps." About soldiers. Illustrated.

These are only a few of the good things in this beautiful number of ST. NICHOLAS. There are poems by Harriet Prescott Spofford, Margaret Johnson and others, a capital fairy story, several stories of adventure, instruction in "Our Neighbor John," etc., etc.

This is the time to begin subscriptions to ST. NICHOLAS. November opens the new volume. Buy it on the news-stands (25 cents), or send $3.00 and subscribe for a year. December will be a beautiful Christmas number. Address THE CENTURY CO., 33 East 17th Street, New York.

HOW TO FILE LETTERS



If you are in business, whether wholesale, retail, or manufacturing, or if you are a professional man, you receive letters, bills, and other office papers which have to be filed. It goes without saying that you have suffered more or less inconvenience in finding a paper when wanted. The simple system used in the

Amberg Cabinet Letter File

Enables you to place your hand upon the letter wanted at once, whether it is a day, week, or many years old.

THE REFERENCE IS INSTANT.

To responsible parties, we send a Cabinet on sixty days' approval.

Send for an Illustrated Catalogue and Price List.

NEW BOOKS.

BY MRS. L. T. MEADE.

The Medicine Lady.

A Novel. By L. T. MEADE, author of "Out of the Fashion," "Polly, a New Fashioned Girl," etc. 1 vol., 12mo, cloth, $1.00.

Mrs. Meade has opened a fresh mine in this story, not less delightful than the old.

BY REV. C. F. DEEMS, D.D.

My Septuagint.

By CHARLES F. DEEMS, D.D., Pastor of the Church of the Strangers, and President of the American Institute of Christian Philosophy. 1 vol., 12mo, white cloth, extra, gilt top, $1.00.

A beautiful volume, containing essays, stories, poems, and other articles from the pen of its distinguished author, who says in the Introduction: "The name of this book probably suggested itself to my mind because what it contains has been written since the LXX. anniversary of my birthday."

BY MRS. ALEXANDER.

The Snare of the Fowler.

By Mrs. ALEXANDER, author of "The Wooing O't," "Which Shall it Be?" etc., etc. 1 vol., 12mo, extra cloth, $1.00.

Well worthy to rank with her earlier masterpiece, "The Wooing O't."

BY HESBA STRETTON.

Half Brothers.

A Novel. By HESBA STRETTON, author of "Bede's Charity," "Hester Morley's Promise," "Jessica's First Prayer," etc. 1 vol., 12mo, cloth, $1.00.

BY FRANK POPE HUMPHREY.

A New England Cactus.

And Other Tales. By FRANK POPE HUMPHREY. *The Unknown Library.* 1 vol., 16mo, cloth, unique binding, 50 cents.

BY FRANK BARRETT.

Out of the Jaws of Death.

By FRANK BARRETT, author of "The Admirable Lady Biddy Fane," etc. 12mo, cloth, $1.00.

"His masterpiece thus far."—*Boston Daily Traveller.*
"One of those novels which it is nowadays refreshing to lay one's hands on."—*Chicago Times.*

The Diplomatic Reminiscences

Of Lord Augustus Loftus, P.C., G.C.B. 1837-1862. In 2 vols., with portrait, 8vo, extra cloth, $6.00.

THE GREATEST BOOK OF THE YEAR.

"Without a peer in the realms of fiction to-day."—*Buffalo Commercial.*

FOR SALE BY ALL BOOKSELLERS.

Cassell Publishing Company

104 and 106 Fourth Avenue, N. Y.

SCRIBNER'S NEW BOOKS.

Streets of the World.

Fully illustrated. Large 8vo, $4.00.

BROADWAY, by Richard Harding Davis—PICCADILLY, by Andrew Lang—THE BOULEVARDS, by Francisque Sarcey—UNTER DEN LINDEN, by Paul Lindau—THE CORSO OF ROME, by W. W. Story—THE GRAND CANAL, by Henry James—THE NEVSKY PROSPÈKT, by Isabel F. Hapgood.

This volume is a thoroughly international one. The streets are chosen because each is full of that peculiar life, color, and action which constitute the distinguishing charm of the cities themselves. The illustrations are numerous and handsome, and represent the best work of eminent artists and engravers.

The Children of the Poor.

By JACOB A. RIIS. Illustrated. Square 12mo, $2.50.

A companion and supplement to Mr. Riis's well-known "How the Other Half Lives," and, like that work, the result of close personal observation of the social condition of the poor. It is illustrated from photographs by the author.

Plays by Henley and Stevenson.

Three Plays by W. E. HENLEY and R. L. STEVENSON. Printed on special hand-made paper, rough edges. 12mo. $2.00 *net.*

The three plays in this volume, "Deacon Brodie," "Beau Austin," and "Admiral Guinea," have the distinction of being literature as well as drama, and as such will interest all admirers of these two well-known authors.

The Battles of Frederick the Great.

Abstracted from Thomas Carlyle's Biography of Frederick the Great. Edited by CYRIL RANSOME. With Maps and Illustrations. 12mo. $1.50.

Alcuin,

And the Rise of the Christian Schools. By ANDREW F. WEST, Ph.D., Professor of Latin and Pedagogics in Princeton University. 12mo, $1.00 *net.*

This new volume in The Great Educators Series reviews the life, teachings, and influence of the great Yorkshire scholar, who was the first to lay the foundation for a system of popular education.

Theological Propaedeutic.

An Introduction to the Study of Theology. Part I. By PHILIP SCHAFF, D.D., LL.D. 8vo, $1.50 *net.*

This treatise is a general introduction to the scientific study of the Christian Religion, in its origin, progress, and present condition. It is the first original book on the subject in America.

Marse Chan.

A Tale of Old Virginia. New Illustrated Edition. By THOMAS NELSON PAGE. Illustrated by W. T. SMEDLEY. Square 12mo, $1.50.

"Brought out in superb holiday form. Mr. Smedley has caught precisely the spirit of the text, and the delicacy and truth of his touch have been well brought out."—*Boston Beacon.*

The Life of Michel Angelo Buonarroti:

By JOHN ADDINGTON SYMONDS. With appendices and 50 handsome illustrations. Large 8vo, 2 vols., $12.50.

Mr. Symonds is recognized as the highest authority on the Renaissance, and his new book is the ripest fruit of prolonged study. It will take high rank in biographical literature as a portrait of the man and as a picture of his times.

Afloat and Ashore on the Mediterranean.

By LEE MERIWETHER. With 24 full-page illustrations. 12mo, $1.50.

An unconventional journey, full of novel and humorous incidents. The illustrations from the author's kodak are a feature of the book.

The Duchess of Berry

and the Court of Charles X. From the French of ISBERT DE SAINT-AMAND. With portrait. 12mo, $1.25.

The second of the three fascinating volumes relating to the career of the celebrated Duchess of Berry, and one of the most entertaining volumes on the Famous Women of the French Court.

Poems of Rod and Gun.

By ERNEST MCGAFFEY. With illustrations by HERBERT E. BUTLER. Square 8vo, $1.75.

"The sportsmen will delight in these lyrics. The illustrations are spirited and artistic."—*Philadelphia Record.*

JUST READY.

German Lessons. By CHARLES HARRIS, Oberlin College.

This book is intended to give such knowledge of forms as will adequately prepare the student to read ordinary German. It is expected to lead up to the advanced grammar on the one hand and to the study of prose composition on the other. As soon as possible the pupil is brought face to face with the language itself. 178 pages. Cloth, 60 cents. Liberal terms for introduction.
D. C. HEATH & CO., Publishers, Boston, New York, and Chicago.

THE DIAL.

A Semi-Monthly Journal of Literary Criticism, Discussion, and Information.

"THE BEST REVIEW WE HAVE."

[From THE INDEPENDENT, New York.]

"THE DIAL is the leading literary journal of the West (if Chicago will pardon the use of this enforced and antiquated nomenclature), but it is more than that. In the first place, it is made up with perfect taste; size, paper, and print are delightful. Then, its matter is really critical and careful, all the leading articles being signed. But its chief merit is its serious appreciation of current literature, expressed without favor. Seriousness, fearless care, and a right instinct in letters, help to make THE DIAL the best review we have."

[From THE NATION, New York.]

"THE DIAL makes the interesting announcement in its issue for September 1, that hereafter it will be published semi-monthly instead of monthly, and will take on several new features, without ceasing to be a purely literary journal—a 'journal of literary criticism, discussion, and information.' . . . One of its articles is upon the Chicago University, and there can be no doubt that the editor of THE DIAL will find himself greatly strengthened by the accession to the city of the scholars whom President Harper is calling about him. . . . THE DIAL has been well conducted from the start, with a serious purpose, and with much learned and intelligent collaboration, and we have had frequent occasion to praise it and to wish it a long life."

THE DIAL'S staff of contributors includes Presidents or Professors of *thirty leading American colleges and universities*, including Harvard, Yale, Princeton, Cornell, Johns Hopkins, Michigan, Leland Stanford, University of Chicago, and others.

The Dial's Special Offer.

To enable new readers to become easily and cheaply acquainted with the paper, it will be sent

Two Months for Twenty-five Cents.

(Viz., from November 1 to December 16, inclusive *—four numbers—postpaid.*)

[From Mr. EDMUND W. GOSSE, London.]

"THE DIAL *seems to me to preserve a higher critical standard, as regards literature, than any other American journal with which I happen to be acquainted.*"

THE DIAL is published on the 1st and 16th of each month, at $2 a year, postpaid. Send 25 cents for a Two Months' *Trial Subscription*, including a Miniature Edition of the paper, containing a sketch of its history and a full list of its hundred and fifty contributors. Address

Diabetes has been cured by BUFFALO LITHIA WATER without other treatment —*Advt.*

Houghton, Mifflin & Co.'s New Books.

A Wonder-Book for Girls and Boys.

By NATHANIEL HAWTHORNE.

Splendidly illustrated by

WALTER CRANE,

with twenty full-page Pictures in colors, and about forty headpieces, tailpieces, and initials, also in colors. Beautifully printed and bound, in all respects one of the most artistic and attractive Holiday Books ever produced in America. 8vo, $3.00.

Dorothy Q,

A Ballad of the Boston Tea-Party, and Grandmother's Story of Bunker Hill Battle.

By OLIVER WENDELL HOLMES.

Three of Dr. Holmes's most popular poems, beautifully illustrated with a Portrait of Dorothy Q., and with many Pictures, decorative borders, and head and tailpieces, by HOWARD PYLE. Exquisitely bound from designs by Mrs. WHITMAN. $1.50.

In the Levant.

By CHARLES DUDLEY WARNER. Holiday Edition, from new plates, with a new steel portrait of Mr. Warner and about twenty-five full-page photogravures of Eastern subjects, and decorative headpieces and initials. Attractively bound, with a cloth slip cover. 2 vols. 12mo, $5.00.

Winterborough.

A Novel by ELIZA ORNE WHITE, author of "Miss Brooks" and "A Browning Courtship." 16mo, $1.25.

A fresh story of New Hampshire scenes and character. The story is attractive, the conversations are very bright, and readers will find the novel unusually interesting.

Cæsar.

A History of the Art of War among the Romans from the Era of Marius to the Fall of the Roman Empire, with a detailed account of the Campaigns of Caius Julius Cæsar. By THEODORE A. DODGE, Colonel U. S. Army. With a Portrait Bust of Cæsar, 250 Maps, Charts, and other Illustrations. 1 vol. 8vo, gilt top, $5.00.

This book is of the same high character as Colonel Dodge's "Alexander" and "Hannibal." It is based on thorough knowledge of the scenes of Cæsar's campaigns, and of all the authorities, ancient and modern.

Dante's New Life. (Vita Nuova.)

*** Notes on New Books, Volume II., No. III., and Prospectus of the Story of the Nations Series sent on application.

TO AUTHORS.

THE DIAL PRESS, CHICAGO,

Is prepared to undertake the publication of Authors' Editions or Private Editions of meritorious works in any department of literature. The services rendered will include the critical revision of MSS. to prepare them for publication, the editorial supervision of works passing through the press, tasteful and correct typography, and the competent oversight of all details necessary to the production of a complete and well-made book; also, the distribution of copies to the press and elsewhere as desired. An extended experience in all the practical details of book-production, both on the literary and the mechanical sides, justifies the guarantee of satisfactory results to all in need of such services. The typography of THE DIAL—spoken of by the San Francisco *Argonaut* as "the *journal de luxe* among American literary periodicals"—is an example in one direction of the work done at this establishment.

Terms will be given on application. Address

THE DIAL PRESS,

24 Adams St., Chicago.

Foreign Books. Subscription to foreign periodicals, Tauchnitz British Authors. Catalogues on application. CARL SCHOENHOF, 144 Tremont St., Boston.

A Question of Veracity.

The Dr. Jaeger's Sanitary Woollen System Co. declare in their advertisements that the famous fabrics known as the Jaeger underwear can be purchased in this city at their stores only. A house on 14th Street advertises that:

"Genuine Jaeger Underwear can be purchased from Le Boutillier Bros., 14th St., at prices ranging from 20 per cent. to 40 per cent. less than it can be obtained elsewhere."

This makes the question of veracity interesting to the public, since it brings it home to their health and their pockets.

Both these statements cannot be true.

There is a falsehood somewhere.

Where?

The Jaeger Co. back their statement with the following extract from a certificate of Dr. Jaeger, the originator of the Jaeger goods:

"I have assigned to Dr. Jaeger's Sanitary Woollen System Company, . . . New York, the sole right in the United States and Territories, of the use of my name . . . patents, trademarks, etc, and the sole right to sell in the United States and Territories all articles of Clothing, Bedding, etc., in connection with my Sanitary Woollen System, and stamped with the trademarks. (Signed) PROF. DR. G. JAEGER."

The only thing we have seen offered in support of the counter statement is a kind of voucher for the "reputation" of said house on 14th St. by a wholesale importer whose goods have been sold by said house on 14th St., for "pure wool" and "genuine Jaeger underwear," which goods, **upon analysis, proved to be about 40 per cent. cotton.**

The public can "compare" the "facts" and judge for themselves.

DR. JAEGER'S SANITARY WOOLLEN SYSTEM COMPANY,

829 Broadway, near 12th Street, and 153 Broadway, near Cortlandt Street, New York.

The Nation

VOL. LV—NO. 1428. THURSDAY, NOVEMBER 10, 1892. PRICE 10 CENTS.

1607 THE LIBRARY OF AMERICAN LITERATURE 1892

COMPILED AND EDITED BY

EDMUND CLARENCE STEDMAN and ELLEN MACKAY HUTCHINSON,

Alone contains more carefully chosen, ably edited, and artistically arranged

ADVENTURES, ANECDOTES, BALLADS, BIOGRAPHIES, CHARACTER SKETCHES, CORRESPONDENCE, CRITICISM, DRAMAS, ESSAYS, FICTIONS, HISTORIES, HUMOROUS ARTICLES, NARRATIVES, NOTED SAYINGS, ORATIONS, POEMS, POLITICS, THEOLOGY, TRAVELS, WARS, WITCHCRAFTS, AND WONDERS,

than were ever before gathered within the same space or offered in one collection. Among those best competent to testify, the following have made constant use of these volumes, and highly recommend them:

Ex-President Noah Porter, Yale University,
W. T. Harris, LL.D., United States Com. of Education,
John Greenleaf Whittier,
Professor John Fiske, Harvard University,
A. R. Spofford, Librarian of Congress,
William Dean Howells,
Bishop John H. Vincent, D.D., LL.D., Chancellor of Chautauqua University,
James Whitcomb Riley,
William E. Sheldon, Ex-Pres. National Teachers' Ass'n,
Robert C. Winthrop,
Richard Malcolm Johnston,
Oliver Wendell Holmes,
Hon. Robert G. Ingersoll,
Hon. George William Curtis,
Robert A. Pinkerton,
Richard Watson Gilder,
Amos M. Kellogg, Editor *N. Y. School Journal*,
Andrew Carnegie,
Gen. Fitz Hugh Lee,
Mrs. J. E. B. Stuart,
Mrs. Roscoe Conkling,
Hon. C. A. Dana,
Bishop Phillips Brooks,
Cardinal Gibbons,
Archbishop Corrigan,
Archbishop Ryan,
Chauncey M. Depew,
Hon. Henry Watterson,
Col. T. Wentworth Higginson,
The London Times,
The Century Magazine,
Joel Chandler Harris,
Hon. Whitelaw Reid,
Professor David Swing,
Cornelius Vanderbilt,
Richard Henry Stoddard,
George Cary Eggleston,
Mrs. John A. Logan,
Charles L. Tiffany, Merchant,
B. O. Flower, Editor *Arena*.

And thousands of others who are well known.

The Stedman-Hutchinson Library of American Literature is indispensable to busy persons whose time is limited; to children whose tastes are to be formed; to those who use books for entertainment and instruction, and to all who wish to know anything about books or authors, or who wish to improve their own conversation and writings. It will cost you nothing to ask the next book-agent you meet to bring you this LIBRARY. He will be glad to bring it. In the mean time write to

WATER CLOSETS

A noisy one is an abomination; a quiet one, if it is sanitarily secure, is a comfort. Get the best.
WILLIAM S. COOPER BRASS WORKS, PHILADELPHIA.

FOR ALL INTERESTED IN POETRY.

Sidney's Defense of Poesy. Edited by Prof. ALBERT S. COOK of Yale University. xlv+103 pages. 90 cents.

As a classic text-book of literary æsthetics, Sidney's *Apologie for Poetrie* has enduring value and interest for every student of language and poetics.

Shelley's Defense of Poetry. Edited by Professor COOK. xxvi+86 pages. 60 cents.

Shelley's *Defense* may be regarded as a companion piece to that of Sidney, and a comparison of the two essays is of the greatest interest to students of historical English style. *The Four Ages of Poetry*, by Thomas Peacock, is contained also in this volume.

Cardinal Newman's Essay on Poetry. With reference to Aristotle's Poetics. Edited by Professor COOK. x+36 pages. 35 cents.

This *Essay* is valuable, not only as a notable example of the literary work of one who has been considered the greatest master of style in this generation, but also for the author's presentation of Aristotle's ideas.

The Art of Poetry. The Poetical Treatises of Horace, Vida, and Boileau, with the translations by Howes, Pitt, and Soame. Edited by Professor COOK. 214 pages. $1.25.

This volume contains the Latin, Italian, and French originals, with the standard English metrical translations. A full index and a topical analysis of the three-fold work greatly enhancs its value.

Addison's Criticisms on Paradise Lost. Edited by Professor COOK. xxiv+200 pages. $1.10.

The text of this edition is based upon the literal reproductions of Arber and Morley, and, allowing for the modernization of spelling and punctuation, is believed to be more correct than any published in this century.

A Primer of English Verse. By Professor HIRAM CORSON of Cornell University. 232 pages. $1.10.

The leading purpose of this volume is to introduce the reader to the æsthetic and organic character of English verse—to cultivate his susceptibility to verse as an inseparable part of poetic expression.

A Hand-Book of Poetics. By FRANCIS B. GUMMERE, Professor of English Literature in Haverford College. x+250 pages. $1.10.

The book has three divisions—Subject-Matter, Style, Metre. Each is treated from two points of view—the historical, tracing the growth of different kinds of subject, of expression or of rhythm; and the theoretical, stating clearly the principles and laws of the matter discussed.

Characteristics of the English Poets, from Chaucer to Shirley. By WILLIAM MINTO. $1.65.

CHAUCER'S HOUSE OF FAME. Edited by Professor T. R. LOUNSBURY, Yale University. (*In preparation.*)

OLD ENGLISH BALLADS. Edited by Professor F. B. GUMMERE of Haverford College. (*In preparation.*)

ENGLISH POETS OF THE 17TH CENTURY, FROM DONNE TO DRYDEN. Edited by Professor L. B. R. BRIGGS of Harvard University. (*In preparation.*)

Any of the above books sent, postpaid, on receipt of price.

LIPPINCOTT'S
NEW BOOKS.

Handy-Book of Literary Curiosities.
By WILLIAM S. WALSH, author of 'Literary Life.' Small 8vo. Uniform with Reader's Hand-Book. Half morocco, $3.50; three-quarters calf, $5 00.

A collection of the bric-a-brac of literature, literary forgeries, hoaxes, jests, enigmas, conundrums, paradoxes, etc., exploited; proverbs, sayings, slang phrases, and familiar lines correlated and traced to their source; plagiarisms, analogies, and coincidences detected; the whole forming a complete encyclopædia of all that is most amusing and entertaining in the ana of the past and present, and an indispensable reference-book of curious, quaint, and out-of-the-way information that has never before been collected in book form.

Gleams and Echoes.
By A. R. G., author of 'Night Etchings,' etc. Illustrated from drawings by Turner, Jones, Schell, Clinedinst, Dielman, and Lippincott, engraved by Anderson, Reed, and Williams. Cloth, gilt top, $2.00; full silk, $3.00.

Atlina, the Queen of the Floating Isle.
By M. B. M. TOLAND, author of 'Eudora,' 'Legend Laymone,' 'Tisáyac of the Yosemite,' etc. Illustrated by full-page photogravure reproductions of drawings by Bloomer, Weir, Church, Dielman, Jones, Jaccaci, Denman, Du Mond, and Twachtman, and numerous decorative designs throughout the text by A. F. Jaccaci. Cloth, gilt, $2.50.

Practice in Parsing
AND ANALYSIS. By HELEN ARNOLD, A.B. 12mo. Cloth, 40 cents.

FICTION.

Barbara Dering.
A Sequel to '*The Quick or the Dead.*' By AMÉLIE RIVES. 12mo. Cloth, $1.25.

My Flirtations.
By MARGARET WYNMAN. Illustrated by J. Bernard Partridge.

One of the most fetching books of the year is this frank and amusing recital of the successive loves of a young London girl. Her suitors are many and various, and Mr. Partridge has hit them off as characteristically in his sketches as Miss Wynman has in her clever and satirical prose.

A Sister's Sin.
By Mrs. H. LOVETT CAMERON, author of 'Jack's Secret,' 'A Daughter's Heart,' etc. Published by arrangement with the author, and copyrighted in *Lippincott's Series of Select Novels.* 12mo. Paper, 50 cents; cloth, $1.00.

For sale by all Booksellers, or will be sent by the Publishers, free of expense, on receipt of the price.

J. B. LIPPINCOTT CO.,
715 and 717 Market St., Philadelphia.

The Nation

VOL. LV—NO. 1429. THURSDAY, NOVEMBER 17, 1892. PRICE 10 CENTS.

D. APPLETON & CO.'S NEW BOOKS.

ILLUSTRATED EDITION OF

An Attic Philosopher in Paris.

OR, A PEEP AT THE WORLD FROM A GARRET. Being the Journal of a Happy Man. By ÉMILE SOUVESTRE. 8vo. Cloth, $1.50.

The great popularity of 'An Attic Philosopher in Paris' has led the publishers to prepare this fine illustrated edition, uniform with the illustrated edition of 'Colette.' For this volume a large number of full-page and vignette illustrations have been made by the French artist, Jean Claude, the illustrator of 'Colette.' A rich binding has been specially designed, and this volume, considering the fine literary quality of the text and the daintiness of the book's appearance, will, it is believed, prove one of the most popular of the autumn books.

Abraham Lincoln: The True Story of a Great Life.

By WILLIAM H. HERNDON and JESSE W. WEIK. With numerous Illustrations. New and revised edition, with an Introduction by HORACE WHITE. In two volumes. 12mo. Cloth, $3.00.

This is probably the most intimate life of Lincoln ever written. The book, by Lincoln's law partner, William H. Herndon, and his friend Jesse W. Weik, shows us Lincoln the man. It is a true picture of his surroundings and influences and acts. It is not an attempt to construct a political history, with Lincoln often in the background, nor is it an effort to apotheosize the American who stands first in our history next to Washington. The writers knew Lincoln intimately. Their book is the result of unreserved association. There is no attempt to portray the man as other than he really was, and on this account their frank testimony must be accepted, and their biography must take permanent rank as the best and most illuminating study of Lincoln's character and personality. Their story, simply told, relieved by characteristic anecdotes, and vivid with local color, will be found a fascinating work.

Warriors of the Crescent.

By the late W. H. DAVENPORT ADAMS, author of "Battle Stories from English History," etc. 12mo. Cloth, $1.50.

This story of Oriental magnificence, of glittering campaigns, fatalistic heroism, and the pillage of the marvellous riches of India by the Sultans of Ghazni and their followers, comes to the reader like new tales of the Arabian Nights. Here we may read the exploits of Mahmud, Timur the Tartar, and the Great Moguls. It is a splendid but little known chapter of history, and Mr. Adams's graphic, vivid style clothes history with the garb of romance. Many who reach the dazzling records of Shah Jahan, The True Star of the Faith, or Auranyzib, the Conqueror of the Universe, will find a new world opened to them in these pictures of magnificent Oriental despotism.

Outlines of Psychology.

By JAMES SULLY, A.M., LL.D., author of "Illusions," "The Human Mind," etc. New edition, revised and largely rewritten. 8vo. Cloth, $2.50.

Admiral Farragut.

By Captain A. T. MAHAN, U. S. N., author of "The Gulf and Inland Waters," etc. With Portrait and Maps. The first volume in "The Great Commander Series," edited by Gen. James Grant Wilson. 12mo. Cloth, $1.25.

"That Captain Mahan has well and faithfully performed his task there can be no doubt. As a treatise upon the evolution of naval science the book commends itself most highly."—*Philadelphia Times.*

"No one could be better fitted than Captain Mahan for writing the biography of our great Admiral. He has been constrained by the limitations of the series from making a large work, but his portrait of Farragut stands out clear, and we rise from reading his book with a renewed sense of admiration for the bravery, the skill, and the persistence of the hero, and for his noble qualities as a man, a husband, and a citizen."—*Phila. Evening Bulletin.*

Mrs. Bligh.

A Novel. By RHODA BROUGHTON, author of "Good-bye, Sweetheart," "Nancy," etc. No. 105, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

A new and charming story by an always popular novelist.

Mona Maclean, Medical Student.

By GRAHAM TRAVERS. No. 104, Town and Country Library. 12mo. Paper, 50 cents, cloth, $1.00.

This is a story with a romantic plot and entertaining characters, and not simply a "novel with a purpose." It is believed to be the first novel to treat of the medical education of women from a woman's point of view.

NEW ONE-VOLUME EDITION OF

An Englishman in Paris.

Notes and Recollections. Two volumes in one. 12mo. Cloth, $2.00.

"The reader of this volume will not marvel more at the unfailing interest of each page than at the extraordinary collection of eminent persons whom the author all his life knew intimately and met frequently. A list would range from Dumas the elder to David the sculptor, from Rachel to Balzac, from Louis Napoleon to Eugène Delacroix, from Louis Philippe to the Princess Demidoff, and from Lola Montez to that other celebrated woman, Alphonsine Plessis, who was the original of the younger Dumas's 'Dame aux Camellias.' He knew these persons as no other Englishman could have known them, and he writes about them with a charm that has all the attraction of the most pleasing conversation. . . ."—*New York Times.*

God's Fool.

By MAARTEN MAARTENS, author of "The Sin of Joost Avelingh." 12mo. Cloth, $1.50.

"Maarten Maartens has secured a firm footing in the eddies of current literature. His peculiarity of being able to present Dutch stories without the medium of translation (which perforce robs a tale of flavor) gives him uncommon advantages. Pathos deepens into tragedy in the thrilling story of 'God's Fool,' as powerful a piece of work as 'The Sin of Joost Avelingh.' Men and manners in the Netherlands are here painted with as careful a brush as any plied by the Dutch artists of long ago."—*Phila. Ledger.*

NEW JUVENILE BOOKS.

Englishman's Haven.

By W. J. GORDON, author of "The Captain-General," etc. With 8 full-page Illustrations. 12mo. Cloth, $1.50.

The romantic story of a boy's adventures among the Indians and French of Cape Breton, and his exploits when the Americans, and afterward the English, captured the stronghold of Louisbourg. A thrilling tale of our colonial times.

The Battle of New York.

By WILLIAM O. STODDARD, author of "Little Smoke," "Crowded out o' Crofield," etc. With 11 Illustrations and colored Frontispiece. 12mo. Cloth, $1.50.

This popular author presents an extraordinary page of our history, which is unfamiliar to readers of the younger generation. He tells what two boys saw and experienced during the great draft riots in New York. Side by side with these scenes there are some vivid descriptions of a boy's adventures at the battle of Gettysburg.

Along the Florida Reef.

By CHARLES F. HOLDER, joint author of "Elements of Zoölogy." With 71 Illustrations. 12mo. Cloth, $1.50.

A story of camping and fishing adventures in company with a naturalist in Florida. The author combines entertainment and instruction, and his book is filled with illustrations which will be prized by every young reader who has ever visited the seashore, or cares for information regarding fishes, shells, and the various forms of marine life.

In the Boyhood of Lincoln.

A Story of the Tunker Schoolmaster and the Times of Black Hawk. By HEZEKIAH BUTTERWORTH, author of "The Zigzag Books," "The Log Schoolhouse on the Columbia," etc. With 12 full-page Illustrations and colored Frontispiece. 12mo. Cloth, $1.50.

Mr. Butterworth describes the boyhood of Abraham Lincoln and the strange life of the early days in the middle West. No boy or girl who wishes to understand the earlier life of one of the greatest of Americans can ignore this book—a romance founded upon fact.

Hermine's Triumphs.

A Story for Girls and Boys. By MADAME COLOMB. With 100 Illustrations. 8vo. Cloth, $1.50.

The popularity of this charming story of French home life, which has passed through many editions in Paris, has been earned by the sustained interest of the narrative, the sympathetic presentation of character, and the wholesomeness of the lessons which are suggested. One of the most delightful books for girls published in recent years. It is bound uniformly with "Straight On."

AUSTIN'S

GENEALOGICAL DICTIONARY

OF

RHODE ISLAND.

This work includes the early generations of settlers who came before 1690, embracing 466 distinct family names, over 11,000 individuals, dates of births, marriage, and death, abstracts of more than 1,100 wills, etc, and various items of interest in the lives of the early inhabitants. Not only Rhode Islanders and their descendants in every State in the Union, but the general reader will find much to interest in its pages. We quote a few brief extracts from the many reviews of this work:

"In a summary way we get a picture of early New England Life." "The critic feels like multiplying words in order to seem to do justice to so great and so successful a labor as this."—*N. Y. Nation.*

"This Dictionary is indispensable to all who would study for themselves the inner history of Rhode Island."—*Providence Daily Journal.*

"The people whose names are inscribed in its pages are scattered through every habitable part of the United States." "The time has come when intelligent men and women wish to know something about themselves and their ancestry."—*Magazine of American History.*

REDUCED FROM $10.00 TO $5 00 PER COPY.

A Famous Battery and Its Campaigns, 1861–'64.

By James E. Smith, Late Captain 4th Independent Battery, New York Volunteer Light Artillery.

A new book about a battery which distinguished itself in many hard fought battles, and won glory and renown in the great Gettysburg conflict, where it held the crest of Devil's Den for three long hours against the flower of Lee's army. The history of this battery, from the Peninsula to Gettysburg, is the history of the war in the East, and it is told modestly but thrillingly by Capt. Smith, and substantiated by official reports of both Union and Confederate officers, as well as personal reminiscences of participants from other organizations.

12mo, cloth, 237 pages. Postpaid, $1.00.

CHARLES SCRIBNER'S SONS' NEW BOOKS

"A STIRRING SOCIAL STUDY"
CHILDREN OF THE POOR
By JACOB A. RIIS. Illustrated. Square 12mo, $2 50.
CONTENTS: The Problem of the Children—The Italian Slum Children—In the Great East Side Treadmill—Tony and his Tribe—The Little Toilers—The Truants of our Great Streets—What it is that Makes Boys Bad—The Fresh-Air Fund—The Kindergartens and Nurseries—The Industrial Schools—Boys' Clubs—The Outcast and Homeless—Putting a Premium on Pauperism—The Verdict of the Potter's Field—Register of Children's Charities.
"The book is a model of what such writing should be—explicit, straightforward, full of plain facts and personal impressions, and free from sentimentality."—*The Nation.*

MARSE CHAN. By THOMAS NELSON PAGE. New Edition, illustrated by W. T. Smedley. Square 12mo, $1.50.
"Brought out in superb holiday form. Mr. Smedley has caught precisely the spirit of the text. The delicacy and truthfulness of his touch have been well brought out."—*Boston Beacon.*

SPANISH CITIES. With Glimpses of Gibraltar and Tangier. By C. A. STODDARD, D.D. Illustrated. 12mo, $1.50.
"Dr. Stoddard is a natural traveller, sees everything worth seeing, and describes admirably as he sees. His style is direct, easy, and graceful."—*Chicago Inter-Ocean.*

BERNARD OF CLAIRVAUX
The Times, the Man, and His Work. A Historical Study. By RICHARD S. STORRS, D.D., LL.D., L.H.D. Crown 8vo, $2.50.
The central interest of Dr. Storrs's volume lies in the vivid portrait of Bernard and in the equally important picture of his times. It is altogether historical, not dogmatic or sectarian, and it will have a special value for general readers, as shedding new light upon an important but unfamiliar period of history.

LIFE OF MICHEL ANGELO BUONARROTI. By JOHN ADDINGTON SYMONDS. With Appendices and 50 handsome Illustrations. Large 8vo, 2 vols., $12.50.
Mr. Symonds is recognized as the highest authority on the Renaissance, and his new book is the ripest fruit of prolonged study. It will take high rank in biographical literature as a portrait of the man and as a picture of his times.

LIFE AND LETTERS OF WASHINGTON ALLSTON. By JARED B. FLAGG, N.A., S.T.D. With 18 reproductions of Allston's paintings. Large 8vo, $5.00.
A poet and novelist as well as a great painter, and the friend of the most eminent men of his time, Allston was one of the most interesting figures of his day; and this, the first full and authentic story of his life, is as important and fascinating biography.

THE GREAT STREETS OF THE WORLD
8vo, fully illustrated, $4.00.
"A beautiful volume. The plan of the work is a good one and the execution complete, each street, representing the life of a great capital, having been described by one thoroughly familiar with its characteristics, and brightly illustrated by a characteristic native artist. The result is most interesting and satisfactory."—*Philadelphia Times.*

AN EXTRAORDINARY OFFER.—The BOOKBUYER *for November, the large Christmas issue, and January—the three most valuable numbers of the year—will be sent to any address for* ONLY 20 CENTS. *The Christmas* BOOKBUYER *will be the handsomest literary annual published, containing over 170 pages of interesting matter concerning holiday literature contributed by Thomas Nelson Page, Kate Douglas Wiggin, Octave Thanet, T. A. Janvier, Prof. Charles Eliot Norton, and other popular authors, and over 80 illustrations by eminent artists.*

Charles Scribner's Sons, 743 and 745 Broadway, New York

MASTERPIECES OF MODERN FRENCH WALL PAINTING. By WILL H. LOW. With many full-page illustrations from the originals of Bonnat, Puvis de Chavannes, Jean Paul Laurens, Gervex, Cabanel, Galland, and others.

NORWEGIAN PAINTERS. By H. H. BOYESEN, with many illustrations.

THE NUDE IN ART. By WILL H. LOW and KENYON COX, with full-page illustrations by the writers.

THE TRIUMPHAL ENTRY INTO BERLIN. By ARCHIBALD FORBES. In the Historic Moments' Series, with a full-page illustration.

SHORT STORIES. FOR THE CROSS. A Christmas story by GEORGE I. PUTNAM. AN ASSISTED PROVIDENCE, a Christmas story by OCTAVE THANET, in the series of Stories of a Western Town, illustrated by A. B. FROST. MISS LADYKER, a Christmas story by GEORGE A. HIBBARD, illustrated by W. T. SMEDLEY. A WEST INDIAN SLAVE INSURRECTION, by GEORGE W. CABLE. APPLES OF GOLD, a short story by Miss M. S. BRISCOE. UNDER POLICE PROTECTION, a true episode in the life of the late Chief of the Russian Police, by Mme. S. R. de MEISSNER.

POEMS. A SHADOW OF THE NIGHT, by THOMAS BAILEY ALDRICH. IN A GALLERY, by JULIA C. R. DORR, illustrated by a full page after a painting by Simon De Vos. THE REPENTANCE OF EBEN PYNCHOT, a humorous story in verse by EDWARD S. MARTIN, illustrated by F. G. ATTWOOD.

POINT OF VIEW, ETC., ETC.

PRICE, 25 CENTS.

IN making the customary preliminary announcements of the leading features for 1893, the publishers call attention to the number and character of the contributions which insure above all the ENTERTAINING quality of its pages; the year will be especially notable for its short and serial stories.

FRANCES HODGSON BURNETT will contribute to the first serial to appear in a magazine from her pen for many years, entitled THE ONE I KNEW THE BEST OF ALL. This serial is something probably entirely unique in literature, being the frankly autobiographical story of the experiences of a child up to girlhood, with its sensations and emotions as each new phase and problem of life opens to it. In no sense, however, is it a juvenile story, being distinctly the study by a mature mind of that wholly different world which a child's mental life presents.

JERSEY STREET AND JERSEY LANE: URBAN AND SUBURBAN SKETCHES. By H. C. BUNNER. A series of six sketches of town and country life, in the most charming vein that is known to readers of his other works. Each sketch will be illustrated in thorough accord with the text.

SEQUEL TO "THE REFLECTIONS OF A MARRIED MAN." By ROBERT GRANT. The author relates the further experiences of the now well-known pair of married lovers, Fred and Josephine. Illustrated.

THE COPPERHEAD By HAROLD FREDERIC. A political novel of great power, which will run through at least five numbers.

THE DURKET SPERRET. By Miss S. B. ELLIOTT, author of "JERRY." A realistic story of life among the Tennessee mountaineers, shown in curious and striking contrast with the scholarly life of the little university at Sewanee—a juxtaposition which gives the key to the motive and plot. It will run through four numbers.

PERSONAL REMINISCENCES. SOME UNPUBLISHED LETTERS OF CARLYLE TO EDWARD IRVING and others, dealing with a part of Carlyle's life far different from that brought out in the recent literature of Carlyle reminiscences. RECOLLECTIONS OF LINCOLN AND SUMNER. By the late MARQUIS DE CHAMBRUN. Both articles are full of new matter. AN ARTIST IN JAPAN. By ROBERT BLUM, who has just returned from a residence of nearly two years in that country. Abundantly illustrated by the author. HISTORIC MOMENTS, which have been a feature of the magazine during 1892, will be continued by some particularly striking papers, among them several by the great war correspondents, WILLIAM H. RUSSELL, ARCHIBALD FORBES, and others.

MEN'S OCCUPATIONS. A series of articles on the life work of men in many callings—the chief ways (exclusive of professions) in which men earn their livelihood. One article describes, for example, the typical life of a machinist or worker in iron on its largest scale in great mills like those at Homestead; another the miner's every-day life, another the lumberman's, another the typical life of a merchant seaman, etc. Each one of these articles will be written by a thoroughly representative man in the line of life of which he writes.

THE WORLD'S FAIR IN CHICAGO. A series will be published later in the year giving the impressions made by the Exhibition upon different observers of note, both American and foreign; and many of these observers will be also artists who will illustrate their own articles.

AMONG MISCELLANEOUS ARTICLES to appear at the opening of the year may be mentioned the further contributions to the "Poor in Great Cities," Mrs. Frances Hodgson Burnett's illustrated paper on the London plan for Home Aid to Invalid Children, etc. Of special interest also will be Professor Heilprin's authoritative account of the PEARY RELIEF EXPEDITION, of which he was the head (illustrated by the artist who accompanied the expedition for the purpose), a very interesting article by Octave Uzanne on the exhibition of WOMAN'S ART now going on in Paris, and articles upon artistic subjects, accounts of travels, etc., etc.

THE ILLUSTRATIONS. A fac-simile of a water-color drawing by the French artist, Marchetti, which will appear in the Christmas number, marks an important departure from the usual methods of reproduction in magazine illustration. It has always been the aim of the publishers to give the best renderings of original drawings in black and white, but in this plate a great step in advance is taken when the original drawing is reproduced not only in form and texture but in its coloring as well. The pictures of the year will represent the work not only of the well-known illustrators, but many drawings will also appear by artists who are best known as painters.

TERMS: { $3.00 a Year; 25c. a Number.

Charles L. Webster & Co.

HAVE JUST PUBLISHED

In their Fiction, Fact, and Fancy Series:

Mr. Billy Downs and His Likes.

By RICHARD MALCOLM JOHNSTON, author of 'Dukesborough Tales.' Stamped cloth, etc., about 200 pages, with frontispiece by Dan Beard. Price, 75 cents.

Col. Johnston is easily the dean among Southern men of letters, and the announcement of a new volume from his pen calls for little comment. It is sufficient to state that he has selected a number of his most characteristic Georgia tales, now first published in book form, including "A Wedding in Dooly District," "The Townses," "Something in a Name," "Parting from Sailor," "A Bachelor's Counselings," and "Two Administrations."

Other Volumes in this Series:

ESSAYS IN MINIATURE. By AGNES REPPLIER.

WRITINGS OF CHRISTOPHER COLUMBUS. Edited by PAUL LEICESTER FORD.

MERRY TALES. By MARK TWAIN.

THE GERMAN EMPEROR AND HIS EASTERN NEIGHBORS. By POULTNEY BIGELOW.

PADDLES AND POLITICS DOWN THE DANUBE. By POULTNEY BIGELOW.

SELECTED POEMS. By WALT WHITMAN.

AUTOBIOGRAPHIA; Or, The Story of a Life. By WALT WHITMAN.

DON FINIMONDONE: Calabrian Sketches. By ELISABETH CAVAZZA.

THE MASTER OF SILENCE. A Romance. By IRVING BACHELLER.

12mo, gilt titles, each, cloth, 75 cents; half calf, $2.00. Set complete, 10 volumes in a box, cloth, $7.50; half calf, $20.00.

A POET'S ITINERARY.

Under Summer Skies.

By CLINTON SCOLLARD. Cloth, octavo, 300 pages. $1.00.

In the present volume, *Under Summer Skies*, Mr. Scollard narrates in delicate prose the story of his wanderings in Egypt, Palestine, Italy, and the Alps. This pleasant reading is interspersed here and there with poetical interludes, descriptive of the scene in which it is set. The author is a careful artist in words, with a bright eye for every scrap of local color, and unflagging interest in all that is rare or curious or historical.

The volume is attractively printed with wide margins, and numerous half-tone illustrations by Margaret Landers Randolph.

Send for our Illustrated Catalogue.

*** Our publications are for sale by all booksellers, or are mailed postpaid on receipt of price.

CHARLES L. WEBSTER & CO.,
67 Fifth Avenue, New York City.

G. P. Putnam's Sons,

NEW YORK AND LONDON,

HAVE NOW READY:

The New Exodus A Study of Israel in Russia. By HAROLD FREDERIC, author of 'The Young Emperor,' etc. 8vo, illustrated, $2.50.

"Mr. Frederic's volume contains the most coherent and the fullest presentment of the case against the Russian Government. . . . As such it is not one whit more trenchant or unsparing than the facts warrant."—*London Times.*

Scenes from the Life of Christ. Pictured in Holy Word and Sacred Art. Edited by JESSICA CONE. With 64 illustrations from celebrated paintings. Square 8vo, bound in white and gold, red edges, $3.50.

The following are a few of the illustrations, reproduced from photographs of the great paintings of Bodenhausen's "The Madonna," Dobson's "The Good Shepherd," Reni's "The Annunciation," Müller's "The Nativity," Portael's "The Star in the East," Bouguereau's "The Flight into Egypt," Ittenbach's "The Christ Child," Doré's "Christ Walking on the Sea," &c., &c.

The Ariel Shakespeare. Each play in a separate volume.
Size 3½x5 inches.
Large, clear type.
Howard's charming illustrations.
Text complete and unexpurgated.
Flexible leather binding.
Volumes sold separately. 75 cents each (in box), and orders invited for the complete set.

The first group will comprise these plays: *The Tempest, A Midsummer Night's Dream, The Merchant of Venice, As You Like It, Much Ado About Nothing, Twelfth Night, The Winter's Tale.*

KNICKERBOCKER NUGGETS.

32mo, gilt top.

XXXVIII.—Deutsche Volkslieder. A Selection from German Folk Songs. Printed in the original text. Compiled and edited by HORATIO S. WHITE, Professor of German Language and Literature, Cornell University. Illustrated. Uniform with the "Ballad" volumes of the Nuggets, $1.50.

XXXIX.—The Wit and Wisdom OF CHARLES LAMB, comprising Selections from Lamb's Letters and Essays, together with anecdotes by his friends, culled from various sources. Compiled by ERNEST DRESSEL NORTH. With portrait from a drawing by Hancock in 1798, in the possession of Mr. Cottle. $1.00.

*** 150 copies are printed on Large Paper with Proof of the Portrait. $3.75.

The Initials. By BARONESS TAUTPHŒUS. 2 vols., 16mo, uniform with the Exmoor Edition of "Lorna Doone," $2.50.

"This very attractive and convenient edition, appropriately called the "Hildegarde," really supplies a long-felt want. In all the thirty-odd years of its deserved popularity there never has been a worthy American edition of this admirable novel. Now in these two tasteful volumes, in the clear typography of the Knickerbocker Press, it can be read again with fresh enjoyment."—*Philadelphia Times.*

NEARLY READY:

Japan in Art and Industry. With a Glance at Japanese Manners and Customs. Translated from the French of Felix Régamy by M. French-Sheldon and Eli Lemon Sheldon. 12mo, fully illustrated, $1.75.

*** Notes on New Books, Vol. III, No. 3, and prospectus of the Knickerbocker Nuggets series, sent on application.

Beautiful Books

EXQUISITE BINDINGS.

ZENOBIA.

QUEEN OF PALMYRA. By WILLIAM WARE, author of 'Aurelian,' 'Julian,' etc. A new edition of this standard work fully illustrated with half-tone plates from photographs taken in Palmyra, showing the ruins of that splendid civilization which was at its zenith nearly two thousand years ago. 1 vol., crown 8vo, cloth, gilt, $2.50.

GENOA, THE SUPERB.

THE CITY OF COLUMBUS. By VIRGINIA W. JOHNSON. This city, the birthplace of Columbus, is not only interesting from its historical associations, but is remarkable for the beauty of its parks, palaces, and cathedrals of modern architecture. Illustrated with photogravures. 1 vol., crown 8vo, vellum cloth, illuminated in gold and colors, $3.00.

THE LILY OF THE ARNO,

OF FLORENCE PAST AND PRESENT. By VIRGINIA W. JOHNSON. Uniform with 'Genoa, the Superb.' 1 vol., $3.00; the 2 above vols., in cloth box, $6.00.

THE LAST DAYS OF POMPEII.

POMPEIIAN EDITION. By BULWER (Lord Lytton). This thrilling historical novel is produced in a superb manner, with fifty photogravure illustrations from photographs of Pompeii as it now is, and from celebrated restorations and frescoes. A magnificent and distinctively Pompeiian binding. 2 vols., crown 8vo, embossed in full gold, $6.00.

RIENZI.

ROMANESQUE EDITION. THE LAST OF THE ROMAN TRIBUNES. By BULWER (Lord Lytton). A superb edition of this splendid historical romance, which stands without an equal, full of photogravure illustrations from Roman photographs. 2 vols., crown 8vo, embossed in gold, gilt tops, $6.00.

ROMOLA. By GEORGE ELIOT.

Uniform with 'Rienzi' and 'Last Days of Pompeii,' with sixty photogravures. 2 vols., $6.00.

CAPTAIN JANUARY.

NEW ILLUSTRATED EDITION. By LAURA E. RICHARDS. This charming idyl of New England coast life has passed through thirteen editions in two years. This is an entirely new edition in larger type and page, and superbly illustrated with thirty half-tone pictures, from drawings by Frank T. Merrill. 1 vol., quarto, cloth, unique, $1.25.

SPRING, SUMMER, AUTUMN, WINTER.

Four exquisite little volumes comprising some of the gems of English poetry, embellished with dainty illustrations set into the text in artistic style. The volumes are bound in full India silk in new and delicate shades stamped in gold. 4 vols., full silk, in neat box, $4.00, or separately, $1.00.

THE VICAR OF WAKEFIELD.

(Exquisite Series.) EDITION JOUAUST. By OLIVER GOLDSMITH. Illustrated with dainty etchings by the great French artist, Ad. Lalauze. 2 vols., 16mo, parchment and silk binding, $3.50.

PAUL AND VIRGINIA.

(Exquisite Series.) EDITION JOUAUST. By BERNARDIN DE SAINT-PIERRE. Uniform with 'The Vicar of Wakefield.' The illustrations are by the celebrated French Etcher, Laguillermie. The most artistic edition of this prose idyl ever made. 1 vol., 16mo, parchment and silk binding, $2.00.

For sale by all booksellers, or sent postpaid by

ESTES & LAURIAT, Publishers,

BOSTON.

A New and Superb Edition.

Historical Memorials of Canterbury.

By ARTHUR PENRHYN STANLEY, D.D.

With 7 full-page illustrations reproduced from etchings. 13 full-page photos, and numerous cuts. Small 8vo, cloth. Italian style. Uniform with the two-volume edition of Westminster Abbey. $6.50.

Attention is invited to this new edition, beautifully printed and bound in ornamental cloth. The reproductions from etchings are full-page, as also the photographs, which are in the best style of that art. These present a vivid view of the main features of the cathedral, both interior and exterior. The photographs alone, if sold separately unmounted, would cost the price of this volume.

Also a New Edition of the Sumptuous Edition of

Historical Memorials OF Westminster Abbey.

By ARTHUR PENRHYN STANLEY, D.D., late Dean of Westminster. A new illustrated edition. With 13 full-page reproductions of etchings after Herbert Railton, and numerous woodcuts. 2 volumes. 8vo. In colored cloth, with jacket, $7.50.

All the copies of the first edition of this beautiful work were sold in three months from the date of publication. The publishers have now ready a new issue.

Also a new Library Edition of the **Memorials of Canterbury**, and also of **Westminster Abbey** in three volumes. 12mo, beautifully printed, and without the full-page illustrations, at the following prices: Westminter Abbey, 2 volumes, $3.00; Memorials of Canterbury, 1 volume, $1.50.

*** *Any of the above will be sent by mail or express on the receipt of the price. Descriptive circular sent on application.*

MACMILLAN & CO., 112 Fourth Avenue, New York.

A PORTFOLIO OF PROOFS OF "OLD ITALIAN MASTERS."

ENGRAVED BY TIMOTHY COLE.

THE CENTURY CO. announces to the lovers of the fine arts the issue of a limited edition of 125 copies of a superb Portfolio of Proofs of the famous engravings of the old Italian Masters made during a residence of seven years in Italy by Mr. Timothy Cole, the acknowledged head of the school of American wood-engravers, and the leading wood-engraver of the world

These engravings, as they have appeared from month to month in the pages of *The Century Magazine*, accompanied with explanatory text by Mr. W. J. Stillman, and by Mr. Cole's own valuable and entertaining notes, have attracted world-wide attention. Prof. Charles Eliot Norton, in a letter to the *Nation*, speaks of them in the highest terms. He says that Mr. Cole has reproduced the work of the masters of art more accurately than has ever before been done in black and white.

The Century Co has spared no pains or expense to make this Portfolio of Proofs the most notable art issue of the day. Each of the 67 proofs is printed on the finest Japan paper, size 17½x14, and is signed by Mr. Cole and by the printer, Mr. J. C. Bauer, professional proof-printer for wood-engravers, the latter certifying that the impression is one of 125 copies printed by hand from the original block or plate. The proof is mounted on heavy Japan paper with another sheet of the same over it, leaving a space for the engraving, lined with gold. This is surmounted by a cover of linen paper bearing the number of the cut. Each engraving that is a detail of a large picture is accompanied by a small outline drawing of the latter, so that the engraved part may be properly located in relation to the whole painting.

The subscriber to the Portfolio of Proofs will receive also a copy of a book containing the text of Mr. Stillman's articles on the Old Masters (with Mr. Cole's notes), a special edition of 125 copies of which has been printed on Holland paper to accompany the Portfolio.

The edition of the Portfolio is absolutely limited to 125 copies, the price of each, to subscribers, being $175. It is impossible to send a specimen of these proofs in a circular, but where the distance from New York is not too great, arrangements will be made to forward a Portfolio for inspection. Address THE CENTURY CO., 33 East 17th Street, New York.

Houghton, Mifflin & Co.'s HOLIDAY BOOKS

Pagan and Christian Rome. Fully Illustrated. $6.00.

For Sale by all Booksellers, Everywhere.

WASHINGTON-MADISON.— SALE OF THE WASHINGTON-MADISON PAPERS, PRESERVED BY JAMES MADISON, PRESIDENT OF THE U. S. SOLD TO CLOSE THE ESTATE OF THE LATE JOSEPH C. McGUIRE OF WASHINGTON, D. C., DECEMBER 6th and 7th, 1892, in our Book Salesroom, 1110 Chestnut St., Philada., Pa. This is undoubtedly the greatest historical collection of original letters and documents ever offered at public sale in this country. The catalogue has been compiled by the noted expert, Stan. V. Henkels, and forms, outside of its original purpose, a most valuable compendium of the inside and unknown history of the American Revolution and early history of our Republican Government. It contains Gen. Washington's letters to Joseph Jones and James Madison during the Revolutionary War, and the formation of the Federal Union, as well as the letters of Edmund Randolph, Edmund Pendleton, Joseph Jones, Jonathan Dayton, James Madison, and other members of the Continental Congress. The celebrated letter of Rev. Jacob Duché to General Washington, begging him to forsake the cause of the Colonies. Many highly interesting letters of signers of the Declaration of Independence and Generals of the Revolutionary War, some of which have special reference to Arnold's treason. Books from General Washington's Library. Relics of General Washington. Oil Portraits by Gilbert Stuart, Chas. Willson Peale, and others, in fact there is not a single item in the whole catalogue that is not of the greatest interest. It is a book of nearly 300 pages, with elegant illustrations, and more than worth the price charged, which is $2.50. Those who wish the catalogue should apply at once to the auctioneers. THOMAS BIRCH'S SONS, Auctioneers, 1110 Chestnut St., Phila., Pa.

A.C. Armstrong & Son

HAVE NOW READY:

A NEW VOLUME (the 15TH) IN THE "BOOK-LOVER'S LIBRARY."

Books in Chains,

And Other Bibliographical Papers by the late WM. BLADES. Cloth, uncut edges, $1.25.

Mr. Blades's writings were remarkable for the great clearness and simplicity of their style—the volume contains the last writings of this able and genial author.

It includes an introduction containing a general notice of Mr. Blades's life-work by Henry B. Wheatley, and will form a volume acceptable to the readers of the "Book-Lover's Library" as a companion volume to that distinguished bibliographer's "*Enemies of Books.*"

NEW VOLUME (BEING FIFTH SERIES) OF

The Book Worm.

AN ILLUSTRATED TREASURY OF OLD-TIME LITERATURE. 1 *Vol., Octavo, Uncut Edges,* $3.

In the pages of *THE BOOK WORM* will be found abundance of lore for all those who are interested in the books of by-gone days. The Collector here finds papers and jottings on his own specialty. Articles on Scarce Books, the works of Special Presses, First Editions, and Unique Copies, and their former and present value. The early BOOK AUCTIONS and old Book Catalogues claim occasional attention. BOOKBINDING takes a prominent place, with illustrations of fine examples, by the greatest masters.

5 VOLUMES ARE NOW READY. PRICE $3 EACH.

Sold separately or in sets.

ALSO JUST READY

A PRESENTATION EDITION OF

Imago Christi:

The Example of Jesus Christ.

By REV. JAS. STALKER, D.D. To meet the demand for a superior edition of this successful book of which 30 THOUSAND COPIES have been sold in England and America, the publishers have had prepared this presentation edition, printed on EXTRA CALENDERED PAPER, ornamented with red lines and elegantly bound in padded leather, RED UNDER GOLD EDGES, price $3.50. May also be had in full calf or turkey morocco, price $4.50. Each style in a neat box.

Of this special edition—printed in England and bound at Oxford Bible Warehouse—but a limited number remain unsold.

History of Art in Persia, Phrygia, Lydia, Caria, and Lycia.

By GEORGES PERROT and CHARLES CHIPIEZ. With 500 illustrations. Two vols., imperial 8vo, uniform with "*History of Art in Ancient Egypt,*" "*History of Art in Chaldæa and Assyria,*" "*History of Art in Phœnicia,*" "*History of Art in Sardinia, Judæa, Syria, and Asia Minor.*" Handsomely bound in cloth, gilt top, $14.50; three-quarter crushed levant morocco, $22.50.

The great history is in many respects the most important contribution of modern times to the literature of art and archæology. As it progresses its value becomes more and more apparent. The illustrations are admirable as illustrative art, and abundant to bring the descriptive text within the comprehension of the ordinary reader as well as the student.

Now Ready Third Thousand.

First Edition of 2,000 Sold in Three Weeks.

Thirty Years among South Sea Cannibals.

The Story of John G. Paton.

A Famous Battery and Its Campaigns, 1861–'64.

By JAMES E. SMITH, Late Captain 4th Independent Battery, New York Volunteer Light Artillery.

A new book about a battery which distinguished itself in many hard fought battles, and won glory and renown in the great Gettysburg conflict, where it held the crest of Devil's Den for three long hours against the flower of Lee's army. The history of this battery, from the Peninsula to Gettysburg, is the history of the war in the East, and it is told modestly but thrillingly by Capt. Smith, and substantiated by official reports of both Union and Confederate officers, as well as personal reminiscences of participants from other organizations.

WILLIAM S. COOPER BRASS WORKS, PHILADELPHIA

America's Venerable and only Weekly Eclectic.

1844. 1893.

FOR NEARLY FIFTY YEARS

LITTELL'S LIVING AGE

Has stood Peerless in the realm of Periodical Literature.

It selects from the whole wide field of EUROPEAN PERIODICAL LITERATURE the best articles by

THE ABLEST LIVING WRITERS

in every department.

Biography, History, Literature, Travels, Science, Politics, Criticism, Art, Fiction, and Poetry.

"Only the best has ever filled its pages; the best thought rendered in the purest English. Nothing poor or unworthy has ever appeared in the columns of THE LIVING AGE."—*The Presbyterian, Philadelphia, April 13, 1892.*

A WEEKLY MAGAZINE, it gives more than

Three and a Quarter Thousand

double-column octavo pages of reading matter yearly, forming four volumes; presenting a mass of matter UNEQUALLED IN QUALITY AND QUANTITY by any other publication in the country.

The publishers are enabled to make one of the MOST LIBERAL OFFERS ever made for the consideration of an intelligent class of American readers, viz.: a **$5.00** copy of RIDPATH'S HISTORY OF THE U. S. at the nominal price of 50 cents, when taken in connection with THE LIVING AGE. Littell's Living Age, one year, postpaid, $8.00. FOR Ridpath's History of the U. S. of America, 5.00 } $8.50

"Whether judged by the thoroughness of research, the accuracy of statement, or the purity of style, it occupies a foremost place among United States Histories."—*Chas. W. Bennett, D.D., Prof. of History, Syracuse University.*

The above price includes postage on The Living Age only. The book must be sent at the subscriber's expense.

THE LIVING AGE is published weekly at $8.00 a year, free of postage.

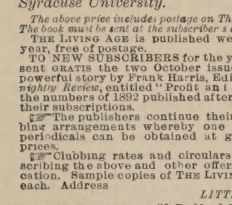
TO NEW SUBSCRIBERS for the year 1893 will be sent GRATIS the two October issues containing a powerful story by Frank Harris, Editor of the *Fortnightly Review*, entitled "Profit and Loss," and also the numbers of 1892 published after the receipt of their subscriptions.

☞The publishers continue their popular clubbing arrangements whereby one or more other periodicals can be obtained at greatly reduced prices.

☞Clubbing rates and circulars more fully describing the above and other offers sent on application. Sample copies of THE LIVING AGE, 15 cents each. Address

LITTELL & CO.,
31 Bedford Street, Boston.

"For the enlightened owners of gardens and woodlands this journal is invaluable."—*N. Y. Tribune.*



Filled every week with original, entertaining and exact information from the best American and European authorities about trees, shrubs, flowers and fruits; the beautifying of home-grounds, roadsides and parks; the preservation of forests and of natural scenery, together with vigorous editorial treatment of topics within its field and illustrations of the highest artistic finish.

"The arbiter in matters of rural taste."—*Boston Transcript.* "A capital specimen of pure literature."—*N. Y. Journal of Commerce.* "Faultless in make-up."—*Phila. Press.* "Illustrations of rare excellence."—*Buffalo Courier.* "Edited with signal ability."—*Cincinnati Times-Star.*

Published weekly. $4.00 a year.

☞*Special Clubbing Offer for 1893: New Subscriptions to Garden and Forest and The Nation.* **$5.80.**

Specimen copy and net clubbing rates with other periodicals sent free on application.

THE

Popular Science Monthly

FOR DECEMBER.

From Magic to Chemistry and Physics. By ANDREW D. WHITE. Tells how some of the brightest minds of the middle ages were lost to science through the hampering influence of a narrow theology.

Deafness and the Care of the Ears. By ABRAM MILLS FANNING, M.D. Contains much useful information clearly given.

Modern Instances of Demoniacal Possession. By Professor E. P. EVANS. Gives evidence from recent authoritative sources that the Catholic Church still holds officially to the belief in possession by devils.

Fallacies of Modern Economists. By ARTHUR KITSON. A vigorous argument in opposition to some current theories of the socialists, nationalists, and other economic reformers.

CHARLES SCRIBNER'S SONS
HAVE JUST PUBLISHED:

Apologetics.
By PROF. A. B. BRUCE, D.D., Free College, Glasgow. Crown 8vo, $2.50 *net.*
Prof. Bruce's book is the third volume in the International Theological Library, of which Prof. Driver's extraordinarily successful "Literature of the Old Testament" was the first, and Dr. Smyth's "Christian Ethics" the second. It is an apologetic presentation of the Christian faith with reference to whatever in our intellectual environment makes faith difficult at the present time, and has therefore a vital interest.

The Swiss Reformation.
Vol. VII in the History of the Christian Church. By PHILIP SCHAFF, D.D., LL.D. Illustrated. Large 8vo, $4.00.
A new volume in Dr. Schaff's great work, treating of the part played by Calvin and Zwingli and their Swiss contemporaries in the Reformation, and having a special interest in connection with the present controversy in the Presbyterian Church.

With Trumpet and Drum.
By EUGENE FIELD.
A Limited Edition of 250 numbered copies printed on hand-made paper, with vignette etchings by Edmund H. Garrett, in half parchment binding, uncut edges, $5.00 *net.*
In this exquisitely made volume are many poems, new and old, which derive their impulse from the author's well-known love of children, one of the most characteristic traits of his verse.

The Poetry of Tennyson.
By HENRY VAN DYKE, D.D. *Third Edition.* With Portrait. 12mo, $2.00.
A new edition of a remarkably successful book containing important additions.
"Without doubt this appreciative and discriminating study is the best general companion to the reading of Tennyson that exists."—*The Examiner* (N. Y.).

The Mission of the Church.
Four Lectures delivered in the Cathedral Church of St. Asaph. By the Rev. CHARLES GORE, Editor of "Lux Mundi," etc. 12mo, $1.00.
The relation of the Church of England to Society, the problem of meeting independent and hostile opinion, and the question of unity within the Church are the principal themes in Mr. Gore's characteristically fresh and invigorating book.

The Refounding of the German Empire.
By Col. G. B. MALLESON, C.S.I. With 4 portraits on copper. *Events of Our Own Times Series.* 8vo. $1.75.
The popularity of Col. Malleson's 'Indian Mutiny of 1857' in the same series indicates that this new book will meet with equally wide appreciation.

THE
ROMANCES
OF
DUMAS.

Limited Edition of 1,000 Copies, with more than 200 superb Plates, now being published by

LITTLE, BROWN & CO.

The special attention of the lovers of the world-famous romances of the great Dumas is directed to this choice publication, which will comprise in forty-eight volumes Alexandre Dumas's remarkable pictures, which, in the form of romance, *span the history of France from the reign of Henri II. to modern times*, translated into English with the utmost closeness to the author's text and *entirely unabridged.*

The illustrations will consist of more than 200 beautiful full-page plates by gifted artists of France and America, including etchings, photogravures, and engraved portraits, the line of kings and queens for centuries of French history, famous courtiers, royal favorites, ministers of State, etc., being fully represented.

The volumes will be printed upon *Enfield hand-made paper*, and bound in cloth, gilt top, and *the type will be clear and beautiful.* The size will be small 8vo, affording ample opportunity for adequate illustrations, and giving the reader at the same time a book not cumbersome to hold.

The illustrations will all be unlettered proofs, printed in the finest style upon imperial Japan paper.

This edition will have *eight more volumes than any other*, and will be the *most complete as well as the most beautifully illustrated and most exquisite library edition in existence.*

In addition to the celebrated story of *Monte Cristo* and *D'Artagnan and Marie Antoinette Romances*, so well known to readers of fiction, and covering the fascinating and romantic periods of French history embraced by the reigns of *Louis XIII.*, *Louis XIV.*, *Louis XV.*, *Louis XVI.*, *Marie Antoinette, and the French Revolution*, this edition will go back of the period of the great Cardinal Richelieu, and embrace Dumas's famous pictures of the reigns of *Henri II.*, *Charles IX.*, *Henri III.*, *Henri IV.*, *and Catherine de Médicis*, and, coming down to a later date, will include the stories of the *Regency of Philippe d'Orléans*, the beautiful love-story of "*The Black Tulip*," treating of the period of *William of Orange*, and three important stories of the time of *Napoleon* and *Louis Philippe*, which have never before been translated.

The price will be $2.50 per volume, and the edition will be limited to 1,000 sets, every set to be numbered. Sold only by subscription. Early subscription is advisable. *Frospectus on application.*

The Nation

VOL LV—NO 1431. THURSDAY, DECEMBER 1, 1892. PRICE 10 CENTS.

"In no way can Americans so effectively inform themselves on the subjects that claim public attention from one month to another as by reading the NORTH AMERICAN REVIEW."

IN THE

North American Review

YOU WILL ALWAYS FIND

THE RIGHT TOPICS.

BY THE RIGHT MEN.

AT THE RIGHT TIME.

The Topics are always those which are uppermost in the public mind—in morals, religion, politics, science, literature, business, finance, industrial economy, social and municipal affairs, etc.—in short, all subjects on which Americans require and desire to be informed. NO MAGAZINE FOLLOWS SO CLOSELY FROM MONTH TO MONTH THE COURSE OF PUBLIC INTEREST. *All subjects are treated of impartially on both sides.*

The Contributors to the REVIEW are the men and women to whom the world looks for the most authoritative statements on the subjects of the day. No other periodical can point to such a succession of distinguished writers. The list is a roll of the people who are making the history, controlling the affairs, and leading the opinion of the age, such as Mr. Gladstone, the Prime Minister of England; Mr. Blaine, Signor Crispi, ex-Prime Minister of Italy; Baron Hirsch, H. R. H. the Count of Paris, Cardinal Gibbons, Bishops Potter, Doane, Mallalieu, Foss, etc., etc.

The Time when these subjects are treated of by these contributors is the very time when the subjects are in the public mind—not a month or two after people have ceased to think of them. The promptness with which the REVIEW furnishes its readers with the most authoritative information upon the topics of the day is one of its most valuable features.

NOW IS THE TIME TO SUBSCRIBE.

SOME COMMENTS OF THE AMERICAN AND ENGLISH PRESS:

No other magazine in the world so fully and fairly presents the opinions of the leading writers and thinkers on all questions of public interest as the NORTH AMERICAN REVIEW.—*Boston Journal.*

The NORTH AMERICAN REVIEW is ahead of any other magazine this country has seen in the importance of the topics it discusses and the eminence of its contributors.—*Albany Argus.*

The REVIEW constantly offers to the public a programme of writers and essays that excite the reader and gratify the intellectual appetite. In this respect there is no other magazine that approaches it.—*New York Sun.*

The NORTH AMERICAN REVIEW needs but to be mentioned to be praised. It is one of the most powerful publications of the century, and without doubt one of the ablest.—*Kansas City Gazette.*

What are the editors of our monthlies thinking of to allow the NORTH AMERICAN REVIEW to "draw" all the most interesting people upon the most interesting questions?—*The Daily Chronicle*, London, England.

The conductors of our reviews must be careful or they will find the ground cut from under their feet by their more go-ahead transatlantic rival, the NORTH AMERICAN REVIEW.—*Bath Herald*, England.

The old steady-going character of the English monthlies has changed; but it is not yet equal to that of the NORTH AMERICAN REVIEW, which is becoming increasingly popular in this country.—*Kidderminster Shuttle*, England.

The NORTH AMERICAN REVIEW was started before the memory of living man, and it is still regarded as an oracle.—*The Queen*, London, England.

Published Monthly. 50 cents a copy; $5.00 a year.

Charles L. Webster & Co.'s

LATEST BOOKS.

A POET'S ITINERARY.

Under Summer Skies.

By CLINTON SCOLLARD. Cloth, octavo, 300 pages. Price, $1.00.

In the present volume, *Under Summer Skies*, Mr. Scollard narrates in delicate prose the story of his wanderings in Egypt, Palestine, Italy, and the Alps. This pleasant reading is interspersed here and there with poetical interludes, descriptive of the scene in which it is set. The author is a careful artist in words, with a bright eye for every scrap of local color, and unflagging interest in all that is rare or curious or historical.

The volume is attractively printed with wide margins, and numerous half-tone illustrations by Margaret Landers Randolph.

New Volumes in the "Fiction, Fact, and Fancy" Series:

ESSAYS IN MINIATURE. By AGNES REPPLIER. Stamped cloth, gilt titles. Price, 75 cents.

A new volume of this brilliant essayist's writings, in which she discourses wisely and wittily on a number of pertinent topics. "Our Friends, the Books," "Trials of a Publisher," "A Short Defence of Villains," "The Charm of the Familiar," and "Three Famous Old Maids," are some of the subjects which receive her attention.

"Miss Repplier is our most clever essayist."—*Philadelphia Inquirer.*

SELECTED POEMS. By WALT WHITMAN. Stamped cloth, etc., 175 pages, with portrait frontispiece. Price, 75 cents.

Arranged for home and school use by the editor of the Series. This is the only eclectic edition ever authorized by Mr. Whitman.

"The volume represents all that is best in Walt Whitman."—*San Francisco Chronicle.*

AUTOBIOGRAPHIA: Or, The Story of a Life. By WALT WHITMAN. Stamped cloth, etc., 206 pages, with view of Whitman's home at Camden. Price, 75 cents.

The story of Whitman's life, told in his own words. These selected passages from his prose works are so arranged as to give a consecutive account of the old poet's career in his own picturesque language.

"Those who love Walt Whitman as a poet and a man will treasure this volume."—*Boston Globe.*

Life of Jane Welsh Carlyle.

By Mrs. ALEXANDER IRELAND. A remarkable biography of a wonderful woman, written and compiled by one in thorough sympathy with her subject, from material made public for the first time. The powerful side-light it throws upon the life and character of Thomas Carlyle will make the volume indispensable to all who venerate the genius, or are interested in the personality of the Sage of Chelsea. Vellum, cloth (half bound), 8vo. Price, $1.75.

We have also several sets of Thackeray, Dickens, George Eliot, Bulwer, and others, in fine library bindings at one-third off the regular list price.

Send for our Illustrated Catalogue.

*** Our publications are for sale by all booksellers, or are mailed postpaid on receipt of price.

CHARLES L. WEBSTER & CO.,
67 Fifth Avenue, New York City.

IMPORTANT BOOKS.

THE HOLY GRAIL. By ALFRED TENNYSON. With fourteen illustrations by W. L. TAYLOR. *Popular Edition.* Square 8vo, daintily bound in cloth, with gold and silver ornamentation, gilt edges, $2.00; padded seal, $4.00.

Taylor's drawings are felicitous in conception and technique. One of the finest gift-books of the season.

OLD CONCORD: HER HIGHWAYS AND BYWAYS. By MARGARET SIDNEY. 8vo, cloth, $3.00. *New and enlarged edition.* Exquisitely illustrated from photographs and drawings made on the spot.

Concord's history, picturesque scenery, and world-famous haunts are all reproduced in text and illustration.

"The ideal portrait of that most ideal of New England towns."—*Boston Advertiser.*

OUT OF DOORS WITH TENNYSON. Edited by ELBRIDGE S. BROOKS. Large 4to, bound in delicate tints, with medallion of Tennyson, and scroll in silver, $2.50. Fully illustrated.

A rare symposium of the poet's pastoral poetry, illustrated with views of scenes described and other attractive cuts.

OUR EARLY PRESIDENTS, THEIR WIVES AND CHILDREN. From Washington to Jackson. By Mrs. HARRIET TAYLOR UPTON. With 100 portraits, pictures and autograph letters. Quarto, gold cloth, $3.00; half calf, $6.00; full morocco, $8.

A book of national importance and interest.

LIFE OF WHITTIER. By W. SLOANE KENNEDY. New edition brought forward to date, with portraits and other cuts, $1.25.

New and important additions to this popular biography give interesting data about the beloved poet, not before published.

OLIVER CROMWELL. By Rev. GEORGE H. CLARK, D.D. 12mo, $1.25.

"More and more is the character of Cromwell matter of study among thoughtful men. A study like Dr. Clark's will be received with deep interest."—*Rev. E. E. Hale, D.D.*

CHRISTMAS EVE AND EASTER DAY. By ROBERT BROWNING. With an introductory essay, and explanatory notes to each poem by HELOISE E. HERSEY. Preface by W. J. ROLFE. 16mo, cloth, 75 cents; holiday binding $1.25.

"Miss Hersey contributes an extremely clear and valuable introductory essay, which no lover of Browning will care to leave unread."—*Christian Union.*

ROBERT SOUTHEY: The Story of His Life Written in His Letters. By JOHN DENNIS. 12mo, $2.25.

"Mr. Dennis is to be congratulated without reserve on having carved the aim he set before him—that of giving an outline portrait of a great and good man."—*London Spectator.*

LAMB'S ESSAYS. A biographical Study. Selected and annotated by ELIZABETH DEERING HANSCOM. 12mo, gilt top, $1.25.

"The volume is distinctly valuable in its collection of facts associated with Lamb's life."—*Brooklyn Times.*

A DISSERTATION UPON ROAST PIG. By CHARLES LAMB. Small 4to, in box, holiday binding, $1.00. Illustrated by Lamb's portrait and twelve designs by Bridgman, which aptly characterize the delicate humor of the famous essay.

SHORT CUTS AND BY-PATHS. By HORACE LUNT, author of "Across Lots," 12mo, $1.25. New Edition.

"To open his book and walk through his 'by-paths' is to breathe in all the freshness and sweetness that nature offers freely."—*Boston Transcript.*

BIRD-DOM. By LEANDER S. KEYSER. 12mo, $1.00. Delightful studies of birds and their habits.

"Mr. Keyser's style is as charming as his birdlore is extensive and accurate."—*Golden Rule.*

THE LOST EARL. With other Poems and Tales in Verse. By J. T. TROWBRIDGE. 8vo, illustrated, bound in delicate tints, with silver and gold ornamentation, $2.00.

"The quality of Mr. Trowbridge's verse is too well known to need description; all sides of his talent are made evident in this volume."—*N. Y. Critic.*

FIGURE-DRAWING FOR CHILDREN. By CAROLINE HUNT RIMMER. 4to, cloth, $1.00.

A series of unique lessons on drawing for children, illustrated by accurate and artistic figures. A charming book.

THE SHAKSPERE ORACLE. 50 cents.

A novel device to familiarize young people with Shaksperean poetry, while affording social entertainment. *The* new game of the season.

D. LOTHROP CO., Publishers,
BOSTON.

BOYS' & GIRLS' Xmas Books.

ELFIE'S VISIT TO CLOUDLAND AND THE MOON.

By FRANCES VESCELIUS and E. J. AUSTEN. A strikingly original story of an imaginary visit of a little girl to the "Realm of Fancy" and the abode of Santa Claus, which originally appeared in St. Nicholas. Nearly a hundred original illustrations. Quarto, cloth, gold and ink, $1.25.

HILDEGARDE'S HOME.

By LAURA E. RICHARDS. Another volume of the popular "Queen Hildegarde" series, giving an account of the haps and mishaps of the heroine in her city home. Illustrated with original designs by Merrill. 12mo, cloth, $1.25. Other volumes of the series are "Queen Hildegarde" and "Hildegarde's Holiday."

RUBY AND RUTHY.

By MINNIE E. PAULL, author of "Prince Dimple," "Cribsie Bye Tales," etc. The adventures and mishaps of two little country girls and a friend from the city. Illustrated by Jessie McDermott. 16mo, cloth, black and gold $1.00.

THREE VASSAR GIRLS IN THE HOLY LAND.

New volume for 1892. By ELIZABETH W. CHAMPNEY. The Vassar Girls in this volume travel through the East, from Egypt and the mouth of the Nile through Palestine to Jerusalem. Illustrated with characteristic pictures of scenery, etc. Small quarto, illuminated covers, $1.50.

Best Boys' Books.

THROUGH THE WILDS.

By CAPT. CHARLES A. J. FARRAR, author of "Eastward Ho," "Down the West Branch," etc. A fascinating narrative of the adventures of a party of young men, travelling through the woods of Maine and New Hampshire. Stories of their camp life, fishing, shooting, etc. Over 300 illustrations made especially for this work. 1 vol., quarto, cloth, black and gold, $2.50.

SCHOOLBOY DAYS IN RUSSIA.

By ANDRE LAURIE. Translated by LAURA E. KENDALL. A capital story of schoolboy life in a country which abounds in interesting facts. The author relates, in a way that will at once attract the reader, the numerous adventures which befall the hero. The volume is well illustrated with twenty-six original designs by the well-known French artist G. Roux. Crown 8vo, $1 50.

ZIGZAG JOURNEYS ON THE MISSISSIPPI.

New volume for 1892. "FROM THE SITE OF THE WORLD'S FAIR TO THE TOMB OF COLUMBUS." An account of a trip down this famous river, across the Gulf of Mexico to Havana. Full of stories about Columbus and the historic places visited. Completely illustrated Over 350,000 vols. of the ZIGZAG series sold. Illuminated covers, $1.50.

AT THE SIGN OF THE WHITE SWAN.

By OLIVIA L. WILSON. An exciting story of life and adventure in the mountains of Western Pennsylvania, told in a healthy but spirited style. Interesting alike to boys and girls. Illustrated from original designs. 1 vol., 12mo, cloth, $1.25.

For sale by all booksellers, or sent postpaid by

ESTES & LAURIAT, Publishers,
BOSTON.

Lippincott's Holiday Books.

Lives of the Queens of England.

New Edition. Printed from new plates. With portraits of the Queens and other illustrations. Lives of the Queens of England from the Norman Conquest. Compiled from Official Records and other Authentic Documents, private as well as public, by Agnes Strickland. A reprint of the author's latest revised edition, containing illustrations that have never appeared in any other issue. In eight volumes. 8vo. Cloth, gilt top, $16.00; half calf, $28.00; three-quarters calf, $32.00.

Tales from Ten Poets.

Containing the most famous narrative poems of ten great Victorian poets done into prose. By Harrison S. Morris, author of "In the Yule-Log Glow," etc. Three volumes. 16mo. Illustrated. Cloth, $3.00.

Tales from the Dramatists.

A series of entertaining stories taken from the leading plays of the most noted dramatic authors from Ben Jonson to the present day. By Charles Morris, author of "Half-Hours with the Best American Authors," etc. Four volumes. 16mo. Illustrated. Cloth, extra, $4.00; half polished calf or morocco, $8.00; three-quarters calf, gilt top, $10.00.

Recent Rambles; or, In Touch with Nature.

By Charles C. Abbott, M.D., author of "A Naturalist's Rambles about Home," "Outings at Odd Times," etc. 12mo. Cloth. With nineteen half-tone illustrations. $2.00.

The Dragon of Wantley.

His Rise, His Voracity, and His Downfall. A Romance. By Owen Wister. Illustrations by John Stewardson. 8vo, extra cloth, gilt top, $2.00.

The story deals with the old days of chivalry in England, and knights, monks, dragons, and crusades afford abundant material for a romantic tale. The illustrations are unique and full of humor.

Handy-Book of Literary Curiosities.

An indispensable reference-book of curious, quaint, and out-of-the-way information that has never before been collected in book form. By William S. Walsh, author of "Literary Life." Small 8vo. Uniform with Reader's Hand-Book. Half morocco, $3.50; three-quarters calf, $5.00.

The New Chambers's Encyclopædia.

The Latest, the Cheapest, the Best. New Type, New Subjects, New Illustrations, New Maps. Concise, simple, clear, accurate, and easy of reference. Twenty years later than any other encyclopædia in the market. Complete in ten volumes. Vols. I., II., III., IV., V., VI., VII., VIII., and IX. ready. Vol. X. ready in December. Specimen pages sent on application. Price, per vol., cloth, $3.00; sheep, $4.00; half morocco, $4.50.

Maid Marian and Robin Hood.

By J. E. Muddock. With twelve illustrations by Stanley L. Wood. 12mo. Cloth, $1.25.

"The threads of tradition and balladry are skilfully combined with those of invention, and the result is a pleasantly readable version of the adventures of the bold and merry outlaw and his merry followers. The introduction of Maid Marian as a chief character gives a fresh flavor to the whole."—*Boston Courier.*

For sale by all booksellers, or will be sent postpaid on receipt of the price.

J. B. LIPPINCOTT CO.,
PUBLISHERS,
715-717 Market St., Philadelphia.

A. C. McClurg & Co.'s New Books

France in the Nineteenth Century 1830–1890.

By Elizabeth W. Latimer. Handsomely Illustrated with 22 Portraits of Celebrated Characters. Crown 8vo, $2.50.

In this brilliant and absorbing narrative Mrs. Latimer has made history as fascinating as fiction; this is, indeed, the peculiar merit of her book. Possessing exceptional facilities for acquiring information she has brought to her task fine scholarship, ripe judgment, and a most engaging literary style. The rapidly changing and dramatic scenes of French history, from the fall of Napoleon Bonaparte to the fall of Boulanger, have never been more vividly portrayed than in this work. A very valuable feature of the work is the large number of excellent portraits which adorn its pages.

Sound and Music.

By the Rev. J. A. Zahm, C. S. C., Professor of Physics in the University of Notre Dame. Profusely illustrated. $3.50.

Few besides special students realize that within the past few years the wonderful discoveries made in the science of acoustics equal those made in electricity or chemistry. "The main purpose of this book," says the author in his preface, "is to give musicians and general readers an exact knowledge, based on experiment, of the principles of acoustics, and to present at the same time a brief exposition of the physical basis of musical harmony."

Prince Tip-Top.

A Fairy Tale. By Marguerite Bouvet, author of "Sweet William" and "Little Majorie's Love Story." Beautifully illustrated by Helen M. Armstrong. Small 4to, $1.25.

"Prince Tip-Top" is so utterly unlike either of Miss Bouvet's earlier books as to give her readers a genuine surprise. In this volume she has given loose rein to a merry and rollicking humor. It is a jolly and healthy little bit of opera bouffe for children, full of fun and go, with a happy adjustment of fairy machinery. Miss Armstrong has adorned it with a series of fascinating pictures.

The Children's Life of Abraham Lincoln.

By Louise M. Putnam. Beautifully illustrated by Helen M. Armstrong. $1.25.

No public man was ever more truly childlike, nor more readily understood by children, than Abraham Lincoln. The author has rendered a distinct service to children by writing this life of the "Martyred President," and by introducing numerous selections from Lincoln's writings has correctly gauged the power of his simple "English undefiled" to interest her youthful readers. Aside from its biographical value the book contains an admirable juvenile history of the Civil War.

A History of Modern Philosophy.

(From the Renaissance to the Present.) By B. C. Burt, A.M. 2 vols. $4.00.

The work is divided into three periods, which are subdivided into groups of authors. A brief biography of each author is given, followed by a list of his principal works and a summary of his philosophy and of his relation to the history of modern thought. The work is alone in its field, and is notable for accuracy of facts and summaries and for its perspicuous style.

References for Literary Workers.

By Henry Matson. Crown 8vo, $3.00.

The author has divided his work into twelve departments: History, Art, Political Economy, Literature, Science, etc. Each subject under these general heads is introduced by a vigorous synopsis which combines comprehensiveness of view with conciseness of statement. With each subject is given a very full bibliography. For writers and public speakers, and, in fact, for all who use works of reference, the book will be found to be almost indispensable.

Poetry of the Gathered Years.

Compiled by M. H. 16mo, $1.00.

The poems that make up this collection embody thoughts and reflections upon mature life and old age.

Valeria,

And Other Poems (including the Dedication Ode). By Harriet Monroe. $1.50.

"Valeria" has already won from well-known critics pronounced and cordial commendations. Miss Monroe has received wide recognition through her "Dedicatory Ode," read at the opening of the Columbian Exposition, which is included in this volume.

Some Rhymes of Ironquill of Kansas.

16mo, 187 pages, $1.00.

"The Rhymes of Ironquill" are as original as the verses of James Whitcomb Riley, while they reflect certain local traits of the greater West as faithfully as does "the Hoosier Poet" those of Indiana. The cordial praise of so discriminating a critic as W. D. Howells, and the sale, in other form, of thousands of copies of some of these poems attest their popularity.

Eleusis

And Lesser Poems. By William Rufus Perkins. 16mo, $1.00.

A year or two ago a little volume containing the remarkable poem of "Eleusis" was published anonymously in a private edition, and made a very marked impression in the limited circle where it was known. The author, encouraged to avow his creation, has revised and extended the poem; and it now appears with the addition of a dozen "Lesser Poems."

Cousin Phillis.

A Story of English Love. By Mrs. Gaskell. *Tales from Foreign Lands.* 16mo, gilt top, $1.00.

"Mrs. Gaskell," says George Sand, "has done what neither I nor any other female writer in France can accomplish; she has written novels which excite the deepest interest in men of the world, and which every girl will be the better for reading." "Cousin Phillis" is considered by many to be Mrs. Gaskell's best piece of work.

Marianela.

A Story of Spanish Love. Translated from the Spanish of B. Perez Galdos. By Helen W. Lester. *Tales from Foreign Lands.* 16mo, gilt top, $1.00.

This famous series of *Tales from Foreign Lands* has received a rich acquisition in this exquisitely beautiful and pathetic story by the great Spanish writer, whose refined fancy and literary charms half conceal his deep insight into human nature and his profound philosophy of life.

The Best Letters of Percy Bysshe Shelley.

Edited, with an Introduction, by Shirley Carter Hughson. *Laurel Crowned Letters.* 16mo, gilt top, $1.00.

Shelley's prose writings have been so eclipsed by the splendors of his poetry that thousands of his admirers are unaware that he was one of the masters of English prose form. To such this volume of his "Best Letters" will be a delightful revelation.

Other Things Being Equal.

A Novel. By Emma Wolf. 12mo, $1.00.

The unusual theme which George Eliot chose for treatment in "Daniel Deronda" has also been selected for this attractive novel, but with a very different solution of the race question involved. The book will have deep interest for Hebrew and Christian alike.

Thaddeus of Warsaw.

By Jane Porter. Finely printed and bound. 12mo, gilt top, $1.25.

This edition is uniform with that of "The Scottish Chiefs" and "The Children of the Abbey," published last year, which the Boston *Times* pronounced "beautifully bound, faultlessly printed, and thoroughly admirable editions."

For sale by booksellers generally, or sent, postpaid, on receipt of price by the Publishers,

A. C. McCLURG & CO., CHICAGO.

CHOICE GIFTS AT MODERATE PRICES.

VIGNETTE SERIES.

The publishers have spared neither pains nor expense to render the volumes in this remarkable series the most beautiful editions in existence of the works selected for publication.

Poems of Robert Browning.

His own selections. *Illustrated by* Thomas McIlvaine.

Poems of Mrs. Browning.

Illustrated by Frederick C. Gordon.

Aurora Leigh.

Illustrated by Frederick C. Gordon. This volume includes a few other of Mrs. Browning's Poems besides "Aurora Leigh," and with the preceding volume of the series forms her *complete works*. These volumes can be had boxed together, in cloth, half calf or half levant. They come separately in all the more expensive bindings referred to below.

Lady of the Lake.

Illustrated by Joseph M. Gleeson. *Mr. Gleeson visited Scotland for the purpose of making these illustrations, and his drawings have the value of great accuracy, as well as artistic merit.*

The standard works previously published in this popular series are: "Lucile," "The Princess, and Other Poems," "Faust," "Lalla Rookh," "Maud, and Other Poems," "A Treasury of Favorite Poems," "The Water Babies," "The Last Days of Pompeii," "The Arabian Nights' Entertainments," 2 vols, an l "Tennyson's Complete Poems," 2 vols.

Each is a remarkably beautiful 12mo volume, most profusely illustrated by new half-tone engravings after original designs made especially for the work. Many of the illustrations are full-page, and the remainder are of various sizes and odd shapes, and are set in the text in the French style, with wide margins.

"Orchid" or cloth binding, $1.00.

For a full description of choice bindings, varying from $3.00 to $5.00, and for a list of the volumes in this series that are offered in sets, in the orchid or a beautiful red and white binding, send for Descriptive Catalogue.

CAMEO SERIES.

Concerning Cats.

A book of poems with the cat as a subject, by many authors, selected by Graham R. Tomson. *With numerous illustrations by* Arthur Tomson. Thomas Gray, Cowper, John Gay, Matthew Prior, Heine and Edmund Gosse are among the authors represented in the collection.

A Chapter from the Greek Anthology.

By Richard Garnett.

The authors represented include Plato, Sophocles, Lucian, Lucillius, *and many other leading Greek writers.*

Each 1 vol., 12 mo, cloth, of peculiarly elongated shape on in an odd binding, $1.50; *De Luxe* edition, on Japan paper, $5.00.

Only twelve copies of each book in this beautiful edition were published for the American market.

THE LIFE AND ADVENTURES OF CHRISTOPHER COLUMBUS.

By Alexander Innes, M.A.

A short and concise history of the life of the great discoverer. It omits the unimportant details of his adventures, but gives every interesting fact in his career in a simple, continued narrative. In antique binding of a rich brown leather, tied with tape. Small 16mo, $1.00.

BISMARCK INTIME.

By a Fellow Student.

Translated from the German by Henry Hayward. This work does not aim to present a study of Bismarck as a statesman, but it depicts the "man himself." 12mo, red and black cloth, $1.00.

NEW VOLUMES BY POPULAR POETS.

Rings and Love-Knots.

By Samuel Minturn Peck, author of "Cap and Bells."

Some of Mr. Peck's sparkling verses have appeared in the magazines, but many of them are published now for the first time.

Wordsworth's Grave, and Other Poems.

By William Watson.

The entire edition of this popular work, as published in the Cameo Series, having been exhausted, a new edition, at a moderate price, has been printed in the standard 16mo Series of Poets, issued by Frederick A. Stokes Company.

Each of these works can be had in the cloth or orchid binding, at $1.00, or in more expensive bindings, at from $2.00 to $3.00.

The following volumes are offered in sets, in the new "forget-me-not" binding. Each set is in an attractive box.

The Poems of Thomas Gray and Wordsworth's Grave.
Lucile and Heine's Book of Songs.
Rab and Lamb's Tales from Shakespeare.
Hero and Hero Worship and Sartor Resartus.

With back and half sides of white vellum cloth, stamped with forget-me-nots in blue and gold, and with lettering stamped in an ornamental panel. With outer half sides of pale blue silk. Price, each volume, $1.25.

HOSPITALITY IN TOWN AND COUNTRY.

By the Author of "Good Form Cards," etc.

Full of valuable information as to the etiquette and best methods of entertaining guests either in town or country. 1 vol., 16mo, cloth, 75 cents.

THE THUMB SERIES.

Thumb Autograph Book.

On each page is a selection from some classical author, the rest of the page being blank for the autograph.

Thumb Birthday Book.

With quotations from the Bible for every day in the year.

The Tom Thumb Calendar, Diary, and Proverb Book.

With a proverb and a reference to some historical anniversary for every day in the year.

Each 64mo, cloth, red edges, 50 cents.

POEMS BY DOBSON, LOCKER, AND PRAED.

A collection of some of the most beautiful poems of Dobson, Locker, and Praed, illustrated by facsimiles of water-color designs by Maud Humphrey. With numerous vignette illustrations by various artists.

1 volume, 4to, gilt top, cloth or in an illuminated binding, $3.00.

Silk, attractively stamped with gold, in a box, $3.50.

THE BUNNY STORIES.

By John H. Jewett.

A collection of the famous Bunny Stories, which achieved such a wide popularity when originally published in *St. Nicholas*. With 66 illustrations by Culmer Barnes. Mr. Jewett's breezy descriptions of the adventures of the various members of the "Bunny" family are as popular as any tales for children published in recent years.

1 vol., 4to, in a beautiful and unique binding; cloth, with a frame enclosing white panel, on which appears the figure of Father Bunny, wearing a coat of brightcolor, $1.75.

FAIRY TALES.

Two charming books for children, by Maud Humphrey, the artist of "Maud Humphrey's Mother Goose," "Baby Sweethearts," etc.

1. Maud Humphrey's Book of Fairy Tales

A most attractive work, full of unique features and unquestionably one of the most beautiful books of the kind ever published. With 24 color-plates.

Large 4to, boards, with covers in colors, $2.50.

2. Favorite Fairy Tales.

This book is made up of selections from "Maud Humphrey's Book of Fairy Tales," and contains 13 colored plates.

Large 4to, boards, with covers in colors, $1.25

MASTERPIECES BY FRA ANGELICO.

Containing six exact reproductions, in smaller size, of the works of Fra Angelico. Highly finished, with backgrounds in burnished gold bronze. The pictures reproduced are: Mad onna della Stella, Gloria in Excelsis, Jubilate Deo, Cantate Domino, Te Deum Laudamus, and Laudate Dominum.

Large 4to, cloth, $2.50.

LIFE'S FAIRY TALES

By J. A. Mitchell, editor of "Life," and author of "The Last American."

A series of clever fairy tales, full of the quaint humor that marks Mr. Mitchell's writings. With numerous illustrations by Gibson, Johnson, Attwood, and others.

Fully as amusing as "The Last American," which was one of the most successful satires ever published in this country, and which is now in its eighth edition.

16mo, cloth, $1.00.

THE DAINTY SERIES.

The Little Garden of the Roses.

The Valley of Lilies.

By Thomas a Kempis.

Translations of hitherto almost unknown works by the author of "Of the Imitation of Christ."

The Story of the Crucifixion.

A Poem by William Mitchell.

A Story of the Resurrection, the Forty Days, and the Ascension.

Persian Tales from Various Sources.

With introduction, notes, and appendix by W. A. Clouston, author of "Popular Tales and Fiction."

These stories are taken, in the most part, from scarce old Indian publications, and have never been printed in the United States.

Counsels; Civil and Moral, from My Lord Bacon.

By James M. Mason, M.D.

Selected chiefly from the Essays and Apothegms of Lord Bacon.

A Ministering Angel and How to Become One.

By the Rev. J. Hiles Hitchins, D.D.

Dr. Hitchins in this book aims to describe what the pure-minded and noble-minded women of the world have accomplished.

Each 32mo, with red-line borders. With a beautiful enamel binding, and in addition there is a dainty cover for each book, of white figured lining, $1.00.

CALENDARS AND NOVELTIES.

The finest line of Calendars ever offered. Forty-five varieties to choose from, ranging in price from 15 cents to $3.00, and including fac-similes of water-color designs by such well-known artists as Maud Humphrey, Francis Day, H. W. McVickar, and Percy and Leon Moran; also cut-out Calendars of all kinds, with odd and humorous designs, and metal and leather frame calendars.

Also a choice line of Christmas and Birthday Cards, Photograph Frames, Penwipers, and Card Cases. Send for Descriptive Catalogue.

ART DEPARTMENT.

Exquisite fac-similes of new water-color sketches by Maud Humphrey. Also examples of the work of Francis Day, H. W. McVickar, J. M. Barnsley, Percy and Leon Moran, Walter Palmer, and other well-known artists.

Send for Descriptive Catalogue. *On receipt of ten cents, two colored* plates *and a* catalogue *will be sent to any address. On receipt of advertised price, any publication will be sent to any address (at the publisher's expense). Mention* The Nation.

FREDERICK A. STOKES COMPANY,

29 West 23d Street, New York City.

BEAUTIFUL GIFT BOOKS.

The Song of the Ancient People.

A noteworthy poem by EDNA DEAN PROCTOR, expressing with admirable insight and force the thoughts and emotions of the Zuñi Indians, as they realize their condition, once so proud, now so pitiful; with an introduction by JOHN FISKE, and eleven superb full-page illustrations by JULIAN SCOTT, reproduced in colors. Artistically printed and bound. 8vo, $5.00. [*Nearly ready.*]

In the Levant.

By CHARLES DUDLEY WARNER, author of "My Summer in a Garden," "Backlog Studies," "My Winter on the Nile," etc. New Holiday Edition. With a new portrait of Mr. Warner, and about twenty-five full-page photogravures, decorative head-pieces, and initials. Bound in attractive style, from Mrs. WHITMAN'S designs. 2 vols., 12mo, $5.00.

Two beautiful volumes, much like the Holiday Edition of the "Marble Faun."

At Sundown.

A beautiful volume containing the last poems by JOHN GREENLEAF WHITTIER. With portrait and eight photogravures from designs by E. H. GARRETT. Very tastefully bound in white and gold, from designs by Mrs. HENRY WHITMAN. 16mo, gilt top, $1.50.

Dorothy Q.

A BALLAD OF THE BOSTON TEA-PARTY, AND GRANDMOTHER'S STORY OF BUNKER HILL BATTLE. By OLIVER WENDELL HOLMES. With a portrait of Dorothy Q., and with profuse illustrations and decorative borders for the text, with head and tail-pieces, by HOWARD PYLE. Bound from designs by Mrs. HENRY WHITMAN. Crown 8vo, $1.50.

An exquisite book, full of delightful pictures of Colonial and Revolutionary life, and beautiful decorative borders on almost every page.

A Wonder Book for Girls and Boys.

By NATHANIEL HAWTHORNE. Splendidly illustrated in colors by WALTER CRANE. Containing twenty exquisite full-page pictures in colors, with about forty head-pieces, tail-pieces, and initials, also in color. Beautifully bound, 8vo, $3.00.

In every respect—paper, typography, binding, and above all, in illustrations, this is probably the most beautiful and artistic holiday book ever produced in America.

Pagan and Christian Rome.

By RODOLFO LANCIANI. A companion volume to his "Ancient Rome in the Light of Recent Discoveries," covering the first five centuries of the Christian Era, and describing the transformation of the Rome of the Emperors into the capital of Christendom. Fully illustrated. Square 8vo, $6.00.

Complete Poetical Works of Shelley.

New *Centenary Edition*. Edited, with introductory Memoir, by GEORGE E. WOODBERRY, Professor of Literature in Columbia College. With a fine new portrait. 4 vols. Crown 8vo, gilt top, $7.00.

This is the most complete and most desirable library edition yet published of Shelley's works.

The Old English Dramatists.

A volume of delightful lectures by JAMES RUSSELL LOWELL. Crown 8vo, uniform with the Riverside Edition of Lowell's Works; also 16mo, in fancy binding, $1.25 each.

The Nature and Elements of Poetry.

By EDMUND CLARENCE STEDMAN, author of "Victorian Poets" (*21st edition*), "Poets of America (*11th edition*), etc. With a photogravure of Dürer's Melencolia for a frontispiece, a Topical Analysis in the margin, and a full Analytical Index. 1 vol. Crown 8vo, $1.50.

This volume completes Mr. Stedman's masterly treatment of poetical literature, and is of the same high order as his "Victorian Poets" ($2.25) and "Poets of America" ($2.25).

Land of the Lingering Snow.

CHRONICLES OF A STROLLER IN NEW ENGLAND FROM JANUARY TO JUNE. By FRANK BOLLES, Secretary of Harvard University. *Third edition*. 16mo, $1.25.

"He is a good observer and a good describer."—*New York Nation.*

Three Episodes of Massachusetts History.

A work of remarkable interest and historic value on the settlement, religious dissensions, and development of town government, in early Massachusetts, by CHARLES FRANCIS ADAMS, author of "Richard Henry Dana," etc. With two Maps. 2 vols. Crown 8vo, gilt top, $4.00.

The Eve of the French Revolution.

By EDWARD J. LOWELL. 8vo, $2.00. "A book of conspicuous ability and interest," says *The Scotsman;* and *The Examiner* of New York adds that "a better exposition of the proximate causes of the Revolution, and a more trustworthy account of the political and social institutions of the age that preceded it, need not be desired."

France Under the Regency.

With a Review of the Administration of Louis XIV. By JAMES BRECK PERKINS, author of "France under Richelieu and Mazarin." Crown 8vo, $2.00. A very careful study of a most interesting period of French history, treating of France in the Eighteenth Century, Wars with Spain and Holland, Colbert, Louis the Great, The Revocation of the Edict of Nantes, The Mississippi Company and its Failure, The Morals of the Regency, and many other important topics.

Phases of Thought and Criticism

By BROTHER AZARIAS, author of "The Development of English Thought." 16mo, $1.50.

CONTENTS: Fourfold Activity of the Soul; On Thinking; Emerson and Newman as Types; The Principle of Thought; Literary and Scientific Habits of Thought; The Ideal in Thought; Culture of the Spiritual Sense; Spiritual Sense of *The Imitation* (of Christ); Spiritual Sense of the *Divina Commedia;* Spiritual Sense of *In Memoriam.*

Brother Azarias is one of the most eminent scholars and persuasive writers among American Catholics. This book cannot fail to interest and charm its readers.

Historical and Political Essays.

Eight vigorous essays on Seward, Madison, Morris, and important political subjects, by HENRY CABOT LODGE, author of "Studies in History," and of "George Washington," "Alexander Hamilton," and "Daniel Webster," in the American Statesmen Series. Crown 8vo, $1.25.

Prose Idyls.

A tasteful little volume of short essays, full of engaging thoughts and fancies which might have been clothed in verse, but are presented in delicate prose, by JOHN ALBEE. Artistically printed. 16mo, $1.25.

Autumn.

A book of nice observation and varied interest. Selected from the Journals of H. D. THOREAU. Edited by H. G. O. Blake. 12mo, gilt top, $1.50.

The Foot-Path Way.
Birds in the Bush.
A Rambler's Lease.

Three delightful out-door books, full of interesting observations, and charmingly written, by BRADFORD TORREY. $1.25 each.

Children's Rights.

By KATE DOUGLAS WIGGIN, author of "The Birds' Christmas Carol," "Timothy's Quest," etc. $1.00.

A very bright, sensible book discussing The Rights of the Child, Children's Plays, What shall Children Read, and other important topics.

As It Is in Heaven.
The Unseen Friend.
At the Beautiful Gate.

Three books by LUCY LARCOM, religious in subject, cheerful in tone, delightful to read, and of the finest quality every way. The last is a book of exquisite religious lyrics. Price, $1.00 each.

Spare Hours.

By JOHN BROWN, M.D. New Edition, with a fine portrait. 3 vols. 16mo, $3.00.

This is an attractive edition of books containing some of the wisest and most delightful essays in English literature—Rab and His Friends, Marjorie Fleming, Jeems the Door-Keeper, Our Dogs, John Leech, etc.

An American Missionary in Japan.

A positive and very interesting contribution to our knowledge of the social and religious development of Modern Japan. By Rev. M. L. GORDON, for twenty years a missionary in that country. $1.25.

*** *For sale by all Booksellers. Sent, postpaid, on receipt of price, by the Publishers.*

HOUGHTON, MIFFLIN & CO., Boston, 11 East 17th St., New York.

MACMILLAN & COMPANY'S
NEW AND ILLUSTRATED BOOKS.

8vo, Illustrated, $4.00.

THE MEMORIES OF DEAN HOLE.

Including Archers, Artists, Authors, Cricketers, Ecclesiastics, Gamblers, Gardeners, Hunters and Shooters, Oxonians, Preachers, and Workingmen. With Illustrations from original sketches by LEECH and THACKERAY. 8vo, $4.00.

"Dean Hole is clearly an anecdotist ready made. . . . He is not only the famous rose-growing parson, but a hunting parson, a cricketing parson, a shooting parson, and a playgoing parson, but at the same time one who never forgets that he is parson and a Christian."—*Daily News.*

SOCIAL LIFE IN ENGLAND
FROM THE RESTORATION TO THE REVOLUTION, 1660–1690.

By WILLIAM CONNOR SYDNEY, author of 'England and the English in the Eighteenth Century.' 12mo, cloth, $2.50.

A NEW BOOK BY THE REV. STOPFORD A. BROOKE.

THE HISTORY OF EARLY ENGLISH LITERATURE.

By the Rev. STOPFORD A. BROOKE. Uniform with Bryce's 'American Commonwealth.' With Map. Large 12mo, $2.50.

Just Published. 12mo, cloth, gilt, $2.25.

STUDENT AND SINGER.

Reminiscences of CHARLES SANTLEY. Written by himself. With two portraits. 12mo, cloth, gilt, $2.25.

"He has many things to tell of various great singers, and not one that is unpleasant. In the most trying circumstances he has a lively anec ote to amuse the reader. In fact, his good humor is unfailing. A special value is given to his book by his advice to young singers, and we recommend all who have any true ambition to read what he says carefully."—*Evening Bulletin.*

ECHOES OF OLD COUNTRY LIFE.

Being Recollections of Sport, Society, Politics, and Farming in the Good Old Times. By J. K. FOWLER. 12mo, cloth. *Just Ready.*

THE BEAUTIES OF NATURE
AND THE WONDERS OF THE WORLD WE LIVE IN.

By the Right. Hon. Sir JOHN LUBBOCK, M.P., F.R.S., LL.D., author of 'The Pleasures of Life.' With numerous Illustrations and many full-page Plates. 12mo, cloth, $1.50.

"He writes charmingly, even poetically at times. The beauties of nature that he finds are often strange phenomena. But he makes them intelligible and agreeable reading for the unscientific."—*Evening Bulletin.*

"In this pleasant volume Sir John Lubbock talks in a familiar yet always accurate manner of the wonders of animal life, of plant life, and of the woods and fields, telling not merely the dry scientific facts, but the poetic associations and suggestions that surround them. Many illustrations adorn the volume, which make it as attractive as it is useful."—*Philadelphia Times.*

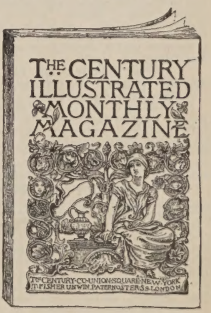
RANCH LIFE AND THE HUNTING TRAIL. By THEODORE ROOSEVELT. Illustrated by REMINGTON. Royal quarto, richly bound, $5.00.

THE BROWNIE BOOKS. By PALMER COX. "The Brownies: Their Book," and "Another Brownie Book." 60,000 sold. Each, $1.50.

LADY JANE. By Mrs. C. V. JAMISON. A children's classic. Illustrated by BIRCH. $1.50.

THE CENTURY MAGAZINE.



No region is too remote, no labor too great, no expense too much, if it will only produce what THE CENTURY's readers want. This is the policy that has made it, as the *Pall Mall Budget* (London) says: "By far the best of the magazines, English or American."

The December—Christmas Number—ready December 1st, will be a beautiful holiday issue—entertaining, richly illustrated, and bound in a specially-designed cover in green and gold. It will contain: SEVEN COMPLETE STORIES. By THOMAS NELSON PAGE, EDWARD EGGLESTON, F. HOPKINSON SMITH, GRACE KING, and others.

PAPERS ON BROWNING AND JENNY LIND. With Portraits.
LEAVES FROM THE AUTOBIOGRAPHY OF SALVINI. Illustrated.
First Chapters of "BENEFITS FORGOT." A Novel by WOLCOTT BALESTIER.
WAR CORRESPONDENCE AS A FINE ART. By ARCHIBALD FORBES. With Illustrations.
PICTURESQUE NEW YORK. Illustrated.
THE PROBLEM OF POVERTY—SCIENCE AND THE BIBLE. Two Serious Papers.
THE MADONNAS OF DAGNAN-BOUVERET, AND OTHERS. Sacred Pictures by famous artists.
POEMS. By THOMAS BAILEY ALDRICH, JAMES WHITCOMB RILEY, JOHN HAY, FRANK DEMPSTER SHERMAN, RUDYARD KIPLING, RICHARD WATSON GILDER, and others.

For sale by all newsdealers, price, 35 cents. A year's subscription costs $4.00. *Prospectus mailed free on application.*

ST. NICHOLAS, for Young Folks.

ALWAYS THE BEST of Children's Magazines, and better now than ever. The poet Whittier—himself an occasional contributor to its pages—said: "It is little to say of ST. NICHOLAS that it is the best child's periodical in the world." The features of the new volume, which began with the November number, include

A SERIAL STORY. By KATE DOUGLAS WIGGIN, author of "The Bird's Christmas Carol," "Timothy's Quest," etc.

THE WHITE CAVE. A serial story of Australia. By W. O. STODDARD.

TOINETTE'S PHILIP. A serial story, by Mrs. C. V. JAMISON, author of "Lady Jane."

GREAT AMERICAN CITIES. A series of Illustrated Papers describing the principal cities of the United States.

And other features too numerous to be mentioned here.

Among the writers who will contribute to ST. NICHOLAS during the coming year are RUDYARD KIPLING, FRANCES HODGSON BURNETT, FRANK R. STOCKTON, MARY HALLOCK FOOTE, POULTNEY BIGELOW, SUSAN COOLIDGE, NORA PERRY, HOWARD PYLE, and many other well-known writers.

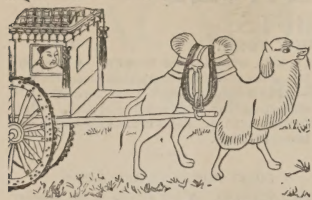
"Place ST. NICHOLAS in your household," says the *School Journal*, "and you need have no fear of the lessons taught your children."

Subscription price, $3.00 a year; single numbers, 25 cents.

All booksellers and newsdealers take subscriptions, or remittance may be made direct to the publishers by check, money-draft, or express-order, or registered letter. BEGIN WITH NOVEMBER.

THE CENTURY CO., 33 East 17th Street, New York.

REVELL'S NEW BOOKS



A MONGOL CAMEL CART. (*From a Native Sketch.*)

JAMES GILMOUR OF MONGOLIA.

His Diaries, Letters, and Reports. Edited and arranged by RICHARD LOVETT, M.A. With three portraits and other illustrations. 8vo, cloth, gilt top, $1.75.

"There are few more pathetic books in the literature of missions. James Gilmour had a genuine literary gift, and a shrewd Scotch humor, which impart a certain charm of vividness and reality to his narrative of his experiences. He stands out everywhere as a man of strong character and firm convictions."—*S. S. Times.*

JOHN G. PATON:

Missionary to the New Hebrides. An Autobiography, edited by his brother. With introduction by Rev. A. T. Pierson, D.D. Fully illustrated from original pen-and-ink sketches drawn by Charles P. Davis and others. *A new and cheaper edition.* Unabridged. 2 vols., boxed, 12mo, cloth, gilt top, net, $2.00.

"The appearance of another edition gives occasion for fresh words of welcome for what has become a Christian classic since its earliest issue in 1889. Few of current publications that are sold by thousands upon thousands have in their pages the import and the fascination that stamp nearly every page in these."—*Christian Union.*

WELSH PICTURES:

Drawn with Pen and Pencil. By D. LEWIS JONES and others. Edited by Richard Lovett, M.A. With many illustrations. Imperial 8vo, cloth, gilt edges, boxed, $3.20.

"'Welsh Pictures' is the work of ten Welshmen, among whom illustrating the beauties of Wales has become a Christian classic since its earliest issue in 1889. Few of current publications that are sold by thousands upon thousands have in their pages the import and the fascination that stamp nearly every page in these."—*Christian Union.*

TEN YEARS' DIGGING IN EGYPT:

1881–1891. By W. M. FLINDERS PETRIE. With maps and 116 illustrations from drawings by the author. 12mo, cloth, $1.50.

"A popular summary of the results attained by one of the most capable and successful of the modern explorers of Egypt. He tells his story so well and so instructively, and it is so well worth telling, that his little book will doubtless command the wide popularity that it certainly deserves."—*The London Times.*

THE STORY OF UGANDA,

And the Victoria Nyanza Mission. By S. G. STOCK. With illustrations. 12mo, cloth, $1.25.

"The Story of Mackay is given with fullness and power; there are added also the stories of the martyr Bishop Hannington and his fateful journey, and of Bishops Parker and Tucker, of the other mission, together with a sketch of these missions under the brutal King Mwanga since Mackay's untimely death."—*The Golden Rule.*

HENRY MARTYN:

Saint and Scholar. First Modern Missionary to the Mohammedans. 1781–1812. By GEORGE SMITH, C.I.E., LL.D. Large 8vo, cloth, gilt top, $3.50.

Dr. Smith has, with the skill already displayed in his life of Carey and Duff, produced in this volume what will, in all probability, become the standard life of Henry Martyn.

THE AINU OF JAPAN.

The Religion, Superstitions, and General History of the Hairy Aborigines of Japan. By Rev. JOHN BATCHELOR. With 80 illustrations. 8vo, cloth, $1.50.

"Mr. Batchelor's book is valuable as being the first which treats at any length of this strange people."—*Pall Mall Gazette.*

KIN-DA-SHON'S WIFE.

An Alaskan Story. By Mrs. EUGENE S. WILLARD. With illustrations. 8vo, cloth, $1.50.

"Being a close observer and in deep sympathy with the native population, Mrs. Willard has gained a more intelligent knowledge of their character, of their needs and hindrances, than perhaps any other person."—*Dr. Sheldon Jackson.*

THE LONDON DAILY PRESS.

By H. W. MASSINGHAM. Profusely illustrated. 12mo, cloth, $1.00.

Very welcome to all who like to look behind the scenes and see how the great London dailies are worked.

For sale by all booksellers, or sent postpaid on receipt of price by the publishers.

Fleming H. Revell Company,

NEW YORK, 30 Union Square, East.
CHICAGO, 148–150 Madison Street.

Parkman's Oregon Trail.

ILLUSTRATED BY REMINGTON.

The Oregon Trail. Sketches of Prairie and Rocky Mountain Life, by the Eminent Historian, Francis Parkman. A New Holiday Edition, with 77 Pictures by the Celebrated Artist, Frederic Remington. 8vo. Decorated Leather or Cloth, Extra, $4.00.

This ever popular book for young and old describes a journey among the Indian Camps and the Rockies by the eminent historian in 1847. Its vivid descriptions of a condition of country and of Indian life now passed away are made still more fascinating by Mr. Remington's striking pictures of Indian settlements, camps, implements, buffalo hunts, trappers, etc.

"For *fascinating interest and picturesque and romantic descriptions it is of unsurpassed power*, and gives the reader of to-day a vivid idea of what that vast and magnificent region of our country, now under the sway of civilization, was only fifty years ago. . . . The author has found *a powerful helper in the pencil of the distinguished artist, Frederic Remington.*"—*Boston Home Journal.*

"One of the handsomest volumes recently published, as well as one of entrancing interest. . . . It is *exquisitely illustrated by Frederic Remington.*"—*Chicago Herald.*

"This superb new edition, *illustrated by the artist who has got nearest to the truth of Indian life, and who, as Mr. Parkman says, 'knew the prairies and the mountains before irresistible commonplace had subdued them,'* will secure it *a permanent place* in every American library."—*Philadelphia Times.*

"The book is one which *should be given to the half-grown boys all over the land.* They will like it, and it is *most healthy reading* for them."—*Boston Courier.*

A NEW BOOK FOR GIRLS, BY A FAVORITE AUTHOR.

A Rosebud Garden of Girls.

BY NORA PERRY.

Author of "Another Flock of Girls," and other Popular Books. Illustrated by F. C. Gordon. 12mo, Cloth, extra, $1.50.

"For entertainment and thorough wholesomeness *Nora Perry's books for girls have never been excelled.*"—*Boston Advertiser.*

"Girls large and small will enjoy her stories."—*Public Opinion.*

"As *graceful*, as *delicate*, and as *winning* as the heart of the most exacting girl could wish."—*Boston Courier.*

"The style of writing is *above the average of books usually written for girls.* It is *strong and picturesque;* the characters *act with naturalness.*"—*New York Observer.*

"*An attractive title, an attractive binding, and within the covers entertaining stories.*"—*Boston Beacon.*

"*Will hardly be surpassed* by any of this season's books for young people."—*Detroit Tribune.*

"*Full of help for young people, and most agreeable reading withal.*"—*The Congregationalist.*

LITTLE, BROWN & CO.,

PUBLISHERS,

254 Washington Street, Boston.

Charles Scribner's Sons' IMPORTANT NEW BOOKS

The Children of the Poor

By JACOB A. RIIS, author of "How the Other Half Lives." Illustrated. 12mo. $2.50.

"Most delightful reading. Mr. Riis knows what he is talking about, and what is more he knows how to tell in a most delightful way what he has seen."—DR. A. F. SCHAUFFLER, *Vice-Pres't of New York City Mission Society.*

"The book is a model of what such writing should be—explicit, straightforward, full of plain facts and personal impressions, and free from sentimentality."—*Nation.*

Bernard of Clairvaux

The Times, the Man, and His Work. A Historical Study. By RICHARD S. STORRS, D.D., LL.D., L.H.D. 8vo. $2.50.

A vivid portrait of Bernard and an equally important picture of his times. It is altogether historical, not dogmatic or sectarian, and it will have a special value for general readers, as shedding new light upon an important but unfamiliar period of history.

"It is a sympathetic and eloquent portrayal by a living preacher, himself justly eminent, of one of the greatest preachers of the Roman Communion and of the age on which his impress was stamped."—Prof. G. P. FISHER.

Marse Chan

By THOMAS NELSON PAGE. *New Edition.* Illustrated by W. T. Smedley. Square 12mo. $1.50.

"The best short story ever written by an American, and eminently worthy the dainty dress in which it now appears. Mr. Smedley's drawings are spirited and sympathetic."—*Philadelphia Press.*

"Brought out in superb holiday form. Mr. Smedley has caught precisely the spirit of the text. The delicacy and truthfulness of his touch have been well brought out."—*Boston Beacon.*

Spanish Cities

With Glimpses of Gibraltar and Tangier, By C. A. STODDARD, D.D., Editor of *N. Y. Observer.* Illustrated. 12mo. $1.50.

"There are few books more entertaining than this. Dr. Stoddard is a natural traveller, sees everything worth seeing, and describes admirably. His style is direct, easy, and graceful. His descriptions are concise yet clear, and markedly elegant."—*Chicago Inter-Ocean.*

"He has mastered the art of writing books of travel. He fulfils the ideal of a delightful companion whose conversation has informing qualities without being tedious, and whose style has sparkle without froth."—*N. Y. Tribune.*

New Catalogue No. 33 will be mailed to any address
GEORGE P. HUMPHREY,
25 Exchange St., Rochester, N. Y.

G. P. Putnam's Sons,

NEW YORK AND LONDON,

HAVE NOW READY:

Japan in Art and Industry.

With a Glance at Japanese Manners and Customs. Translated from the French of Felix Régamy by M. French-Sheldon and Eli Lemon Sheldon, 12mo, fully illustrated, $1.75.

"It abounds in instruction, brief, precise, and decisive, on the crafts, industries, conditions of labor, and processes of manufacture. . . . His pen is vivid, alert, and picturesque. On the other hand his drawings have so much *verve* and so much character that they might almost suffice of themselves and might be said to be speaking. Text and drawings thus form an *ensemble* of a very unique value, as agreeable as truly practical."—*Extract from Report of the Société de Géographie Commerciale de Paris.*

Lyrics and Ballads of Heine, Goethe, and Other German Poets.

Translated by Frances Hellman. 16mo.

Heine's verse, on the other hand, is distinctive by its charm, its melody, and grace of fancy. Mrs. Hellman's thorough knowledge of German and English, her keen sympathy with the feeling of the poet, and her command of graceful expression and of versification will, it is believed, secure for her rendering of the "Lyrics" the cordial appreciation of lovers of poetry and of Heine.

The Wit and Wisdom of Charles Lamb,

comprising Selections from Lamb's Letters and Essays, together with anecdotes by his friends, culled from various sources. (No. XXXIX in the Knickerbocker Nuggets Series.) Compiled by ERNEST DRESSEL NORTH. With portrait from a drawing by Hancock in 1798, in the possession of Mr. Cottle. $1.00.

*** 150 copies will be printed on Large Paper with Proof of the Portrait. $3.75.

NEARLY READY:

John Wyclif.

Last of the Schoolmen and first of the English Reformers. By LEWIS SERGEANT (No. 7 in the Heroes of the Nations Series). (Nearly ready.) Large 12mo, fully illustrated, cloth, $1.50; half leather, gilt top, $1.75.

Shirley says of Wyclif: "It was less the Reformer or the master of English prose than the *great Schoolman* that inspired the respect or his contemporaries; and, next to the deep influence or personal holiness and the attractive greatness of his moral character, it was to his supreme command of the weapons of scholastic discussion that he owed his astonishing influence."

The Writings of Thomas Jefferson.

Edited by PAUL LEICESTER FORD. Uniform with the sets of the writings of "Hamilton" and "Franklin." To be complete in 10 vols. Volume I. nearly ready. 8vo, half-leather, gilt tops, per volume, $5.00.

Limited edition, 750 copies, printed from type.

Of the writings of the American statesmen of the Revolutionary and constitutional periods, none possess greater interest than those which were the work of Thomas Jefferson. The individuality of the man, the important part borne by him in the events of his time, and still more the political principles originated or supported by him, give to the productions of his pen a value for the statesman, the lawyer and the historian.

*** Notes on New Books, Vol. III., No. 3, a quarterly bulletin and prospectus of the Knickerbocker Nuggets and Story of the Nations Series, sent on application.

LONGMANS, GREEN & CO.'S LIST.

FIFTY YEARS IN THE MAKING OF AUSTRALIAN HISTORY. By Sir HENRY PARKES, K.C.M.G., Premier of New South Wales, 1872–5, 1877, 1878–9. With two Portraits. 8vo, $5.00. *[Immediately.]*

THE RUINED CITIES OF MASHONALAND; Being a Record of Excavation and Exploration in 1891. By J. THEODORE BENT, F.S.A., F.R.G.S. With a chapter on the ORIENTATION and MENSURATION of the TEMPLES, By R. M. W. SWAN. With 5 Maps and Plans, 13 Plates, and 104 Illustrations in the Text. 8vo, $5.00. *[Immediately.]*

ESSAYS AND ADDRESSES: Lectures on Buddhism—Lectures on the Life of St. Paul—Papers on Dante. By HENRY PARRY LIDDON, D.D., D.C.L., LL.D., late Canon and Chancellor of St. Paul's. Crown, 8vo, $1.50.

THE SECOND VOLUME OF DR. BOYD'S REMINISCENCES.

SECOND EDITION NOW READY.

TWENTY-FIVE YEARS OF ST. ANDREWS, 1865-1890. By the Very Rev. A. K. H. BOYD, D.D., LL.D., First Minister of St. Andrews, author of 'The Recreations of a Country Parson.' 2 vols., 8vo. Vol. I., Third Edition, $3.00; Vol. II., Second Edition, $3.00.

"Abounds in stories . . . Wherever he may be, A. K. H. B. carries his individuality with him, and is always in the very best of company, both clerical and lay."—*Daily News.*

A SELECTION FROM THE LETTERS OF GERALDINE ENDSOR JEWSBURY to JANE WELSH CARLYLE. Edited by Mrs. ALEXANDER IRELAND, author of 'The Life of Jane Welsh Carlyle,' and Prefaced by Monograph on Miss Jewsbury by the Editor. 8vo, $5.00

"Charming letters—not a page is dull. For lightness of touch, for easy versatility of mood—they may compare—and this is high praise—with Mrs. Carlyle's own. Above all, they have the rare and precious quality of being entertaining."—*Standard.*

LETTERS TO YOUNG SHOOTERS SECOND SERIES. On the Production, Preservation, and Killing of Game. With directions in Shooting Wood Pigeons and Breaking in Retrievers. By Sir RALPH PAYNE-GALLWEY, Bart. With Portrait of the Author and 103 Illustrations. Crown 8vo, $3.50.

FIRST SERIES—ON THE CHOICE AND USE OF A GUN. With numerous Illustrations and Diagrams. Crown 8vo, $2.50.

THE TOILERS OF THE FIELD. By RICHARD JEFFERIES, author of 'Field and Hedgerow,' etc. With a Portrait from the Bust in Salisbury Cathedral. Crown 8vo, $2.00.

*** The first and larger part of this volume, from which it takes its name, consists of papers which will be new to the large majority of readers of Richard Jefferies' works. The "True Tale of the Wiltshire Laborer" has never previously been published.

BUDDHISM—PRIMITIVE AND PRESENT IN MAGADHA AND IN CEYLON. By REGINALD STEPHEN COPLESTON, D.D., Bishop of Colombo, President of the Ceylon Branch of the Royal Asiatic Society. 8vo, pp. xv.-502, $5.00.

SAINT PETER AND THE FIRST YEARS OF CHRISTIANITY. By the Abbé CONSTANT FOUARD. Translated from the Second Edition, with the Author's sanction, by GEORGE F. X. GRIFFITH. With an introduction by CARDINAL GIBBONS. With 3 Maps. Crown 8vo, cloth, gilt top, $2.00.

MR. ANSTEY'S NEW BOOK.

VOCES POPULI. SECOND SERIES Reprinted from *Punch*. By F. ANSTEY, author of 'Vice Versa,' etc. With 25 Illustrations by J. BERNARD PARTRIDGE. Post 4to, $1.75.

BY THE SAME AUTHOR.

VOCES POPULI. FIRST SERIES. With 20 full-page illustrations, by J. BERNARD PARTRIDGE. Post 4to, $1.75.

"Capable of affording lasting amusement, and some of these mirth-provoking scenes and dialogues are well adapted to being acted on the private stage. The book is beautifully made."—*The Nation.*

THE TRAVELLING COMPANIONS: A STORY IN SCENES. Reprinted from *PUNCH*. By F. ANSTEY, author of 'Vice Versa,' etc. With 26 Illustrations by J. BERNARD PARTRIDGE. Post 4to, $1.75.

"A bright little comedy reprinted from *Punch*. The persons engaged are several tourists, who, by chance or otherwise, meet at various places on the Continent. The characteristics of the several nationalities represented are happily shown, and the dialogue is vivacious and entertaining. The illustrations are exceedingly good and add to the humor of the scenes. The whole is a sparkling bit of nonsense and makes capital reading for the lazy hour."—*Public Opinion.*

NEW NOVELS.

THE NEW EDEN: A STORY. By C. J. CUTCLIFFE HYNE. With Frontispiece and Vignette. Crown 8vo, cloth, $1.00.

"An original and in many respects a charming book. Mr. Hyne has treated his difficult theme with admirable literary dexterity and with fine imaginative power."—*Glasgow Herald.*

AFTER TWENTY YEARS; AND OTHER STORIES. By JULIAN STURGIS, author of 'Thraldom,' 'John Maidment,' etc. Crown 8vo, cloth, $1.00.

THE ONE GOOD GUEST. A NOVEL. By L. B. WALFORD, author of 'Mr. Smith,' 'The Baby's Grandmother,' 'A Mere Child,' etc., etc. 12mo, cloth, $1.00.

"It is a delightful picture of life at an English estate, which is presided over by a young 'Squire' and his young sister. Their experiences are cleverly told, and the complication which arise are amusing and interesting."—*Boston Times.*

For sale by Booksellers. Sent, postpaid, on receipt of price by the Publishers,

LONGMANS, GREEN & CO., 15 East 16th St., New York.

Remington Typewriter.

THE history of the Remington shows a steadily rising tide of popularity and success. It is absolutely unrivalled for all the essential qualities of a first-class writing machine.

In 1880, five years after the first Remington Typewriters regularly made by machinery were first put upon the market, only 1,000 machines had been sold. The public were slow to realize the value of the invention.

By 1882 the number had increased to 2,300 machines.

In 1885 Five Thousand machines were sold.

In 1890 sales had increased to 20,000 machines per annum.

In 1892 we find our standing orders to our factory for 100 machines per day inadequate to meet the constantly increasing demand.

A rich selection of fine German Books for Christmas presents. Catalogues on application.

A Famous Battery and Its Campaigns, 1861–'64.

By JAMES E. SMITH, Late Captain 4th Independent Battery, New York Volunteer Light Artillery.

A new book about a battery which distinguished itself in many hard fought battles, and won glory and renown in the great Gettysburg conflict, where it held the crest of Devil's Den for three long hours against the flower of Lee's army. The history of this battery, from the Peninsula to Gettysburg, is the history of the war in the East, and it is told modestly but thrillingly by Capt. Smith, and substantiated by official reports of both Union and Confederate officers, as well as personal reminiscences of participants from other organizations.

12mo, cloth, 237 pages. Postpaid, $1.00.

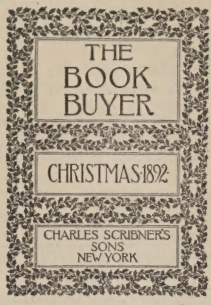
THE HANDSOMEST CHRISTMAS ANNUAL ISSUED.



SEND TEN CENTS FOR THE CHRISTMAS BOOK BUYER

It is the most beautiful literary annual published. Between its covers of gold, salmon, and brown will be found a full review of the holiday books of 1892. More than 90 of the richest illustrations from the leading works are given, making of the number a complete and handsome *résumé* of illustrated holiday literature.

Famous writers will contribute special articles and signed reviews to the number. The list of writers will include:

Prof. Charles Eliot Norton, Thomas Nelson Page, Kate Douglas Wiggin, Octave Thanet, Robert Grant, Hamlin Garland, Hamilton W. Mabie, Thomas A. Janvier, Noah Brooks, Rossiter Johnson.

The illustrations will be by the following eminent artists:

Frederic Remington, Thomas Cole, Walter Crane, R. B. Birch, H. W. McVickar, F. D. Millet, W. T. Smedley, Howard Pyle, Edmund H. Garrett, W. Hamilton Gibson, Alfred Parsons, R. F. Zogbaum, Emile Bayard, Joseph Pennell,

FROM THE NEW YORK TRIBUNE:

"There is not in America or in England a more comprehensive, tasteful, and suggestive aid to the buying of books than is this handsome little periodical."

CHARLES SCRIBNER'S SONS, 743-745 Broadway, New York.

The Nation

VOL. LV—NO 1432. THURSDAY, DECEMBER 8, 1892. PRICE 10 CENTS.

BOOKS FOR THE HOLIDAYS.

ILLUSTRATED EDITION OF

An Attic Philosopher in Paris.

OR, A PEEP AT THE WORLD FROM A GARRET. Being the Journal of a Happy Man. By ÉMILE SOUVESTRE. 8vo. Cloth, $1.50.

The great popularity of "An Attic Philosopher in Paris" has led the publishers to prepare this fine illustrated edition, uniform with the illustrated edition of "Colette." For this volume a large number of full-page and vignette illustrations have been made by the French artist, Jean Claude, the illustrator of "Colette." A rich binding has been specially designed, and this volume, considering the fine literary quality of the text and the daintiness of the book's appearance, will, it is believed, prove one of the most popular of the autumn books.

Love Songs of English Poets, 1500-1800.

With Notes by RALPH H. CAINE, and Frontispiece after Angelica Kauffman. 16mo, Cloth, $1.50.

"An admirable selection."—*London Athœneum.*

"From the stores of some three centuries much poetic treasure of the first order in art is forthcoming."—*London Saturday Review.*

Admiral Farragut.

By Captain A. T. MAHAN, U. S. N., author of "The Gulf and Inland Waters," etc. With Portrait and Maps. The first volume in "The Great Commander Series," edited by Gen. James Grant Wilson. 12mo. Cloth, $1.25.

"No one could be better fitted than Captain Mahan for writing the biography of our great Admiral. His portrait of Farragut stands out clear, and we rise from reading his book with a renewed sense of admiration for the bravery, the skill, and the persistence of the hero, and for his noble qualities as a man, a husband, and a citizen."—*Phila. Evening Bulletin.*

General Taylor.

By Major-General O. O. HOWARD, U. S. A. With Portrait and Maps. The second volume in the "Great Commander Series." 12mo. Cloth, gilt top, $1.50.

Pictures from Roman Life and Story.

By Professor A. J. CHURCH, author of "Stories from Homer," "Stories from Virgil," etc. Illustrated. 12mo. Cloth, $1.50.

"Mr. Church has a remarkable command of the literature of the period, and has used it with his customary grace and deftness."—*London Athenæum.*

Warriors of the Crescent.

By the late W. H. DAVENPORT ADAMS, author of "Battle Stories from English History," etc. 12mo. Cloth, $1.50.

This story of Oriental magnificence, of glittering campaigns, fatalistic heroism, and the pillage of the marvellous riches of India by the Sultans of Ghazni and their followers, comes to the reader like new tales of the Arabian Nights. Mr. Adams's graphic, vivid style clothes history with the garb of romance.

In Gold and Silver.

By GEORGE H. ELLWANGER, author of "The Story of My House," "The Garden's Story," etc. With many Illustrations. 16mo. Cloth, gilt top, $2.00. Also limited *édition de luxe*, on Japanese vellum, $5.00.

CONTENTS: The Golden Rug of Kermanshâh; Warders of the Woods; A Shadow upon the Pool; The Silver Fox of Hunt's Hollow.

In this volume the author carries the reader from the Orient to the outdoor life of our own country, of which he is so competent to speak. "In Gold and Silver" has been magnificently illustrated by two of the foremost American artists, W. Hamilton Gibson and A. B. Wenzell, who have furnished full-page drawings, vignettes, and initials; while there are several pen-and-ink drawings of Oriental articles by W. C. Greenough, and there is a specially designed title-page and cover by H. B. Sherwin. Altogether, this book may safely be called one of the best examples of fine book-making produced in recent years.

Abraham Lincoln: The True Story of a Great Life.

By WILLIAM H. HERNDON and JESSE W. WEIK. With numerous Illustrations. New and revised edition, with an Introduction by HORACE WHITE. In two volumes. 12mo. Cloth, $3.00.

This is probably the most intimate life of Lincoln ever written. The book, by Lincoln's law partner, William H. Herndon, and his friend Jesse W. Weik, shows us Lincoln the man. It is a true picture of his surroundings and influences and acts. It is not an attempt to construct a political history, with Lincoln often in the background, nor is it an effort to apotheosize the American who stands first in our history next to Washington. The writers knew Lincoln intimately; their frank testimony must be accepted, and their biography must take permanent rank as the best and most illuminating study of Lincoln's characterand personality.

God's Fool.

By MAARTEN MAARTENS, author of "The Sin of Joost Avelingh." 12mo. Cloth, $1.50.

"Throughout there is an epigrammatic force which would make palatable a less interesting story of human lives or one less deftly told."—*The Saturday Review (London).*

"Perfectly easy, graceful, humorous. . . . The author's skill in character-drawing is undeniable."—*London Daily Chronicle.*

"A remarkable work."—*N. Y. Times.*

From Dusk to Dawn.

By KATHARINE P. WOODS, author of "Metzerott, Shoemaker." 12mo. Cloth, $1.25.

This book is an original one, like its predecessor, in that it follows none of the beaten paths of fiction, and it raises questions of vital interest, and addresses itself to the reader's thought instead of merely tickling his fancy. There is a story, a romance, which will interest novel-readers, but the book will hold the attention of those for whom the average novel has little charm.

The Story of Columbus.

By ELIZABETH EGGLESTON SEELYE. Edited by Dr. EDWARD EGGLESTON. With 100 Illustrations by Allegra Eggleston. 12mo. Cloth, $1.75.

"A brief, popular, interesting, and yet critical volume, just such as we should wish to place in the hands of a young reader. The authors of this volume have done their best to keep it on a high plane of accuracy and conscientious work without losing sight of their readers."—*New York Independent.*

"The illustrations are particularly well chosen and neatly-executed, and they add to the general excellence of the volume."—*New York Times.*

SECOND EDITION OF

On the Plantation.

By JOEL CHANDLER HARRIS, author of "Uncle Remus." With 23 Illustrations by E. W. KEMBLE, and Portrait of the Author. 12mo. Cloth, $1.50.

"Those who never tire of Uncle Remus and his stories—with whom we would be accounted—will delight in Joe Maxwell and his exploits."—*London Saturday Review.*

The Historical Reference-Book,

Comprising a Chronological Table of Universal History, a Chronological Dictionary of Universal History, a Biographical Dictionary. With Geographical Notes. For the use of Students, Teachers, and Readers. By LOUIS HEILPRIN. Third edition, revised, and brought down to 1892. Crown 8vo. Half leather, $3.00.

New Juvenile Books.

ENGLISHMAN'S HAVEN.

A Tale of our Colonial Times. By W. J. GORDON, author of "The Captain-General," etc. With 8 full-page Illustrations. 12mo. Cloth, $1.50.

THE BATTLE OF NEW YORK.

By WILLIAM O. STODDARD, author of "Little Smoke," "Crowded out o' Crofield," etc. With 11 full-page Illustrations and colored Frontispiece. 12mo. Cloth, $1.50.

ALONG THE FLORIDA REEF.

By CHARLES F. HOLDER, joint author of "Elements of Zoölogy." With 71 Illustrations. 12mo. Cloth, $1.50.

IN THE BOYHOOD OF LINCOLN.

A Story of the Tunker Schoolmaster and the Times of Black Hawk. By HEZEKIAH BUTTERWORTH, author of "The Zigzag Books," "The Log Schoolhouse on the Columbia," etc. With 12 full-page Illustrations and colored Frontispiece. 12mo. Cloth, $1.50.

STORIES TOLD IN AN AFRICAN FOREST.

By A. J. MOUNTENEY JEPHSON, author of "Emin Pasha and the Rebellion at the Equator." With numerous Illustrations. 12mo. Cloth, $2.00.

HERMINE'S TRIUMPHS.

A Story for Girls and Boys. By MADAME COLOMB. With 100 Illustrations. 8vo. Cloth, $1.50.

Charles L. Webster & Co.'s

LATEST BOOKS.

New Volumes in the "Fiction, Fact, and Fancy" Series:

MR. BILLY DOWNS AND HIS LIKES. By RICHARD MALCOLM JOHNSTON, author of 'Dukesborough Tales.' Stamped cloth, etc., about 200 pages, with frontispiece by Dan Beard. 75 cents.

Colonel Johnston is easily the dean among Southern men of letters, and the announcement of a new volume from his pen calls for little comment. It is sufficient to state that he has selected a number of his most characteristic Georgia tales, now first published in book form, including: "A Wedding in Dooly District," "The Townses," "Something in a Name," "Parting from Sailor," "A Bachelor's Counselings," and "Two Administrations."

ESSAYS IN MINIATURE. By AGNES REPPLIER. Stamped cloth, gilt titles. 75 cents.

A new volume of this brilliant essayist's writings, in which she discourses wisely and wittily on a number of pertinent topics. "Our Friends, the Books," "Trials of a Publisher," "A Short Defence of Villains," "The Charm of the Familiar," and "Three Famous Old Maids," are some of the subjects which receive her attention.

"Miss Repplier is our most clever essayist."—*Philadelphia Inquirer.*

WRITINGS OF CHRISTOPHER COLUMBUS. Edited, with an Introduction, by PAUL LEICESTER FORD. Stamped cloth, etc., 250 pages, with portrait frontispiece. 75 cents.

Mr. Ford has for the first time collected in one handy volume those letters and other documents written by Christopher Columbus which describe his experiences in the discovery and occupation of the New World.

"The most interesting of recent contributions to Columbian literature."—*Boston Post.*

DON FINIMONDONE: CALABRIAN SKETCHES. By ELISABETH CAVAZZA. Stamped cloth, etc., 180 pages, with frontispiece by Dan Beard. 75 cents.

Few American authors have so completely captured the Italian spirit as Mrs. Cavazza has done in these pictures of Italian life among the lowly. They are fresh, graphic, and characterized by a certain literary skill and grace which are conspicuous.

"Each one of these sketches shows the sure touch and the constructive instinct of a born artist in letters."—*The Literary World (Boston).*

"Mrs. Cavazza has made a great beginning in these stories, which will bear more than one reading, and which, as the work of a New England woman, are very remarkable. They are delightful, and they are mature."—*Richard Henry Stoddard, in Mail and Express.*

A New Book by Mark Twain.

THE AMERICAN CLAIMANT. The most widely known character in American fiction, Col. Mulberry Sellers, is again introduced to readers in an original and delightful romance, replete with Mark Twain's whimsical humor. Fully illustrated by Dan Beard. Cloth, 8vo, $1.50.

We have also several sets of Thackeray, Dickens, George Eliot, Bulwer, and others, in fine library bindings at one-third off the regular list price. All the Holiday Editions of new and old books, children's books, and calendars, suitable for Holiday Gifts.

Send for our Illustrated Catalogue.

*** Our publications are for sale by all booksellers, or are mailed postpaid on receipt of price.

CHARLES L. WEBSTER & CO.,
67 Fifth Avenue, New York City.

BULWER'S WORKS.

Now in course of publication, by Little, Brown & Co, *a new and beautiful edition* of the works of this famous English novelist, in forty volumes

The volumes of this new edition are of *handy, convenient size*, easy to hold in the hand.

The type is clear and beautiful, and has been made expressly for this edition. The paper is of extra quality, affording an important adjunct to the printers' careful and beautiful work, the type being set and the volumes printed at the University Press, Cambridge.

The exquisite frontispieces will be etched in the finest manner from *drawings made especially for this edition by Edmund H. Garrett.* The books are of medium 12mo size, bound in cloth, extra, gilt top, *with a choice cover design.*

The whole combines to produce *a perfect library edition*, which will be complete in forty volumes.

The price will be $1.50 per volume.

"*We have long learned to reverence the* FINE INTELLECT OF BULWER. *Who is there uniting in one person the imagination, the passion, the humor, the energy, the knowledge of the heart, the artist-like eye, the originality, the fancy, and the learning of Edward Lytton Bulwer?*"
—*From Marginalia,* EDGAR ALLAN POE.

John Wyclif.

Last of the Schoolmen and first of the English Reformers. By Lewis Sergeant (No. 7 in the Heroes of the Nations Series). (Nearly Ready.) Large 12mo, fully illustrated, cloth, $1.50; half leather, gilt top, $1.75.

Shirley says of Wyclif: "It was less the Reformer or the master of English prose than the *great Schoolman* that inspired the respect of his contemporaries; and, next to the deep influence or personal holiness and the attractive greatness of his moral character, it was to his supreme command of the weapons of scholastic discussion that he owed his astonishing influence."

Short Stalks;

Or, Hunting Camps, North, South, East, and West. By Edward North Buxton. With numerous fine illustrations by Whymper, Lodge, Wolf, &c. 8vo, $5.00.

Contents.—Sardinia and its Wild Sheep—Recollections of Chamois Hunting—The Rocky Mountains—On the Rim of the Desert—The Elk—The Father of all the Goats—The Pyrenean Ibex—Bear Hunting—A Tantalizing Quest—Reindeer Stalking—The Izzard—Peaks and Passes.

RECENTLY PUBLISHED:

is a good name to remember when selecting a Christmas gift for a boy or girl. It is The Century Co's magazine for young folks. "The best child's periodical in the world," is what the poet Whittier called it.

A YEAR'S SUBSCRIPTION to St. Nicholas costs $3.00. No other gift you can buy for that price will give a boy or girl half so much pleasure or will be productive of so much good. The child who reads St. Nicholas cannot help being well informed.

THE NEW VOLUME, which began with the November number, promises to be one of the best ever issued. There will be among other entertaining features:

SERIAL STORIES by Kate Douglas Wiggin, W. O. Stoddard, Mrs. C. V. Jamison, author of "Lady Jane," Mrs. Mary Hallock Foote, and others.

SHORT STORIES by Rudyard Kipling, Frances Hodgson Burnett, Frank R. Stockton, Susan Coolidge, Nora Perry, and many other well-known writers.

PICTURES by the leading artists and engravers, and rhymes, jingles and puzzles innumerable. Subscribe now, beginning with November, the first of the new volume.

All booksellers and newsdealers take subscriptions, or remittance may be made by check, draft, money- or express-order, or in registered letter direct to the publishers,

BOOKS OF HISTORY.

Three Episodes of Massachusetts History.

By CHARLES FRANCIS ADAMS, author of "Richard Henry Dana," etc. With two Maps. 2 vols., crown 8vo, gilt top, $4.00.

A work of remarkable historical value describing (1) the settlement of Massachusetts Bay and the struggle between the royal party and the Puritans; (2) the early religious dispute in Massachusetts, the account of which is now for the first time written from a modern point of view; (3) the slow growth and gradual development of a Massachusetts town from 1640 to 1890.

France Under the Regency.

With a Review of the Administration of Louis XIV. By JAMES BRECK PERKINS, author of "France under Richelieu and Mazarin." Crown 8vo, $2.00.

Mr. Perkins has made a very careful study of a most interesting period of French history.

The Eve of the French Revolution.

By EDWARD J. LOWELL. 8vo, $2.00.

Mr. Lowell gives an admirably clear and comprehensive view of one of the most important and engrossing periods of modern History.

Christopher Columbus.

By JUSTIN WINSOR, Editor of "The Narrative and Critical History of America." With portraits and maps. *Fourth Edition.* 8vo, gilt top, $4.00.

"Dr. Winsor's work embodies the latest and most authoritative conclusions on the subject which the best European and American research and scholarship have reached."—*Dr. W. F. Poole.*

The Discovery of America.

By JOHN FISKE. With a steel portrait of Mr. Fiske, many maps, facsimiles, etc. *Ninth thousand.* Two vols, crown 8vo, gilt top, $4.00.

"In wealth of maps, diagrams, explanatory notes, references to authorities, thorough literary equipment, and charm of style, this book is worthy of the author's great fame."—*The Critic, New York.*

The Genesis of the United States.

A narrative of the movement in England, 1605-1616, which resulted in the Plantation of North America by Englishmen, disclosing the contest between England and Spain for the possession of the soil now occupied by the United States of America; the whole set forth through a Series of Historical Manuscripts now first printed, together with a reissue of rare contemporaneous tracts, accompanied by bibliographical memoranda. Compiled and edited by ALEXANDER BROWN. With Notes, Maps, Plans, 100 Portraits, and Comprehensive Biographical Index. 2 vols., royal 8vo, $15.00.

Economic and Social History of New England, 1620-1789.

With an Appendix of Prices. By WILLIAM B. WEEDEN. 2 vols., crown 8vo, gilt top, $4.50.

The New York *Times* finds the work "full of suggestive and vital information about New England. . . . Literally a storehouse of historical data of the utmost value to one who would learn how the New England colonists first subdued the earth, and thus, in securing their own fortunes, built up the framework on which mighty States were to grow."

*** *For sale by all Booksellers. Sent postpaid on receipt of price by the Publishers,*

HOUGHTON, MIFFLIN & CO., Boston and New York

The Atlantic for 1893

Will contain, among other attractions,

Old Kaskaskia, a Serial Story by Mary Hartwell Catherwood,

Who will be favorably remembered as the author of "*The Lady of Fort St. John.*" It begins in the January number.

James Bryce, M.P.,

Will consider "*American Influence on English Political Institutions.*" This is a field in which Mr. Bryce is a master.

Penelope's English Experiences, by Kate Douglas Wiggin,

Will bring fresh entertainment to those who know Mrs. Wig in's delightful books.

Studies in American Biography,

Which are a feature of the *Atlantic*, will be continued by papers on *George William Curtis* by Sherman S. Rogers, etc.

The Feudal Chiefs of Acadia, by Dr. Francis Parkman.

This eminent historian has written a narrative of the events in Colonial history on which Mrs. Catherwood's "*Lady of Fort St. John*" is based. The first part will appear in the January *Atlantic.*

Improvement of Living.

Papers by thoughtful writers on *The Preservation of Country Beauty*, on *Libraries, Art Museums, Museums of Science*, etc.

Education.

A prominent place will be given to the discussion of educational topics. Among other subjects, papers on the structure and decoration of school-houses, school gardens, etc., will be presented.

Literature.

Special studies in English Literature and impartial criticism of current literature will constantly appear.

Special Contributors.

Among the writers from whom contributions are expected are:

OLIVER WENDELL HOLMES,
EDMUND CLARENCE STEDMAN,
THOMAS BAILEY ALDRICH,
PROFESSOR SHALER,
CARL SCHURZ,
AGNES REPPLIER,
GEORGE H. PALMER,
MARGARET DELAND,
BRADFORD TORREY,
KATE DOUGLAS WIGGIN,
HARRIET WATERS PRESTON,
OLIVE THORNE MILLER,
EDITH M. THOMAS,
PERCIVAL LOWELL,
JOHN C. ROPES,
THOMAS M. COOLEY,
THEODORE ROOSEVELT,
LAFCADIO HEARN,

and other well-known writers.

TERMS: $4.00 a year in advance, postage free; 35 cents a number. With new life-size portrait of Whittier, Lowell, Hawthorne, Emerson, Longfellow, Bryant, or Holmes, $5.00; each additional Portrait, $1.00.

The November and December numbers sent free to new subscribers whose subscriptions for 1893 are received before December 20th.

Postal Notes and Money are at the risk of the sender, and therefore remittances should be made by money-order, draft, or registered letter, to

Houghton, Mifflin & Company,

4 Park St., Boston, Mass.

Some Gift Books of Special Excellence.

DANTE: A Handbook to Dante.
By GIOVANNI A. SCARTAZZINI. Translated from the Italian with Notes and Additions by THOMAS DAVIDSON, M.A. 12mo. Cloth. xii+315 pages. Price, $1.25.

L. CLARK SEELYE, *Pres. of Smith College:* It seems to me to meet a real need of both teachers and students of Dante.

BROWNING: Introduction to the Poetry of Robert Browning.
By WILLIAM JOHN ALEXANDER, Ph.D., Professor of the English Language and Literature, University of Toronto. 12mo, cloth, v+212 pages. Price, $1.10.

F. J. FURNIVALL, *Founder of the original Browning Society:* I think your estimate of Browning and your analysis of his limitations and their causes are the best and truest yet made.

SHAKESPEARE: The Life, Art, and Characters of Shakespeare.
By HENRY N. HUDSON, LL.D., Editor of *The Harvard Shakespeare*, etc. In 2 vols., 12mo, 1,003 pages. Uniform in size and binding with *The Harvard Shakespeare*. Prices: Cloth, $4.00; half calf, $8.00.

Besides the topics mentioned in the title, this work treats of the origin and growth of the English drama and of Shakespeare's contemporaries.

Dr. A. P. PEABODY, *Harvard College:* I regard the edition as unequaled in Shakespearian scholarship, and in its worth in the library and for current use.

The Harvard Shakespeare.
By HENRY N. HUDSON, LL.D. In *Twenty Volumes*, 12mo, two plays in each volume. Prices: Cloth, $25.00; half calf, $55.00. Also in *Ten Volumes*, of four plays each. Prices: Cloth, $20.00; half calf, $40.00.

Buyers should be careful not to confound the Harvard Shakespeare with an old edition made in 1851 and still sold by another house.

This is preëminently the edition for libraries, students, and general readers. The type, paper, and binding are attractive and superior, and the literary work represents the editor's ripest thought.

Prof. C. T. WINCHESTER, *Wesleyan University, Middletown, Conn.:* It seems to me, without question, the best edition now printed.

The Home and School Shakespeare.
Revised and enlarged Editions of twenty-three plays. Carefully expurgated, with Explanatory Notes at the bottom of the page, and Critical Notes at the end of each volume. By H. N. HUDSON, LL.D., Editor of *The Harvard Shakespeare*. One play in each volume. Square 16mo. Varying in size from 128–253 pages. Price of each: Cloth, 50 cents; paper, 35 cents. Per set (in box), $12.00.

HIRAM CORSON, *Prof. of Eng. Lit., Cornell Univ.:* I consider them altogether excellent.

CLASSICS FOR CHILDREN: (Send for Circular.)
About forty volumes of choice literature specially edited for young people. Some of the authors are Hans Andersen, Ruskin, Kingsley, Defoe, Scott, Harriet Martineau, Lamb, Franklin, Swift, Church, Plutarch, Irving, Goldsmith, Samuel Johnson, Bunyan.

OPEN SESAME! About One Thousand Pieces of the Choicest Prose and Verse.
Compiled by BLANCHE WILDER BELLAMY and MAUD WILDER GOODWIN. Vol. I., for children from four to ten years old; Vol. II., for children from ten to fourteen years old; Vol. III., for children of a larger growth. Square 12mo. About 350 pages each. Illustrated, and handsomely bound in cloth. Price 90 cents.

A. B. POLAND, *Supt. of Schools, Jersey City, N. J.:* They are admirably gotten up. The selections are excellent. The editors have shown great literary judgment. The publishers have exhibited their usual good taste in the make-up of the books.

STAR-LAND: Talks with Young People about the Wonders of the Heavens
By SIR ROBERT S. BALL, F.R.S., Royal Astronomer of Ireland. Illustrated. 12mo. Cloth. viii + 376 pages. Price, $1.10.

This book presents in the clearest and most interesting manner the fundamental facts and ideas of Astronomy. It is something of rare quality—lucid, fascinating, and yet thoroughly scientific.

RIGHT HON. W. E. GLADSTONE: I have now finished reading your luminous and delightful 'Star-Land,' and I am happy to be in a sense enrolled amongst your young pupils.

FOOTPRINTS OF TRAVEL: or, Journeyings in Many Lands
By MATURIN M. BALLOU, author of *Due West, Due East, Due North, Under the Southern Cross*, and other books of travel. 12mo. 370 pages. Illustrated. Cloth; price, $1.10. Boards; price, 80 cents.

This presents the substance of many books of travel. Its itinerary covers the whole world.

EDWARD SMITH, *Supt. of Schools, Syracuse, N. Y.:* It seems to me to be the best book ever published for awakening interest in geography and a love for reading.

HANDBOOK OF HISTORIC SCHOOLS OF PAINTING.
By MISS DERISTHE L. HOYT, Instructor in the Massachusetts Normal Art School. 12mo. Cloth. $1.00.

A. A. MINER, D.D., *Chairman Board of Visitors, Mass. Normal Art School:* Upon those who would find a short road to what is most vital in the historic schools, the author has conferred a great favor.

These books can be had from all booksellers, or will be sent on receipt of the prices given above.

GINN & CO., Publishers, Boston, New York, Chicago, and London.

The Real and Ideal in Literature.

By FRANK PRESTON STEARNS,

A Reply to W. D. Howells and the Doctrine of Realism,

With Portrait and Memoir of

Brown Brothers & Co, Bankers,
NO. 59 WALL STREET, NEW YORK.

J. B. Lippincott Co.'s
Holiday Publications.

Handy-Book of Literary Curiosities.

An indispensable reference-book of curious, quaint, and out-of-the-way information that has never before been collected in book form. By WILLIAM S. WALSH, author of "Literary Life." Small 8vo. Uniform with Reader's Hand-Book. Half morocco, $3.50.

The Dragon of Wantley.

His Rise, His Voracity, and His Downfall. A Romance. By OWEN WISTER. The story deals with the old days of chivalry in England, and knights, monks, dragons, and crusades afford abundant material for a romantic tale. The illustrations are unique and full of humor. Illustrations by John Stewardson. 8vo, extra cloth, gilt top, $2.00.

Recent Rambles; or, In Touch with Nature.

By CHARLES C. ABBOTT, M.D., author of 'A Naturalist's Rambles about Home,' 'Outings at Odd Times,' etc. 12mo. Cloth. With nineteen half-tone illustrations. $2.00.

Atlina, the Queen of the Floating Isle.

By M. B. M. TOLAND, author of 'Eudora,' etc. Illustrated by full-page photogravure reproductions of drawings by eminent artists, and numerous decorative designs throughout the text. Cloth, gilt, $2.50.

Night Etchings.

By A. R. G., "are indeed true poems," says the Detroit *Tribune*. "There is no struggle after effect, no trick of rhetoric, no careful studied polishing of phrase, no obvious ornamentation, but the lines flow on like waves, we are not treated to mysticism nor to purposed obscurity of sense and sentiment, but are given a look into the soul of things." 12mo. Cloth, gilt top, $1.25.

Gleams and Echoes.

By A. R. G. "Is a holiday volume of more than common beauty. The poems are full of feeling, and graceful in structure, and are illustrated with the most delicate engravings by eminent artists."—*Phila. Bulletin.* Cloth, gilt top, $2.00; full silk, $3.00.

Hours with John Darby.

By Dr. J. E. GARRETSON. "With its cheerful, refined, scholarly humor," says an eminent critic, "and its manly contemplation of every stage of life, we must commend it as a most valuable production." In the attractive form just issued it makes an especially appropriate gift-book. 16mo, cloth binding, $1.25.

Complete Holiday Editions of

Dr. Garretson's Works.

'Nineteenth Century Sense,' 'Thinkers and Thinking,' 'Hours with John Darby,' 'Brushland,' 'Odd Hours of a Physician,' 'Man and His World.'

Six volumes, beautifully bound, gilt top, in a neat box, $7.50.

For sale by all Booksellers, or will be sent by the Publishers, free of expense, on receipt of the price.

PREFERENCES IN ART, LIFE, AND LITERATURE.

By HARRY QUILTER.

Imperial 8vo, in a unique binding.

This work includes A HISTORY OF PRE-RAPHAELITISM and an ESSAY UPON CONTEMPORARY ENGLISH PAINTING, which together occupy more than half the book. The remaining Essays are reprinted from various periodicals, but have been in all cases revised, and in many cases entirely rewritten. The greatest care has been taken in selecting the Illustrations, which are being printed in the best Parisian style, and comprise SIXTY-FOUR FULL-PAGE PLATES by G. D. LESLIE, Sir JOHN GILBERT, Sir J MILLAIS, R.A., PHIL MORRIS, A.R.A., D. G. ROSSETTI, WM. HUNT, DAVID COX, G. A. STOREY, A.R.A., ALBERT MOORE, E. BLAIR LEIGHTON, W. W. OULESS. C. E. PERUGINI, SEYMOUR LUCAS, A.R.A., JOHN PETTIE, R.A., G. F. WATTS, R.A., E. J. POYNTER, R.A., J. WATERHOUSE, R.A., FRED WALKER, A.R.A., J. MCWHIRTER, A.R.A., E. WATERLOW, A.R.A., HENRY MOORE, A.R.A., WYKE BAYLISS, ERNEST PARTON, S. PROUT, Sir F. BURTON, ALFRED EAST, CLARA MONTALBA, R.W.S., P. DE WINT, POOLE, R.A., and several others.

*** *Also a limited large-paper edition (the English copies have all been sold before the day of publication), in royal 4to, with 57 autotypes extra. Price on application.*

Now Ready. 8vo, cloth gilt, $4.00.

"A delightful book, full of anecdotes of Dickens, Thackeray, and John Leech, all of whom the Dean of Rochester has known."

THE MEMORIES OF DEAN HOLE,

With illustrations from original sketches by Leech and Thackeray, and a Photogravure Portrait of the author. 8vo, cloth, $4.00.

"It abounds in bright, cheerful, sparkling anecdotes of all kinds of people, artists, writers, preachers, statesmen, scholars of deserved eminence. There breathes through the charmingly easy, flowing, rambling, chatty volume a spirit of broad, cheerful, hopeful, helpful humanity that will scarcely fail to make every generous reader love the cheery and bright-spirited author."—*Commercial Advertiser.*

Just Published. 12mo, cloth, gilt, $2.25.

CHARLES SANTLEY'S REMINISCENCES.

"A treasury of delightful anecdotes about artists."

STUDENT AND SINGER.

Reminiscences of CHARLES SANTLEY. Written by himself. With two portraits. 12mo, cloth, gilt, $2.25.

"Mr. Santley's life has been one of wide artistic activity, and its story is interesting reading. Moreover, the book contains many pleasant sketches of the great artists whose very names dazzled the eye of the last generation—Giuglini, Marini, Ronconi, Beletti, Mario, Grisi, Tietjens, and Graziani. . . . Charles Santley is a pleasing figure in the history of song, and his autobiography will be read with pleasure."—*N. Y. Times.*

WITH 80 ILLUSTRATIONS BY HUGH THOMSON.

DAYS WITH SIR ROGER DE COVERLEY.

Reprinted from the Spectator, Uniform with Mr. Thomson's editions of "Cranford" and "The Vicar of Wakefield." 12mo, cloth, gilt, $1.50.

Under Pressure.

Scenes from Roman Life. By Marchesa THEODOLI. 12mo, cloth, $1.00.

"Full of the passionate, glowing imagery of that beautiful land of the olive and myrtle. The Marchesa Theodoli is to be congratulated upon this literary venture."—*St. Louis Republic.*

F. MARION CRAWFORD,

Don Orsino.

A Sequel to "Saracinesca" and "Sant' Ilario." By F. MARION CRAWFORD. 12mo, cloth, $1.00.

Uniform with the new edition of Mr. Crawford's Novels.

The three novels comprising the "Saracinesca Series" may now be had in uniform binding in box, price, $3.00.

Saracinesca. Sant' Ilario. Don Orsino.

"His greatest achievement is the group of three novels on Modern Italy. The three books present a wonderfully vivid picture of Italian social life. The Saracinesca family is a type of the old feudal nobility, admirable in its breeding, conservative in its ideals, and especially fine in its family affection and pride. . . .

"The plot of the story (Don Orsino) is one of the best that the author has constructed. The mystery of Maria Consuelo's birth and her relation to Spicca is most ingenious—continually suggesting a false trail to the reader, and its end surprising and satisfying him with its adequateness.

"When you combine all these things with a wonderful beauty of diction and facility of expression, you have that very difficult achievement—a thoroughly good modern romance."—*Life.*

Macmillan & Co.'s New Illustrated Catalogue of Holiday Gift Books will be sent free by mail to any address on application.

MACMILLAN & Co., Publishers, New York.

America's Venerable and only Weekly Eclectic.

1844. 1893.

FOR NEARLY FIFTY YEARS

LITTELL'S LIVING AGE

Has stood Peerless in the realm of Periodical Literature.

It selects from the whole wide field of EUROPEAN PERIODICAL LITERATURE the best articles by

THE ABLEST LIVING WRITERS

in every department,

Biography, History, Literature, Travels, Science, Politics, Criticism, Art, Fiction, and Poetry.

"Only the best has ever filled its pages; the best thought rendered in the purest English. Nothing poor or unworthy has ever appeared in the columns of THE LIVING AGE."—*The Presbyterian, Philadelphia, April* 13, 1892.

A WEEKLY MAGAZINE, it gives more than

Three and a Quarter Thousand

double-column octavo pages of reading matter yearly, forming four volumes; presenting a mass of matter UNEQUALLED IN QUALITY AND QUANTITY by any other publication in the country.

The publishers are enabled to make one of the MOST LIBERAL OFFERS ever made for the consideration of an intelligent class of American readers, viz.: a **$5.00** copy of RIDPATH'S HISTORY OF THE U. S. at the nominal price of **50 cents**, when taken in connection with THE LIVING AGE. Littell's Living Age, one year. postpaid, $8.00) FOR Ridpath's History of the U. S. of America, 5.00) $8.50

"Whether judged by the thoroughness of research, the accuracy of statement, or the purity of style, it occupies a foremost place among United States Histories."—*Chas. W. Bennett, D.D., Prof. of History, Syracuse University.*

The above price includes postage on The Living Age only. The book must be sent at the subscriber's expense.

THE LIVING AGE is published weekly at $8.00 a year, free of postage.

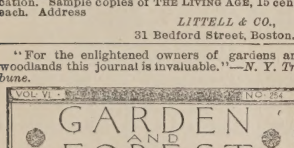
TO NEW SUBSCRIBERS for the year 1893 will be sent GRATIS the two October issues containing a powerful story by Frank Harris, Editor of the *Fortnightly Review*, entitled "Profit and Loss," and also the numbers of 1892 published after the receipt of their subscriptions.

☞ The publishers continue their popular clubbing arrangements whereby one or more other periodicals can be obtained at greatly reduced prices.

☞ Clubbing rates and circulars more fully describing the above and other offers sent on application. Sample copies of THE LIVING AGE, 15 cents each. Address

LITTELL & CO.,
31 Bedford Street, Boston.

"For the enlightened owners of gardens and woodlands this journal is invaluable."—*N. Y. Tribune.*



Filled every week with original, entertaining and exact information from the best American and European authorities about trees, shrubs, flowers and fruits; the beautifying of home-grounds, roadsides and parks; the preservation of forests and of natural scenery, together with vigorous editorial treatment of topics within its field and illustrations of the highest artistic finish.

"The arbiter in matters of rural taste."—*Boston Transcript.* "A capital specimen of pure literature."—*N. Y. Journal of Commerce.* "Faultless in make-up."—*Phila. Press.* "Illustrations of rare excellence."—*Buffalo Courier.* "Edited with signal ability."—*Cincinnati Times-Star.*

Published weekly. $4.00 a year.

GARDEN AND FOREST PUBLISHING CO.,
Tribune Building, New York.

Victor Hugo' ks.

New Limited Edition pies.

The first fine edition *in English of the works of one of the foremost writers of the nineteenth century, that will include, besides his famous novels and romances, his travels, principal poems, dramas (including* **'Ruy Blas,' 'The Fool's Revenge,"** *etc.), miscellanies, and a critical biography.*

It will be illustrated with over 200 superb etchings and photogravures (the latter by Goupil & Co.) by the foremost artists of France, including **Leloir, Flameng, Detaille, Madeleine Lemaire, Lalauze, Gaujean, Baudry,** *and others of like eminence, each plate a proof impression on* **imperial Japanese paper.**

The translations *will be by competent hands, including, among others,* **A. Langdon Alger, Andrew Lang, Sir Edwin Arnold,** *and* **Clement Scott.**

The type will be large and new, set in a fine, open page, the margins ample, and the paper a beautiful natural tint, the volume a small 8vo, easy to handle, and the binding vellum cloth, gilt tops, slightly trimmed. Complete in **30 vols.,** *issued at the rate of about 2 vols. per month, at* **$2 50 per volume.** *Prospectus and specimen pages, showing type, page, and paper, with sample illustration, sent on application.*

BRYAN, TAYLOR & CO.,

757 Broadway, New York.

"A Christmas Carol, *by Phillips Brooks ($1), does not need the reviewer's word of approval. This carol is beautifully illustrated, and is one of the attractive books of the season.* The Story of a Short Life *($1.50), by Juliana Horatia Ewing, issued by the same firm as a holiday book, is beautifully bound in white, with a conventionalized band of Christmas roses and ribbon on the cover. The old-time quaintness of the little hero, and the local color that makes the story seem so real, receive new charm presented in so beautiful a dress.* The Talking Clock *($2) is, as its name indicates, a collection of stories and poems by Mrs. Molesworth and other writers of stories and poetry for children, told to the listening children by a clock. The beautiful illustrations make the book as valuable for educating the eye as the stories and poetry in the book are for educating ear and heart. This book equals, in the beauty of its illustrations,* Our Little Men and Maidens *($1.50), which is giving it high praise. The publishers deserve thanks for the care exercised in the making of these books."*—Christian Union.

Sent by mail, postpaid, on receipt of prices.

BEST PORTRAIT OF TENNYSON.

The Poet at the age of 70. Etched from life by Rajon. The head in profile, half life size.

Of this Portrait F. G. Stephens, in his biography of Rajon, says: "It is simply one of the finest specimens of modern draughtsmanship."

Unsigned artists' proofs, $18.00. A few early signed proofs on Japan paper, $60.00; on vellum, $75.00. Special illustrated prospectus free by mail. Also, Catalogue No. 9 of high-class Modern Etchings, for holiday presents, with 50 illustrations, mailed on receipt of ten cents in stamps.

FREDERICK KEPPEL & CO.,
Paris, Chicago, and 20 East 16th St., New York.

CHOICE GIFT BOOKS.

Edition de Luxe.

The Little Minister.

By J. M. Barrie. In two vols., royal 8vo, $12.00 net. With etchings by G. W. H. Ritchie.

"J. M. Barrie's 'The Little Minister' is a great novel."—*New York Press.*

"The story is sweet and human from the first word to the last."—*St. Paul Globe.*

Large paper, limited to 260 copies, signed and numbered. Printed on Van Gelder's Holland paper, embellished with exquisite initial letters in blue and red, and illustrated with nine superb etchings and an etched frontispiece portrait of the author, printed on Imperial Japanese paper. A duplicate set of etchings are inserted in each set. Nos. 1 to 5 are printed entirely on Imperial Japanese paper, with three sets of etchings on vellum, in three colors.

Kirriemuir Edition.

In two vols., post 8vo, gilt top, $6.00.

Printed from new plates on laid paper. Tastefully bound in vellum and gold. Illustrated with ten superb etchings by G. W. H. Ritchie, printed entirely on Van Gelder's hand-made Holland paper.

Holiday Edition.

Three Normandy Inns.

By Anna Bowman Dodd. In one volume, 8vo, full gilt. Strictly limited to five hundred copies. Owing to the demand made for this limited edition, the price has been advanced to $7.50 per copy.

"A whole gallery of pastels in prose."—*New York World.*

"A thoroughly artistic treatment of picturesque scenery and a picturesque people."—*Philadelphia Inquirer.*

The text of the present Holiday Edition is printed in blue-black ink on extra heavy super-finished paper, while the twenty-four full-page illustrations, by C. S. Reinhart and other artists of note, are printed separately on imperial Japanese paper, in tints of sepia, ultramarine, purple, dark green, terra-cotta, and olive. The superb binding of white vellum, illuminated in gold and color, is preserved by a red slip cover in the Roman style.

An Erring Woman's Love.

By Ella Wheeler Wilcox, author of "Poems of Pleasure," "Maurine," "Poems of Passion," etc. Containing sixteen full-page illustrations and frontispiece portrait of author. Exquisitely bound. Square quarto, cloth, full gilt, $2.50; 12mo, cloth, with portrait, $1.00.

"Mrs. Wilcox has done work that is equal to her best in these poems. They are full of brilliant poetic flashes and catching reflections of mood."—*Milwaukee Wisconsin.*

Gossip in a Library.

By Edmund Gosse. 12mo, cloth, gilt top, $1.25. New edition.

"A delightful volume of interesting short talks on the history and contents of certain famous or curious books. The chapters are colloquial in tone, informal and chatty, the reader following with interest the easy flow of Mr. Gosse's talk."—*Book Chat.*

Love Letters of a Violinist.

By Eric Mackay. 12mo, cloth, $1.25; half levant, gilt top, $2.50.

"Mr. Mackay's lyrics are often sweet and true, and throb with a passion whose sincerity none may question."—*The Dial.*

The Truth About Beauty.

By Annie Wolf, author of "Pictures and Portraits of Foreign Travel," "Pen Pictures of London Society," etc. Elegantly illustrated by W. P. Hooper. 12mo, cloth, gilt top, $1.25.

"Mrs. Wolf's book is wholesome, practical, and amusing. . . . Such treatises will be of benefit to the world."—*The Churchman.*

"The work is marked by an unusual degree of literary finish and a style that is singularly dainty and graceful."—*Boston Courier.*

*** *For sale by all booksellers, or sent postpaid on receipt of price by the publishers.*

HOLIDAY GIFT BOOKS

Thackeray's Complete Works.

THE NEW HOUSEHOLD EDITION.

The edition is printed from new and large type, set in a small page, well spaced and leaded, making volumes handy in size and easy to hold without weariness. It is fully illustrated with over 300 illustrations, consisting of new wood engravings from drawings by the author, Luke Fildes, Barnard, and others, and original etched frontispieces by Failthorpe of London, or photogravures from Barnard's designs. The paper has a fine laid surface and contains no clay or filling. It is an ideal set of books and by far the best set of Thackeray ever offered. Complete in 30 volumes. Maroon cloth, gilt tops, $37.50.

Bulwer Lytton's Novels.

THE NEW LOUSEHOLD EDITION.

This is the first and only illustrated edition of Bulwer ever offered American book-buyers. It is beautifully printed on fine laid paper from new and large type, making a genuine handy volume set. It is illustrated with about 200 half-tone illustrations from original drawings by the best American artists, such as Dielman, Harper, Taylor, Merrill, and others, and photographs of scenes referred to in the text. Each volume will have a photogravure or etched frontispiece. Complete in 32 volumes. Maroon cloth, gilt tops, $40.00.

Thanatopsis and A Forest Hymn.

By William Cullen Bryant. With an introduction by Rev. John W. Chadwick. Illustrated by 13 photogravures from nature and original drawings. Printed in red and black and daintily bound in vellum cloth. Gilt top, 1 vol., square 12mo, $2.00.

The Song of the Brook.

NEW EDITION.

By Alfred Tennyson. Fifteen original and beautiful photogravure illustrations, after original drawings by William J. Mozart. The title-page and text of the poem is printed in red and black, and each stanza is illustrated. 1 vol., square, 12mo, vellum, cloth, $2.00.

The Eneid of Virgil.

NEW EDITION.

Translated into English by John D. Long, who has brought to his work a fund of poetic sympathies, a style vigorous and pure and thoroughly in keeping with the terse power and virility of the great Roman poet. With 13 photogravure illustrations. Bound in white or gray vellum cloth, gilt top, uncut, $2.50.

Childe Harold.

NEWSTEAD EDITION.

By Lord Byron. A superb edition of this unrivalled poem. Profusely illustrated with wood-cuts and 30 photogravures, illustrating the scenery, art, and architecture mentioned in the poem. 2 vols, 8vo, white vellum cloth, gold and silver decoration, gilt tops, $5.00.

Old Shrines and Ivy.

By William Winter.

Shadows of the Stage.

By William Winter.

Shakespeare's England.

NEW EDITION.

By William Winter.

Gray Days and Gold.

By William Winter. Three dainty volumes of travel in England and Scotland, and a companion volume of reminiscences of the stage during the past thirty years. Each volume illustrated with 12 photogravures from original photographs. Bound in white cloth and China silk, gilt tops. Two sets of two volumes, each in a Gladstone box. Each set $3.00. The same in half red levant morocco, gilt tops, uncut, each set $6.00.

For sale by all booksellers, or sent, charges paid, on receipt of price, by the

Remington Typewriter.

THE history of the Remington shows a steadily rising tide of popularity and success. It is absolutely unrivalled for all the essential qualities of a first-class writing machine.

In 1880, five years after the first Remington Typewriters regularly made by machinery were first put upon the market, only 1,000 machines had been sold. The public were slow to realize the value of the invention.

By 1882 the number had increased to 2,300 machines.

In 1885 Five Thousand machines were sold.

In 1890 sales had increased to 20,000 machines per annum.

In 1892 we find our standing orders to our factory for 100 machines per day inadequate to meet the constantly increasing demand.

A Famous Battery and Its Campaigns, 1861–'64.

By JAMES E. SMITH, Late Captain 4th Independent Battery, New York Volunteer Light Artillery.

A new book about a battery which distinguished itself in many hard fought battles, and won glory and renown in the great Gettysburg conflict, where it held the crest of Devil's Den for three long hours against the flower of Lee's army. The history of this battery, from the Peninsula to Gettysburg, is the history of the war in the East, and it is told modestly but thrillingly by Capt. Smith, and substantiated by official reports of both Union and Confederate officers, as well as personal reminiscences of participants from other organizations.

MATTHEW ARNOLD IN THE "NINETEENTH CENTURY."

"The New York NATION—a newspaper which I read regularly and with profit, a newspaper which is the best, so far as my experience goes, of all American newspapers, and one of the best newspapers anywhere."

THE NATION,

an independent weekly journal, was established in 1865. Its contributors include the most prominent names in literature, science, and art, both in this country and abroad. It is emphatically found in the homes of people of culture and refinement. No intelligent American, desirous of keeping abreast of the best political and literary thought of the day, can afford to be without it. Subscription price, $3.00 a year, postpaid.

IMPORTANT NEW WORK BY GEORGE BARNETT SMITH.

History of the English Parliament,

Together with an account of the Parliaments of Scotland and Ireland. By GEORGE BARNETT SMITH, author of "The Prime Ministers of Queen Victoria," "The Life of the Right Hon. W. E. Gladstone, M. P.," etc, etc. ILLUSTRATED WITH FAC-SIMILES OF NUMEROUS VALUABLE HISTORICAL DOCUMENTS connected with constitutional history. In two volumes, 8vo, cloth, boxed, $6.00.

"There are no fewer than seventeen appendices, in the shape of 'Constitutional Addenda,' dealing with a great number of matters affecting Parliament and the Constitution. The work differs entirely from the many existing constitutional histories treating of the government of England at various periods. It is the first complete, consecutive record of the English Parliament as a legislative institution from the earliest times to the present day. In addition to the Parliamentary journals and official documents, all the constitutional writers of authority upon each epoch have been consulted in its preparation—a fact which will sufficiently testify to the magnitude of the undertaking."—*London Academy.*

UPTOWN BOOKSTORE.

TWO NOTABLE BOOKS

LIFE ON THE CIRCUIT WITH LINCOLN.

By Major HENRY C. WHITNEY, one of his closest friends, who shared his confidence and knew him intimately during his evolution from a circuit lawyer to a national statesman. Profusely illustrated with portraits and views, together with thirteen facsimile letters and many other novel features. Quarto, cloth, gilt top, $3.50.

SOCIAL ETHICS AND SOCIETY DUTIES.

A sequel to 'Sensible Etiquette.' More thorough education of women in all the relations of life; as wives, mothers, or teachers, hostesses or guests. By Mrs Bloomfield Moore (nom de plume "Mrs. H. O. Ward"). 12mo, cloth, gilt tops, $2.00.

For sale by all booksellers, or sent postpaid by
ESTES & LAURIAT, Publishers, Boston

Reading Case for the Nation,

To receive the current numbers in a convenient (temporary) form. Substantially made, bound in cloth, with *The Nation* stamped on the side in gold. Holds about one volume. Papers easily and neatly adjusted. Sent, postpaid, on receipt of 75 cents.

Brentano's HOLIDAY DISPLAY.

American and English Books.

Our stock for the approaching holidays, comprehending absolutely everything new and desirable in standard and current literature, appropriate for gift books, is now fully displayed.

This stock includes, besides all the newest publications, editions de luxe of standard works, and sets of the standard authors bound specially by us in the finest leather bindings.

French and German Books.

Our own establishments in London and Paris give us facilities, of which we have most excellently availed ourselves, for the special importation of many exclusive books, both in respect of authors and bindings.

Special attention is directed to our display of the French classics in fine bindings, works of art, editions de luxe, etc.

In our German Department will be found the finest editions of the classic and modern authors and poets of Germany, all the famous fairy tales, books for older children, etc.

The latest novelties in French and German calendars, almanacs, etc.

All the American, English, and French Christmas numbers may be inspected on our counters. Orders sent by mail promptly executed.

A descriptive catalogue of the holiday numbers will be mailed to any address, postpaid, upon request.

GOODS CAN BE SELECTED NOW FOR THE HOLIDAYS AND DELIVERED ON ANY DATE DESIRED.

CAPE BRETON

AND ITS MEMORIALS.

A Historical and Descriptive Account of Cape Breton and of its memorials of the French Régime. With Bibliographical, Historical, and Critical Notes. By J. G. BOURINOT, C.M.G., LL.D., D.C.L. With Maps and Illustrations. Large 4to, $2.00.

FROM THE PREFACE.

"It is the object of the writer, a native of Cape Breton, to record briefly the main facts in its history from the days of its discovery by European voyagers in the remote past down to the present time, when a stream of travel is already beginning to find its way to an island abounding with so many features of natural and historic interest."

FOR SALE BY
CHARLES SCRIBNER'S SONS,
743 and 745 Broadway, N. Y.

WORTHINGTON CO., 747 B'WAY, N. Y.

G. P. Putnam's Sons,

NEW YORK AND LONDON.

Recent Importations in Limited Quantities.

Pablo de Segovia:

The Adventures of a Spanish Sharper. By FRANCISCO DE QUEVEDO. *Illustrated with over 100 Drawings by* DANIEL VIERGE. *With an Introduction on "Vierge and his Art," by* JOSEPH PENNELL: *and "A Critical Essay on Quevedo and his Writings," by* H. E. WATTS. *Quarto, bound in parchment, old style (limited edition only),* $20.

This is the chief work of QUEVEDO, who has been likened, in his wit, to Dean Swift, and in his grace to Horace. He has also been called the Spanish Juvenal, the Spanish Ovid, and the Spanish Lucian. Daniel Vierge is well-known as one of the most expert and delicate artists of the present day; his designs for "Pablo de Segovia" represent some of his most finished work, but the complete series has never before been published.

The Life of William Cowper.

By THOMAS WRIGHT *(Principal of Cowper School, Olney), Author of "The Town of Cowper," &c. With 21 full-page Illustrations. Octavo, Cloth, $5.00.*

This work aims to be the most complete Life of Cowper ever published. It will contain numerous illustrations and reproductions, and fac-similes of papers and places and scenes of Cowper's life, obtained from all the well-known authorities and students of the subject.

The Fishguard Invasion by the French in 1797.

Some passages taken from the Diary of the Reverend DANIEL ROWLANDS, *sometime Vicar of Llanfiangelpenybont.* Illustrated. Octavo, $1.50.

Sixty Years of an Agitator's Life.

The Autobiography of GEORGE JACOB HOLYOAKE. *In two Volumes, with photogravure frontispiece portrait to each.* Octavo, $6.50.

This work includes many strange experiences and adventures in social and insurgent movements, with descriptions of agitators, the author enumerating sixty personal friends who have either been imprisoned, transported, banished, hanged, or beheaded. Mr. Holyoake supplies, too, new estimates of well-known men; the origin of movements of mark; the tragedies of peace, and deals with various other events of historic interest.

Three Generations of Englishwomen.

Memoirs and Correspondence of Mrs. JOHN TAYLOR, Mrs. SARAH AUSTIN, *and* LADY DUFF GORDON. *By* JANET ROSS. *New Edition, revised and augmented. With Portraits.* Octavo, $2.

The Nationalisation of Health.

By HAVELOCK ELLIS, *Editor of "The Contemporary Science" Series.* Octavo, cloth, $1.25.

G. P. PUTNAM'S SONS,

27 and 29 West 23d St.

LONGMANS, GREEN & CO.'S NEW BOOKS.

UNIFORM WITH THE ABOVE.

THE BLUE FAIRY BOOK. Illustrated, $2.00. THE RED FAIRY BOOK. Illustrated, $2.00.

NEW VOLUME OF POEMS BY OWEN MEREDITH.

KING POPPY: A FANTASIA. By the EARL OF LYTTON. With frontispiece and title-page after designs by EDWARD BURNE-JONES. 12mo, $3.00. *[In the Press.]*

BY THE SAME AUTHOR.

Marah. A Volume of Poems. 12mo, cloth, gilt top, $1.50. *[Just published.]*

SEAS AND LANDS. By SIR EDWIN ARNOLD, M.A., K.C.I.E., C.S.I., etc., Author of "The Light of Asia," etc., etc. Demy Octavo, with 42 full-page illustrations from Photographs and 30 Illustrations in the Text, cloth extra, gilt top, $5.00.

"He possesses the art . . . of seeing the lands that he has visited through the eyes of their peoples. No Englishman with whom we are acquainted has so thoroughly entered into the spirit of Japanese life and manners as Sir Edwin Arnold, who handles them as Walton advised his angler to handle his worms—as if he loved them."—*Mail and Express.*

FIFTY YEARS IN THE MAKING OF AUSTRALIAN HISTORY. By Sir HENRY PARKES, K.C.N.G., Premier of New South Wales, 1872–5, 1877, 1878–9. With two portraits. 8vo, $5.00.

THE RUINED CITIES OF MASHONALAND; Being a Record of Excavation and Exploration in 1891. By J. THEODORE BENT, F.S.A., F.R.G.S. With a chapter on the ORIENTATION and MENSURATION of the TEMPLES. By R. M. W. SWAN. With 5 Maps and Plans 13 Plates, and 104 Illustrations in the Text. 8vo, $5.00.

THE NEW EDEN. A Story. By C. J. CUTLIFFE HYNE. With Frontispiece and Vignette. Crown 8vo, $1.00.

"An original and in many respects charming book. Mr. Hyne has treated his difficult theme with admirable literary dexterity and with fine imaginative power."—*Glasgow Herald.*

"The idea is worked out with astonishing skill and cleverness, and so logically developed that the book has all the interest of one with an intricate plot."—*Scotsman.*

AFTER TWENTY YEARS AND OTHER STORIES. By JULIAN STURGIS, Author of "John Maidment," etc., etc. Crown 8vo, $1.00.

"There is in the stories a promise of delight for the reader who will consider literature as the truthful expression of life; for they are intimately faithful to men and events not narrow, but genuinely real. . . . They speak with a sort of cordial comprehension to every man who has gone below the surface of things. Frankness, keenness, acquaintance, are their characteristics; and these are shown by an originality of plot and a penetrating brightness of style sacred to the very best work that has been done in this field."—*Boston Times.*

PERSIA AND THE PERSIAN QUESTION. By the Hon. GEORGE N. CURZON, M.P., Author of "Russia in Central Asia and the Anglo-Russian Question." With 9 Maps, 94 full-page Plates, and 53 Illustrations in the Text, Appendices, and Index. 2 vols., 8vo, pp. 1330, $12.00.

"An extremely thorough, able, and valuable book. The book is an account of pretty much the whole field of Persian life, politics, finance, trade, railways, telegraphs, the Shah's Government, archæology, in fact, of all that is Persian. . . . Mr. Curzon's qualifications for the task have been of the best. . . . The work is finely illustrated, and the maps may be particularly commended."—*N. Y. Times.*

LA COMMEDIA DI DANTE ALIGHIERI. A new Text, carefully revised with the aid of the most recent editions and collations. Small 8vo. $2.00.

For sale by Booksellers. Sent, postpaid, on receipt of price by the Publishers,

LONGMANS, GREEN & CO., 15 East 16th St., New York.

The Engineering RECORD.

Founded fourteen years ago and prior to 1887 known as *The Sanitary Engineer*, is the recognized authority on Municipal and Building Engineering. It has subscribers in all countries where there are engineers who can read English. Recently it has been enlarged by the addition of a department conducted, as is its custom, under the advice of an expert, in which notable industrial plants are regularly described and illustrated, the steam and power plants being a conspicuous feature.

It is published every Saturday, $5 per year to United States, Canada, and Mexico—$6 to other countries. Sample copies and list of its publications free. Address,

THE ENGINEERING RECORD,

277 Pearl Street, New York.

CHARLES SCRIBNER'S SONS
NEW BOOKS

THE CHILDREN OF THE POOR

By JACOB A. RIIS, author of "How the Other Half Lives." Illustrated. Square 12mo. $2.50.

"Most delightful reading. Mr. Riis knows what he is talking about, and what is more, he knows how to tell in most delightful way what he has seen. I know of no novel so well worth reading as this book."—Dr. A. F. SCHAUFFLER, *Vice-Pres't of New York City Mission Society.*

"The book is a model of what such writing should be—explicit, straightforward, full of plain facts and personal impressions, and entirely free from sentimentality, violence, or preaching of any sort."—*Nation.*

THE GREAT STREETS OF THE WORLD

8vo, fully illustrated, $4.00.

Broadway. By RICHARD HARDING DAVIS.—**Piccadilly.** By ANDREW LANG.—**The Boulevards.** By FRANCISQUE SARCEY.—**Unter den Linden.** By PAUL LINDAU.—**The Corso of Rome.** By W. W. STORY.—**The Grand Canal.** By HENRY JAMES.—**The Nevsky Prospekt.** By ISABEL F. HAPGOOD.

"A beautiful volume. The plan of the work is a good one and the execution complete, each street, representing the life of a great capital, having been described by one thoroughly familiar with its characteristics, and each brightly illustrated by a characteristic native artist. The result is most interesting and satisfactory."—*Philadelphia Times.*

MARSE CHAN

By THOMAS NELSON PAGE. *New Edition.* Illustrated by W. T. Smedley. Square 12mo. $1.50.

"The best short story ever written by an American and eminently worthy the dainty dress in which it now appears. Mr. Smedley's drawings are spirited and sympathetic."—*Philadelphia Press.*

"Brought out in superb holiday form. Mr. Smedley has caught precisely the spirit of the text. The delicacy and truthfulness of his touch have been well brought out."—*Boston Beacon.*

LIFE & LETTERS OF WASHINGTON ALLSTON

By JARED B. FLAGG, N.A., S.T.D. With 18 reproductions of Allston's paintings. Large 8vo, $5.00.

A painter and novelist as well as a great painter, and the friend of the most eminent men of his time, Allston was, in character, temperament, and genius, one of the most striking figures of his day; and this, the first authentic story of his life, is as much as a biography and as interesting as a narrative.

Public Library 1st 27593

SPANISH CITIES

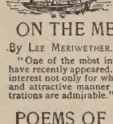
With Glimpses of Gibraltar and Tangier. By C. A. STODDARD, D.D., Editor of *N. Y. Observer.* Illustrated. 12mo, $1.50.

"There are few books more entertaining than this. Dr. Stoddard is a natural traveller, sees everything worth seeing and describes admirably. His style is direct, easy and graceful. His descriptions are concise yet clear, and markedly elegant."—*Chicago Inter-Ocean.*

THE LIFE OF MICHEL ANGELO

By JOHN ADDINGTON SYMONDS. With appendices and 50 illustrations. Large 8vo, 2 vols., $12.50

Mr. Symonds is recognized as the highest authority on the Renaissance, and this new work, which is the ripest fruit of prolonged study, has been eagerly awaited both by scholars and the public. It embodies much new material, and will take high rank in biographical literature as a portrait of the man and as a picture of his times.



AFLOAT AND ASHORE ON THE MEDITERRANEAN.

By LEE MERIWETHER. Illustrated, 12mo, $1.50.

"One of the most interesting books of travel that have recently appeared. It will be read with unbroken interest not only for what it tells, but for the animated and attractive manner in which it is told. The illustrations are admirable."—*Boston Sat. Eve. Gazette.*

POEMS OF ROD AND GUN.

By ERNEST MCGAFFEY. With illustrations by Herbert E. Butler. Square 8vo, $1.75.

"The beauties of forest and lake find rare expression in his consummate verse. One takes up this beautiful book and knows not which to admire most, the poems or the illustrations."—*Chicago Herald.*

CYCLOPEDIA OF PAINTERS AND PAINTINGS.

Edited by J. D. CHAMPLIN, Jr. Critical Editor, C. C. PERKINS. *Popular Edition.* 2,000 illustrations. 4to, 4 vols., $20.00 net.

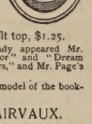
"The publication of this monumental work leaves far behind it all similar enterprises. Here is a reference book of the highest order, a work upon which the country is to be congratulated, for no nation has produced anything superior to this."—*Boston Beacon.*

NEW SAINT AMAND VOLUMES.

The Duchess of Berry and the Court of Louis XVIII.
The Duchess of Berry and the Court of Charles X.
The Duchess of Berry and the Revolution of 1830.

3 vols. Each with portrait. 12mo, $1.25.

"The Life of the Duchess of Berry shows a fascinating woman whose history is full of interest, and it is written in the delightful style of vivid and graceful narration that characterizes the earlier volumes in this series."—*N. Y. Observer.*



DR. J. G. HOLLAND'S TWO POEMS.

Bitter Sweet
and Kathrina.

Cameo Edition. Each with an etched frontispiece. 16mo, gilt top, $1.25.

In this series there have already appeared Mr. Mitchell's "Reveries of a Bachelor" and "Dream Life," Mr. Cable's "Old Creole Days," and Mr. Page's "In Ole Virginia."

"Dainty little volumes that are a model of the bookmaker's art."—*Philadelphia Press.*

BERNARD OF CLAIRVAUX.

The Times, the Man and His Work. A Historical Study. By RICHARD S. STORRS. 8vo, $2.50.

A vivid portrait of Bernard and an equally important picture of his times. It is altogether historical, not dogmatic or sectarian, and it will have a special value for general readers, as shedding new light upon an important but unfamiliar period of history.

OTHER IMPORTANT BOOKS ARE: **"South Sea Idyls,"** by Charles Warren Stoddard (12mo, $1.50); **"French Art,"** by W. C. Brownell (12mo, $1.25); **"Under the Evening Lamp,"** by R. H. Stoddard (12mo, $1.25); **"Rowen; 'Second Crop Songs,'"** by H. C. Bunner (12mo, $1.25); **"Three Plays,"** by Robert Louis Stevenson and W. E. Henley (12mo, $2.00 *net*); **"Songs about Life, Love and Death,"** by Anne Reeve Aldrich (12mo, $1.25); **"Letters to a Young Housekeeper,"** by Mrs. Bayard Taylor (12mo, $1.25); **"The Little Dinner,"** by Christine Terhune Herrick (12mo, $1.00).

L. L. ROUSH, *Agt.*

GIOVANNI AND THE OTHER.

Children who have made Stories. By MRS. FRANCES HODGSON BURNETT. Fully illustrated by R. B. Birch. Square 8vo, uniform with

"Little Lord Fauntleroy." $1.50.
"The stories are beautiful in tone, style, and color" KATE DOUGLAS WIGGIN.
"Very sweet and pathetic."—*Churchman.*
"Each of the stories is a gem."—*Boston Traveller.*

KENT HAMPDEN.

A Story of a Boy. By REBECCA HARDING DAVIS. Illustrated by Rufus F. Zogbaum. 12mo, $1.00.

"Sharply drawn incidents and crisp narrative make the book interesting."—*Boston Journal.*

THE END OF A RAINBOW.

By ROSSITER JOHNSON. Illustrated. 12mo, $1.50.

"It will be read with breathless interest. It is interesting and full of boyish experiences."—*Independent*

JUVENILES

NEW STORIES BY G. A. HENTY.

"Probably the most popular writer of boys' books in England to-day is G. A. Henty."—*Boston Transcript.*

Condemned as a Nihilist. A Story of Escape from Siberia.
In Greek Waters. A Story of the Grecian War of Independence.
Beric the Briton. A Story of the Roman Invasion.

Each, crown 8vo, fully and beautifully illustrated, $1.50.

"Quite up to the mark set in his other stories for boys—full of captivating incident."—*Philadelphia Telegraph.*

THE THIRSTY SWORD.

A Story of the Norse Invasion of Scotland (1626-65). By ROBERT LEIGHTON. Illustrated. Crown 8vo, $1.50.

"Brimful of exciting incident, battles, duels, scenes of peril and daring adventure, and written with vigor."—*Boston Sat. Eve. Gazette.*

THE CLOCKS OF RONDAINE, AND

Other Stories. By FRANK R. STOCKTON. With 24 illustrations by BLASHFIELD, ROGERS, BEARD and others. 8vo, $1.50.

"His books for boys and girls are classics. In this one we have seven of the most delightful tales imaginable."—*Newark Daily Advertiser.*

"Tales in Mr. Stockton's usual clever style. They are all extremely entertaining."—*The Churchman.*

WITH TRUMPET AND DRUM.

By EUGENE FIELD. 12mo, $1.00.

A volume of poems for children and about childhood, full of melody and sentiment.

BOYHOOD IN NORWAY.

By H. H. BOYESEN. Illustrated. 12mo, $1.50.

"Stories of boy life, varied in subject and attractively rich in incident."—*Brooklyn Times.*

LATEST BOOKS.

Late Volumes in the "Fiction, Fact, and Fancy" Series:

Essays in Miniature.

By AGNES REPPLIER. Stamped cloth, gilt titles, 75 cents.

A new volume of this brilliant essayist's writings, in which she discourses wisely and wittily on a number of pertinent topics. "Our Friends, the Books," "Trials of a Publisher," "A Short Defence of Villains," "The Charm of the Familiar," and "Three Famous Old Maids," are some of the subjects which receive her attention.

"Miss Repplier is our most clever essayist."—*Philadelphia Inquirer.*

The Master of Silence: A Romance.

By IRVING BACHELLER. Stamped cloth, etc., 176 pages. 75 cents.

Mr. Bacheller's first novel will be looked for with interest. It is a striking study of a mind-reader's experiences.

"A well-named story is already on the road to success. . . . Altogether the story is a strange character study, full of suggestion, earnest in moral purpose, and worthy of attention."—*Cincinnati Enquirer.*

Merry Tales.

By MARK TWAIN. Stamped cloth, gilt titles, 206 pages, with portrait frontispiece. 75 cents.

Contains some of the author's favorite sketches, including his personal reminiscences of the war as given in "The Private History of a Campaign that Failed."

"Very readable and amusing tales they are."—*N. Y. Sun.*

"Thousands will welcome in permanent form these delicious bits of humor."—*Boston Traveller.*

Tales from Ten Poets.

Containing the most famous narrative poems of ten great Victorian poets done into prose. By HARRISON S. MORRIS, author of "In the Yule-Log Glow," etc. Three volumes. 16mo. Illustrated. Cloth, $3.00.

The Dragon of Wantley.

His Rise, His Voracity, and His Downfall. A Romance. By OWEN WISTER. The story deals with the old days of chivalry in England, and knights, monks, dragons, and crusades afford abundant material for a romantic tale. The illustrations by John Stewardson are unique and full of humor. 8vo. Extra cloth, gilt top, $2.00.

Recent Rambles; or, In Touch with Nature.

By CHARLES C. ABBOTT, M.D., author of "A Naturalist's Rambles about Home," "Outings at Odd Times," etc. 12mo. Cloth. With nineteen half-tone illustrations. $2.00.

Tales from the Dramatists.

A series of entertaining stories taken from the leading plays of the most noted dramatic authors from Ben Jonson to the present day. By CHARLES MORRIS, author of "Half Hours with the Best American Authors," etc. Four volumes. 16mo. Illustrated. Cloth, extra, $4.00.

A Family Likeness.

By Mrs. B. M. CROKER, author of "Two Masters," etc. The latest issue in Lippincott's Series of Select Novels. 12mo. Paper, 50 cents; cloth, $1.00.

Broken Chords.

A charming novel. By Mrs. GEORGE MCCLELLAN (Harford Fleming). 12mo. Cloth, $1.25.

Handy-Book of Literary Curiosities.

An indispensable reference-book of curious, quaint and out-of-the-way information that has never before been collected in book form. By WILLIAM S. WALSH, author of "Literary Life." Small 8vo. Uniform with Reader's Hand-Book. Half morocco, $3.50.

Lives of the Queens of England.

New Edition. Printed from new plates. With portraits of the Queens, and other Illustrations. By AGNES STRICKLAND. A reprint of the author's latest revised edition, containing illustrations that have never appeared in any other issue. In eight volumes. 8vo. Cloth, gilt top, $16.00.

Maid Marian and Robin Hood.

By J. E. MURDOCH. With twelve illustrations by Stanley L. Wood. 12mo. Cloth, $1.25.

"The threads of tradition and balladry are skilfully combined with those of invention, and the result is a pleasantly readable version of the adventures of the bold and merry outlaw and his merry followers. The introduction of Maid Marian as a chief character gives a fresh flavor to the whole."—*Boston Courier.*

Atlina, The Queen of the Floating Isle.

By M. B. M. TOLAND, author of "Eudora," etc. Illustrated by full-page photogravure reproductions of drawings by eminent artists, and numerous decorative designs throughout the text. Cloth, gilt, $2.50.

Illustrated Edition of the Novels of E. Marlitt.

It is through the delightful translations of Mrs. A. L. Wister that the novels of this celebrated German author have become so popular in America. They have now been profusely illustrated with characteristic full-page drawings from the original German editions, and include the following volumes: "Old Mam'selle's Secret," "At the Councillor's," "The Second Wife," "The Lady with the Rubies," "The Owl's Nest," "Countess Gisela," "In the Schillingscourt," "The Bailiff's Maid," "Gold Elsie," "The Little Moorland Princess."

Price in sets, 10 volumes, $15.00.

Diary of George Mifflin Dallas

While United States Minister to the Courts of St. Petersburg (1837-1839) and St. James (1857-1861). 12mo. Cloth, $2.00.

For sale by all Booksellers, or will be sent postpaid on receipt of the price.

J. B. LIPPINCOTT CO., PUBLISHERS,
715 and 717 Market Street, Philadelphia.

"Its reflections are always astute and incisive."
—HARPER'S MONTHLY.

VON HOLST'S
CONSTITUTIONAL AND POLITICAL HISTORY
OF THE
UNITED STATES.

CARLYLE says: "The history of one's own country, that each must know, to him it is the broad highway through all fertile country."

Vitally considered, the real history of a country is that of its growth, its political forces, its living constitution. We have books of varying merit on different phases or epochs of our national career; but of vigorous, fearless, just, and profound works dealing with the American nation broadly and exhaustively, from its colonial beginnings up to within the times of the active men of to-day—as late, perhaps, as final history can be written—there is no other than *Von Holst's Constitutional and Political History of the United States.* It is accepted for America as is Stubbs's for England. The college course and University Extension cannot replace it.

Alexander Johnson: We have now a *history.* . . . Most readers will agree with the conclusions which it draws from the facts presented, though some may disagree in particular cases; but none will deny that it is a history of high type and enduring value. . . . The peculiarities of Von Holst's historical clinics are, first, a multitude of side-lights which he throws on them from every quarter, and, second, the remorseless pertinacity with which he follows up every nerve and muscle to its end. His historical judgments will always command respect, even where they fail to meet sympathy. Preston S. Brooks himself, if he were still living and should read the statement of the circumstances under which Sumner's speech on "The Crime Against Kansas" was delivered, might very well join in admitting, as a naked historical fact, that the source and secret of the wrath against Sumner is correctly stated as follows: "The Sewards and Hales, "the Fessendens and Trumbulls, the Wilsons "and Wades, did not handle the majority with "silk gloves when they spoke of slavery; but it "never before had had the feeling that it was "subjected to morally running the gauntlet before the eyes of the whole world."

"Dr. Von Holst continues his masterly analysis of events . . . with a power and success which leave little to criticise. The book is so able and so honest, and it teaches lessons which our people may profit so much by learning."—*The Nation.*

A descriptive pamphlet will be sent on request.

When looking at other books for Christmas presents examine this.

Eight vols., 8vo. Per set, boxed, cloth, $25.00; sheep, $30.00; half calf, $38.00.

Longmans, Green & Co.,

15 EAST SIXTEENTH ST., NEW YORK.

Tait, Sons & Company's
NEW BOOKS.

The Secret of Narcisse.

A Romance. By EDMUND GOSSE, author of "Gossip in a Library," "On Viol and Flute." 12mo, cloth, gilt, $1.00.

This is the first work of fiction from the brilliant pen of Edmund Gosse, the eminent *littérateur* and critic, and has been looked forward to with much interest on both sides of the Atlantic. It is a story of love, jealousy, and an unfounded charge of witchcraft in the dark, untolerating days of the Middle Ages. Mr. Gosse's romance carries with it its appropriate atmosphere, and the character studies are as clear and soft as an old-time etching. The story is well-balanced and told with much daintiness and felicity of expression.

The Last Confession.

By HALL CAINE, author of "The Scapegoat," "The Bondman," etc. 12mo, cloth, $1.00.

"In 'The Last Confession,' Mr. Hall Caine is in his element. In his dedication, addressed to his friend, Bram Stoker, Mr. Caine describes this tale as 'an attempt to solve a moral problem which we have discussed from opposite poles of sympathy—the absolute value and sanctity of human life, the right to fight, the right to kill, the right to resist evil and to set aside at utmost need the letter of the sixth commandment.' . . . How the moral problem is 'solved' we leave the reader to discover."—*London Times.*

Who is the Man?

By J. SELWIN TAIT, author of "My Friend Pasquale," "The Neapolitan Banker," etc. Illustrated. 12mo, cloth, $1.25.

One of the surest indications of ability on the part of the novelist is the faculty for misleading the reader in his conclusions as to the ultimate issue of the story. In "Who is the Man?" the reader finds himself continually drawing and then redrawing his conclusions. A book which has this power is sure to be fascinating, and, if to the cleverness of the plot is added purity of diction and rapidity of action, the prime elements of success are gained. The work is handsomely illustrated from original drawings by the artist Reinhart.

A Battle and a Boy.

By BLANCHE WILLIS HOWARD, author of "Guenn," "The Open Door," etc. 12mo, cloth, $1.00.

This is a volume where lofty tone and purpose intermingle with lively incidents, with the result of furnishing one of the best books it is possible to place in a boy's hands, although the wonderful life which the writer imparts to her works makes the book fully as interesting to adult readers.

Those Girls.

By JOHN STRANGE WINTER, author of "Army Tales," "Bootle's Baby," "Strange Experiences of a Lady Help," etc. 12mo, cloth, $1.00; paper, 50 cents.

Holyrood Series.

A story of true love with more than the average number of mishaps. The writer is particularly happy in depicting the characters she is most in sympathy with, and her portraiture of unselfish womanhood willing to sacrifice her own over-charged heart on the altar of sisterly affection is very fine.

When I Lived in Bohemia.

By FERGUS HUME, author of "Madam Midas," "The Mystery of a Hansom Cab," etc. Illustrated. 12mo, cloth, $1.25.

This book of rare and lively reading from Mr. Hume's versatile and gifted pen is well-timed to this festive season of the year. The visions of Bohemia will serve to enliven many a dull hour—here and there they may even raise a sigh as some reader murmurs, "Et ego in Bohemia fui." The copious illustrations of the volume by Cyril R. Hallward are wonderfully faithful and forceful.

Sold by all booksellers, or sent, postpaid, on receipt of price by the publishers.

TAIT, SONS & COMPANY,

31 Union Square, North,
NEW YORK.

Houghton, Mifflin & Company's
NEW BOOKS.

The Song of the Ancient People.

A noble poem of the Zuni and Moki. By EDNA DEAN PROCTOR. With an Introduction by JOHN FISKE and Notes, a Commentary by FRANK H. CUSHING, and eleven colored Illustrations by JULIAN SCOTT, reproduced in aquatint. 8vo, $5.00.

The Old English Dramatists.

A book of delightful lectures by JAMES RUSSELL LOWELL. Edited by CHARLES ELIOT NORTON, Professor in Harvard University. Uniform with Riverside Lowell, also in fancy binding, $1.25.

Shelley's Poetical Works.

Edited, with an Introductory Memoir, by GEORGE E. WOODBERRY, Professor of Literature in Columbia College. *Centenary Edition.* From new plates, and more nearly complete and every way desirable than any library edition of Shelley heretofore published. With a new portrait. 4 vols., crown 8vo, gilt top, $7.00.

Pagan and Christian Rome.

By RODOLFO LANCIANI, author of "Ancient Rome in the Light of Modern Discoveries," giving the results of archæological researches relating to the first five centuries of the Christian era and describing the transformation of the Rome of the Cæsars into the Capital of Christendom. With numerous illustrations. In Roman binding, with a slip cover. 1 vol., square 8vo, $6.00.

Dorothy Q.

A Ballad of the Boston Tea-Party, and Grandmother's Story of Bunker Hill Battle. With a portrait of Dorothy Q. and many pictures, by HOWARD PYLE. Exquisitely bound, $1.50.

In the Levant.

A beautiful Holiday edition of Mr. WARNER'S delightful book of travel, with a portrait of Mr. Warner, and about twenty-five full-page photogravures of Eastern subjects. 2 vols., $5.00.

Hawthorne's Wonder Book.

A charming holiday edition, illustrated by WALTER CRANE, with twenty full-page pictures in colors, and about forty head-pieces, tail-pieces, and initials, also in colors. Beautifully printed and bound. 8vo, $3.00.

Uncle Remus and His Friends.

A delightful concluding book of "Uncle Remus" stories. By JOEL CHANDLER HARRIS. With 12 excellent full-page illustrations by A. B. Frost. 12mo, $1.50.

The Story of Mary Washington.

A book of new and very interesting information about the mother of Washington. By MARY VIRGINIA TERHUNE ("Marion Harland"). With a portrait and eight illustrations. 16mo, $1.00.

The Chosen Valley.

A very interesting novel of Western life and experience. By MARY HALLOCK FOOTE, author of "John Bodewin's Testimony," "Led-Horse Claim," etc. 16mo, $1.25.

Historical and Political Essays.

Eight vigorous essays on Seward, Madison, Morris, and important political subjects. By HENRY CABOT LODGE, author of "Studies in History," and of "George Washington," "Alexander Hamilton," and "Daniel Webster," in the American Statesmen Series. Crown 8vo, $1.25.

Prose Idyls.

A tasteful little volume of short essays, full of engaging fancies which might have been clothed in verse, but are presented in delicate prose. By JOHN ALBEE. Artistically printed. 16mo, $1.25.

The Story of a Child.

A charming story of child life and character, but not written for children. By MARGARET DELAND, author of "John Ward, Preacher," etc. $1.00.

A Book of Famous Verse.

A delightful volume, containing a great variety of the best British and American poems. Selected by AGNES REPPLIER, author of "Points of View." 16mo, tastefully bound, full gilt, $1.25; also in Riverside Library for Young People, 75 cents.

Sold by Booksellers. Sent postpaid by

HOUGHTON, MIFFLIN & CO., Boston.
11 East 17th Street, New York.

Macmillan & Company's New Fine Art Books.

"A SUPERB AND A COMPREHENSIVE WORK."

PREFERENCES IN ART, LIFE, AND LITERATURE.

By HARRY QUILTER.

Imperial 8vo, in a unique binding, $9.00.

This work includes A HISTORY OF PRE-RAPHAELITISM and an ESSAY UPON CONTEMPORARY ENGLISH PAINTING, which together occupy more than half the book. The remaining Essays are reprinted from various periodicals, but have been in all cases revised, and in many cases entirely rewritten. The greatest care has been taken in selecting the Illustrations, which are being printed in the best Parisian style, and comprise SIXTY-FOUR FULL-PAGE PLATES by G. D. LESLIE, Sir JOHN GILBERT, Sir J. MILLAIS, R.A., PHIL MORRIS, A.R.A., D. G. ROSSETTI, WM. HUNT, DAVID COX, G. A. STOREY, A.R.A., ALBERT MOORE, E. BLAIR LEIGHTON, W. W. OULESS, C. E. PERUGINI, SEYMOUR LUCAS, A.R.A., JOHN PETTIE, R.A., G. F. WATTS, R.A., E. J. POYNTER, R.A., J. WATERHOUSE, R.A., FRED WALKER, A.R.A., J. MCWHIRTER, A.R.A., E. WATERLOW, A.R.A., HENRY MOORE, A.R.A., WYKE BAYLISS, ERNEST PARTON, S. PROUT, Sir F. BURTON, ALFRED EAST, CLARA MONTALBA, R.W.S., P. DE WINT, POOLE, R.A., and several others.

*** *Also a limited large-paper edition (the English copies have all been sold before the day of publication), in royal 4to, with 57 autotypes extra. Seven copies only remain for sale. Price on application.*

"It is a large volume, most beautifully printed, and it gives the author's (who for twenty years was art critic for the London *Spectator*) account by illustration and by exposition of his preferences in art, life, and literature. The book, in one of its aspects, is Mr. Quilter's testament of taste."—*From the London Daily News.*

In One Volume, Columbier 8vo, $20.00.

MAN IN ART.

By PHILIP GILBERT HAMERTON, author of "Etching and Etchers," "The Graphic Arts," "Landscape," "The Present State of the Fine Arts in France." Editor of "The Portfolio."

Illustrated by Etchings and Photogravures from pictures by Sir F. Leighton, Alma Tadema, Watts, Sir John Gilbert, Luke Fildes, Dicksee, G. Leslie, Gonzalo, Coques, Philipe de Champagne, Maes, Schalken, Murillo, Ghirlandajo, Ary Scheffer, Moreau, Botticelli, Pisano, Giovanni, Bellini, Borgognone, Walenn, Woolner, M. de Roton, Macklin, Rude, Luca della Robbia, Tassaert, Bellanger, Fra Angelico, Albert Dürer, Lucas of Leyden, Rembrandt. Etched or photogravured by Norman Hirst, Rhead, C. O. Murray, M. Manesse, Didier, Flameng, Goupil Process, Dujardin, Annan and Swan, Amand, Durand, Guillaume, Pierre, Gusman. Printed on J. Dickinson & Co.'s English Hand-made Paper, large 8vo, $30.00.

*** Also Edition de Luxe (limited to 125 copies for England and 50 for America, only 20 of which remain for sale; the English copies have all been sold before the day of publication), printed on John Dickinson & Co's Hand-made paper, and the Illustrations on Japanese vellum. Price on application.

EDWARD BURNE-JONES, A.R.A.

WITH 80 ILLUSTRATIONS BY HUGH THOMSON.

DAYS WITH SIR ROGER DE COVERLEY.

With Illustrations by HUGH THOMSON. Printed on hand-made super-royal, and bound in buckram, uniform with "Cranford" and "The Vicar of Wakefield." The edition, limited to 250 copies, is all sold. Cheaper edition in cloth, gilt, $1.50.

THE MAKERS OF VENICE.

Doges, Conquerors, Painters, and Men of Letters. By Mrs. OLIPHANT. With Illustrations by R. R. Holmes, F.S.A., and 20 additional Illustrations. Medium 8vo, bound in half buckram, to match "The Makers of Florence," published in 1891. $6.00.

Just published. 12mo, cloth, gilt, $2.25.

CHARLES SANTLEY'S REMINISCENCES.

"A treasury of delightful anecdotes about artists."

Student and Singer.

REMINISCENCES OF CHARLES SANTLEY. Written by himself. With two portraits. 12mo. Cloth. $2.25.

"Mr. Santley's life has been one of wide artistic activity, and its story is interesting reading. Moreover, the book contains many pleasant sketches of the great artists whose very name dazzled the eye of the last generation—Giuglini, Marini, Ronconi, Beletti, Mario, Grisi, Pietjens, and Graziani. . . . Charles Santley is a pleasing figure in the history of song, and his autobiography will be read with pleasure."—*New York Times.*

Now ready. 8vo, cloth, gilt, $4.00.

"A delightful book, full of anecdotes of Dickens, Thackeray, and John Leech, all of whom the Dean of Rochester has known."

The Memories of Dean Hole.

With Illustrations from original sketches by LEECH and THACKERAY, and a Photogravure Portrait of the author. 8vo, cloth, $4.

"It abounds in bright, cheerful, sparkling anecdotes of all kinds of people, artists, writers, preachers, statesmen, scholars of deserved eminence. There breathes through the charmingly easy, flowing, rambling, chatty volume a spirit of broad, cheerful, hopeful, and helpful humanity that will scarcely fail to make every generous reader love the cheery and bright-spirited author."—*Commercial Advertiser.*

Social Life in England.

From the Restoration to the Revolution, 1660-1690. By William Connor Sydney, author of "England and the English in the Eighteenth Century," 12mo, cloth, $2.50.

The History of Early English Literature.

By the Rev. Stopford A. Brooke. Uniform with Bryce's "American Commonwealth." With Map. Large 12mo, $2.50.

"In Mr. Stopford Brooke's monumental work he strives with rare skill and insight to present our earliest national poetry as a living literature and not as mere material for research."—*Times, London.*

The Beauties of Nature

AND THE WONDERS OF THE WORLD WE LIVE IN.

By the Right Hon. Sir John Lubbock, M. P., F.R.S., LL.D., author of "The Pleasures of Life." With numerous illustrations and many full-page plates. 12mo, cloth, $1.50.

"He writes charmingly, even poetically at times. The beauties of nature that he finds are often strange phenomena. But he makes them intelligible and agreeable reading for the unscientific."—*Evening Bulletin.*

Uniform with Bryce's American Commonwealth and Jephson's Platform. 2 Vols., 12mo.

VOL. I. NOW READY. 12mo, cloth, $2.00.

History of the New World Called America.

By Edward John Payne, Fellow of University College, Oxford.

Macmillan & Co.'s New Illustrated Catalogue of Holiday Gift Books will be sent free by mail to any address on application.

MACMILLAN & Co., Publishers, New York.

Charles Scribner's Sons' New Books.

The Children of the Poor.

By Jacob A. Riis, Author of "How the Other Half Lives."

Illustrated. 12mo, *$2.50.*

"More thrilling than any fiction, this work gives the most vivid pictures of the life lived by the children of the poor. Society owes Mr. Riis a great debt for his revelations."—*N. Y. Observer.*

Marse Chan.

By Thomas Nelson Page. New Edition. Illustrated by W. T. Smedley.

Square 12mo, *$1.50.*

"If any one is looking out for a dainty little Christmas gift for a fastidious friend, this is the one. The illustrations are homogeneous with the text, which is saying a good deal."—*Churchman.*

Great Streets of the World.

By Various Authors. Fully Illustrated by Eminent Artists.

Large 8vo, *$4.00.*

"It was a delightful thought to gather into one volume, brilliantly illustrated, accounts by master-hands and master-pencils of the celebrated highways. Each city has been handed over to the *cicerone* best informed of its life."—*The Critic.*

Life and Letters of Washington Allston.

By Jared B. Flagg, N.A., S.T.D. With 18 reproductions of Allston's paintings.

Large 8vo, *$5.00.*

"A work not surpassed, if indeed ever equalled in significance and charm by any other American biography. The volume is printed in luxurious style, and is one that every cultivated American should own."—*Boston Beacon.*

Cyclopedia of Painters and Paintings.

Edited by J. D. Champlin, Jr., Critical Editor, C. C. Perkins. Popular Edition. 2,000 illustrations.

4to. 4 vols. *$20.00 net.*

"No art book of the exhaustiveness of this monumental work has been attempted in this country, and it should be appreciated by those who need a comprehensive, well-arranged, and well-edited book of reference."—*N. Y. Tribune.*

Bernard of Clairvaux.

The Times, the Man, and His Work. An Historical Study.

By Richard S. Storrs, D.D., LL.D., L.H.D.

8vo, *$2.50.*

"An historical study which reflects not a little credit on American scholarship. We doubt if a more appreciative biography of a Catholic theologian has ever proceeded from a Protestant pen."—*M. W. Hazeltine in N. Y. Sun.*

Spanish Cities.

With Glimpses of Gibraltar and Tangier,

By C. A. Stoddard, D.D., Editor of *N. Y. Observer.*

Illustrated. 12mo, *$1.50.*

"There are few books more entertaining than this. Dr. Stoddard is a natural traveller, sees everything worth seeing, and describes admirably. His style is direct, easy, and graceful. His descriptions are concise, yet clear, and markedly elegant."—*Chicago Inter-Ocean.*

CHARLES SCRIBNER'S SONS, 743-745 Broadway, N. Y.

The Nature and Elements OF *POETRY.*

By E. C. STEDMAN, author of "Victorian Poets" and "Poets of America." With Frontispiece after Dürer, Topical Analysis, and Analytical Index. Crown 8vo, uniform with previous volumes, gilt top, $1.50; in fancy style, $1.50.

CONTENTS:

I. Oracles Old and New.
II. What is Poetry?
III. Creation and Self-Expression.
IV. Melancholia.
V. Beauty.
VI. Truth.
VII. Imagination.
VIII. The Faculty Divine, Passion, Insight, Genius, Faith.

"A WHOLESOME AND REFRESHING WIND blown from the clear cold heights of philosophy and art. The lectures have the practicality of modern thought. While they are the talk of a poet about poets, they are addressed to the great body of readers and students of English literature. To all liberal minds and hearts this volume will have a message of helpful guidance and encouragement."—*Boston Transcript.*

"HOW WIDELY AND PROFOUNDLY MR. Stedman has studied the subject treated in this volume the reader becomes very soon aware. That he is, besides, by natural endowment, a critic in the true and worthy meaning of the word is no less apparent. One accepts him for his teacher at once and willingly, charmed not only with the richness of the matter, the perspicuousness of the style, but also by the generous and manly spirit which recognizes merit and truth wherever found."—*Chicago Standard.*

"THE STUDENT WILL CLIMB TOWARDS noble conceptions while he reads it. Take this book as an appendix and a finishing chapter to Mr. Stedman's monumental works on the 'Victorian Poets,' and on 'Poets of America,' and it will show how admirably our critic has accomplished the task he set for himself; the three books stand for the highest and broadest achievement of American literary criticism."—*The Independent, New York.*

"SINCE THE DEATH OF LOWELL THERE IS none other among us upon whose intellectual powers we could so absolutely rely, and to whose wealth of learning and thought we could so confidently turn for information concerning the past, comprehension of the present, and clear reason touching the future of poetry. Poesy is the very ichor of Mr. Stedman's veins; but his well-known familiarity with the practical affairs of life distinguishes him as one peculiarly entitled to speak to practical men about the force and significance of that element which, while unrecognized by most of them, deeply affects their lives. . . . It is by far the most exhaustive and illuminative treatise on poetry that has ever appeared."—*New York World.*

VICTORIAN POETS.

With Topical Analysis in margin, and full Analytical Index. *Twenty-first Edition.* Revised and extended, by a Supplementary Chapter, to the Fiftieth Year of the Period under Review. Crown 8vo, $2.25; half calf, $3.50.

"WE OUGHT TO BE THANKFUL TO THOSE who write with competent skill and understanding, with honesty of purpose, and with diligence and thoroughness of execution. And Mr. Stedman, having chosen to work in this line, deserves the thanks of English scholars by these qualities and by something more. He is faithful, studious, and discerning; of a sane and reasonable temper, and in the main a judicial one; his judgment is disciplined and exercised, and his decisions, even when we cannot agree with them, are based on intelligent grounds."—*The Saturday Review* (London).

POETS OF AMERICA.

With full Notes in margin, and careful Analytical Index. *Eleventh Edition.* 12mo, $2.25; half calf, $3.50.

CONTENTS: *Early and Recent Conditions; Growth of the American School; William Cullen Bryant; John Greenleaf Whittier; Ralph Waldo Emerson; Henry Wadsworth Longfellow; Edgar Allan Poe; Oliver Wendell Holmes; James Russell Lowell; Walt Whitman; Bayard Taylor; The Outlook.*

"THE APPEARANCE OF THIS BOOK IS A notable event in American letters. No such thorough and conscientious study of the tendencies and qualities of our poetry has been attempted before, nor has any volume of purely literary criticism been written in this country upon so broad and noble a plan and with such ample power. . . . Mr. Stedman's work stands quite alone; it has had no predecessor, and it leaves room for no rival."—*New York Tribune.*

Sold by Booksellers. Sent, postpaid, by

A Famous Battery and Its Campaigns, 1861–'64.

By JAMES E. SMITH, Late Captain 4th Independent Battery, New York Volunteer Light Artillery.

A new book about a battery which distinguished itself in many hard-fought battles, and won glory and renown in the great Gettysburg conflict, where it held the crest of Devil's Den for three long hours against the flower of Lee's army. The history of this battery, from the Peninsula to Gettysburg, is the history of the war in the East, and it is told modestly but thrillingly by Capt. Smith, and substantiated by official reports of both Union and Confederate officers, as well as personal reminiscences of participants from other organizations.

12mo, cloth, 237 pages. Postpaid, $1.00.

Remington Typewriter.

THE history of the Remington shows a steadily rising tide of popularity and success. It is absolutely unrivalled for all the essential qualities of a first-class writing machine.

In 1880, five years after the first Remington Typewriters regularly made by machinery were first put upon the market, only 1,000 machines had been sold. The public were slow to realize the value of the invention.

By 1882 the number had increased to 2,300 machines.

In 1885 Five Thousand machines were sold.

In 1890 sales had increased to 20,000 machines per annum.

In 1892 we find our standing orders to our factory for 100 machines per day inadequate to meet the constantly increasing demand.

A REMARKABLE BOOK.

JUST PUBLISHED BY

S. C. GRIGGS & CO.

THE YOUTH OF FREDERICK THE GREAT.

By ERNEST LAVISSE, Professor at the Sorbonne, Paris. Translated from the French by MARY BUSHNELL COLEMAN. 1 vol., 462 pages, cloth, $2.00.

"German critics pronounce this history the best that has been written, and the sudden and unprecedented popularity of the book in Europe attests that the thinking people agree with the critics. Prof. Lavisse's style is ornate and elegant, and sharply critical of grave faults of both father and son. The biographies are clean, markedly authentic, fine in analysis of character, and full of fine humor and life on every page."—*Chicago Inter-Ocean.*

ENGLAND AND ITS RULERS.

A concise compendium of the history of England and its people, by H. POMEROY BREWSTER and GEORGE H. HUMPHREY. Cloth, 350 pages, price $1.50.

"The gradual evolution of the Great Britain of the present from centuries of divers influences, Celt and Roman, Saxon, Dane, and Norman, reads like the gradual unrolling of a page of Providence. The authors of this volume go back as far as history reaches—to the year 900 B. C. The latest recorded is in August, 1891. Two thousand three hundred and ninety-one years pass in review in 350 pages of carefully written, skilfully condensed matter. The historians, as such, are fair and just; as writers they are clear, concise, entertaining. . . . Each chapter throughout the book is so arranged in paragraphs and indexed in the margin as to make it a valuable work for ready reference, and as a class-book we know no better."—*The Interior, Chicago.*

A SYLLABUS OF PSYCHOLOGY.

By WILLIAM M. BRYANT, author of "World Energy," etc. Paper, 60 pages, price 25 cents.

"It presents a systematic birds-eye view of the subject whose value cannot be overstated."—*The Independent, N. Y.*

ETERNITY.

A thread in the weaving of a life, by WILLIAM M. BRYANT. Paper, 40 pages, price 25 cents.

"This essay is the work of a thoughtful man and a scholar. It is well conceived and finely written."—*The Presbyterian, Philadelphia.*

RECENTLY PUBLISHED.

A STUDY OF GREEK PHILOSOPHY.

By ELLEN M. MITCHELL. With an introduction by William Rounseville Alger. 1 vol., cloth, $1.25.

"An able and in every respect an admirable volume. It sets forth in a clear and interesting style the importance and value of the study of philosophy, and is well calculated to incite a desire and love for the study."—*Christian at Work, New York.*

MENS CHRISTI.

By JOHN STEINFORT KEDNEY, D.D., of the Seabury Divinity School. 1 vol., cloth, $1.

"Thought-provoking in the extreme, and instructive on new and bold lines of thought."—*Methodist Review, New York.*

HINDU LITERATURE.

By ELIZABETH A. REED, member of the Philosophical Society of Great Britain. 1 vol., 12mo, cloth, price $2.00.

"It is among the most entertaining and instructive volumes ever written upon this subject. It is plain, clear, and methodical, devoid of all technicalities, and adapted fully to the wants of all intelligent readers."—*Boston Daily Traveler.*

CIVILIZATION: AN HISTORICAL REVIEW.

By CHARLES MORRIS, author of the "Aryan Race: Its Origin and Its Achievements." 2 vols., 12mo, over 1,000 pages, $4.00.

"Those who read it will find its broad survey of history fitted to widen their thought, ennoble their sympathies, and quicken their faith in the fact that all these paths of thought and action are leading to a better order of things."—*Chicago Advance.*

Sold by The Baker & Taylor Co., Agents, 740 Broadway, and other booksellers, or sent, postage paid, on receipt of price.

S. C. GRIGGS & CO., Publishers,

262 and 264 Wabash Ave., Chicago.

IMPORTANT NEW WORK BY GEORGE BARNETT SMITH.

History of the English Parliament

Together with an account of the Parliaments of Scotland and Ireland. By GEORGE BARNETT SMITH, author of "The Prime Ministers of Queen Victoria," "The Life of the Right Hon. W. E. Gladstone, M.P.," etc., etc. ILLUSTRATED WITH FACSIMILES OF NUMEROUS VALUABLE HISTORICAL DOCUMENTS connected with constitutional history. In two volumes, 8vo, cloth, boxed, $6.00.

"There are no fewer than seventeen appendices, in the shape of 'Constitutional Addenda,' dealing with a great number of matters affecting Parliament and the Constitution. The work differs entirely from the many existing constitutional histories treating of the government of England at various periods. It is the first complete, consecutive record of the English Parliament as a legislative institution from the earliest times to the present day. In addition to the Parliamentary journals and official documents, all the constitutional writers of authority upon each epoch have been consulted in its preparation—a fact which will sufficiently testify to the magnitude of the undertaking."—*London Academy.*

UPTOWN BOOKSTORE.

An Educational Directory.

I. THE NATION has a larger circulation than any literary-political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 206 to 210 Broadway, N. Y.

STANDARD

Holiday Books.

Cranford.

By Mrs. Gaskell. With an Introduction by Rev. Brooke Herford. An entirely new edition of this charming volume, with 100 illustrations, including a color frontispiece from an original drawing by Frank T. Merrill. 1 vol., small quarto, fancy cloth, gilt tops, $2.00.

John Halifax (Gentleman).

By Miss Mulock. A new edition of a story of which readers, young and old, never tire. With 40 new half-tone illustrations, and a color frontispiece from an original drawing by Miss Laura C. Hills. 1 vol., small quarto, fancy cloth, gilt tops, $2.00.

A Dog of Flanders.

A Christmas Story. By Louisa de la Rame (Ouida). A new edition of a beauti ul Christmas story, already prized as a classic by all who know it. With 42 original illustrations and a photogelatine reproduction of Rubens's great picture, "The Descent from the Cross," 1 vol., small quarto, cloth, gilt top, $1.50.

The Nurnberg Stove.

By Louisa de la Rame (Ouida). Another of Ouida's fascinating stories, delightful alike to old and young. With 50 original illustrations and a color frontispiece of a German stove, after the celebrated potter Hirschvogel. 1 vol., small quarto, cloth, gilt top, $1.50.

Public Library 1st 2013

CAPE BRETON

AND ITS MEMORIALS.

A Historical and Descriptive Account of Cape Breton and of its memorials in the French Régime. With Bibliographical, Historical, and Critical Notes. By J. G. BOURINOT, C.M.G., LL.D., D.C.L. With Maps and Illustrations. Large 4to. $3.00.

FROM THE PREFACE.

"It is the object of the writer, a native of Cape Breton, to record briefly the main facts in its history from the days of its discovery by European voyagers in the remote past down to the present time, when a stream of travel is already beginning to find its way to an island abounding with so many features of natural and historic interest."

FOR SALE BY
CHARLES SCRIBNER'S SONS,
743 and 745 Broadway, N. Y.

The Real and Ideal in Literature.

FREDERICK WADSWORTH LORING.

1 vol., 12mo, cloth, gilt top, $1.50.

At all booksellers' and libraries, or mailed, postpaid, on receipt of price by
CUPPLES COMPANY, Pubs.,
BOSTON.

A. C. McClurg & Co.'s New Books

France in the Nineteenth Century, 1830-1890.

By ELIZABETH W. LATIMER. Handsomely Illustrated with 22 half-tone Portraits of Celebrated Characters. Crown 8vo. $2.50.

"The book gives us the best account extant of modern France—France as she has been made to-day by the events of the last fifty years—as she has emerged from the empire and the commune into the possible—we may say probable—stability of the republic."—*Baltimore Sun.*

Sound and Music.

By the Rev. J. A. Zahm, C. S. C., Professor of Physics in the University of Notre Dame. Profusely illustrated. $3.50.

"It is the most successful attempt that has yet been made to give a scientific analysis and explanation of music and harmony."—*Colorado Catholic.*

Christmas Stories from French and Spanish Writers.

By Antoinette Ogden. 16mo, gilt top, in white, gold, and colors, in a box; $1.25.

Enjoyable is just the word with which to describe this book. The novel and piquant features of the Continental Christmas—so different from the English "plum pudding" traditions and our own American customs—are delightfully presented, and, what is quite as important, in translations singularly felicitous. The writers easily rank among the first in their respective tongues, and include, among others, Valdes, Coppée, Daudet, Galdos, de Alarcon, Simon, Prevost, and Becquer. The book is beautifully bound, and will be welcomed as a dainty Christmas gift.

Prince Tip-Top.

A Fairy Tale. By Marguerite Bouvet, author of "Sweet William" and "Little Marjorie's Love Story." Beautifully illustrated by Helen M. Armstrong. $1.25.

"It is a dainty little story that will be a welcome gift to many a child next Christmas morning. . . . It is a fairy tale of the most wholesome kind, very prettily written and beautifully illustrated."

The Children's Life of Abraham Lincoln.

By M. Louise Putnam. Beautifully illustrated by Helen M. Armstrong. $1.25.

"It is just what it pretends to be—a life of the great President told in the simple words which any child can understand, and withal containing a most interesting history of the Civil War."—*The Boston Times.*

A History of Modern Philosophy.

(From the Renaissance to the Present.) By B. C. Burt, A.M. 2 vols. $4.00.

"Students of the systems and the logical development of modern philosophy will find a valuable assistance in this work. Its general arrangement is chronological, and while it may be used as a book of reference, it can be read continuously to advantage."—*The Review of Reviews*, New York.

References for Literary Workers.

With Introductions to Topics and Questions for Debate. By Henry Matson. Crown 8vo, $3.00.

"The book in both its method and matter is excellent, and it will start the wide-awake student into new trains of thought, and widen his field of vision. The merit of the book rests in the fact that it points the way to the best in every field and tells the student to dig for himself if he expects to find the shining metal."

Cousin Phillis.

A Story of English Love. By Mrs. Gaskell. *Tales from Foreign Lands.* 16mo, gilt top, $1.00.

"Anything by Mrs. Gaskell is as welcome as the sunshine in tempest and the rain in time of drought, 'Cousin Phillis' is one of the most lovely of all her stories, too. . . . Truly the simplicity of genius is sublime."—*Chicago Tribune.*

Marianela.

A Story of Spanish Love. Translated from the Spanish of B. Perez Galdos. By Helen W. Lester. *Tales from Foreign Lands.* 16mo, gilt top, $1.00.

This famous series of *Tales from Foreign Lands* receives a rich acquisition in this exquisitely beautiful and pathetic story by the great Spanish writer, whose refined fancy and literary charms half conceal his deep insight into human nature and his profound philosophy of life.

For sale by booksellers generally, or sent, postpaid, on receipt of price by the Publishers,

The Nation

VOL. LV—NO. 1434. THURSDAY, DECEMBER 22, 1892. PRICE 10 CENTS.

THE

POPULAR SCIENCE MONTHLY

FOR JANUARY, 1893.

From Magic to Chemistry and Physics. Part II. By ANDREW D. WHITE, LL.D. Further incidents in the stubbornly contested advance of science.

Marriage and Kinship among the Ancient Israelites. By Colonel A. B. ELLIS. Presents evidence to show that the Israelites practiced marriage by capture and polyandry, and probably female infanticide.

Some Vegetable Malformations. (Illustrated.) By BYRON D. HALSTED. Describes a variety of strange growths, such as roses and pears with branches extending through them, ribbonlike shoots of asparagus, etc

Genius and Suicide. By CHARLES W PILGRIM, M.D. Shows, from the many cases in which geniuses have committed suicide, that an abnormally developed mind tends to become unbalanced.

OTHER ARTICLES ON

THE STUDY OF MAN; EARLY EXTIRPATION OF TUMORS; EVOLUTION OF CIVILIZATION AND THE ARTS; A CAPTIVE COMET; THE PROBLEMS OF ANTHROPOLOGY; WILL THE COMING WOMAN LOSE HER HAIR? ROTATION OF THE FARM; THE LOGIC OF ORGANIC EVOLUTION; PROFITS OF LEGITIMATE BUSINESS NOT TOO LARGE; TOTEMISM IN THE EVOLUTION OF THEOLOGY; THE INVENTOR OF THE LIGHTNING-ROD (illustrated); SKETCH OF LEWIS MORRIS RUTHERFURD (with Portrait).

50 cents a number; $5.00 a year.

Two New Books.

By Dr. S. Weir Mitchell.

Francis Drake.
A Tragedy of the Sea. Gilt top, $1.25.

The Mother and Other Poems.
8vo, gilt top, $1.25.

Dr. Mitchell has gained an enviable reputation by the volumes of poems he has heretofore published. The two volumes here announced will confirm and increase it by the vigor of thought they display, their imaginative power and lyrical excellence.

HOUGHTON, MIFFLIN & CO.,
BOSTON,
11 East 17th Street, New York.

A CHARMING VOLUME.

Witty, Wise, and Wicked Maxims.

(Mostly from the French.) By HENRI PENE DU BOIS, the well-known Littérateur.

A very pretty volume, containing 654 maxims, proverbs, precepts, thoughts of men of genius, not all gathered from printed books; some have been taken from autograph letters, others from albums. A good many were found in the collection of illustrious autographs made by Philoxène Boyer. Beautifully bound in three different styles—Lavender, Old Rose, and White and Gold. 1 vol., foolscap octavo, 75 cents.

A TIMELY VOLUME.

The Technique of the Drama.

By WILLIAM T. PRICE.

Being a statement of the principles involved in the value of dramatic material, in the construction of plays, and in dramatic criticism. The first book of the kind published in this country giving the fundamental principles of dramatic construction.

1 vol., 12mo, gilt top, $1.50.

To be had of all booksellers, or will be sent, postpaid, on receipt of the price by the publishers.

BRENTANO'S, Union Square, N. Y.

An Educational Directory.

I. THE NATION has a larger circulation than any literary-political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

MACMILLAN & Co.'s NEW BOOKS.

NEW BOOK BY REV. STOPFORD A. BROOKE.

The History of Early English Literature.

By the Rev. STOPFORD A. BROOKE. Uniform with Bryce's 'American Commonwealth.' 12mo, cloth, $2.50.

"In Mr. Stopford Brooke's monumental work he strives with rare skill and insight to present our earliest national poetry as a living literature, and not as a mere material for research."—*London Times.*

"It is a monument of scholarship and learning, while it furnishes an authentic history of English literature at a period when little before was known respecting it."—*Public Opinion.*

"It is a comprehensive, critical account of Anglo-Saxon poetry from its beginnings to the accession of King Alfred. A thorough knowledge of the Anglo-Saxon language was needed by the man who undertook such a weighty enterprise, and this knowledge is possessed by Mr. Brooke in a degree probably unsurpassed by any living scholar."—*Evening Bulletin.*

DRAWING AND ENGRAVING.

A Brief Exposition of Technical Principles and Practice. By PHILIP GILBERT HAMERTON, author of 'Man in Art,' 'Etching and Etchers,' etc. With numerous Illustrations. Small 4to, $7.00.

GOTHIC ARCHITECTURE.

By EDOUARD CORROYER, Architect to the French Government and Inspector of Diocesan Edifices. Edited by WALTER ARMSTRONG. With 236 Illustrations. Large 12mo, $2.00.

THE BARBIZAN SCHOOL OF PAINTERS. I.

COROT.

By DAVID CROAL THOMSON, author of 'The Life of Bewick,' etc. With 50 Illustrations. 4to, $5.00.

Just Ready. Large 12mo, cloth, $2.60 net.

A REVIEW OF THE SYSTEMS OF ETHICS.

Founded on the Theory of Evolution. By C. M. WILLIAMS.

CONTENTS: PART I.—HISTORICAL.

DARWIN,	HAECKEL,	FISKE,	BARRATT,	CARNERI,	GIZYCKI,
WALLACE,	SPENCER,	ROLPH,	STEPHEN,	HOFFDING,	ALEXANDER,

PART II.—CONSTRUCTIVE.

The Concepts of Evolution; Intelligence and End; The Will; The Mutual Relations of Thought, Feeling and Will in Evolution; Egoism and Altruism in Evolution; Conscience; The Moral Progress of the Human Species as Shown by History; The Results of Ethical Inquiry on an Evolutional Basis; The Ideal and the Way of its Attainment.

THE WORKS OF WILLIAM WINTER.

Now Ready. A New and Enlarged Edition with Portrait.

WANDERERS.

Being the Poems of WILLIAM WINTER. New Edition, Revised and Enlarged. With a portrait of the author, reproduced from a drawing by J. N. MARBLE. 18mo, cloth, 75 cents.

*** Also a limited large-paper edition, printed on English hand-made paper. Price, $2.50.

"The poems have a singular charm in their graceful spontaneity."—*Scots Observer.*

SHAKESPEARE'S ENGLAND.

New Edition. 18mo, cloth gilt, gilt top, 75 cents.

"He offers something more than guidance to the American traveller. He is a convincing and eloquent interpreter of the august memories and venerable sanctities of the old country."—*Saturday Review.*

"The book is delightful reading."—*Scribner's Monthly.*

OLD SHRINES AND IVY.

18mo, cloth gilt, 75 cents.

"Whatever William Winter writes is marked by felicity of diction and by refinement of style, as well as by the evidence of culture and wide reading. 'Old Shrines and Ivy' is an excellent example of the charm of his work."—*Boston Courier.*

GRAY DAYS AND GOLD.

New Edition. 18mo, cloth gilt, gilt top, 75 cents.

"Much that is bright and best in our literature is brought once more to our dulled memories. Indeed, we know of but few volumes containing so much of observation, kindly comment, philosophy, and artistic weight as this unpretentious little book."—*Chicago Herald.*

SHADOWS OF THE STAGE.

18mo, cloth gilt, 75 cents.

"Into a very pretty little volume, Mr. Winter has gathered a score or more of his minor theatrical articles, written with abundant literary art and with the constant desire to pay due meed of praise to those features of the contemporary stage which were best worth commemoration."—*The Nation.*
